INDEX	I-1

Chapter 1: Introduction and Overview

Purpose

The purpose of this guide is to provide you with information about the HealthRules claims features.

Intended Audience

This guide is primarily for Claims processing users, and users of the various claims workbasks.

How This is Organized

This guide includes the following chapters:

Chapter	Description	Page
Chapter 1: Introduction and Overview	This contains key concepts about the claims feature.	1-1
Chapter 2: Claims Tasks	This contains step-by-step instructions for claims related tasks.	2-1
Chapter 3: Claims Screens	This contains information about claims related screens and fields.	3-1
Chapter 4: Claims Workbaskets	This contains information about claims related workbaskets.	4-1

Related Information

You may also want to refer to the following HealthRules Manager User Guides:

- *Vol. 1: Getting Started*
- *Vol. 3: Membership and Enrollment*

Claims Overview

There are general key concepts related to the claims feature.

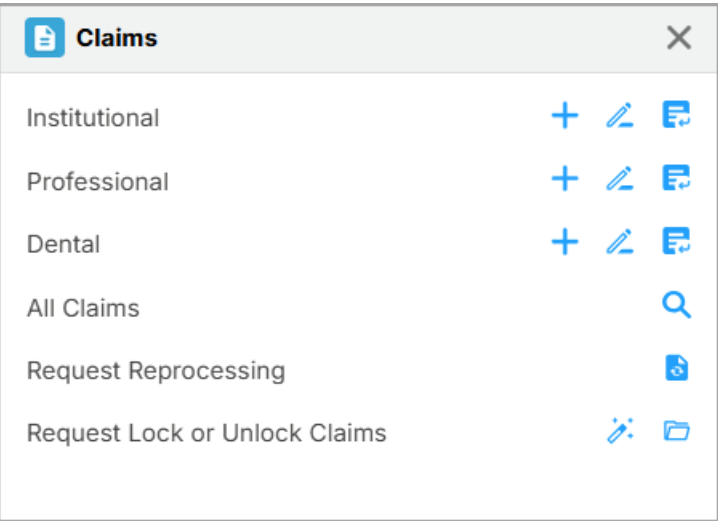

This discusses the following:

Entering Claims	1-6
About Claim IDs	1-6
Adjudication Process Overview	1-7
The Claim Adjudication Process	1-9
Multiple-Pass (N-Pass) Adjudication	1-10
Claim Entry	1-11
Consolidation/Matching	1-12
Claim Status Assignment During Adjudication	1-17
Adjudicating Claims Based on a Confinement	1-18
Internal vs. External (Statistical) Claims	1-21
About External Claims	1-21
Claims Workbaskets	1-22
Predetermination Dental Claims	1-22
Converted, Renewed, and Delegated Claims	1-22
What are Converted Claims?	1-22
What are Delegated Encounters?	1-23
Tagging Possible Over-accruals	1-24
Renewing Converted Claims	1-24

External System Claim Overview	1-24
Entering External System Information Claims	1-25
Claim Reprocessing Overview	1-28

Data Warehouse Streaming Information	1-50

Entering Claims

Entering claims into the system provides HealthRules Server with the data necessary to determine payment based on the dates incurred and services rendered. To ensure accurate calculation of claim payment, it is important to accurately enter all claim data. Claims can be entered individually or in a batch.

HealthRules Manager includes the following claim forms:

- Institutional—CMS-1450 (UB-04) form
- Professional—CMS-1500 (HCFA) form
- Dental—ADA Dental Claim Form

This chapter describes the main features of the Create Claim page and provides step-by-step instructions for entering a new a claim, creating a claims batch, and entering a claims batch.

About Claim IDs

It is important to keep in mind that claim IDs created by HealthRules Payer are not necessarily created in sequential order if you are working in a multi-server environment. The IDs assigned to a claim as it moved through adjudication and other processes reflect which *claim server* processed the claim. Claim IDs are reserved for each claim server in batches, as in this example:

Chapter 1: Introduction and Overview

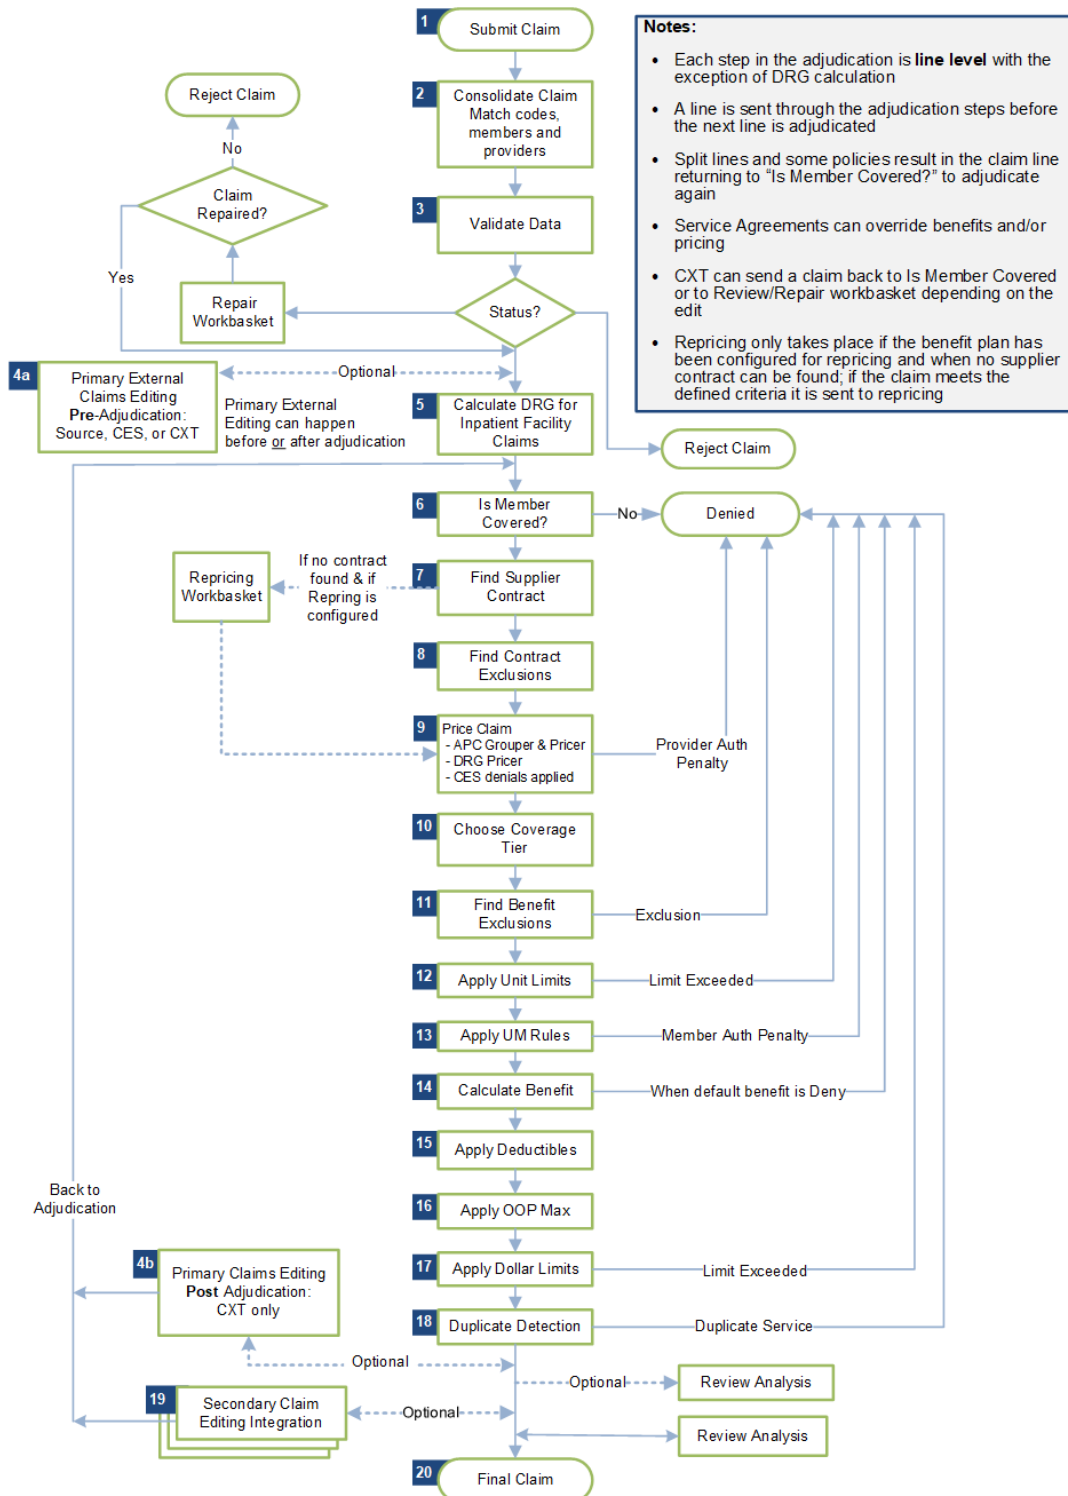

- Claim server 1 – 100-200
- Claim server 2 – 201-300
- Claim server 3 – 301-400
- Claim server 4 – 401-500

If a claim is initially processed by Claim server 4, then re-adjudicated through Claim server 3, the assigned IDs are not consecutive.

Adjudication Process Overview

This chapter describes the claim adjudication process used to validate, authorize, and finalize claims entered into HealthRules Payer. Detailed descriptions of other steps in the adjudication process are covered in subsequent sections.

Chapter 1: Introduction and Overview

The Claim Adjudication Process

1. **Submit Claim** — Either manually enter data in HealthRules Manager using either the institutional, professional, or dental claim form, or electronically submit claim data to HealthRules Server through HealthRules Connector, using the EDI-837 standard.
2. **Consolidation/Matching** — Convert claims manually entered in the system or received electronically into a single, standardized claim structure that is used for adjudication. Identify the correct member, practitioner, and supplier/supplier location that are associated with the claim.
3. **Validate Data** — Verify the data on the claim is complete and accurate based on industry standards and customer business rules. This includes repair and reject edits performed by HealthRules. Depending on the results of the data validation, the claim may be rejected, sent to the Claims Review or Repair Workbaskets, or advance to next stage of adjudication.
4. **Submission to External Claims Editing System** — If HealthRules Payer is integrated with a third-party claims editing system, including CES or ClaimsXten, claims are submitted to the third-party system only after they have passed all HealthRules repair validations. **Note:** Source is only called after integration. ClaimsXten may be configured to be called *after* adjudication.
5. **Calculate DRG** — For inpatient facility claims only, the system calculates the Diagnosis Related Group (DRG) for the inpatient stay.
6. **Is Member Covered?** — Determine the member's eligibility status and benefits.
7. **Find Supplier Contract** — Find the applicable supplier contract. If the associated benefit plan has been configured for repricing, when no supplier contract can be found claims may be sent to the Repricing workbasket (provided the claim meets the defined criteria to send it to Repricing).
8. **Find Contract Exclusions** — Check for contract exclusions and deny claim if applicable.
9. **Price Claim** — Price the claim using External Groupers and Pricers, and if applicable, apply CES denials. Deny if provider authorization penalties apply.
10. **Choose Coverage Tier** — Chooses applicable benefit coverage tier, such as In Network or Out of Network.
11. **Find Benefit Exclusions** — Check for benefit exclusions and deny claim if applicable.
12. **Apply Unit Limits** — Check accumulators for unit limits, deny claim if exceeded.

13. **Apply UM Rules** — Determine if an authorization is required for a rendered service; if required, determine if the appropriate authorization is in the system; if not, apply any penalty defined in the member's benefit plan and/or supplier contract.
14. **Calculate Benefit** — Determine the benefit to be applied to a service.
15. **Apply Deductibles** — Determine and apply deductibles.
16. **Apply OOP Max** — Apply out-of-pocket maximums if applicable.
17. **Apply Dollar Limits** — Determine limits, and if exceeded, deny claim.
18. **Duplicate Detection** — Detect duplicate service, deny claim if applicable.
19. **Secondary Claim Editing Integration** — If HealthRules Payer is integrated with one or more third-party claims editing system to run as a secondary editor, claims are submitted to the secondary editor after adjudication.
20. **Final Claim** — Gather all the information from the preceding steps and calculate the final benefit.

Multiple-Pass (N-Pass) Adjudication

There are certain types of claims that may take a long time to process, given their required provisions, time relation expressions, or complexity. Accurately adjudicating a claim line on one of these types of claims might require the adjudication results of the other claim lines on the claim, including those lines that have not yet been adjudicated.

Using the multiple pass or N-Pass adjudication process, HealthRules sends these types of complex claims through the adjudication process multiple times in order to obtain adjudication results more quickly and efficiently. Depending on the complexity of the claim and/or the applicable contract and benefit provisions, a claim might make several passes through adjudication in order to obtain the final adjudication results. These passes take place automatically and behind the scenes during claims processing. Claims that adjudicate using N-Pass do not look any different from claims that do not use N-Pass.

HealthEdge has targeted the following types of claims to use N-Pass adjudication:

- Claims with confinement and other time relation expressions (for example, “service X delivered within the same confinement as service Y”), including all provisions that use confinement history.
- Coordination of Benefits (COB) claims*

- Episode of Care (EOC) Claims
- Other complex claims

If HealthRules uses N-Pass to adjudicate a claim, the reason for invoking N-Pass (for example, a claim line could only be successfully processed by reviewing other lines on the claim) and the number of passes made by adjudication are recorded and can be displayed by clicking the **Information** icon in the upper right corner of the claim header next to the Last Changed On field. This information is also streamed to the data warehouse.

NOTE *Claims with multiple EOBs are not auto-adjudicated and are pended for manual review. The system cannot determine whether or not it should take the amount from the most recent EOB as the true amount left to pay, or if it needs to consider member liability from both EOBs.

NOTE Enable the “Multiple Adjudication Pass Limit Reached” validation policy to send a claim to the Claim Review & Repair workbasket if the claim exceeds a pre-defined limit on the number of adjudication passes. In some rare cases (usually involving misconfigured provisions), not setting this validation policy can cause a claim to get into a processing loop and eventually fail.

Claim Entry

Entering claims provides HealthRules Server with the data necessary to determine payment based on the dates incurred and services rendered. Accurate calculation of claim payment requires accurate entry of all claim form data.

NOTE When entering claims manually, HealthRules provides you with the ability to resolve or select records from the HealthRules database and pre-fill selected fields on the claim form with data from the records you select. For example, you can search for a supplier by clicking the **search** icon and selecting a supplier record from the database. The system will pre-fill the name, address, phone number, and tax ID fields from the selected supplier record.

This **is not** the same process as matching, where the system takes the data on the claim and uses the matching engine to find the corresponding members, supplier, supplier location, and rendering practitioner records in your database (see "Consolidation/Matching" below).

Consolidation/Matching

Consolidation involves taking raw data and condensing it into a format the system can process. Claims remain separate entities. During the Consolidation phase, the system creates a single record format for claim data originating from multiple entry sources. For example, on a given day, both Institutional and Professional claims can be manually entered as well as electronically loaded via the EDI interface.

During matching, the system associates incoming claim data with the data in your system database.

The specific fields on the incoming claim used to match with the records in your database, vary for each HealthRules customer, and are specified in your Claims Matching Definition Files, set up during initial configuration.

Matching

Matching involves the following three independent processes:

- Matching the Member
- Matching the Supplier and Supplier Location
- Matching the Rendering Practitioner

Matching the Member

The member data entered on the claim is compared to the enrollment data in the application. Criteria such as member number, name, and date of birth can be used (as defined in your Claims Matching Definition files) to determine the correct member. Once the member is matched, the application is able to determine the associated benefit plan to apply the appropriate rules for benefits determination.

Matching the Supplier and Supplier Location

Depending on how your Claims Matching Definition files are configured, you might match suppliers based on the tax ID number and provider name, or NPI. Identifying the correct supplier ensures claims payments are made to the correct entity. If the claim includes the provider taxonomy ("supplier classification"), that can also be used to match the supplier and/or supplier location.

Matching the Rendering Practitioner

Depending on how your Claims Matching Definition files are configured, you might match rendering practitioner based on the rendering practitioners named and/or provider number.

Code Sets

In addition to the record matching described above, during this phase, any industry standard codes entered on the claim are also matched against the code sets stored in HealthRules Payer.

The Consolidated Claim

Once consolidation and matching is complete, the resulting consolidated claim is used throughout the rest of the adjudication process.

Data Validation

Data Validation determines the completeness of the claim and accurate coding based on industry standards. Data Validation means verifying that all required data have been received on the claim and that the data are complete and appropriate.

The system looks up all codes and reference data in the database. HealthRules Server maintains a set of industry standard codes (such as Diagnosis, HCPCS, Revenue Code, and Place Of Service) in the database, and verifies the incoming claim data against this data to ensure that only valid codes are used.

If required data are missing or invalid, the claim is sent to the Claim Review & Repair workbasket for manual correction, or is rejected depending on how the policy is configured. Accurate and automated claims payment depends upon the accuracy of the information submitted on the claim.

Submission to External Claims Editing Systems

HealthRules Payer provides integration of external, third-party claims editing systems, including CES and ClaimsXten. For more information on the integration process, see one of the following:

- *HealthRules Payer - CES Integration Guide*
- *HealthRules Payer - ClaimsXten Integration Guide*

Note that claims are submitted to the third-party system only after they have passed all HealthRules repair validations.

Eligibility

Eligibility data provides information relating to a member's age, their specific benefit plan, dependent information, and the like. Eligibility contains the data for the subscriber and associated dependents. Eligibility data can also contain rules regarding pre-existing periods and conditions for members.

Provider

The Provider phase uses the supplier that billed the services to determine if the claim can be priced based on the supplier's contract for the member's benefit plan. In case such a contract is not present, the system uses non-participating pricing rules.

Pricing

Upon reaching this phase of claim adjudication, HealthRules Server has determined what particular pricing rules are to be applied for the services performed, for example a special fee schedule, or a "Usual and Customary Rate" is applied for the services performed. Using the payment rules specified in the Provider phase, the system now computes the allowed amount for the service.

Authorization

The Authorization process reviews the services performed to determine whether approval is needed for the services rendered. If there are Utilization Management rules in place that indicate an authorization is required, the application reviews the current authorizations to find a match based on service date, service code or referral category, and provider. If the application does not find a matching authorization, the application applies the penalty specified in the Utilization Management rule. If the application finds a matching authorization, the claim is processed correctly and displays the authorization information on both the claim and authorization records.

Suppose a claim for multiple units is billed on a single day, the application automatically matches an authorization and splits lines that exceed the authorized number of units with the relevant system message.

Examples:

- If an authorization allows ten units for a single date of service, a claim with 12-units on a single day would automatically split into lines 1.1 and 1.2 for that date of service and deny the two-units that exceeded the authorized limit on line 1.2.

- If the authorization is then updated to allow 12-units for a single date of service, the claim is reprocessed and paid as a single line.

The automatic split does not happen when the service spans multiple days if the submitted units of service do not equal the number of service days and exceed the authorized units. If the authorized units are a fractional number, you must manually split the claim lines.

Matching Logic

When matching an authorization, the system checks to ensure that the claim lines align with an authorized service set that includes member, provider, authorized dates, and service code or referral category defined under the Utilization Management Rules provision in HealthRules Designer. In addition, the system also references additional configuration options listed below for authorization matching.

- Service Authorization Exemption
- Exclude Service for AuthMatchOP
- Grace Period for Authorization Provision
- Subscription Level Authorization Matching Provision
- Exclude Provider For AuthMatchOP

If the system finds multiple matching authorizations, the system uses the following logic to find a matching authorization.

The claim first attempts to match specific authorizations in approved status with available units and the same service code or referral category, authorized service date, AND the Referred to Selection (Referred to Party or Referred to Taxonomy) as detailed below.

1. The system first references the **Referred to Party** on the authorization to match based on the selection in the following order.
 - a. Practitioner
 - b. Supplier Location

- c. **Supplier** - If the supplier belongs to a supplier network, the system also checks authorizations created for the supplier network if none is available for the supplier. For more information about matching an authorization on supplier network, see the "Matching Service Authorizations which Refer to Supplier Networks" in Vol. 7: Medical Management of the HealthRules Manager User Guides.
 - d. **Other** - If the **Referred To Party** is **Other**, the system will attempt to find a matching authorization only if the "Enable Auth Configuration On Submitted Supplier" provision under HCC settings is set to True. The system will use the submitted supplier information (supplier name and NPI) on the claim to match the information in the Organization or ID fields. However, if the provision is set to the default option, False, the authorization will not be considered for matching and not use the submitted supplier information even if the **Referred To Party** is **Other** on the authorization. For more information about the Enable Auth Configuration On Submitted Supplier provision, see the *HealthRules Designer Vol.4: Operating Provisions Reference Guide*.
2. If the system does not find a match based on the **Referred To Party** section, the system will then check for authorizations with the **Referred to Taxonomy** setting to match the provider taxonomy.

If the **Exclude Provider For AuthMatchOP** is enabled and there are no specific authorization matches found, the system will consider the authorizations that have **Referred To Party** set to **Other**. If a match is not found based on the **Referred To Party**, the system will match on the service code or referral category and dates and use the authorization with the lowest service set ID.

3. If a match is not available among the approved authorizations based on the above logic, the system will check for any authorizations in the denied state. If the system finds multiple matching denied authorizations, the system will follow the same logic applied to approved authorizations to find a match.

The above logic also supports splitting a claim to match, as necessary. For example, the first unit on a claim line may match a more specific service set with a matching provider. The second unit on a claim line may match a less specific authorization and adjudicate based on available units if the first authorization units are all used.

Benefits

The Benefits phase determines any deductible amounts, co-pays, limits, and percentages at which to pay each rendered service. HealthRules Server then determines whether Benefit maximums have been exceeded or if any exclusions apply, and applies the appropriate messages for any services to be denied.

Finalization

Finalization takes all the information gathered in the previous phases, makes the calculation for the amount of payment, and stores the appropriate amounts (deductible, out-of-pocket, visit limits, and others) in the claim adjudication detail. HealthRules Server keeps track of every provision and rule used in processing the claim, and together with the adjudication detail, saves all the information to the database. During this process, claim status is updated and the claim is made ready for inclusion in the next appropriate payment run.

Claim Status Assignment During Adjudication

As a claim moves through the adjudication process, it is assigned a status. If a claim makes it to the end of the process, it is assigned a status of "Final," "Denied," or "Locked." If something happens along the way that prevents the entire process from completing, the claim is assigned a status of "Needs Review," "Needs Repair," or "Rejected." Claims that need review can ultimately move to the "Final" or "Denied" state, and claims needing repair can ultimately move to the "Final," "Denied," or "Rejected" state.

NOTE Criteria for rejection, repair, and review are included in policies configured by your plan administrator or plan architect using HealthRules Designer.

Claim status values are as follows:

Final — This is the state of most claims. It indicates that the data on the claim were complete enough and accurate enough for HealthRules Server to adjudicate the claim, and there were no benefit provisions that caused the claim to be denied. Final claims can be edited or adjusted as necessary.

Denied — Denied claims also have complete and accurate data such that they could be adjudicated, but there was a benefit provision or policy that caused the claim's request for payment to be denied. This is an end state for a claim, although the claim can still be edited or adjusted.

Locked — Claims that are locked for any modifications for the users who lack required permission. Only finalized (final/denied) claims can be locked.

Needs Review — Claims that need review also have complete and accurate data such that they could be partially adjudicated, but they require review by a person to evaluate how the claim should be finally adjudicated. A user can manually flag a claim for review during creation or edit, or the system can automatically flag a claim anywhere during the adjudication process, based on the customer's business rules. After the Finalization phase, claims flagged for review are listed together in the Claim Review & Repair Workbasket.

Needs Repair — Claims that are incomplete or that contain invalid data need to be repaired before they can be adjudicated. Therefore, there is no financial information on a claim in Repair. HealthRules Server can send a claim to Repair during the Data Validation phase. These claims are listed together in the Claim Review & Repair Workbasket.

Rejected — Claims that do not meet the minimum data requirements according to business rules are rejected. Rejected claims cannot be changed, although they can be viewed. HealthRules Payer can reject a claim during the Data Validation phase; you can manually reject a claim during Repair. Claim lines may also be rejected, and once rejected, even accidentally, they cannot be edited.

Waiting for External System — If you have enabled external claim integration, and the claim has been stopped for further external editing, the status "Waiting for External System" will be displayed.

Adjudicating Claims Based on a Confinement

The HealthRules Payer system often needs to evaluate claims for services that are within the same confinement. Features such as DRG Pricing, the HealthRules Language expression "Delivered in the same confinement as," and benefit intervals can all depend on correctly interpreting the boundaries of a confinement.

As of HealthRules Payer 5.1, the system considers a single confinement to have the following characteristics:

- same member
- same supplier
- inpatient
- same admit date
- billed on an institutional claim

This deliberately excludes any services billed on a professional claim from the same institution while the member was inpatient. This prevents the system from incorrectly including hospital services billed on professional claims in "confinement," resulting in incorrect pricing and other errors.

If a user configures benefits "per confinement" for services that are not confinement services, for example ambulance services, claims for these services are sent to the Review Workbasket with an adjudication exception.

If “for confinement” pricing is configured for a professional claim or outpatient institutional claim, the system bypasses this pricing rule and move on to the next rule.

If “for confinement” authorization rules or benefit limits are configured for a professional claim or outpatient institutional claim:

- The system adjudicates the claim.
- An applicable system message is appended: “A configured utilization management rule does not support services other than inpatient facility services for confinement interval” or “A configured benefit tier does not support services other an inpatient facility services.”
- The claim is sent to the Review Workbasket.
- To get the claim out of the Review Workbasket, you can correct the configuration, manually price the claim, or approve the claim as is.

About Pay Through Termination or Discharge Date

When a member terminates while in an inpatient stay confinement, you can configure the system to either pay through the termination date (the system default behavior) or pay through the discharge date. This behavior is configured in HealthRules Designer in the HCC-level provision "Inpatient Facility Claim Terminated Member" provision.

The system default is to cover inpatient facility claims only until the termination date of the member.

A system message is included on the claim line that reflects partial denied lines due to member termination, or paid lines after termination due to a policy or service agreement.

- If the inpatient facility claim is covered only up until the member termination date, the System Message 1000 is displayed on the claim line: "Line denied for member not covered through discharge for Medical."
- If the inpatient facility claim is configured to pay through discharge date, the System Message 1001 is displayed on the claim line: "Line paid for member not covered through discharge for Medical."

Alternatively, if the Admit Date is outside of the dates the member is active, you receive System Message 62: (Standard message): "This line or portion of a line is denied because the Medical coverage is terminated."

About User Messages Mapped to Authorization Service Sets

A Medicare compliance configuration specialist may assign a user message to a specific Authorization Status Reason Code entry so that a more specific reason may be passed on to the EOB, along with the appropriate CARCs and RARCs associated with the user message. This ensures that the EOBs have the appropriate member and provider wording.

Configuration

To enable this, in the Data Maintenance application, you can assign a message domain code entry value to an authorization status code entry. Once defined, when viewing the code entry value, you can now see the associated user message. See "Data Maintenance" in *HealthRules Manager Guide, Vol. 10*, or the online help for more information.

Claims Adjudication

Once a user message domain code entry value is mapped to an authorization status code entry, for each claim line that matches an authorization service set item, where the service set status = 'denied', when adjudicating the line, the system evaluates the authorization status reason, if it exists, and if there is a user message associated with the reason code, the user message is included on the claim line. Otherwise, a system default message is used.

NOTE The ability to define the claim line action and responsibility exists on both the authorization status reason code entry, as well as the user message domain code entry and the system message domain entry.

In the case where a user message and authorization reason code both have action and responsibility defined, and the user message is mapped to the authorization status reason, the order of selection is to assume the user message domain is the lowest, most specific level and use that action and responsibility over the authorization status reason action and responsibility if both exist and are different.

The same is true for authorization status reason and corresponding system message domain value. If the system message is applied because no user message is associated with the authorization status reason, the system uses the system message domain action and responsibility over the authorization status reason.

When a Denied Auth Reason is Mapped to a User Message...

The ability to define the claim line payment responsibility exists on any message code (user or system) as well as at the HCC level as an operational provision.

When multiple responsibilities conflict with each other the following hierarchy takes precedence from most specific to least specific:

- If an Authorization Status Reason Code is mapped to a Member or Provider responsibility on the HCC Operational Provision, then use that responsibility and system message (override).
- If the Authorization Status reason code on the claim is not in the operational provision and there is a user message mapped to the reason code with a responsibility configured, use the responsibility of the user message and print the user message on the claim line.
- If the user message does not have a responsibility configured (or no user message mapped to the reason code), use the default responsibility which comes from the same "Claim Payment Responsibility" operational provision and its system message.

Internal vs. External (Statistical) Claims

In the Claim Payor field on the claim entry forms for all three claim form types (Professional, Institutional and Dental), a claim can be designated "internal" or "external."

Internal claims are those claims for which payments and payment records are generated by HealthRules. This is the default. External claims are generally considered "statistical" claims and may or may not generate payments outside the HealthRules Payer software.

About External Claims

Like internal claims, external claims:

- Are adjudicated
- Can be pre-priced and re-priced
- Can be reprocessed
- Can be used to generate an Explanation of Benefits

- Can be adjusted
- Can be imported and exported
- Can be changed to an internal claim, but only before it is finalized
- Can generate payments
- Can generate payables

Some differences from internal claims include:

- Receivables are not created on an external claim.

Claims Workbaskets

A claim that has not already been finalized can be changed from Internal to External, and vice versa in the Claim Payor field when working in the Claim Review and Repair Workbasket, or the Claim Work in Progress Workbasket.

Predetermination Dental Claims

A dental claim with a Transaction Type setting of "Predetermination" does not generate a payment. The monthly/quarterly schedule appears in a canceled state with a reason code. This will ensure the schedule claims are not generated and submitted for adjudication when the banding claim is only for predetermination. Therefore, even if the dental claim has the Claim Payor field set to "Internal," if the Transaction Type indicator is set to Predetermination, no payment is produced.

Converted, Renewed, and Delegated Claims

What are Converted Claims?

In HealthRules Payer, converted claims can be one of the following:

- Claims that have already been paid that get loaded into HealthRules during "cut-over" from a legacy system.

- Claims that have already been paid that are added to HealthRules during production time frame to include external adjudicated claims from another system (most commonly pharmacy, optical, or mental health claims).
- Claims that have been processed by a Delegated Entity to the health plan.

Converted claims provide accumulator details for the associated member. You can search for converted claims by selecting Yes in the Converted Claim filter on the Claim Search Basic tab. You can make adjustments to a converted claim, but you cannot adjudicate or reprocess a converted claim until that claim is renewed.

What are Delegated Encounters?

Health plans may choose to delegate risk to provider organizations under the terms of capitation arrangements. When these delegated relationships are established, the provider group is financially responsible for certain services and they do not receive reimbursement from the health plan for those services as they are rendered to covered members. Even though the providers do not need to submit claims for reimbursements, the health plan still requires that the delegated entities provide encounter submissions that capture the services that were rendered. This encounter data is used for a variety of purposes, including financial contract analysis, and reporting to state and/or federal agencies.

For a claim submission to be considered a “delegated encounter,” the following criteria must be met:

- Claim Header
 - encounter = True
 - providerParticipationStatus = Y/N
 - allowedAmount >= 0.00
 - netPaidAmount >= 0.00
- Claim Line Level
 - allowedAmount >= 0.00
 - netPaidAmount >= 0.00

When this criterion is met, the record is processed as a converted claim within HealthRules Payer. Both member and provider match definitions are applied, as well as ConvertedClaim and ConvertedClaimLine validation policies.

Tagging Possible Over-accruals

A user message can be systematically added to both a converted and delegated encounter when the member's deductible and/or maximum limits have been acceded as the result of the converted and/or delegated encounter. For more information on property "ENABLE_MSG_CODE_FOR_OVER_ACCRUALS," see the *HealthRules Administration Console Guide*.

Renewing Converted Claims

A converted claim can be transformed into a Renewed claim. Renewed claims work just like any other HealthEdge claim. Once you have selected a converted claim for View, you can click a toolbar button to Renew the claim. The system first prompts you to verify the Pay To Address, and then displays the Renewed Claim page in Edit mode. The header information indicates the claim is a "Renewed Claim." The claim number does not change. The renewed claim is the next version of the converted claim. In another words, the original converted claim is replaced by the renewed claim.

NOTE After converting to a Renewed Claim, the system assumes the "paid amount" (on each claim line) has already been paid. The system creates additional payables or receivables accordingly. The system does this regardless of the claim state, for example even if the Converted claim state was Denied.

Submit the claim for adjudication and then view the renewed claim. The Renewed Claim works like any other "live" HealthEdge claim. You can make adjustments to it, reprocess it, deny it, etc.

NOTE A Renewed claim cannot be adjusted by a claim fed into the system from a CSI channel.

External System Claim Overview

What are External System Claims?

HealthRules Payer provides support for external system information claims, such as "Pharmacy" claims, or other claims designated as the external source.

For step-by-step instructions on entering, editing, and searching for external system information claims, see ["Working with External System Claims" on page 2-89](#)

Entering External System Information Claims

You can enter external system information on either a Professional, Institutional, or Dental claim form. The Claim Source field is used to indicate the external system claim. In our sample, the claim source is External system.

The following sample highlights some of the external fields on a Professional form, but similar fields are available on the Institutional and Dental forms (see ["Entering External System Information on a Claim" on page 2-90](#)).

The screenshot displays the Professional claim form interface. The top navigation bar includes buttons for Submit, Submit And New, Clear, Add Line, Import Claim, Export Claim, and Close. The form is divided into several tabs: Professional, Attachments, Delegated Processing, Submission Format, Claim UDT, Line UDT, and Notes. The Professional tab is active, showing various input fields for claim information. On the right side, there are checkboxes for SEND TO REVIEW and ENCOUNTER. A red box highlights the CLAIM PAYER dropdown menu, which is set to 'External'. Another red box highlights the CLAIM SOURCE dropdown menu, which is set to 'External system medic...'. A third red box highlights the EXTERNAL CLAIM # field, which contains the value '299948322'. Other fields include CLAIM NUMBER (1999), DATE RECEIVED (05/27/2021), CLEAN CLAIM DATE (05/27/2021), SUBMITTER (Provider), CLEARINGHOUSE #, REFERENCE #, BENEFIT PLAN TYPE, INSURANCE TYPE, ID PREFIX, INSURED'S I.D. NUMBER (0000241-00), PATIENT'S NAME (Last, First, Middle Initial) Covered, Dually, BIRTH DATE (01/25/1976), SEX (Male), INSURED'S NAME (Last, First, Middle Initial) Covered, Dually, PATIENT'S ADDRESS (No., Street) 70 Main St., ADDRESS 2, PATIENT RELATIONSHIP TO INSURED (Self), INSURED'S ADDRESS (NO., STREET) 70 Main St., ADDRESS 2, CITY, STATE, ZIP CODE (07601), COUNTRY, TELEPHONE, PATIENT STATUS, EMPLOYMENT STATUS, OTHER INSURED'S NAME, OTHER INSURED'S POLICY NUMBER, IS CONDITION RELATED TO, EMPLOYMENT? (Current or Previous), BIRTH DATE (1/25/1976), SEX (Male), EMPLOYER'S NAME OR SCHOOL NAME (UCare Wrap), INSURANCE PLAN NAME, RELEASE AUTHORIZATION SIGNATURE? (Yes), DATE, ILLNESS/INJURY/PREG. DATE, QUALIFIER, OTHER DATE, QUALIFIER, NAME OF REFERRING PROVIDER, REFERRING PROVIDER ID, REFERRING PROVIDER NPI, NO WORK FROM, TO, HOSPITAL FROM, TO, EXTERNAL BATCH #, EXT. BATCH SEQ. #, TRADING PARTNER ID, EXTERNAL CLAIM # (299948322), EXT. CROSS REF. CLAIM #, HOST PLAN CODE, FREQUENCY CODE, DELIVERY TYPE (Manual), and DPI.

Search for External System Information Claims

On the Claim Search page, under the Basic tab, you can limit the search results by selecting the applicable Claim Source search criteria entry (see ["Search for and View External System Claims" on page 2-93](#)).

The screenshot shows the 'Claim Search - hcc_admin' interface. At the top, there's a search bar with 'Search', 'Clear', and 'Search For' dropdown. Below that, a 'Show' button and a 'Claims' dropdown are visible. The main area has tabs for 'Claim', 'Basic *', 'Advanced', 'Dental', 'Claim Input', and 'BlueCard *'. The 'Basic *' tab is active, displaying various search filters like 'Claim Type', 'Delivery Type', 'Claim Status', 'User Message', 'Scan Code', 'Capitated Claim', 'Procedure', 'Diagnosis', 'Service Code', 'Revenue Code', 'Batch Number', 'Encounter Claim', 'Authorization ID', 'Agreement ID', 'Patient Account #', 'System Message (Line)', 'User Message (Line)', 'Responsibility Action', 'Claim Payor', and 'Converted Claim'. A dropdown menu for 'Claim Source' is open, showing options: 'External system ph', 'BlueCard', 'BlueCard Home', 'BlueCard Host', 'External system medical c...', 'External system pharmac' (highlighted), 'Orthodontia Scheduler', 'Unknown', and 'X'.

Editing External System Claims

You can edit external system claims the same as you would any standard claim in HealthRules, with some differences. If you have enabled the External System Claim tab, it appears on the Edit Claim page. The label of the tab is based on an external system claim code entry (see ["Editing External System Claims" on page 2-95](#)).

Enabling the External System Information Tab in HealthRules Designer

On the Edit Claims page and Claim View page, the external system claim tab displays a summarized view of the external system information-related fields from the header and lines sections of the claim. To enable this tab, in HealthRules Designer, you must set the External System Claims Source definition to the name of the defined external system, such as "Pharmacy."

The name of the defined external system is used as the tab label (see the stand-alone HealthRules Designer document: *Setting the External System Claim Source Definition*.)

Void and Replace External System Claims

External System Claims, such as "Pharmacy" claims, can be electronically voided and/or replaced via EDI download(see [" Electronic Void/Replace Claim Overview" on page 1-39](#)).

DME Accumulators

HealthRules supports External System Claims, such as "Equipment Vendor" claims, with DME accumulators for purchase or rental determination. In HealthRules Designer, use the *HistoryLengthForExternalSystemUnit* provision to set the number of years to go back in history to review external system claims (with the same service definitions) to determine if a limit has been met or surpassed.

Once this provision is set, when a claim with an external limit set (in dollars, units, or days) is submitted, the system reviews all claims in member history with the same service code, using the rolling years method for the number of years entered in this provision. The system looks for claims with the same service code and determines if the claim exceeds the limit.

The system does one of the following:

- If the submitted claim is under the limit, it continues to adjudicate, as normal.
- If the claim exceeds the limit, the system denies the claim.
- If the claim hits the limit, in units or days, and then goes over, the system splits the claim lines (it first attempts to split the lines automatically, but if the system cannot the system sends the claim to the Review and Repair workbasket to be split manually).
- If the claim hits the limit in dollars, and then goes over, the system caps the dollars at the limit.

If this provision is not set, external system claims ignores the limit.

External Limits Section on the Claim Line

In the External System Limits section of the Claim Line, the Limit Type and the corresponding value are displayed. For example, the Limit Type of "Amount" and the corresponding "Amount" field.

External System Limits		Add
Limit Type Amount	x	Delete
Amount \$150.00		

If the Limit Type is "Days," the corresponding field "Days" is displayed. If the Limit Type is Units, the corresponding field "Units" is displayed.

External System Message Codes for DME Accumulators

External System Message CodesAdd

Message Code

287

Delete

DME Accumulator limit-related messages in the Message Codes section of the claim line include the following:

287 – When a claim is submitted and is denied because the external limit has been met in the claim's history before the claim is processed, the message "External allowed amount limit has been exceeded by (external amount limit value) is displayed.

288 – External allowed amount limit was exceeded by current line by \$(dollar value).

388 – When a claim is processed that exceeds the external limit, the message "External Limits was Exceeded" is displayed.

488 – External days limit of (value) was exceeded.

Claim Reprocessing Overview

What is Claims Reprocessing?

During normal system operation, certain events such as supplier contract or benefit changes can affect one or more claims by changing the amounts that should have been paid.

When such an event occurs, by default, any claims that were affected by the event are considered for reprocessing. Depending on how your system is configured, some of the claims are reprocessed automatically, some are sent to the Reprocessed Claims workbasket where you (if you have the applicable permissions) can approve or reject them from reprocessing, and some claims are recognized by the system as "do not reprocess" claims.

There are several ways you can configure HealthRules to determine which claims are reprocessed, which claims must go through review/approval, and which are specifically not reprocessed.

Determine Which Claims Get Reprocessed

When a triggering event occurs HealthRules, by default, considers claims as far back as the versioning allows. For example, if there was an update to a member without any version amends, then all claims for that member are considered for reprocessing. This is not always the most desirable way to

reprocess claims; you might only want to reprocess a more recent, smaller set of claims.

You can determine the claims that are reprocessed, by:

- Indicating that you do not want to reprocess claims (that might otherwise result from a triggering event) on the Specify As of Date dialog (see ["Excluding Claims from Reprocessing/Setting a Reprocessing Threshold Date" on page 1-33.](#))
- Setting a threshold reprocessing date, also on the Specify As of Date dialog (see ["Excluding Claims from Reprocessing/Setting a Reprocessing Threshold Date" on page 1-33.](#))
- Running the Request Reprocessing wizard to reprocess a group of claims on demand that are in a current state of Review or Repair (see [" Using the Request Reprocess Wizard" on page 1-35.](#))
- Setting the options in the "Claim Reprocessing" provision in HealthRules Designer (see ["Claim Reprocessing Provision in Designer" on page 1-35.](#))
- Approving and Rejecting claims in the Reprocessed Claims Workbasket (see ["Working with the Reprocessed Claims Workbasket" on page 1-38.](#))

What events can trigger claims reprocessing?

During normal system operation, certain events might cause one or more claims in the system to become out-of-date. This can, potentially, change the amounts that should have been paid on those claims.

The following events may trigger reprocessing of related or affected claims:

Event Type	Reprocessing Event(s)
Authorization	Amend, Create, Terminate Note: When reprocessing is enabled for events related to authorizations, HealthRules Payer may need to sweep in a broad set of claims for that member. This may include claims which are not linked to the authorization itself, or even claims for different suppliers. This broad sweep is necessary due to the flexibility in which customers can choose to match claims to authorizations.
Agreement	Amend, Create, Terminate
Benefit Plan	Amend
Benefit Plan Component	Amend

Event Type	Reprocessing Event(s)
Capitated Payment Component	Amend
Case Instance	Amend, Create, Terminate, Reinstate
Fee Component	Amend
Individual	Create, Amend
Member Factors	Amend, Create, Terminate
Member Health Condition	Amend, Create, Terminate, Reinstate
Network Definition Component	Amend
Practitioner	Amend
Practitioner Role	Amend
Product	Amend
Subscription	Amend
Supplier Affiliation	Amend
Supplier	Amend, Create, Terminate, Reinstate
Supplier Contract	Amend, Create, Terminate, Reinstate
Supplier Location	Amend
Variable Definition Component	Amend

NOTE Amend events may or may not trigger claim reprocessing, depending on the specific fields that have been changed. For example, changing a name such as "Benefit Plan Name" value would not cause reprocessing, but changing a copay amount would.

Claims that are not candidates for reprocessing are:

Claims that are specifically *excluded* from reprocessing:

- Claims matching a service definition specified in the "Reprocess Claims" provision in HealthRules Designer that has been specifically defined as do not reprocess
- Manually priced claims

- Locked claims
- Converted claims
- Claims assigned to an owner are not considered for reprocessing in the Request Reprocessing Claims Wizard

About Deductibles and Reprocessed Claims

Claims are reprocessed individually. Deductible amounts for reprocessed claims are applied to older claims first, where applicable.

For example, a plan is configured with multiple deductibles: one for \$30 per calendar year, one for \$20 per calendar month, and both waive the deductible if no claims occur in a prior interval.

1. A claim is entered for 4/1/2014 - the deductible is waived because there was no occurrence in prior period.
2. A claim is entered for 5/1/2014 - \$20 deductible
3. A claim is entered for 7/1/2013, the 4/1/2014 claim is reprocessed, and the deductible is \$10 instead of \$30. Claim 2 is not reprocessed.

Entire \$40 deductible is applied to 4/1/2013 claim, leaving no deductible left over for 5/1/14 claim.

About Episodes of Care and Reprocessing

Episodes of care (most often used to define "Medicare Benefit Periods") provide a way to link claims together in certain ways as defined by benefit plans. Claims are included in episodes of care based on their relationship to other services in the episode of care. Therefore, if claims reprocessing changes the way a claim was either triggered or matched to the included services of an episode of care, then the system will need to examine other claims to see if their relationship to the episode of care also changed.

When the system processes a new claim or reprocesses a finalized claim, if any change is made to instantiate a new episode of care, refer to an episode or care, or to no longer refer to an episode of care, reprocessing will be triggered for other claims as well, to evaluate whether or not their relationship to the episode of care has changed.

If processing an existing claim results in a change to episode of care references only (the change does not require backing out and re-adding payables), then a new version of the claim is *not* created and it *does not* appear in the Reprocessed Claims workbasket. The system will update the necessary episode of care references in the related claims.

The key points about claims reprocessing and episodes of care are:

- Claims do not reprocess when the only change is a change to the references to episodes of care.
- Claims which were candidates for reprocessing have their references to episodes of care updated even if the claim itself did not reprocess (the audit log shows that the system has updated episodes of care).
- Claims which did reprocess have their references to episodes of care updated.
- Users will have the ability to query references from a claim line to episodes of care in the data warehouse.
- HealthRules Payer users can see current references to episodes of care in the Member Episodes of Care tab and can see both current and outdated references in the [Claim Episode of Care tab](#).

NOTE If using episodes of care, the Claim Reprocessing Trigger for "Finalized Claim" must be "ON." This is the default setting, and it should *NOT* be overridden using the HCC Claim Reprocessing/Overrides processing rule provision. The Claim Reprocessing Trigger for "Finalized Claim" enables the system to reevaluate what other claims may be affected within an episode of care, when one particular claim is re-adjudicated and reprocessed.

Example

Consider the following simple example when a claim reprocesses due to changes in coverage and the claim can now trigger a new episode of care.

Other claims reprocess as well, and some of their services are now included in the new episode of care.

Claims Reprocessing Scenario

The following table summarizes how claims reprocessing interacts with the EOC Definition "MBP"

Claims submitted in this order:

		Matches included services in service definition?	Matches time constraint to service in an MBP EOC that already exists?	Matches trigger?
1.	Claim A	Yes	No	No
2.	Claim B	No	N/A	No
3.	Claim C	No	No	Yes

Result

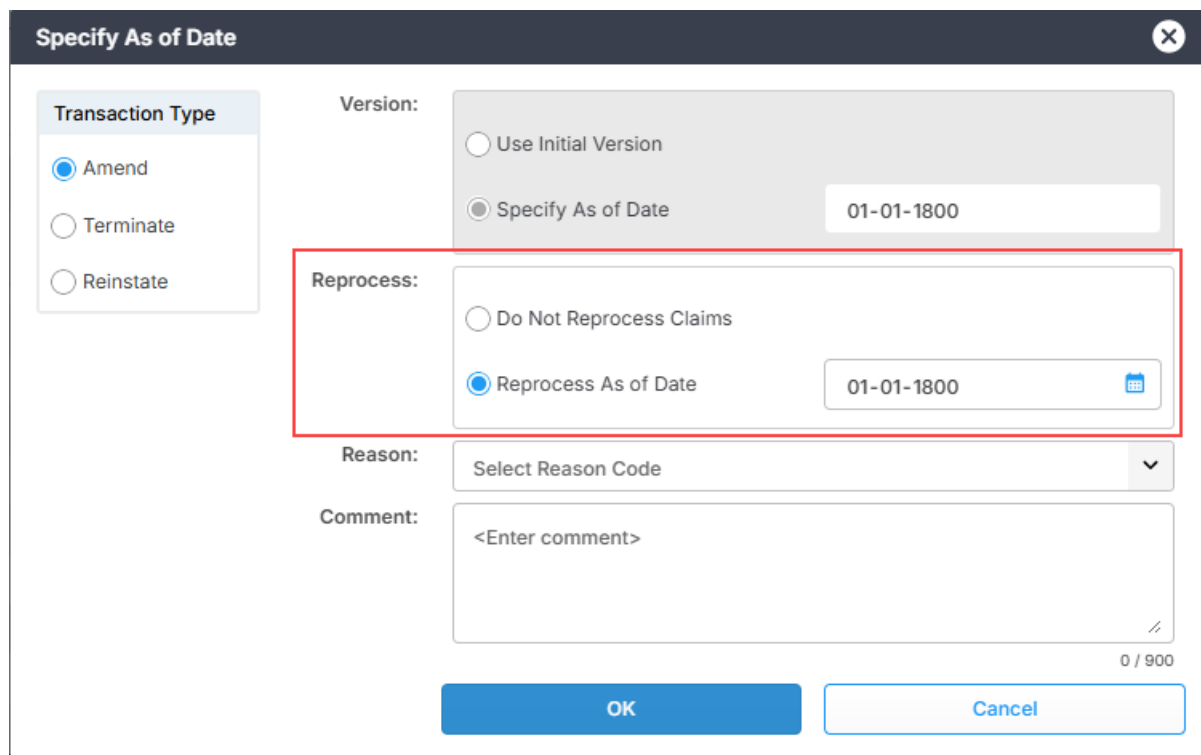

1. When Claim A is submitted, while it would match "MBP" Episode of Care if one existed, but since there is no instantiated "MBP" Episode of Care it does not match. It does not trigger a new Episode of Care.
2. When Claim C is submitted, it triggers a new "MBP" Episode of Care.
3. System reprocesses and also includes Claim A in the "MBP" Episode of Care.

For more information about episodes of care, see the *HealthRules Manager Guide, Vol. 3: Membership and Enrollment* and the *HealthRules Designer Guide, Vol. 2: Products and Benefits*.

Excluding Claims from Reprocessing/Setting a Reprocessing Threshold Date

If you have been granted the applicable permissions (via the Claim Reprocessing Override permission), you can use the Specify As of Date dialog to either indicate that claims from the event will not be considered for reprocessing, or you can enter a threshold date for reprocessing.

When a user chooses to amend a record that may generate a claim reprocessing event, the following Specify As of Date dialog is displayed.

The image shows a 'Specify As of Date' dialog box. On the left, under 'Transaction Type', there are three radio buttons: 'Amend' (selected), 'Terminate', and 'Reinstate'. To the right, under 'Version:', there are two radio buttons: 'Use Initial Version' and 'Specify As of Date' (selected). Next to 'Specify As of Date' is a date field containing '01-01-1800'. Below this, the 'Reprocess:' section is highlighted with a red border. It contains two radio buttons: 'Do Not Reprocess Claims' and 'Reprocess As of Date' (selected). Next to 'Reprocess As of Date' is a date field containing '01-01-1800' with a calendar icon. Below the 'Reprocess:' section is a 'Reason:' dropdown menu with the text 'Select Reason Code'. Below that is a 'Comment:' text area with the placeholder '<Enter comment>' and a character count '0 / 900'. At the bottom are two buttons: 'OK' and 'Cancel'.

For users with the applicable permissions, the Specify As of Date dialog includes the Reprocess section.

In the Reprocess section, select the applicable radio button to either:

- Indicate that no reprocessing should occur as result of an event, or
- Enter a threshold date, back to which claims can be considered for reprocessing. When entering a threshold date, the following rules apply:
 - Entering an "absolute" date of 1/1/1800 includes claims as far back as versioning allows.
 - Entering a date of 2/1/2012, will only consider claims as far back as February 1, 2012.
 - Entering a version date will impact the reprocessing threshold date, as well. If you enter a version date in the Version section, the reprocessing threshold date must be the same or after (later than) the version "As of" date.
 - If you version a document, for example with effective dates from 5/1/2014 to 7/1/2014 (the ending date is not inclusive), your Reprocess As of Date must fall within that version period, in other words a date within the range of 5/1 through 6/30.

Using the Request Reprocess Wizard

The Request Reprocessing wizard allows you to reprocess a group of claims on demand, based on the status of Needs Review or Needs Repair, and optionally by reason code/code set.

You can limit claim reprocessing candidates based on whether or not claims need to be reviewed first prior to reprocessing. Optionally, you can also specify a claim reason (see ["Request Reprocessing Claims Wizard" on page 2-97](#)).

Claim Reprocessing Provision in Designer

Use the "Claim Reprocessing" provision in HealthRules Designer to define your rules for reprocessing claims at the Health Care Company level.

Using the "Claim Reprocessing" Provision you can:

- Set the maximum number of claim that might be impacted by an event that triggers reprocessing, such as a change to a benefit plan. This maximum number allows you to prevent “runaway” reprocessing of claims, in case you included more claims in reprocessing than intended.
- Indicate whether or not to reprocess claims that have a “rejected” status
- Indicate that only claims that will be financially impacted will be reprocessed
- Indicate that claims with a specific service definition will not be reprocessed
- Set overrides for selected reprocessing event types, such as an Account Amend, Benefit Plan Amend, Supplier Create and so on. Claims that result from these events are either set to Not

reprocess, or are sent to the Reprocessed Claims workbasket for review (see the *HealthRules Designer Guide, Vol. 4: Operating Provisions Reference*.)

External Claim Editing and Reprocessing

When reprocessing claims, you can automatically send finalized and denied claims to an external claim editing service, such as ClaimsXten or CES.

This feature is controlled by a setting in the HealthRules Designer HCC level "External Claim Editing System" provision.

The screenshot shows a web application window titled "Health Care Company - PHIC (Edit)". The window has a blue header bar with "Save", "Undo (Edit)", and "Close" buttons. Below the header, there are two tabs: "Details" (selected) and "Document". In the "Details" tab, there is a search bar with "Find: Label (Column 1)" and a "Starting With: Extern" filter. There are also "Next" and "Previous" buttons. The main content area displays a list of configuration items for the "External Claim Editing System". The items are as follows:

Property	Value	Action
Vendor	McKesson	▼
Java Class Name		
Enabled	True	▼
System Invocation		▼
Execute Within Trial Claim		▼
Enabled When Reprocessing Finalized Or Denied Claims	True	▼
Exclusions		✎
Claim History In Months		
Configuration Properties		Add
Repair Flags		Add
Reject Flags		Add
Claim Review Overrides		Add
Reverse Order Of Policy Overrides		▼
Use Benefit Provision Order Within Component To Resolve		▼
Use Fee Provision Order Within Component To Resolve		▼

In the "Enabled When Reprocessing Finalized or Denied Claims" field, you can select "True" or "False" from the drop-down list.

The “True” setting ensures that when finalized or denied claims are reprocessed, the claim is sent to the external claims editing system, such as ClaimsXten or CES, for processing.

NOTE The system already invokes external claim editing (if enabled) when reprocessing claims in reject, review, or repair status.

Because reprocessing may cause a claims editing rule to trigger a repair condition, when this feature is enabled, the claims will go through review and repair analysis.

The “False” setting means finalized or denied claims are not sent to external claims editing during reprocessing. This is the default setting (see the stand-alone HealthRules document, *ClaimsXten Configuration Guide* or the *CES Configuration Guide*, whichever applies.)

Working with the Reprocessed Claims Workbasket

Once a claims lands in the Reprocessed Claims workbasket, there are several actions that you can take, including:

- Filtering trigger events and the list of claims in the workbasket.
- Display details about the claims to be processed, including before and after totals by claim line, allowing you to view the impact (financial or reporting) a reprocessed claim will have, by claim line *before* it is reprocessed.
- Approve or reject claims in the "Needs Review" state to be reprocessed, then submit them (see ["](#)

Reprocessed Claims Workbasket" on page 4-56).

Electronic Void/Replace Claim Overview

Providers can submit a replacement (corrected) claim if information on the original claim was incorrect or missing. They can submit a Void (canceled) claim if the previously submitted claim needs to be eliminated entirely. External system claims, such as Pharmacy claims, can also be electronically voided or replaced, but use a different process.

NOTE You can only replace a claim with the same claim type. For example, you can only replace an institutional claim with an institutional claim or a professional claim with a professional claim, otherwise upon submitting the replacement claim you will see a "Claim type does not match" error.

Manual Void/Replace Claims

Both standard and external system claims can also be voided or replaced manually. See one of the following for step-by-step instructions:

- ["Manually Replace a Claim" on page 2-75](#)
- ["Manually Voiding a \(Standard\) Claim" on page 2-70](#)
- ["Manually Replace an External System Claim" on page 2-79](#)
- ["Manually Void an External System Claim" on page 2-73](#)

Electronic Replacement Standard Claims

Replacement claims (sometimes referred to as corrected claims) submitted electronically will reduce the potential for a claim to deny as a duplicate. If a replacement claim needs to be submitted, the provider can submit the correction electronically with the appropriate frequency code (7).

For example, an ANSI 837P file containing a replacement claim is submitted. It includes the required REF segment and Qualifier in Loop ID 2300 – Claim Information, as shown below:

```
Claim Frequency Code ↑ CLM*12345678*500***11:B:7*Y*A*Y*I*P~ REF*F8*(Enter the Claim Original Reference Number)
```

In the above example, "11" (CLM05-1) indicates the place of service on a professional claim. "B" (CLM05-2) is the Facility Code Qualifier, which is required in ANSI Version 5010. "7" (CLM05-3) is the Claim Frequency Code.

The replacement claim with Frequency code 7 will replace the entire previously processed claim.

If the claim was previously submitted with procedure codes 99213, 88003 and 77090, and the procedure code 88003 should have been 88004, an electronic replacement claim can be submitted for the line that needs to be corrected, along with the appropriate frequency code: 7, 99213, 88004 and 77090. This indicates to the health plan that all charges need to be deleted, and the claim will then be processed with 99213, 88004 and 77090.

In another example, a claim was previously submitted with procedure codes 99214, 70052 and 99213. Procedure codes 70052 and 99213 were submitted in error and need to be removed. An electronic replacement claim can be submitted with frequency code 7 and procedure code 99214. This claim will then be adjusted to remove 70052 and 99213, and it will be processed with 99214.

Electronic Void Standard Claims

If the previously submitted claims was submitted in error and needs to be voided, the claim to be voided is electronically submitted exactly as it was previously submitted, along with frequency code 8, indicating that the claim should be voided.

Claim Frequency Code ↑ CLM*12345678*500***11:B:8*Y*A*Y*I*P~ REF*F8*(insert the Claim Original Reference Number)

Electronic Void and Replace on External System Claim

External System Claims, such as Pharmacy claims can be electronically voided and/or replaced via EDI download.

Automated Void request can be made via inbound Submission Format (SF):

- Void – this can be requested by either the host or home, depending on the situation. The host plan must approve the Void/Reissue. In HealthRules Payer, the claim will be marked as a "Void Claim."
- Void/Reissue – This can be requested by the host or home plan, depending on the situation. The host plan must approve the Void/Reissue. The claim will be marked in HealthRules as a "Replaced Claim."

NOTE For non-par providers, replacement claims are sent to the workbasket and are not automatically processed. The replacement claim is not processed until the recoupment is received from the non-par provider for the claim to be replaced. This prevents re-adjudication and possibility of making a double payment.

Electronic Void on External System Claim

HealthRules will identify a Void via Submission Format (SF) claim submission. This will include a new SCCF# and Cross Reference SCCF# for the existing claim to be voided. An external system claim is received with a xref SCCF# (for the original SCCF # of the claim to be voided and replaced) and an SCCF # which is the replacement claim number.

The void is processed within HealthRules and this information is recorded from claim history against the xref SCCF#. The SCCF# that requested the void will also be reported to external sources as finalized. No adjudication is necessary.

The system will find the original claim, it will be adjusted to reject, and a reject reason can be recorded, or the default system-generated message code 534 will be used.

Replacement Claims and Accumulators

When you submit a replacement claim (same exact claim number) that essentially reverses the amount of the claim to \$0, then the claim will no longer be viewable in the member's Claims and Accumulator Adjustments list. If you submit a replacement claim with a slightly different number that reduces the claim to \$0, the details will be reflected in the member's accumulators and adjustments.

Example 1: Claim 3344556 wouldn't be displayed in the Claims and Accumulator Adjustments list when:

Version 1 of claim 3344556 = \$40

Version 2 of claim 3344556 = (\$40) or -\$40

Member responsibility = \$0

Example 2: By submitting a negative impacting claim with the same claim number, but suffixed with a numbered value:

Original claim 3344556 = \$40

Negative Claim 3344556-1 = (\$40) or -\$40

Member responsibility = (\$40) or -\$40

In this case, both 3344556 and 3344556-1 would both be displayed in the member's Claims and Accumulator Adjustments list.

Voiding Claims and the Impact on ClaimsXten

For users that send claims to the ClaimsXten external claims editing system, when claims get voided or rejected in HealthRules Payer, or when claim transactions get canceled (through Transaction Manager), HealthRules Payer will automatically send information about the voided, rejected, or canceled states of these claims to ClaimsXten (in real time) if needed in order to ensure that ClaimsXten's claims history stays in sync with HealthRules Payer's.

About Claims Repricing

Claims that require repricing are held in the Claim Repricing workbasket.

In the absence of supplier contract the system may send a claim to the repricing workbasket as part of adjudication in order to obtain the claim price from an outside vendor (Repricer), if the member's benefit contract specifies this.

Optionally, you can override claim repricing information, such as the allowed amount, on one or more claim lines, or send one or more lines back to the repricer (see "[Claim Repricing Workbasket](#)" on [page 4-47](#)).

About Repricers

A Repricer is a third-party company or network that a health plan contracts with in an effort to achieve better negotiated provider pricing rates for that health plan's claims.

The three ways a repricer works in conjunction with the Health Care Company's claims processing method:

- Repricer receives the claims first, applies the pricing, then forwards the claims (already pre-priced) to the Health Care Company, who then enters the price manually in HealthRules.
- Health Care Company receives the claims, sends the claims via a nightly batch process (electronically) to the repricer, who then prices and sends back (via modified 837OB process) to the Health Care Company for benefits and payment.
- Health Care Company receives the claims, manually prices via a web interface with the Repricer, then enters the price manually in the HealthRules Repricing Workbasket.

A claim can also be resent to the Repricer, if it was not processed as expected the first time.

NOTE If the Supplier on the claim has a Supplier Contract, the price from the contract is used, and the claim finalizes with a message indicating that the claim was priced by a provider contract.

About Processing Claims in the Repricing Workbasket

Viewing/Editing Claims

When claims are opened for repricing from the Claim Repricing workbasket, HealthRules Payer makes sure that the claim detail reflects the most up-to-date adjudication and editing results for the claim. This ensures that the repricing ultimately applied to these claims is based on current information.

For example, a claim has been sitting in the Claim Repricing workbasket for several days. During that time, changes in the member's claims history or changes in system configuration have taken place, which could potentially change some the edits that were originally applied to the claim. A claims processor (or an automated repricer) opens the claim from the Claim Repricing workbasket to reprice the claim. Before making the claim available for repricing, HealthRules re-adjudicates and re-edits the claim; when the claim becomes available, it now reflects up-to-date adjudication and edits that reflect any changes to member claims history or configuration that might have occurred since the claim was initially processed.

Information from Externally Editing Claims

HealthRules retains repricing results for externally edited claims lines (for example, claims edited through ClaimsXten or CES) when a claim gets re-adjudicated as a result of selecting the claim during an "Open for Edit," "Preview Results," or "Submit" workflow, when the external editing results are the same as they were before. When this happens, the claim no longer has to go back to the Claim Repricing workbasket to re-acquire repricing information, and you can see the existing repricing information still on the claim when you open the claim for Edit.

Repricing and Line-level Denials

If a claim that has been repriced then gets edited by an external editing system (such as ClaimsXten or CES) in a way that could potentially alter the pricing, HealthRules typically sends the edited version of the claim back to the Claim Repricing workbasket to obtain updated repricing. HealthRules also considers a line-level denial by the external editing system to be an additional type of "significant edit" and sends the claim back to the Claim Repricing workbasket when a line-level denial occurs (as long as the entire claim did not get denied, in which case no further repricing is needed). This is important because the repricing applied to some claim lines can depend on the repricing applied to one or more other claim lines, as in the case of a multiple-procedure surgery. If such a line gets denied, the denial could affect the repricing of other claim lines.

In addition, repricing results on all non-denied lines will get cleared from a claim that requires updated repricing, not just cleared from the significantly-edited lines, since repricing on any line could potentially be affected by significant edits that get subsequently applied to a claim. This applies to any significant edit made to a claim by the external editing system, not just to line-level denials.

For example, HealthRules considers any of the following external editing system edits to be "significant" because they will require updated re-pricing for at least some portion of the claim:

- One or more claim lines were added due to bundling or unbundling (such as CXT transfer)
- One or more (but not all) claim lines were denied (such as CXT deny)

- One or more claim lines were modified (such as CXT modify). For example changed to a different modifier number on the line, the same number of modifiers but modifiers are different, the same number of modifiers on the line, but modifiers are different, or the same modifiers on the line and same number of modifiers, but modifiers are in a different order.
- Units of service were changed.

NOTE The denial of an entire claim (all claim lines denied) shall not be considered a significant edit because a denied claim does not require updated re-pricing.

A claim line to which an external editor applies only Pay Percent edits and nothing else shall not be considered a significant edit because Pay Percent adjustments in and of themselves do not require updated re-pricing.

Reprocessing and Repricing Claims

When a claim is reprocessed, if the repricing information already obtained for claim lines added by an external editing system is still valid when a claim gets re-adjudicated, the repricing information is retained so that additional, unneeded calls are not made to the external repricer. This behavior occurs when you open the Edit page for a claim, and when claims get reprocessed.

Optionally, you can overwrite repricing information on the claim by opening and using the Repricer Outputs tab. Here all claim lines and their repricing information is summarized in one tabular view. You can make repricing changes to all claim lines, and resend one claim line or all eligible claim lines to the repricer, or you can make repricing changes and submit the repricing changes along with other claim edits by clicking **Submit**.

Repricing Claims via Electronic Feed

If claims have been set up to receive electronic updates directly from the Repricer, when they are submitted from claims entry, they are automatically sent to the Claim Repricing Workbasket, and are also sent electronically to the Repricer for processing. In this case, the claim can sit in the workbasket waiting for an electronic feed to come back from the Repricer to update the claim. Once the claim is updated, it is automatically submitted for adjudication.

Working with the Repricing Outputs tab

The Repricer Outputs tab displays a summarized view of the repricing information for each claim line.

When you are editing a claim, you can change the repricing information directly on this tab.

You can enter or change the allowed amount, select a different repricer decision, change the request and response dates, and select the associated benefit network and repricer.

Any information you enter on the Repricing Outputs tab for a line is also changed on the Line tab in the Repricing Outputs section for the corresponding line. Likewise, any repricing information changed on a selected claim line is also automatically updated on the Repricing Outputs tab.

For additional information on a claim line, you click the expand line control [+]. Claim line information includes the Start/End date, Rev. Code, CPT/HCPCS codes, Billed Amount, HCC Amount Paid Amount, and Member Responsibility.

Resending the Claim to the Repricer

If a claim was transmitted to the Repricer, but does not come back from processing in the expected time, you can resend it to the Repricer. You must change the repricing decision to "Waiting for Repricer" to make a claim line eligible before resending, and then you can either resend all eligible claim lines or a selected claim line to the repricer.

Trial Claim Service and AEOB

The Trial Claim Service allows you to provide members and providers with the cost of upcoming services for all claim types.

By entering some basic services information, and taking into account the member, supplier contract and/or available benefits, you can create a "Trial Claim" using a process that simulates HealthRules' claim adjudication process with the given data, and then displays cost and benefit information for the trial claim. The Trial Claim service provides pricing and benefit details as if a real claim because the member, provider and services entry are all available.

The Trial Claim Service is available from the Member View page, Supplier View page, Supplier Location View page, and Practitioner View page.

The Trial Claim Service is also used to support the Advance Explanation of Benefits (AEOB) feature (see "Working with the Trial Claim Service" in *Vol. 3: Membership and Enrollment*.)

For the AEOB feature, see "Enable and Use Trial Claim and AEOB Preview and Save" in *Vol. 3: Membership and Enrollment*.

About Claims Bonuses

You can automatically apply a bonus to a claim. Some customers may want to apply a bonus, for example, to satisfy requirements for the CMS Special Program “Health Professional Shortage Area” or HPSA, where CMS regulations state that a 10% bonus is due to providers who provide services to Medicare membership (in designated areas), where there are not a sufficient number of health professionals or physicians based on census data.

You can use the “Claim Bonuses” provision at the Product or Benefit Plan Component level, to define a bonus percentage to be paid on a claim when the claim meets specific criteria, including the specific service definition. You can also specify a ZIP code or a range of ZIP codes (that represent where the service was rendered) to which a bonus applies. You can optionally attach a user-defined message to the claim or use the default system message. Bonuses only apply to claims submitted where the payee on the claim is the Provider. If a claim is submitted where the payee on the claim is the Subscriber, no bonus is applied to the claim.

When a bonus is applied to a service it is displayed on the applicable claim line. Claim line bonus totals are rolled up to and display on the claim header.

The Bonus amount is applied to the claim payment amount after all other calculations for the payment have been performed prior to late claim interest or withholds.

NOTE If a bonus is applied to a wrap plan, the bonus is not displayed at the claim level; a user can still drill down to the line level benefits and sum it up to find the correct bonus. The bonus appears, however, in the claim payable/payment.

Triggering Conditions

A bonus for a claim is triggered when:

- There is a rendering provider (contracted or non-contracted) that rendered the configured service (CPT or HCPC code) in the impacted configured ZIP code area (submitted rendered at address)
- Or, a configured Modifier is on the service line (Modifier overrides service definition)

An X% bonus is paid (based on the paid amount (plan responsibility)) on a line by line basis

Simple Scenarios

Scenario 1: Bonus on line 1

- Allowed Amount line 1: \$80.00
- bonus applicable - service included
- Allowed Amount line 2: \$20.00
- bonus not applicable - service not included
- Total bonus against plan responsibility 10% X \$80: \$8.00
- Total Plan Responsibility (HCC Amount): \$108.00
- User message: HPSA bonus applied

Scenario 2: No user message configured

- Allowed Amount line 1: \$80.00
- bonus applicable - service included
- Total bonus against plan responsibility 10% X \$80: \$8.00
- Total Plan Responsibility (HCC Amount): \$88.00
- System message: Bonus applied

Configuration Settings

To configure Claim Bonuses, refer to the "Claim Bonuses" provision in the *HealthRules Designer Guide, Vol. 4: Provisions Reference* for basic steps.

Bonus Details on the Claim Line and Header

Claim Line: When a bonus applies to a service on a claim line, the bonus is displayed in the Bonus Amount field in the Pricing section.

Chapter 1: Introduction and Overview

▼ Pricing

☐ Authorization Required	Status Adjudicated	
Allowed Amount \$120.00 ✓	Non-Covered \$0.00	Considered Charge
Provider Penalty \$0.00	Capped Non-Covered \$0.00	Amount Pre Lesser Than \$0.00
Bonus Amount \$4.00	Co-Insurance \$24.00	Reference Fee
Other Discount \$0.00	Deductible \$0.00	Calculated Reference Fee
Sales Tax Amount \$0.00	Co-Payment \$0.00	Calculated Line Reference Fee
Member Reserve Used \$0.00	Balance Billed \$0.00	Carry Over Reference Fee
HCC Amount \$96.00	Member Penalty \$0.00	Rollover Benefit Amount
Paid Amount \$96.00		Threshold Rollover Benefit
	Member Responsibility \$24.00	MRT Amount Accrued
		Qualifying Payment Amount

In addition, the bonus message specified for the claim line is displayed in the Message Codes section:

▼ Message Codes

Message Code 147	Description Services rendered by an out of network provider.	Delete
Message Action Informational	Responsibility	
Message Code 111	Description Bonus Applied	Delete
Message Action Informational	Responsibility	

Totals Tab: Bonus amounts for each line are rolled up to the claim header level and display in the Totals tab in the Bonus Amount field.

Totals

Submitted Totals					
Submitted Charges		\$1,390.00	Member Paid to Provider		\$0.00

Claim Totals					
Billed Amount	\$1,390.00	Non-Covered Amount	\$0.00	Amount Pre Lesser Than	\$0.00

Sales Tax Amount	\$0.00	Paid From Member Accounts	\$0.00	Total MRT Units	0

Data Warehouse Streaming Information

Bonus information at the claim level now streams to the TOTAL_BONUS (Type - Number) column in the CLAIM_FACT table.

Bonus information at the claim line level now streams to the BONUS_AMOUNT (Type - Number) column in the ALL_CLAIM_LINE_FACT table.

Chapter 2: Claims Tasks

You can do several tasks using the claims feature.

This discusses the following:

Create a Claim Record	2-3
Working with Claim Batches	2-12
Searching for Claims	2-19
Editing Claims	2-21
Adjusting Claims Financials	2-42
Working with Claim Denials	2-47
Denying a Claim in Needs Review State	2-64
Apply Manual Overrides to Multiple Claim Lines	2-64
Manually Apply Alternate Benefit Rules	2-69
Manually Voiding a (Standard) Claim	2-70
Manually Void an External System Claim	2-73
Manually Replace a Claim	2-75
Manually Replace an External System Claim	2-79
Expediting Claim from Claim View Page	2-83
Viewing Claims Repricing Results	2-85
Changing a Converted Claim to a Renewed Claim	2-86
Working with External System Claims	2-89
Entering External System Information on a Claim	2-90

Request Reprocessing Claims Wizard	2-97
Request Lock Unlock Claims Wizard	2-102
Rejecting and Submitting Claims	2-109

Create a Claim Record

HealthRules provides three types of claim forms: Institutional (UB, CMS-1450), Professional (HCFA, CMS-1500), and Dental (ADA 2002 and 2012 versions). While the forms differ in content, the general procedure for creating a claim record is the same.

For specific field definitions, see the ["Create Claim Page" on page 3-2](#).

To create a claim record:

1. In the Claims tab of the HealthRules Manager page, click the **Create** link beside the type of claim you wish to create.

The applicable claim form page is displayed. The following example, shows an Institutional claim.

Provider | REFERENCE # | BENEFIT PLAN TYPE | CLEAN CLAIM DATE
06-03-2025 | ☐ SEND TO REVIEW |
| EXTERNAL BATCH # | EXT. BATCH SEQ. # | CLAIM PAYOR
Internal | CLAIM SOURCE | DELIVERY TYPE
Manual | TRADING PARTNER | EXTERNAL CLAIM # | EXT CROSS REF CLAIM # | HOST PLAN CODE | ☐ ENCOUNTER |
| | | | | | | | | FREQ. CODE | DI |

3. Select the claim payer to indicate if the claim is an internal (paid through HealthRules) or external (paid outside of HealthRules) claim (see ["Internal vs. External \(Statistical\) Claims" on page 1-21](#)).
4. Select the claim source to indicate the source of the claim, for example, Internal. Pharmacy, external system medical claim, or some other user-defined code entry.
5. For external system claims you can also enter the Ext. Cross Ref. Claim #, ID Prefix, and Host Plan Code.

The ID Prefix can be used to match the claim during adjudication against an ID Prefix specified on the member's benefit plan selection for the date of service (see ["Denying a Claim when an Invalid Member ID Prefix was Submitted on the Claim" on page 2-96](#)).

NDC/UPN Repricing Manual Override External Fees External Limits External Messages Service Description

| Allowed Amount | Benefit Network Name | Repricer Name | Decision |
|----------------|----------------------|---------------|----------|
| \$222.00 | | | Priced |

The information on the Repricer Tab includes allowed amount, the benefit network name, the repricer name and decision (priced, denied) reported by the repricer.

The Manual Override Tab allows you to override benefit plan information, including the Allowed Amount, Benefit Network Name, Repricer Name, Benefit Tier Type: In-Network or Out-of-Network, and the Member Responsibility Type: Billed Amount or Allowed Amount. The override information will be used during claims adjudication.

For example, if the manual override specifies Member Responsibility as "In-Network" and the benefit plan has been defined as "Out-of-Network", the claim will be adjudicated as "In-Network."

Chapter 2: Claims Tasks

You can select a user-defined denial message from the Denial Message drop-down for the claim line denial - this message will force a denial of the claim line during adjudication. These messages are defined as Code entries under the code set "UserMessageDomain", with a user Message Action of "Denial."

You can also click **Override** to select one or more user- or system-defined Override messages from the drop-down that represent denial overrides to be applied to the line during adjudication. The Code Set column in the drop-down indicates if the message originated from the UserMessageDomain, or the SystemMessageDomain.

Claim Fees

| Fee Type | Fee Amount | Fee Percentage | Delete |
|----------------------|------------|----------------|--------|
| Supplemental Payment | \$233.00 | | |

Chapter 2: Claims Tasks

- On the Attachments tab, add any attachments and additional data about the attachment.

The fields on the tab will vary, depending on the specified Attachment Type. In the following example, the Attachment Type is "Explanation of Benefits."

Complete the fields as applicable. The following sample illustrates a Professional Claim with an EOB attached and the name of the other insurance company selected from the list. The Company list includes the companies from the COB policy, identifying the member's other insurance companies.

The screenshot displays the 'Attachments' tab in a software interface. At the top, there are navigation buttons: Submit, Submit And New, Clear, Add Line, Import Claim, Export Claim, and Close. Below these are tabs: Professional, Attachments (selected), Delegated Processing, Claim UDT, Line UDT, and Notes.

The 'Attachments' section includes a dropdown for 'Attachment Type' (set to 'Explanation of Benefits') and a 'Transmission' field. A 'Comment' text area is also present. Below this is the 'Company Information' section with fields for 'EOB Date', 'Payer Priority', 'Claim ID', and 'Claim Filing Indicator'. There are expandable sections for 'Subscriber', 'Company', and 'Message Codes'.

The 'Other Insurance Payments (Claim Level)' section contains a table with columns: Paid, Co-Pay, Co-Insurance, Deductible, Billed, Allowed, Discount, Member Penalty, Member Responsibility, Provider Penalty, and Non-Covered. A 'Totals' row is at the bottom of this table.

The 'Other Insurance Payments (Line Level)' section has an 'Add Line' button and a similar table structure. A message 'No Data Found' is displayed at the bottom of this section.

- On the Notes tab, add any notes about the form you are creating.
- On the Claim UDT tab, enter user-defined data for the claim or on the Line UDT tab, enter user-defined data on the claim lines.

Claim UDTs, Claim Line UDTs and attributes are defined in HealthRules Designer by using the User Defined Term option. It is highly recommended that these Claim UDTs or Line UDTs are not defined as "required."

16. After entering all necessary claim information correctly, submit the claim for immediate adjudication by clicking one of the following:

- **Submit** - The claim is submitted. The system performs an initial validation pass on the submitted claim, and then displays either a Successful message if the claim was accepted or an appropriate error message if it was not. If an error message appears, correct the error, and then resubmit the claim.

If the submission is successful, the Claim View window is displayed, showing the claim you submitted.

- **Submit And New** - The claim is submitted, a message is displayed indicating a successful submission. The system performs an initial validation pass on the submitted claim, and then displays either a Successful message if the claim was accepted or an appropriate error message if it was not. If an error message appears, correct the error, and then resubmit the claim.

If the submission is successful a new claim form is displayed so you can enter another claim.

NOTE If you select the Send to Review checkbox, the claim will be placed in the Claim Review and Repair Workbasket.

NOTE If you select the Encounter checkbox, the claim will be marked as an encounter.

Working with Claim Batches

Use claim batches to help manage your claim receipt inventory and facilitate the entry of claims into your system.

Claim batches allow you to group together similar claims for processing. For example, you can create a batch that groups together multiple institutional claims received on the same day for a specific product. Optionally, you can assign ownership of the batch to a specific group or individual.

When entering a batch of claims, you complete the first claim in the batch on the Claims Entry page like you would any individual claim. Click **Next** to load the next claim in the batch. Complete each claim in turn, until the entire batch has been entered. Once you have entered all claims, click **Submit** to begin the adjudication process for all the batch claims.

This section describes how to create a new claims batch and how to enter a batch of claims (see ["Create a Claim Record" on page 2-3.](#))

Creating a New Batch

Creating a new batch involves entering a batch number, the number of claims, the total amount of the claims and other descriptive information. You can assign ownership of the batch to a specific group of users or to an individual of a specific group.

To create a new batch:

1. On the Claims tab of the HealthRules Manager page, click the **Create Batch** link beside the type of claim you wish to create, or from the File menu, select **Create**, then select **Batch Claims**, and then select **Institutional**, **Professional**, or **Dental**. The Create Claim Batch page is displayed.

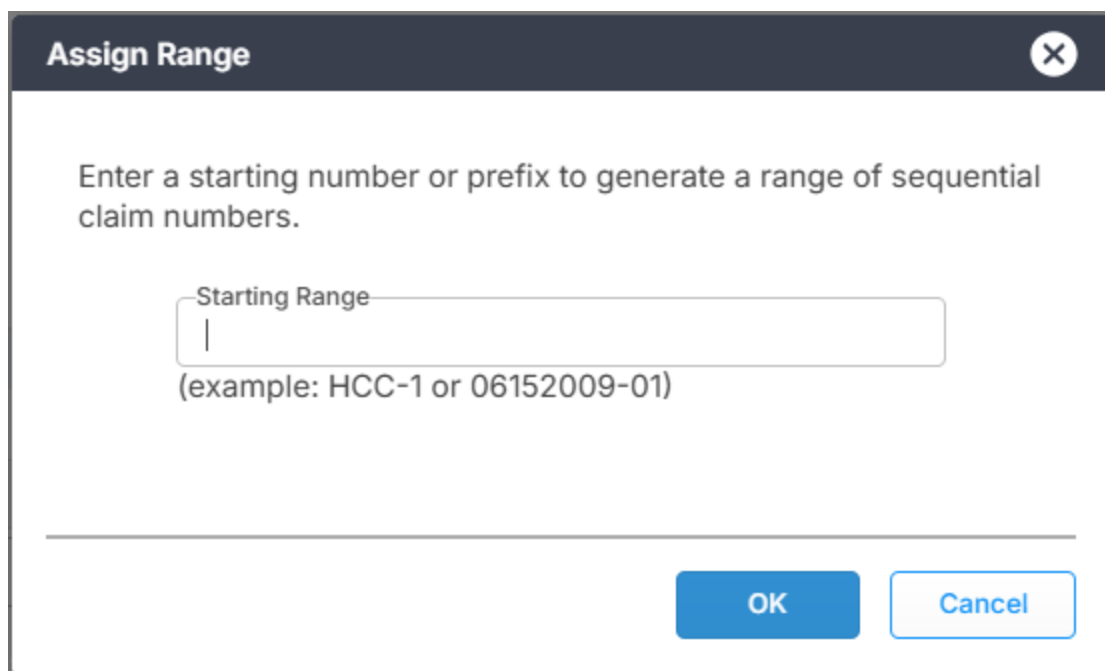

2. Complete the applicable fields on this page to define the batch.
 - You can enter a unique batch number or you can leave the field blank. If left blank, a batch number will be automatically assigned by the system. The type of claim pre-fills based on your selection in Step 1, but can be changed.
 - Enter the receipt date. Use the calendar tool to help you, if needed.
 - To enter the total amount of the claims, either enter the total amount in the Total Amount field or use the calculator. Click the down arrow to access the calculator.

Chapter 2: Claims Tasks

- Optionally, you can associate the batch with a specific account name and/or product, and you can assign ownership of the batch to a specific group and/or owner. Once assigned, only owners of the batch can enter the claims batch. Typically, a Claims Supervisor assigns the batch to a claims examiner.
3. To automatically assign numbers to each of the claims in the batch, leave the “Manually assign the claim numbers in the batch” field cleared and go to Step 9.

Follow Steps 4-8 to manually assign claim numbers in the batch.

4. To manually assign claim numbers to the claims in the batch, select the **Manually assign the claim numbers...** checkbox. The Claims Number entry list appears (blank).
5. To assign a range of numbers, click **Assign Range**. The Assign Range page appears.

The image shows a dialog box titled "Assign Range" with a close button (X) in the top right corner. The main text inside the dialog box reads: "Enter a starting number or prefix to generate a range of sequential claim numbers." Below this text is a text input field with the placeholder text "Starting Range" and a vertical cursor. Below the input field, there is an example: "(example: HCC-1 or 06152009-01)". At the bottom right of the dialog box, there are two buttons: "OK" (a solid blue button) and "Cancel" (a white button with a blue border).

Chapter 2: Claims Tasks

6. Enter the starting range number in the Starting Range field and click **OK**. The Claims numbers will be listed starting with the range number you specified.

List of Claims

☒ Manually assign the claim numbers in this batch

| | Claim Numbers |
|---|---------------|
| 1 | 0001-0 |
| 2 | 0001-1 |
| 3 | 0001-2 |
| 4 | 0001-3 |
| 5 | 0001-4 |
| 6 | 0001-5 |
| 7 | 0001-6 |

Add Claim

Remove Claim

Assign Range

You can make changes to the list by using the Add Claim and Remove Claim buttons.

7. To add a new claim number, click **Add Claim**. A new line appears at the bottom of the list where you can type in the new claim number.
8. To remove a claim number from the list, select the number by clicking on the line you want to remove and click **Remove Claim**. Then, answer the message to confirm that you want to remove the claim from the batch.
9. To save your changes, do one of the following:
 - Click **Save**. After you complete the Select Reason Code dialog, the application will close and you will return to the Claims home page.
 - If you are entering multiple batches, click **Save and New** so the page does not close and you can continue entering batches.

NOTE

- When a claim from a batch is opened and edited, the update to the reason and comment fields is added to all claims in the batch when the claims have the same member.
- You cannot add/mention individual reason code and comments for claims in the batch. You can view the audit log associated with the batch for more information.

Entering a Claims Batch

You can search for and select the claims batch you want to work with and then enter all the claims in the batch into the Claims Entry page, one after the other.

To enter a batch of claims:

1. In the Claims tab of the HealthRules Manager page, click the **Enter Batch Claims** link beside the type of claim you wish to process, or from the File menu, select **Create**, then select **Batch Claims**, and then select **Enter Institutional Batch Claims**, **Enter Professional Batch Claims**, or **Enter Dental Batch Claims**.

The Enter Batch - Select the Claim Batch page is displayed.

2. On the left side of the page, enter search criteria to help you find the batch you want to work with, such as the batch number, claim type or owner, and click **Search**. The right side of the page displays a resulting list of batches from which to choose.

Claim batches with an Open status have not yet been entered. Claim batches with an On Hold status have been partially entered into the Claims system and require completion. Claims with a status of Submitted are completed (processed) claims that were submitted without error.

Chapter 2: Claims Tasks

Enter Batch - Select the Claim Batch - hcc_admin

Account

Product

Search

Max Results: 50

| Claim Batch # | Status | Receipt Date | Group | Owner |
|---------------|--------|--------------|-------|-------|
|---------------|--------|--------------|-------|-------|

OK Cancel

- Click the row of the batch you want to process and click **OK**.

The Create Claims page is displayed.

NOTE If an owner has been specified for the batch, only the owner can select the batch and enter the claims into the system. If no owner is specified, any claims user can select and enter the batch.

Notice the Batch Number, Claim Number, and Date Received fields are pre-filled with information entered for the batch.

- Complete the remainder of the fields as you would for any new claim (see ["Create a Claim Record" on page 2-3](#).) You can search for a batch to work with, select it for entry, and complete entering the batch claims. You can also reassign the claim to another claims adjuster (see ["Using the Claim Batch Entry Workbasket" on page 3-300](#)).
- When finished entering claim information, click the **Next** arrow toolbar button to process the next claim in the batch. You can click the **Back** arrow button to return to the previous claim, or you can click the Claims List drop-down to select any of the claims in the batch.

A check mark displays next to claims that have been successfully entered.

Chapter 2: Claims Tasks

You can navigate between claims in the batch that are incomplete, however, depending on what information has been left off the form, the system will display a number of dialogs (two for the Professional, and four for the Institutional claim):

- Incomplete Input "This claim must contain at least one valid service line"
- Incomplete Input "This claim is not complete. Would you like to continue to the next claim and resolve these issues later"

The Institutional Claim has two additional dialogs:

- Please enter a valid statement from date
- Please enter a valid statement through date

6. When all claims in the batch have been successfully entered, click the **Submit Batch** toolbar button.

Incomplete Claims

If claims have not been completed, when click **Submit**, a dialog appears indicating the claim ID that needs to be completed.

Batch Totals

Totals must match when submitting the batch. For example, if five claims are entered in the batch and the batch total is 500.00, the sum of the five claims in the batch must total \$500.00, otherwise, the Inconsistent Total Amounts dialog will appear and display a message similar to the following:

"The total of each claim must match the total amount set in the claim batch. Please review the inputs and resubmit the batch. Batch Total 500.00 Claim Totals 1400.00"

Claim 1 100.00

Claim 2 100.00

Claim 3 1000.00

Claim 4 100.00

Claim 5 100.00"

Click **OK** to remove the dialog and correct claim line amount.

Claim Batch Entry Workbasket

All types of Claim batches appear in your Workbasket under the Claim Batch Entry option.

Batch claims that have not been processed have a status of “open.” Partially completed batches have a status of “on hold.” Batch claims that have been submitted are also displayed in the workbasket.

You can search for a batch to work with, select it for entry, and complete entering the batch claims. You can also reassign the claim to another claims adjuster.

Searching for Claims

This section describes how to search for claims.

The claims search allows you to easily find the claims you want to work with based on search criteria, and then view, edit, or export information relating to a claim.

Search Criteria Options

You can search for claims records using one or more search criteria fields.

To search for a Claim record:

1. Open the [Claim Search page](#) using any of the methods described below:
 - On the Home page Claims card, click the **Search** icon next to All Claims
 - On the Home Page Main toolbar, click **Search**
 - On the Home page Main Menu, select **Document/Search**

The Claim Search page is displayed.

Chapter 2: Claims Tasks

2. You can search by claim (search results display one row per claim), or claim line (search results display one row per claim line). The default is "Claims." If you want to search by claim line, select "Lines" from the Show drop-down list in the toolbar.
3. On the [Claim](#) tab, enter search criteria (or leave blank to return all records). Click the [Basic](#), [Advanced](#) or [Claim Input](#) tabs to specify additional search criteria, if needed.
4. Click **Search**.

The [search results](#) are displayed. The visible columns depend on the selected result set (Claim or Lines). You can use the Column Chooser to add additional columns to the results.

NOTE If your system administrator restricted access to claims with sensitive diagnoses, and you do not have the appropriate permissions to view these claims, the search results do not display the details for claims with sensitive information. If you click a Claim with sensitive information, the View page does not display and you receive an informational message. For more information, see "Restrictions on Sensitive Claims, Service Authorizations, and Service Agreements" in *Vol. 1: Getting Started*.

5. To view the claim or line, do either of the following:
 - Double-click a row in the list.
 - Select a row in the list, and then click **View**.

The [Claim View page](#) for the claim or line displays in the current page. If you requested the results by line, clicking a row displays the claim's Lines tab with the particular line expanded.

6. To edit the claim record, click **Edit**.

If the claim is in the Review and Repair Workbasket, or the Repricing Workbasket, a confirmation dialog is displayed asking if you want to work with the version of the claim that is in the workbasket. Click **Yes** to continue.

The [Edit Claim page](#) is displayed.

7. To export search results to a Microsoft Excel workbook, click **Export**.

The Export Search Results To a File page is displayed.

Editing Claims

This explains how to edit entry fields for claims.

Claims with a Status of Final, Denied, Needs Review, Needs Repair, or Needs Repricing can be edited using the procedure in this chapter. Optionally, if you want to review or repair claims, see ["Claim Review and Repair Workbasket" on page 4-4](#).

Claims that have been rejected cannot be edited.

For more information see the following topics:

- [How to Edit a Claim](#)
- [Approving Review Codes on an Edited Finalized Claim](#)
- [Adding and Removing Case References to Claims](#)

You can also deny a claim from the Edit Claim page (see ["Working with Claim Denials" on page 2-47](#)).

If you need to adjust financial information on a final or denied claim, use the Adjust Financials feature on the Claims View page (see ["Adjusting Claims Financials" on page 2-42](#)).

How To Edit a Claim

To edit a claim, do the following:

1. Search for and select the claim you want to edit. For more information about conducting searches, see ["Claims Search Page" on page 3-86](#).

Chapter 2: Claims Tasks

2. Select a record and click **Edit** on toolbar. The Edit Claim page is displayed.

| Name | Ignored | Expired | Created |
|---------------------|---------|---------|---------|
| No exceptions exist | | | |

3. If applicable, modify the general information on the top of the page. The following fields can be edited:
- **Benefit Plan Type** — Indicate if you want the claim to process using a medical or dental plan.
 - **Send to Review** — Select this checkbox to send the claim to the Review workbasket.
 - **Encounter** — Select this checkbox to mark the claim as an encounter.
 - **Manually Applied Interest** — Indicates that the interest has been manually overridden by adding information in the Interest Override section.
 - **Manually Priced** — Deselect the checkbox if it is checked, otherwise you cannot submit and re-process the claim.
 - **Claims Source** — Indicate the source of the claims, for example, External system medical claim, or some other user-defined code entry.
4. Modify the claim fields on the Header tab.

NOTE When you open a claim, you cannot edit the financial fields; they are calculated automatically when the claim is submitted.

Navigating Claims Using the Tab button

Optionally, you can use the [Tab] key to navigate through the claim sections. If the section is currently expanded, pressing [Tab] will move to the next field in that section. If the section is collapsed, pressing [Tab] will go to the next section.

Some Sections will default to collapsed if the section has not been set, even when there is submitted data present. For example, if the Supervising Practitioner is not set, then that section is collapsed.

Sections and Fields

Each of the sections (panels under the Header Tab) are summarized below.

| Section/Panel | Description |
|-----------------------|---|
| (General Information) | Claims header information. You can edit the submitted payee, date received, patient account number, medical record number, clearinghouse trace number, trading partner ID, external claim ID, and external batch number, if applicable. Other fields are display only. |
| Member | <p>Edit information about the member associated with this claim. You cannot change individual fields, but you can click the Search button to select a different member ID. The new member information then replaces the information in the fields.</p> <p>The ID prefix can be used to validate the claim during adjudication by using an operational provision in HealthRules Designer that requires matching the entered ID Prefix with the ID prefix specified in the Benefit Plan Selection.</p> <p>The Name and Account fields are hyper-linked so you can easily display additional subscriber and account information.</p> |

| Section/Panel | Description |
|---------------------------|---|
| Provider | <p>To edit the current supplier, click the Edit Provider Section command. You can use the Search button to search for and select a different provider. To change the supplier classification (provider taxonomy) and/or the supplier location, select the new Location and/or Classification from the drop-down lists. You can specify the pay-to address and change the practice address, if applicable.</p> <p>The Submitted Supplier Information section displays information from the supplier invoice, including the supplier name and address, and can also be changed using the Edit Supplier Section command.</p> <p>Note: If only the supplier is specified, the classification drop-down list will show all classifications associated with the supplier. If a location is specified, the classification drop-down list will show only classifications associated with the specified supplier location.</p> |
| Dental Claim Information | For dental claims only. Edit fields related to dental treatment. |
| Rendered Services Address | You can edit the address information for the services rendered. Selecting the "Ignore Address Check" checkbox bypasses address validation by the system. |
| Manual Override | <p>Allows to manually override the payee assigned to the claim, re-direct the payment to the subscriber or supplier, or manually add one or more alternate benefit rules and apply to the claim.</p> <p>Note: For Dental claims, you can use dental information from the original claim line or provide specific tooth, surface or cavity information to use with the alternate service code. You must always select a tooth number, letter or range of teeth when entering</p> |

| Section/Panel | Description |
|------------------------------|---|
| | <p>information about a tooth surface.</p> <p>The manual rules override rules defined in the "Alternate Benefit" provision on the benefit plan component. However, if you select the Bypass Alt. Benefit Rules checkbox setting on the claim line, the claim bypasses all alternate benefit rules, including the manual rules on the claim header. You can remove the manual rules, sort the order for applying the rules as necessary (see "Manually Apply Alternate Benefit Rules" on page 2-69).</p> |
| User Messages | <p>Displays messages that have been entered for the claim. For example, if a claim was denied, a message entered about the denied claim will display here.</p> <p>You can also add or delete user messages. Select the message to add from the drop-down list.</p> |
| Claim Notes | <p>The Claim Notes and Claim Lines Notes sections displays claim and line-level notes submitted via professional and institutional Electronic Data Interchange (EDI) claim transactions. The section also allows you to edit the note information as needed, and add and delete notes.</p> |
| Additional Information | <p>In this section, you can enter additional information, including if the condition is related to auto, work, or other injury, if there is another benefit plan, when the condition began, whether or not a release signature was provided, and more. You can also specify a service authorization to further define the condition.</p> |
| Accident/
Emergency Dates | <p>Professional and Institutional claims only. Used to enter dates of a prior occurrence, a date range of missed work, and a date range for the hospital stay.</p> |
| Ambulance | <p>Institutional claim only. Ambulance information,</p> |

Chapter 2: Claims Tasks

| Section/Panel | Description |
|-----------------------------|---|
| | including the type of trip, reason and transport information. Also, you can enter one or more member conditions to define the ambulance experience. |
| Other Insurance Information | Used to record other insurance information, including amount due and prior payments, subscriber information, employer name and address, and insurance company name and address. |

5. Click the **Lines** tab and use the different views from the drop-down list to select the line you want to edit.

You can only edit the claim line in the Classic view, but you can use the Pricing view and the Benefits view to help determine which claim line you want to edit.

Note that pricing totals, Coordination of Benefits, Benefit Adjudication Details, and Pricing Details contain all calculated fields that cannot be edited.

You can edit an existing line or click **Add** to add an entire new line of claims information. When you click **Add**, a copy of the previous line is made. This helps speed the data entry process. Carefully go through each section to ensure accuracy.

Each of the lines sections (panels under the Lines Tab) are summarized below.

| Section/Panel | Description |
|-----------------------|--|
| (General Information) | <p>At the top of this section, you can select the applicable checkboxes to exclude the claim from reinsurance and from bundling with other claims.</p> <p>You can change or delete the Clean Claim Date. If you have multiple lines on a claim, a message will be displayed prompting you to populate all lines with the new or deleted date. If no clean claim date exists on claim lines, no interest can be calculated for the claim.</p> |
| Lines Details | <p>Indicate the dates of service, Procedures/services/supplies, and associated charges, NDC Codes, external and repricer messages if applicable, diagnosis codes, rendering practitioner, identified cases, override information including amounts, denials and included or excluded cases, pricing, and more.</p> |
| Other Insurance | <p>If applicable, enter other insurance information.</p> |

- To perform manual overrides to multiple claim lines, including changing/deleting the Allowed Amount, adding/removing denial messages, and adding/removing override denial reasons, click **Manual Override** on the toolbar (see ["Apply Manual Overrides to Multiple Claim Lines" on page 2-64](#)).
- Preview the adjudication results by clicking the **Preview Result** toolbar button. The system processes the claim, computes the dollar values, and identifies any errors or exceptions that may exist on the claim.

8. If there are still issues to resolve, you can continue editing the claim and click **Preview Results** again to update the view.

If you have the correct permissions, and you have made edits to a finalized claim, you may be allowed to approve your changes by clicking the **Approve** button (see ["Approving Review Codes on a Finalized Claim" on page 2-30](#)).

9. To edit UDTs, click the Claim UDT tab or Line UDT tab. Make any necessary changes.

NOTE A claim UDT or claim line UDT must first be created and configured through HealthRules Designer to be available on the Claim UDT tab or Line UDT tab.

When finished editing claims information, you can either Cancel, send the claim to the Work In Progress workbasket, or Submit the claim for processing.

10. To add or edit attachments on the claim, click the **Attachments** tab.

11. To cancel your changes, click **Close**.

A dialog displays asking if you want to cancel and lose your changes. Choose one of the following:

- **Yes** to discard changes and close the Edit Claim page.
- **No** to discard changes and re-display the Claim Edit page so you can continue to make changes.
- **Cancel** to cancel the Close request and return to the opened claim with all changes intact.

12. To send the claim to the Claim Work in Progress workbasket, click **Work in Progress** on the toolbar. The Edit Claim page closes and the claim is placed in the WIP workbasket.

13. To submit the edited claim for adjudication, click **Submit**.

NOTE The above reissue payments dialog is only displayed if you have Amend-Payment permission.

Remember, if you do not have the Amend-Payment permission, you will not be prompted to reissue any payables associated voided or stopped payments for this claim. When denying a claim, or changing the supplier on a claim, a receivable is automatically created, but any pending payables from voided or stopped payments are not automatically reissued. If you have voided the

payment associated with the claim, you will need to notify someone with Amend-Payment permission to reissue the payables.

NOTE Edits can be saved without reissuing the voided or stopped payments, the only limitation is that the adjustments created will not be picked up by the next payment cycle until the payments are reissued.

14. Select the claim payables you want to reissue by selecting the Reissue checkbox corresponding to the claim (or select the "Reissue All" checkbox to reissue all claim payables- see above).

NOTE Note that this feature does NOT create a new payment. It releases the claim payables on the voided or stopped check for the selected claim and makes them available to be picked up by the next payment cycle run.

15. Select the date the system should use to calculate interest on the reissued payment from the drop-down list. Select either "Original Payment Date" or "Reissue Payment Date."

The "Original Payment Date" is the payment date of the voided check you are currently reissuing. The "Reissue Payment Date" is the date of whichever payment in the future picks up the reissued payables.

NOTE If a claim payable is on a check which is voided and reissued, and then the next check is voided, when reissuing the second check the "Original Payment Date" refers to the payment date on the voided check being reissued, that is, the second one.

16. Click **Reissue Payment**.

The payables for the selected claims are reissued (released for pick up by the next appropriate payment cycle run), and the Reissued Status column shows "Reissued."

NOTE You can only reissue payables associated with the currently selected claim. If there are payables for other claims on the voided or stopped check, then the check will be in a partially reissued state.

- On the Select Reason Code dialog, select a reason code from the “Reason Code” drop-down, enter an optional comment, and click **OK**. The application processes the claim and saves it to the database.

Approving Review Codes on a Finalized Claim

When editing a finalized claim, if the changes you make result in triggered review codes, when you click **Preview Results**, the review codes will be displayed in the Review and Repair Exceptions area on the right side of the window. If you have permission, you can click **Approve** and approve one or more of the review codes. This eliminates the need to submit the claim, and then access the Review and Repair workbasket to approve review codes there.

To approve review codes on an edited finalized claim, follow these steps:

- Make edits to a finalized claim that result in triggering one or more review policies.
In our example, there are two policies triggered.
- Click the **Preview Result**.

Any resulting exception review messages are displayed on the right side of the window. The **Approve** button is displayed in the upper left corner of the screen.

The screenshot displays the Claims Management application interface. At the top, a blue navigation bar contains buttons: Submit, Preview Result (active), Deny Claim, Manual Override, Work In Progress, View Input, and Close. Below the navigation bar, the claim details are shown in a grid:

- Claim ID:** 2017495371800
- Last Changed On:** 3/13/2025 4:08:35 PM
- Estimated Preview Time:** < 1 sec
- Status:** Rejected
- Adjudicated On:** 4/15/2025 2:24:54 PM
- Claim Type:** Institutional
- Benefit Plan Type:** Medical
- Calculated Benefit Plan Type:** Medical
- Claim Source:** Unknown
- Options:** Manually Priced, Send to Review, Trial Claim, Capitated Service, Renewed Claim, Voided Claim, Locked Claim.

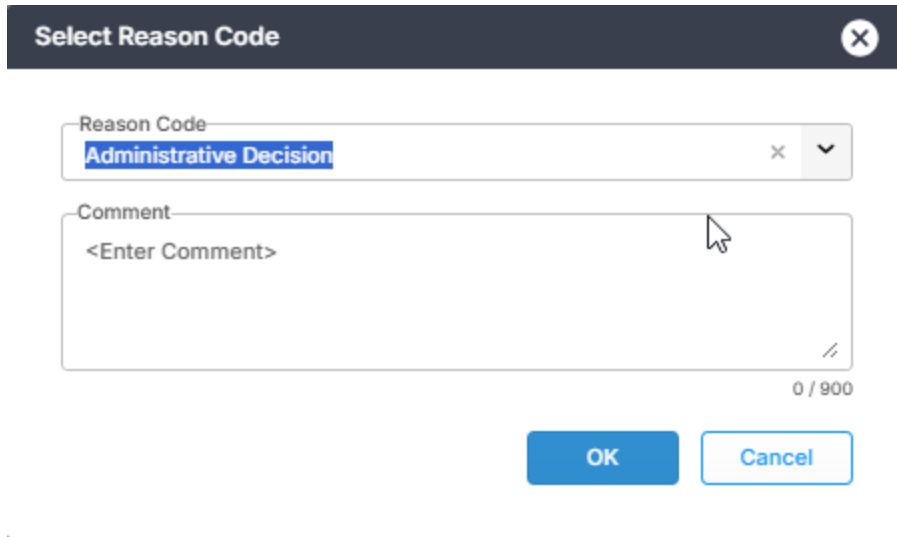

Below the claim details, there are tabs: Header, Lines, Summary, Totals, COB, Repricer Outputs, Attachments, Episodes of Care, Claim U, and More. The **Header** tab is selected, showing a form with various fields for claim information, including Payee, Claim Payor, External Batch #, Submitted Payee, Supplier, Date Received, Date Entered, Patient Account #, Medical Record #, Clearinghouse #, Submitter Name, Claim Filing Code, Submitter ID, External Batch Seq. #, External Claim ID, Ext. Cross Ref. Claim ID, Submitted Subscriber ID, Pay-to-Plan Primary ID, Underpayment Notification, RAP/NOA Received Date, and Split Claim ID.

On the right side of the window, there is a sidebar with a list of review codes:

- Expand All**
- Name**
- Header**
- Reject Exceptions (1)**
- Line 1**
- Repair Exceptions (1)**

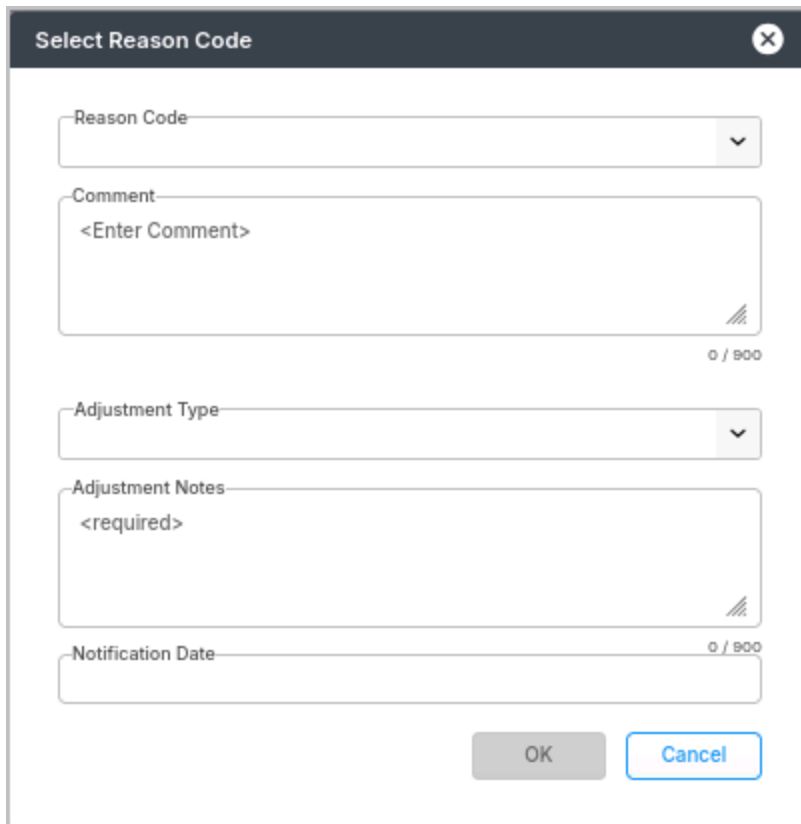

3. Click the **Approve**.

The Select Reason Code dialog is displayed.

The image shows a 'Select Reason Code' dialog box. It has a dark header bar with the title 'Select Reason Code' and a close button (X). Below the header, there is a 'Reason Code' field with a dropdown menu. The dropdown is open, showing 'Administrative Decision' as the selected option. Below the dropdown is a 'Comment' text area with a placeholder '<Enter Comment>'. A mouse cursor is pointing at the text area. At the bottom right of the text area, it says '0 / 900'. At the bottom of the dialog, there are two buttons: 'OK' and 'Cancel'.

If "Enable Adjustment Type" provision is enabled in the HealthRules Designer, the Select Reason Code dialog is displayed with **Adjustment Type**, **Adjustment Notes** and **Notification Date** fields. This will clearly identify the reason for the rework and for more precise tracking and reporting.

The dialog box is titled "Select Reason Code" and has a close button (X) in the top right corner. It contains five input fields: "Reason Code" (a dropdown menu), "Comment" (a text area with a placeholder "<Enter Comment>" and a character count "0 / 900"), "Adjustment Type" (a dropdown menu), "Adjustment Notes" (a text area with a placeholder "<required>" and a character count "0 / 900"), and "Notification Date" (a date field). At the bottom, there are two buttons: "OK" and "Cancel".

NOTE The **Adjustment Type**, **Adjustment Notes** and **Notification Date** fields will only appear when amending the Final/Denied claims.

4. Select a reason for your edits to the claim and click **OK**.

The Approve Review Code dialog is displayed. One or more codes that require review are listed on the dialog.

5. In the Approve column, enter a checkmark next to each code you want approve.

To select all review codes for approval, click the **Select All**  button at the bottom left of the dialog.

To remove all codes from selection, click the **Remove All**  button.

6. When the codes you want to approve are selected, click **OK**.

If all review triggers have been selected, the Approve Review Codes dialog and the Edit Claim window are closed, and the View Claim window is displayed. See step 7.

If you did not select all available review triggers for approval, the Unapproved Review Triggers Dialog is displayed. It prompts you with the question, "Do you want to keep ownership of this claim?"

Indicate whether or not you want to be assigned to the claim. In either case, the claim is sent to the Review and Repair workbasket, and the View Claims window is displayed.

7. On the View Claims window, click the **Exceptions** tab.

You can see the results of your Approved reviews. Any approved codes are displayed in green text. Any remaining codes that require approval are displayed in red.

Adding and Removing Case References to Claims

You can add or remove a reference to a case (or multiple cases) in the Manual Override section of the Edit Claim page. When you add a case, the claim line adjudicates against the claim the same as if it had automatically matched the case itself.

If you manually remove a case, when the claim is re-adjudicated, it is removed from the Benefit Adjudication Details section and removed from consideration in processing the claim.

Capture Secondary Claims Editing Recommendations

NOTE This section *does not apply* to integration with ClaimsXten and CES primary claims editors. For more information about secondary claims editing integration, see the HealthEdge document, *Secondary Claims Editing Integration*.

Users with appropriate permissions can edit a claim with the status "Waiting for External System" and use the new **Change Recommendation** button to manually apply recommendations obtained from an external editor. Recommendations will be applied to the claim after the claim has been released and is re-adjudicated. If a user does not have the permission that is required to work on these claims, the user can view the claims, but cannot edit or release them.

Manual application of recommendations is available for situations in which an automated update process has not been set up or is off-line. For example, if connectivity for automatic updates from the external editor is lost, and you need to immediately update a claim with the external editor recommendation received by an alternate method (such as e-mail), you can do so manually using the new Change Recommendation dialog.

The following pre-defined, standardized, claims editing recommendations can be captured on lines of a claim that's in the "Waiting for External System" status:

Chapter 2: Claims Tasks

- Apply percentage (pay percent) - Reduce the claim line allowed amount by a recommended percentage
- Deny line
- Partial deny - Reduce units on claim line

The following (optional) information can be captured along with a claim line recommendation:

- Up to three reason codes that explain or justify the recommendation (free text)
- Free-text comments for each reason code
- For Deny (line) recommendations, a denial message code (from the HealthRules UserMessageDomain) can also be specified to use as a customer-specific denial message for the denied line. If no message is specified, HealthRules Payer will use its own default system denial message.

NOTE If both a system denial message and a user denial message show up on a denied line, you can set the "Messages to Apply When User Message is Configured for Denial" operating provision, at the HCC level, to suppress the system message and only show the user message, if desired (see the *HealthRules Designer Guide, Vol. 4: Operating Provision Reference*.)

- For Partial Deny (line) recommendations, a denial message code (from the HealthRules UserMessageDomain) can also be specified to use as a customer-specific denial message for the denied line.
- For Pay Percent recommendations, a user message code (from the HealthRules UserMessageDomain) can also be specified to use as a customer-specific message for the recommended percentage change on the line.

After you finish capturing recommendation information on a claim and click **OK** to close the Change Recommendations dialog, the system will release the claim from its "Waiting for External System" status and re-adjudicate the claim for finalization.

NOTE Clicking the **OK** button to close the new Change Recommendations dialog will immediately release the claim for re-adjudication; you do not need to click the **Submit** button. If you need to make other edits to the claim besides capturing external editing recommendations, make those other changes first before using the Change Recommendations dialog. Clicking the **Cancel**

button on the Change Recommendations screen will not submit the claim, it will simply close the Change Recommendations screen.

Important Notes:

Claims that do not require any external edits can be handled as follows:

- If an individual claim line does not have any recommendation associated with it, you do not have to enter any recommendation information on the line; no recommendation will be applied when the claim gets released and re-adjudicates.
- If none of the lines on a stopped claim have any recommendations associated with them (that is, the claim can be processed “as is”), you can simply submit the waiting claim without entering any recommendation information by clicking the **Submit** button. HealthRules Payer will release the claim and re-adjudicate it. The date and time the claim was released from its “waiting” status will still be captured on the claim header, as well as in the claim’s audit log.

How to Capture External Editing Recommendations

To manually capture a recommendation from an external editor, do the following:

1. Edit the claim. Make any non-recommendation related edits to the claim, if needed.
2. Click **Change Recommendation**.

The Change Recommendation dialog is displayed.

NOTE Replaced, rejected, and split lines are not displayed on this dialog.

3. To deny all lines on the claim, select **Deny all lines**, and then click **OK**.

or

To deny selected lines, click the <Select Action> drop-down on the line you want to deny, and select “Deny Line.” The list shows all denial messages from the UserMessageDomain code set. The selected message code will be displayed on the claim line.

or

To apply a percentage (recommended percentage by which the allowed amount should be adjusted), click the <Select Action> drop-down on the line you want to change, and select "Apply Percentage." Then enter the percentage change amount in the Percentage field. For example, if the recommendation is to pay only 25% of the allowed amount, enter "25" in the Percentage field.

or

To partially deny a line, click the <Select Action> drop-down on the line you want to partially deny, and select "Partial Deny." Enter the number of adjusted units for the line in the Adjusted Units field. For example, if the original line had five units of service but the recommendation is to only allow three units, enter "3" in the Adjusted Units field.

NOTE If you click the **Times** icon in the Action field, any values previously entered on the line will be cleared.

4. If you want to enter a reason code (mnemonic) and comments, click the **Plus** icon below the Add Reason column.
5. Enter the mnemonic and comments in the corresponding fields. Click **OK**.

To delete a mnemonic and comments, click the "X" in the corresponding Delete field.

6. If desired, select a Deny Message (for Denial or Partial Deny) actions, or a User Message (for Apply Percentage actions), by selecting a user message code entry (defined in the UserMessageDomain code set) from the Deny Message or User Message drop-down list.
7. Repeat Steps 3 through 6 for any other lines you want to deny or change.
8. When finished, click **OK**

The Change Recommendations dialog will close and the claim will be submitted.

or

If you click **Cancel**, the Change Recommendations dialog will close, and the claim will be submitted. Any recommendations you might have entered will be discarded.

Once submitted, HealthRules Payer will release and re-adjudicate the claim, applying any recommendations indicated on the claim. The claim will not stop again to wait for further external claims integration/editing. The date and time the claim was released from the "waiting" status is captured on the claim header under the "External System Processing Results" section, and in the claim's audit log.

Claims that are denied while in edit mode are released and resume the normal processing for denied claims. They do not stop again for additional external edits after re-adjudicating.

Re-Sending Already-Processed Claims Back to the External Editor for Re-Editing

In some cases, it may be necessary to re-send an already-processed claim back to the external editor for re-editing. In these cases, you may also need to flag certain lines not to be re-edited.

For example, suppose a claim has been sent to the external editor and processed, but the provider appeals certain edits applied by the external editor. The Health Care Company may decide to reprocess the claim without those edits to honor the appeal (but still apply other edits). To support this scenario, HealthRules Payer allows you to re-send a previously edited claim back to the external editor for re-editing, while flagging certain lines not to be re-edited.

Once you have selected to re-send a claim to the external editor, and selected the lines to exclude from re-sending, the claim is placed back in a “Waiting for External Editor” status.

If you need to re-send an already-processed claim back to an external editor for re-editing, and make a change to an external editor recommendation you must use a two-stage process. First, you must re-send the claim to the external editor, specifying any lines you do not want to re-send. This claim is then placed in a Waiting for External Editing status. Second, you must apply any external editing change recommendations to the claim.

To re-send a claim to an external editor, do the following:

1. View the claim you want to re-send to external editing.
2. Click **Resend**.

The Resend to External System dialog is displayed.

3. If there are any claim lines you do not want to re-send for external editing, select the corresponding checkbox(es) in the Exclude Line column. To exclude all lines, select the Exclude All Lines checkbox.

Note that if you display line detail for any line that has been flagged not to send to the external editor, the “Exclude From External Claim Editing” checkbox will be selected.

4. Click **Resend**.

The Select Reason dialog is displayed.

5. Select a reason code and enter an explanatory comment. Then, click **OK**.

The claim is re-displayed. Notice that the status is now "Waiting for External System."

If you need to make manual change recommendations to the external edits, proceed with Steps 6 through 8.

6. Click **Change Recommendation**.

The Change Recommendation dialog is displayed.

7. Select the line you are re-sending to the editor and make your change recommendations. For more information, "Manual Application of External Editing Recommendations" on page 4.

Notice that you cannot select lines you previously selected to not sent to the external editor.

8. Click **OK**.

The Select Reason Code dialog is displayed.

9. Select a reason code and enter an explanatory comment. Then, click **OK**.

The claim is re-displayed. Notice that the status is now "Final."

If you select the re-send button again, you will see that the line to be re-sent now has the manually applied change recommendation, and the lines you specified not to re-send are shown as excluded.

Removing and Reinstating Informational Messages

You can remove an informational message (not denial messages) from a claim line while editing the line. When you remove the message, it is retained in the Manual Override > Removed Informational Message(s) section of the claim line. If you want to reinstate the message, you can delete it from this section.

To Remove an Informational Message

1. Open the claim for which you want to remove the informational message from a claim line for Edit.
2. Expand the line you want to work with.

Chapter 2: Claims Tasks

3. Scroll down to the Message Codes section.

The screenshot displays the HealthEdge Claims Task interface. At the top, there is a navigation bar with tabs: Submit, Preview Result, Deny Claim, Manual Override, Work In Progress, View Input, and Close. Below the navigation bar, the main content area is divided into several sections. On the left, there are input fields for Claim ID (121), Status (Final), Claim Type (Institutional), Benefit Plan Type (Medical), and Calculated Benefit Plan Type (Medical). There are also checkboxes for Manually Priced, Send to Review, Trial Claim, Capitated Service, Renewed Claim, Voiced Claim, Claim Source (Unknown), and Locked Claim. On the right, there is a table with columns: Name, Ignored, and Expired. The table contains one row with the text "No exceptions exist". Below the table, there is a section titled "Message Codes" with a red box highlighting the first row. The first row has Message Code 521, Description "Appeal upheld", and a "Delete" button. The second row has Message Code 147, Description "Services rendered by an out of network provider.", and a "Delete" button. The third row has Message Code 27, Description "Coinsurance Amount", and a "Delete" button. Below the Message Codes section, there is a "User Messages" section.

| Name | Ignored | Expired |
|---------------------|---------|---------|

| 147 | Services rendered by an out of network provider. | Delete |
| 27 | Coinsurance Amount | Delete |

4. Click the **Delete** control to the right of the message you want to remove.
5. Click **Submit**.
6. On the Claim View screen, navigate to the claim line and Messages section to see that the message is no longer displayed. Messages are not permanently removed.
7. Now scroll down to the Manual Override Detail section of the line.

8. Expand the Removed Informational Message(s) section to see the message that was removed.

To Reinstate a Removed Message

To move the informational message back to the Message Codes section of the claim line, you can edit the claim line, open the Removed Informational Message(s) section, and click the Delete control next to the message you want to move back. When you submit the claim, the informational message will be returned to the Message Codes section.

NOTE Currently, this feature is not available from the Claim level Manual Override feature.

Messages Removed via Financial Adjustment

Removing an informational message via the Financial Adjustment operation does not retain the message. It is not saved in the Removed Informational Message(s) section.

Split Lines with Common Messages

When informational messages are common to multiple split lines, such as 1.1, 1.2, 1.3 and so on, removing a message from a split line, removes the common message from all split lines and places the removed message in the Removed Informational Message(s) section on the original line (base line), in this example line 1. To return the informational message to the split lines, you can delete it from the Removed Informational Message(s) section in the original line.

Manually Edit Service Authorizations Associated to a Claim Line

Depending on how a provider submitted the claim, the member's claim may not automatically match to the necessary service authorization. When a service authorization does not match to a claim automatically, HealthRules Payer denies the claim line because the service authorization is missing. When you have the appropriate permission (AuthServiceSetOverride), you can manually assign a service authorization to a claim. You can also replace a service authorization on a claim with a different service authorization.

Manually Edit Service Authorizations Associated to a Claim Line

If HealthRules Payer is not able to match to the expected service authorization, you may have to manually assign it to a claim.

1. Search for and select the claim you want to edit (see ["Claims Search Page" on page 3-86](#)).
2. Select the claim you want to edit, then click **Edit**.

The Edit Claim page is displayed.

3. Click the **Lines** tab.
4. Expand the claim line you want to edit.
5. Expand the **Manual Override** section.
6. Next to the Service Authorization field, navigate **Search > Look up**.

The Resolve Service Authorization screen is displayed. By default, service authorizations associated with the member are shown.

7. Search for the service authorization you want to associate with the claim line.
8. Select the service authorization you want to assign to the claim, then click **OK**.

The Resolve Service Authorization screen closes and the Service Authorization ID populates the Service Authorization field in the Manual Override section.

9. Make any additional edits to the claim.

10. Click **Preview Result** to preview the result of the adjudication process, or click **Submit** to submit your changes.

Adjusting Claims Financials

Adjust financials allow you to override dollar amounts on a claim. With that, validation policies will be evaluated during both the Preview and Submission actions of the "Adjust Financials" process to ensure that payments are processed accurately. The "Adjudicated On" date will also be updated accordingly.

This chapter describes how to adjust financials on a claim.

Most financial information is adjusted at the claim line level. An exception is that you can add or edit information in the Claim Fee section in both the claim header, and on the External System Claim (label corresponds to an external claim source name) tab, if available.

Claims with a status of Final or Denied can be adjusted using this procedure. You cannot adjust financials on claims that need repair or that have been rejected. You cannot adjust financials using the Open for Edit function; you must use the Adjust Financials function.

You can also adjust financials on a claim needing review from the Claim Review and Repair Workbasket page.

To adjust claims financials, do the following:

1. Locate the claim you wish to adjust by searching for the record and viewing it, from one of the following pages:
 - [Claim View page](#)
 - [Claim Review & Repair Workbasket](#)
 - [Claim Work in Progress Workbasket](#)

For more information about conducting searches, see *the HealthRules Manager Guide, Vol. 1: Getting Started*.

If you selected a claim in a workbasket, the Claims detail for the selected claim fills the top portion of the page.

Chapter 2: Claims Tasks

The screenshot displays the 'Claims Tasks' interface with the 'Header' tab selected. The top toolbar includes buttons for 'Close', 'Add Comment', 'Open for Edit', 'Adjust Financials', 'Deny', 'Cancel', and 'View Input'. Below the toolbar, there are input fields for 'Claim ID' (1741319879700), 'Last Changed On' (3/6/2025 10:57:58 PM), 'Status' (Needs Review), 'Adjudicated On' (3/6/2025 10:57:58 PM), 'Claim Type' (Dental), 'Benefit Plan Type' (Dental), 'Calculated Benefit Plan Type' (Dental), 'Claim Source' (Unknown), 'Estimated Preview Time' (< 1 sec), 'Assigned Group' (hcc_super_user), and 'Assigned Owner' (hcc_admin). The 'Lines' tab is also visible in the header. The main content area shows a table with columns for 'Claim ID', 'Claim Type', 'State', 'Review/Repair Reason', 'Member Name', 'Service Start Date', 'Receipt Date', 'Edit', and 'View'. The table contains three rows of data. The bottom status bar indicates 'Total assigned to user: 17'.

| Claim ID | Claim Type | State | Review/Repair Reason | Member Name | Service Start Date | Receipt Date | Edit | View |
|---------------|--------------|--------|---|-------------------------|--------------------|--------------|------|------|
| 1741322035900 | Professional | Repair | The claim was submitted with an inva... | 1741322035, CypressT... | 3/3/2025 | 3/5/2025 | | |
| 1741286466900 | Professional | Repair | Service unit count may not be null | 1741286466, CypressT... | 3/3/2025 | 3/5/2025 | | |
| 1741319879700 | Dental | Review | Claim is manually marked as requir... | 1741319879, CypressT... | 3/3/2025 | 3/5/2025 | | |

2. Click **Adjust Financials** in the toolbar.

The Adjust Financials page for the selected claim is displayed.

The screenshot displays the 'Adjust Financials' page for the selected claim. The top toolbar includes buttons for 'Approve', 'Preview Result', 'View Input', and 'Close'. The main content area shows the 'Header' tab selected, with input fields for 'Claim ID' (1741319879700), 'Last Changed On' (3/6/2025 10:57:58 PM), 'Status' (Needs Review), 'Adjudicated On' (3/6/2025 10:57:58 PM), 'Claim Type' (Dental), 'Benefit Plan Type' (Dental), 'Calculated Benefit Plan Type' (Dental), 'Claim Source' (Unknown), 'Estimated Preview Time' (< 1 sec), 'Assigned Group' (hcc_super_user), and 'Assigned Owner' (hcc_admin). The 'Lines' tab is also visible in the header. The main content area shows a table with columns for 'Claim ID', 'Claim Type', 'State', 'Review/Repair Reason', 'Member Name', 'Service Start Date', 'Receipt Date', 'Edit', and 'View'. The table contains three rows of data. The bottom status bar indicates 'Total assigned to user: 17'.

| Claim ID | Claim Type | State | Review/Repair Reason | Member Name | Service Start Date | Receipt Date | Edit | View |
|---------------|--------------|--------|---|-------------------------|--------------------|--------------|------|------|
| 1741322035900 | Professional | Repair | The claim was submitted with an inva... | 1741322035, CypressT... | 3/3/2025 | 3/5/2025 | | |
| 1741286466900 | Professional | Repair | Service unit count may not be null | 1741286466, CypressT... | 3/3/2025 | 3/5/2025 | | |
| 1741319879700 | Dental | Review | Claim is manually marked as requir... | 1741319879, CypressT... | 3/3/2025 | 3/5/2025 | | |

The Header tab is open by default.

Chapter 2: Claims Tasks

3. If applicable, for external system claims, in the Claim Fees section, you can adjust the Fee Type, Fee Amount and/or Fee percentage.

NOTE If the External System Claim (user-defined label) tab is available, you can also add or edit Claim Fees there.

6. Make your applicable changes to the editable fields in the Pricing section to adjust financials.

2-44

HealthEdge

Chapter 2: Claims Tasks

You can edit the Other Discount field, if required. If you add or remove an Other Discount amount, you may want to manually add a user message, or remove a system message, to reflect the change. The messages are not updated automatically when adjusting financials.

The “Interest Paid” field is present only if interest has been paid. You cannot edit the “Paid Amount,” “HCC Amount,” and “Member Responsibility” fields because they are calculated by the system.

These fields and the fields in the Totals tab are computed fields. To update them, click **Preview Results**.

NOTE When you adjust financials on a claim, capitated lines remain capitated and the ‘Paid Amount’ field is not editable.

7. If applicable, open the COB section and make changes to the coordination of benefits information. For example, you can change the secondary payment amount.
8. You can optionally add a user message to the line to indicate the reason for the adjustment. Open the User Messages section, click the **Add** link, and select the appropriate message from the drop-down.
9. For external system claims, in the Claim Line Fees section, you can adjust the Fee Type, Fee Amount and/or Fee percentage. If applicable, scroll down to the Claim Line Fees section. Here you can click **Add** link to add a new claim line fee, or you can edit existing claim line fees. Select a fee type from the drop-down list box, and then enter a fee amount and/or fee percentage, as applicable.

| ▼ Claim Line Fees | | | Add |
|-----------------------------|-----------------------|----------------|--------|
| Fee Type
State Surcharge | Fee Amount
\$12.00 | Fee Percentage | Delete |

10. Click **Submit** to save your changes and submit the claim.

If there are voided or stopped payments associated with the claim you are editing, and these payments have not been reissued, the Reissue Payments dialog is displayed.

NOTE The above reissue payments dialog is only displayed if you have Amend-Payment permission.

Remember, if you do not have the Amend-Payment permission, you will not be prompted to reissue any payables associated voided or stopped payments for this claim. When denying a

claim, or changing the supplier on a claim, a receivable is automatically created, but any pending payables from voided or stopped payments are not automatically reissued. If you have voided the payment associated with the claim, you will need to notify someone with Amend-Payment permission to reissue the payables.

NOTE Edits can be saved without reissuing the voided or stopped payments, the only limitation is that the adjustments created will not be picked up by the next payment cycle until the payments are reissued.

11. Select the claim payables you want to reissue by selecting the Reissue checkbox corresponding to the claim (or select the "Reissue All" checkbox to reissue all claim payables- see above).

NOTE Note that this feature does NOT create a new payment. It releases the claim payables on the voided or stopped check for the selected claim and makes them available to be picked up by the next payment cycle run.

12. Select the date the system should use to calculate interest on the reissued payment from the drop-down list. Select either "Original Payment Date" or "Reissue Payment Date."

The "Original Payment Date" is the payment date of the voided check you are currently reissuing. The "Reissue Payment Date" is the date of whichever payment in the future picks up the reissued payables.

NOTE If a claim payable is on a check which is voided and reissued, and then the next check is voided, when reissuing the second check the "Original Payment Date" refers to the payment date on the voided check being reissued, that is, the second one.

13. Click **Reissue Payment**.

The selected claim payable or payables are reissued (released for pick up by the next appropriate payment cycle run), and the Reissued Status column shows "Reissued" for the reissued rows.

NOTE You can only reissue payables associated with the currently selected claim. If there are payables for other claims on the voided or stopped check, then the check will be in a partially reissued state.

14. On the Select Reason Code dialog, select a reason code from the “Reason Code” drop-down, enter an optional comment, and click **OK**. The application processes the claim and saves it to the database.

NOTE As a result of the Adjust Financials operation, the system marks the claim as “Manually priced” and the claim is never automatically reprocessed again, unless you edit it and un-mark it.

Before clicking **Submit**, you can cancel your changes at any time by clicking **Close**. When you click **Close**, a dialog displays with the following options:

- **Yes** – Discards any changes and keeps this claim in the workbasket with ownership assigned to you.
- **No** – Discards any changes and removes your ownership to the claim; the claim remains in the workbasket.
- **Cancel** – Cancels your Close request and returns you to the opened claim with all changes still intact.

15. Select a reason for approving the claim and then click **OK**. The application processes the claim and saves it to the database.

Denying/Reverting a Claim Pricing Line

You can deny a claim line by clicking the **Deny** link on the right-hand side of the Pricing panel. When you click the **Deny** link, you are prompted to select a Denial Reason Code. All financial fields are set to zero and the fields become read-only.

If a line has been denied, you can revert the denial by clicking the **Un-Deny** link on the right-hand side of the Pricing panel. After you select an Un-Deny Reason Code, financial fields become enabled so you can enter the financial amounts manually.

Working with Claim Denials

You can deny a claim from the Claim Edit page, or from within several claim-related work baskets. When you select a Final or Need Review claim on the Claims - Work in Progress Workbasket page for example, the **Deny** toolbar button is enabled.

When you click **Deny**, all claim lines are denied at once, the selected denied reason message is written to all lines, and the claim is marked “Manually Priced”.

You can adjust the denial reason codes for a claim line and remove a claim line from denial, so that the accepted claim lines can be processed while the denied claim lines cannot. You can do this in the Manual Override section of each claim line, or you can change this information on *multiple* claim lines using the Manual Override button available on the toolbar of the Edit Claim screen.

You cannot deny a manually priced claim - you need to manually remove the check mark from that field first.

For step-by-step instructions, see how to:

- [Deny a Whole Claim \(All Lines\)](#)
- [Deny Individual Claim Lines](#)
- [Deny a Claim with Voided or Stopped Payments](#)
- [Change the Denial Reason on a Claim Line](#)
- [Remove a Denial Message on a Claim Line](#)
- [Apply Manual Overrides to Multiple Claim Lines](#)
- [Un-deny a Claim Line](#)

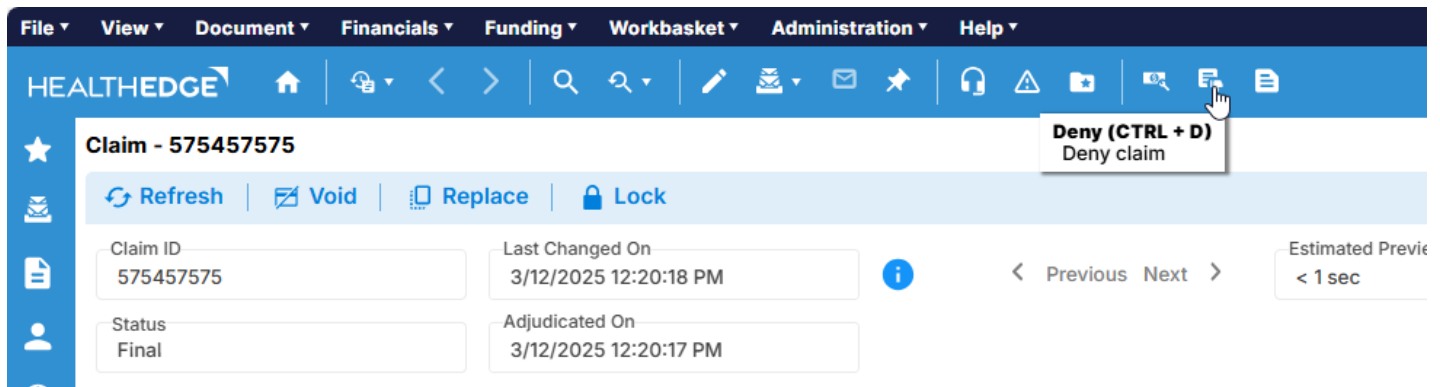

Deny a Whole Claim (All Lines)

To deny a whole claim (all lines on the claim), do the following:

1. Search for and select the claim you want to deny. For more information about conducting searches, see the ["Claims Search Page" on page 3-86](#)
2. Select the claim and click **View**.

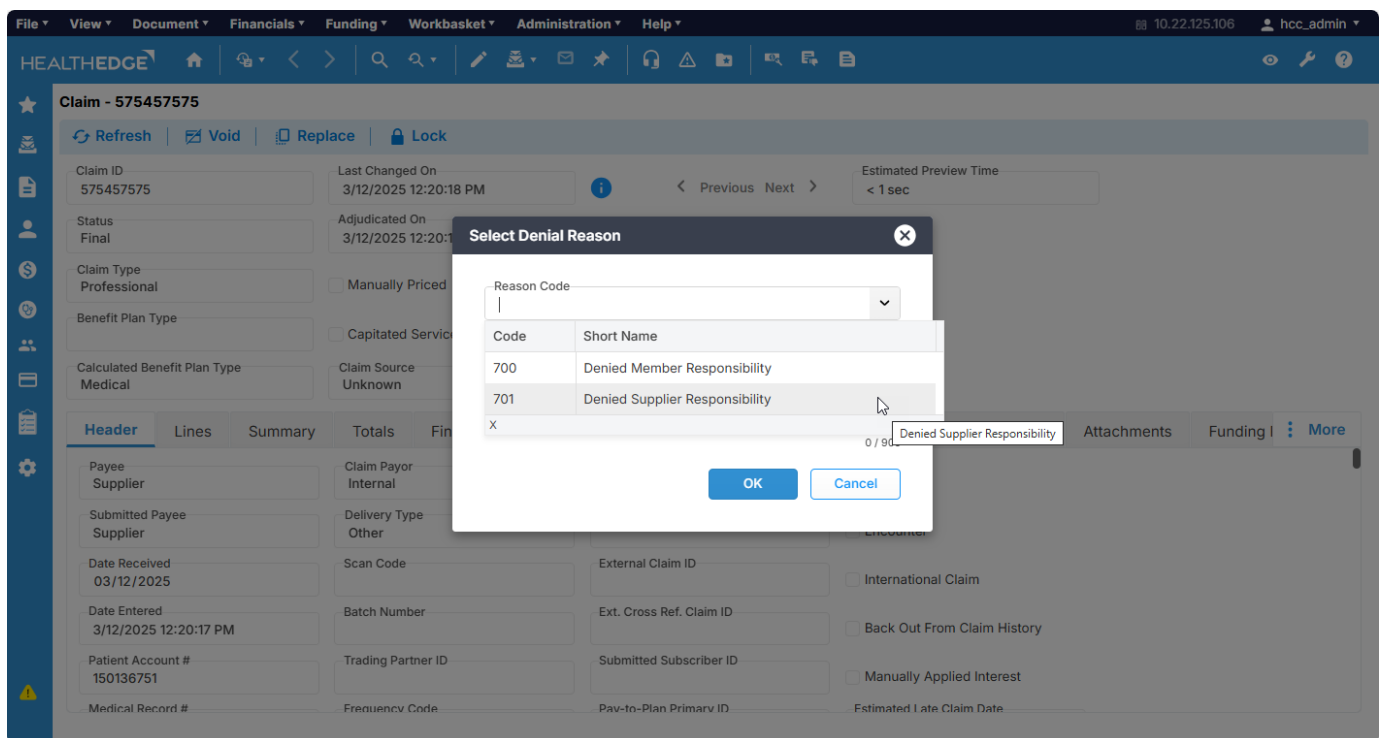

The [Claim View page](#) is displayed.

Chapter 2: Claims Tasks

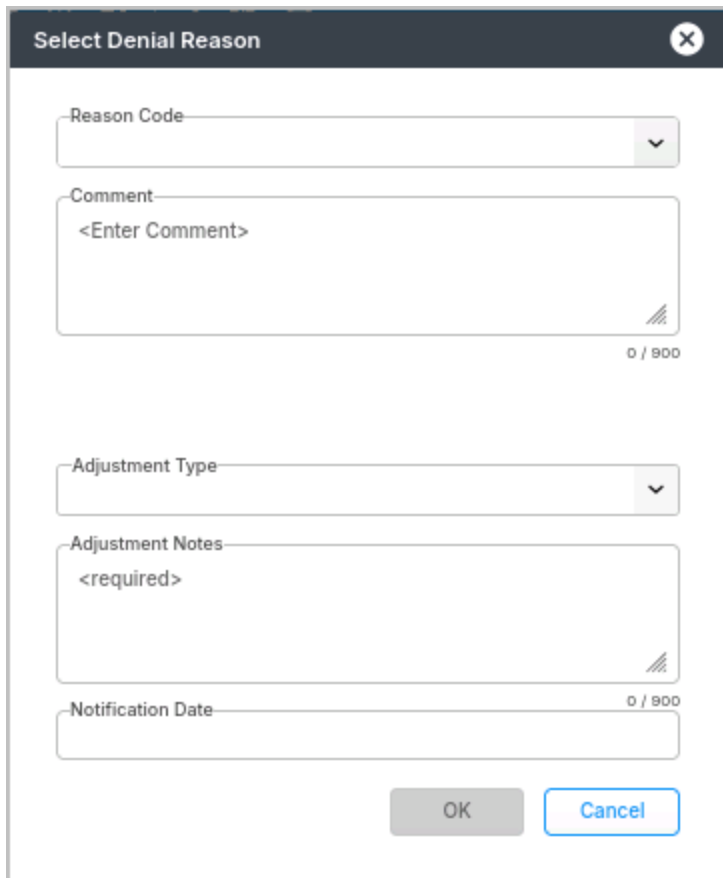

3. Click **Deny Claim** on the main toolbar.

The Select Denial Reason dialog is displayed.

If "Enable Adjustment Type" provision is enabled in the HealthRules Designer, the Select Reason Denial Reason dialog is displayed with **Adjustment Type**, **Adjustment Notes** and **Notification Date** fields. This will clearly identify the reason for the rework and for more precise tracking and reporting.

The image shows a 'Select Denial Reason' dialog box. It has a dark header bar with the title 'Select Denial Reason' and a close button (X). The main area contains several input fields: a 'Reason Code' dropdown menu, a 'Comment' text area with a placeholder '<Enter Comment>' and a character count '0 / 900', an 'Adjustment Type' dropdown menu, an 'Adjustment Notes' text area with a placeholder '<required>' and a character count '0 / 900', and a 'Notification Date' text field. At the bottom, there are two buttons: 'OK' and 'Cancel'.

NOTE The **Adjustment Type**, **Adjustment Notes** and **Notification Date** fields will only appear when amending the Final/Denied claims.

4. Select a denial reason from the drop-down list.

The Select Denial Reason drop-down list displays all denial reason code entries that have been set up in the UserMessageDomain code set with a "Denial" message action and member or supplier responsibility. If no user messages have been configured with a denial message action, no reason codes will be displayed in the drop-down list.

For more information about viewing, creating and editing code entries, user messages, message actions and responsibility assignments, see the "Data Maintenance" and "Code Entries" sections of the *HealthRules Manager Guide, Vol. 10: System Administration*.

5. Click **OK**.

The claim is denied and the "Manually Priced" checkbox is now selected.

Note that you can see the new status in the Status field under the Claim ID. If you scroll down to the User Messages section of the Header tab, the denial reason user message code entry you selected is displayed along with the message action and responsibility.

| User Messages | | |
|---------------|---|---|
| Code
701 | Description
Denied Supplier Responsibility | Action
Denial |
| | | Responsibility
Supplier Responsibility |

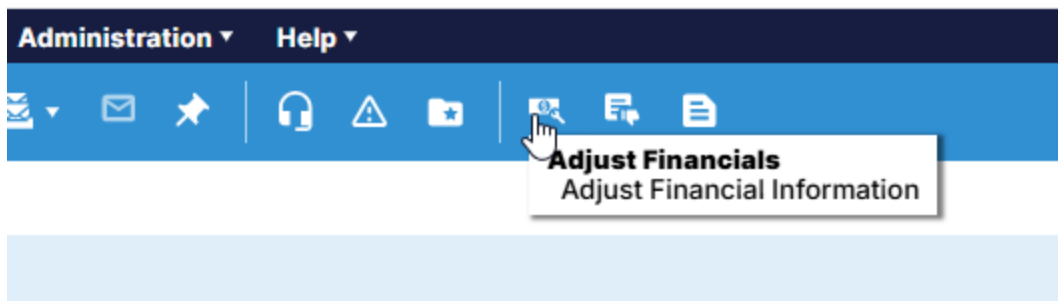

Deny Individual Claim Lines

To deny a individual claim lines, do the following:

1. Search for and select the claim you want to deny. For more information about conducting searches, see the ["Claims Search Page" on page 3-86](#)
2. Select the claim and click **View**.

The [Claim View page](#) is displayed.

NOTE Only Claims with a "Final" status can be denied.

3. Click **Adjust Financials** on the main toolbar.

The Adjust Financials page is displayed.

Click the Lines tab.

6. Click the Deny link.

The Select Denial Reason dialog is displayed.

Chapter 2: Claims Tasks

7. Select a denial reason from the drop-down list.

The Denial Drop down list displays all denial reason code entries that have been set up in the UserMessageDomain code set with a "Denial" message action and member or supplier responsibility. If no user messages have been configured with a denial message action, no reason codes will be displayed in the drop-down list.

For more information about viewing, creating and editing code entries, user messages, message actions and responsibility assignments, see the "Data Maintenance" and "Code Entries" sections of the *HealthRules Manager Guide, Vol. 10: System Administration*.

The screenshot displays the HealthRules Manager interface. At the top, there are tabs for 'Submit', 'Preview Result', 'Work in Progress', 'View Input', and 'Close'. Below these, a claim summary is shown with fields for Claim ID (1741320465800), Last Changed On (3/6/2025 11:08:50 PM), Status (Final), Claim Type (Institutional), and Benefit Plan Type (Medical). A 'Select Denial Reason' dialog box is open in the center, showing a list of denial codes: 700 (Denied Member Responsibility) and 701 (Denied Supplier Responsibility). The background shows a claim summary with fields for Claim ID, Status, Claim Type, and various pricing details. The 'Pricing' section includes fields for Allowed Amount (\$120.00), Provider Penalty (\$0.00), Bonus Amount (\$0.00), Other Discount (\$0.00), Sales Tax Amount (\$0.00), Member Reserve Used (\$0.00), HCC Amount (\$120.00), and Paid Amount (\$120.00). The 'Status' section includes fields for Status (Adjudicated), Non-Covered, Capped Non-Covered, Co-Insurance, Deductible, Co-Payment, Balance Billed, Member Penalty, and Member Responsibility.

8. Click **OK**.

The line is denied.

Notice the Line Status field is changed to "Denied."

9. Click **Submit**.

10. Select a Reason Code and click **OK**.

Deny a Claim with Voided or Stopped Payments

To deny a claim, do the following:

1. Search for and select the claim you want to deny. For more information about conducting searches, see the ["Claims Search Page" on page 3-86](#)

The Claim View page is displayed.

NOTE If there are voided or stopped payments associated with the claim, the following message is displayed: "There are void or stopped payments for this claim which have not been reissued. Adjustments will not be included in payment cycle runs until those payments have been reissued."

2. Click **Deny** in the toolbar at the top of the page.

NOTE The above reissue payments dialog is only displayed if you have Amend-Payment permission.

Remember, if you do not have the Amend-Payment permission, you will not be prompted to reissue any payables associated voided or stopped payments for this claim. When denying a

claim, or changing the supplier on a claim, a receivable is automatically created, but any pending payables from voided or stopped payments are not automatically reissued. If you have voided the payment associated with the claim, you will need to notify someone with Amend-Payment permission to reissue the payables.

NOTE Claims can be denied without reissuing the voided/stopped payments (by canceling reissue), but the payable and receivables will not be picked up by payment until the voided payments are reissued.

3. Select the claim payables you want to reissue by selecting the Reissue checkbox corresponding to the claim (or select the "Reissue All" checkbox to reissue all claim payables- see above).

NOTE Note that this feature does NOT create a new payment. It releases the claim payables on the voided or stopped check for the selected claim and makes them available to be picked up by the next payment cycle run.

4. Select the date the system should use to calculate interest on the reissued payment from the drop-down list. Select either "Original Payment Date" or "Reissue Payment Date."

The "Original Payment Date" is the payment date of the voided check you are currently reissuing. The "Reissue Payment Date" is the date of whichever payment in the future picks up the reissued payables.

NOTE If a claim payable is on a check which is voided and reissued, and then the next check is voided, when reissuing the second check the "Original Payment Date" refers to the payment date on the voided check being reissued, that is, the second one.

5. Click **Reissue Payment**.

The selected claim payable or payables are reissued (released for pick up by the next appropriate payment cycle run), and the Reissued Status column shows "Reissued" for the reissued rows.

6. On the Select Reason Code dialog, select a reason code from the Reason Code drop-down, enter an optional comment, and click **OK**.

By default, the selected denial reason will appear in the Message Codes section for each line of the claim.

Change the Denial Reason on a Claim Line

On the Edit Claim screen, you can go to the Manual Override section of the claim line and change the denial reason, if you have permission.

You can also change the denial reason on *multiple* claim lines by clicking the Manual Override button on the Edit Claim screen (see ["Apply Manual Overrides to Multiple Claim Lines" on page 2-64](#)).

To change the denial reason on a claim line, do the following:

- 1. To change the denial reason on a line, open the claim for edit.
- 2. On the Claim Edit Page/Lines tab, open the claim line you want to work with.
- 3. Open the Manual Override section.

The screenshot displays the 'Manual Override' section of the 'Edit Claim' interface. At the top, there are tabs for 'Submit', 'Preview Result', 'Deny Claim', 'Manual Override' (selected), 'View Input', and 'Close'. Below the tabs, there are several input fields for claim details, including 'Claim ID', 'Last Changed On', 'Status', 'Needs Repair', 'Claim Type', 'Benefit Plan Type', 'Calculated Benefit Plan Type', 'Claim Source', 'Assigned Group', 'Assigned Owner', 'Estimated Preview Time', 'Manually Priced', 'Send to Review', 'Trial Claim', 'Capitated Service', 'Renewed Claim', 'Voided Claim', and 'Locked Claim'. The 'Lines' tab is selected, showing a table of claim lines. The 'Denial Message' dropdown is open, displaying a list of denial reasons. The 'Denied Supplier Responsibility' option is highlighted. The table also shows 'Code' and 'Short Name' for each reason.

| Code | Short Name |
|------|--------------------------------|
| 700 | Denied Member Responsibility |
| 701 | Denied Supplier Responsibility |
| X | Denied Supplier Responsibility |

- 4. Click inside the Denial Message to display a drop-down list of messages. Select the new message.
- 5. Repeat steps 2-4 for other claims lines whose denial reasons you want to change.

Remove a Denial Message from a Claim Line

On the Edit Claim screen, you can go to the Manual Override section of the claim line and remove the denial reason, if you have permission.

You can also remove the denial reason on *multiple* claim lines by clicking the **Manual Override** button on the Edit Claim screen (see ["Apply Manual Overrides to Multiple Claim Lines" on page 2-64](#)).

To remove a denial message from a claim line, do the following:

1. To remove a denial reason from a line, open the claim for edit.
2. On the Claim Edit Page/Lines tab, open the claim line you want to work with.
3. Open the Manual Override section.

The screenshot shows the 'Manual Override' section of the 'Lines' tab in the Claim Edit page. The section contains various input fields and checkboxes for overriding claim details. A red box highlights the 'Denial Message' dropdown menu, which currently displays 'Denied Supplier Responsibility'. A mouse cursor is positioned over the 'Delete (X)' icon located to the right of the dropdown arrow, indicating the action to remove the selected denial message.

4. In the Manual Override section on the Claim Edit page, click the **Delete (X)** icon to the right of the Denial Message to remove the message from the claim line.

NOTE You will need to clear the "manually priced" checkbox on the claim summary information before you can clear the message and "undeny" the claim.

5. Click **Submit**.

This will effectively remove the claim line from denial status (the claim line status changes from "Denied" to "Adjudicated").

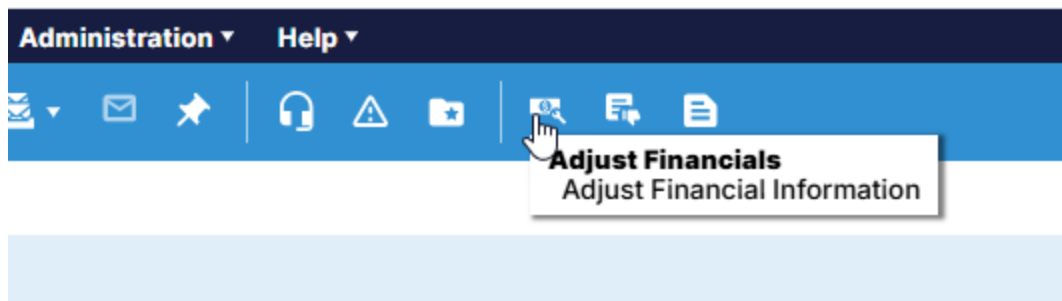

Un-Deny a Claim Line

You can un-deny a claim line through the Adjust Financials option.

To un-deny an individual claim line, do the following:

1. Search for and select the denied claim you want to un-deny (see the ["Claims Search Page" on page 3-86](#)).
2. Select the claim and click **View**.

The [Claim View page](#) is displayed.

3. Click **Adjust Financials** on the main toolbar.

The Adjust Financials page is displayed.

Click the Lines tab.

6. Click the **Un-Deny** link.

The Select Denial Reason dialog is displayed. It displays system and user messages.

Chapter 2: Claims Tasks

7. Select a message, and click **OK**.

The line is un-denied.

8. Click **Submit**.

9. Select a Reason Code and click **OK**.

Override Claim Denial for Eligibility

HealthRules Manager allows you to manually override an eligibility denial on a claim by selecting a benefit plan from the member’s plan history. The claim is then adjudicated against the selected benefit plan. This allows you to pay claims where the member is either close to becoming eligible, or just past eligibility.

To manually override an eligibility denial on a claim, do the following:

1. Go to the Claim View page for the denied claim you want to override.

NOTE Only denied claims with the following eligibility messages may be overridden using this feature:

- 61 Denied – date of service before coverage effective

- 62 Denied – coverage terminated
- 1000 Denied – for member not covered through discharge

2. Select the Lines tab.
3. Click the **Pencil** icon on the [main toolbar](#) to open the claim for editing.
4. Select the denied line you want to override.
5. Go to the Manual Override section.
6. Select the benefit plan you want to use to override the eligibility denial by selecting it from the Override Eligibility Denial drop-down list.

NOTE Only valid plans are displayed in the drop-down list. Valid plans must be a plan within the member plan selection history (all plans regardless of Account). Valid plans must be defined in HealthRules and effective as of the date of service, but not necessarily for the member on the claim. If the member has no plan history, you cannot apply the override.

7. If you want, click **Preview Result**.
8. Click **Submit**.

The Select Reason Code dialog is displayed.

9. Select a Reason Code from the drop-down list. If desired, enter a comment, and then click **OK**.

After the override is applied, the claim will bypass any existing system edits related to plan selection and eligibility, and will fully adjudicate using the selected plan, using the pricing and plan benefit provisions that are applicable for the date of service on the claim.

All claims overridden using this feature will have the following system message applied: "Denial for eligibility overridden by user."

Capture Denial Recommendation from Secondary Claims Editor

NOTE This section *does not apply* to integration with ClaimsXten and CES primary claims editors. For more information about secondary claims editing integration, see the HealthEdge document, *Secondary Claims Editing Integration*.

Users with appropriate permissions can edit a claim with the status “Waiting for External System” and use the new **Change Recommendation** button to manually apply recommendations obtained from an external editor. Recommendations will be applied to the claim after the claim has been released and is re-adjudicated. If a users does not have the permission that is required to work on these claims, the user can view the claims, but cannot edit or release them.

Manual application of recommendations is available for situations in which an automated update process has not been set up or is off-line. For example, if connectivity for automatic updates from the external editor is lost, and you need to immediately update a claim with the external editor recommendation received by an alternate method (such as e-mail), you can do so manually using the new Change Recommendation dialog.

The following pre-defined, standardized, claims denial recommendations can be captured on lines of a claim that's in the “Waiting for External System” status:

- Deny line
- “Partial deny” - Reduce units on claim line External Claims Integration (Secondary External Claims Editing)

You can also “Apply percentage”, that is, reduce the claim line allowed amount by a recommended percentage (see [“Capture Secondary Claims Editing Recommendations” on page 2-33](#)).

You can deny all lines on the claim, or selected lines on the claim.

To manually apply a denial recommendation from an external editor, do the following:

1. Edit the claim. Make any non-recommendation related edits to the claim, if needed.
2. Click **Change Recommendation**.

The Change Recommendation dialog is displayed.

NOTE Replaced, rejected, and split lines are not displayed on this dialog.

3. To deny all lines on the claim, select **Deny all lines**, and then click **OK**.

or

To deny selected lines, click the <Select Action> drop-down on the line you want to deny, and select "Deny Line." To apply a deny user message, click on the corresponding Deny Message field and select a message from the drop-down list. The list shows all denial messages from the UserMessageDomain code set. The selected message code will be displayed on the claim line.

or

To partially deny a line, click the <Select Action> drop-down on the line you want to partially deny, and select "Partial Deny." Enter the number of adjusted units for the line in the Adjusted Units field. For example, if the original line had five units of service but the recommendation is to only allow three units, enter "3" in the Adjusted Units field.

NOTE If you click the **Times** icon in the Action field, any values previously entered on the line will be cleared.

4. If you want to enter a reason code (mnemonic) and comments, click the **Plus** icon below the Add Reason column.
5. Enter the mnemonic and comments in the corresponding fields. Click **OK**.

To delete a mnemonic and comments, click the **Times** icon in the corresponding Delete field.

6. Repeat Steps 3 through 5 for any other lines you want to deny.
7. When finished, click **OK**.

or

If you click **Cancel**, the Change Recommendations dialog will close, and the claim will be submitted. Any recommendations you might have entered will be discarded.

Once submitted, HealthRules Payer will release and re-adjudicate the claim, applying any recommendations indicated on the claim. The claim will not stop again to wait for further external claims integration/editing. The date and time the claim was released from the "waiting" status is captured on the claim header under the "External System Processing Results" section, and in the claim's audit log.

Claims that are denied while in edit mode are released and resume the normal processing for denied claims. They do not stop again for additional external edits after re-adjudicating.

Denying a Claim in Needs Review State

Users with the applicable permissions can deny a claim in needs review state (is not approved).

The screenshot displays the HealthEdge Claims View page for a claim with ID 2ea-ae9e-2736c14d3a6f. The claim is in the 'Needs Review' state, which is highlighted with a red box. In the top toolbar, the 'Deny (CTRL + D)' button is also highlighted with a red box. The page includes various fields for claim details, such as 'Claim ID', 'Status', 'Claim Type', 'Benefit Plan Type', 'Last Changed On', 'Adjudicated On', 'Estimated Preview Time', 'Assigned Group', and 'Assigned Owner'. There are also checkboxes for 'Manually Priced', 'Send to Review', 'Trial Claim', 'Capitated Service', 'Renewed Claim', 'Voided Claim', and 'Locked Claim'. The bottom section of the page shows a table with columns for 'Header', 'Lines', 'Summary', 'Totals', 'Exceptions', 'Financial History', 'COB', 'Repricer Outputs', 'Accumulators', 'Issue Tracking', 'Attachments', 'Funding Request', 'Episodes of Care', and 'Claim UDT'. The 'Member' section at the bottom shows the member's name and ID.

The Deny button in the toolbar of the Claims View page appears if the claim is in a Needs Review state, and the user has permissions to view and work with claims in the workbasket. You must have review permission to use the **Deny** button.

Apply Manual Overrides to Multiple Claim Lines

You can make manual override changes to multiple claim lines at one time. On the Edit Claim screen, you click **Manual Override** and then make changes on the Apply Manual Overrides screen, which shows a summarized view of all claim lines.

Here you can:

- Remove denial messages on all claim lines.
- Add, change or remove individual denial messages on one or more claim lines.

Chapter 2: Claims Tasks

- Add, change or remove the allowed amount on one or more claim lines.
- Add, change or remove the benefit tier type, benefit network, member responsibility type and reprinter on one or more claim lines.
- Add, change or delete the copay, coinsurance, or deductible amounts
- Add, change or delete the other discount amounts
- When overriding any of the cost share amounts, select a cost share override reason
- Bypass alternate benefit rules that were applied to the original claim line, and use the originally submitted service.
- Add, change or remove override denial reasons on one or more claim lines.
- Add, change secondary editing bypass code and message on one or more claim lines.
- Exclude one or more claim lines from primary and secondary claim editing.
- Override the Qualifying Payment Amount (QPA) Amount. QPA is the insurer's median contracted rate. This is generally the median contracted rate recognized by the plan or issuer for the same or a similar item or service by a similar provider in the same geographic region. The QPA helps determine the patient cost-sharing in a surprise billing situation. For adjudication, the QPA provision of the Benefit Plan Component or Product uses the the manually overridden QPA amount.

NOTE You can also override the QPA amount when you click **Adjust Financials**.

You can also copy one or more selected values from a specific claim line to ALL claims lines. When you make a change to a claim line using this feature, the same change is automatically reflected in the Manual Overrides section of the claim line.

You can click the + control button next to a claim line to view one or more tabs with additional information, including override denial information, and line detail.

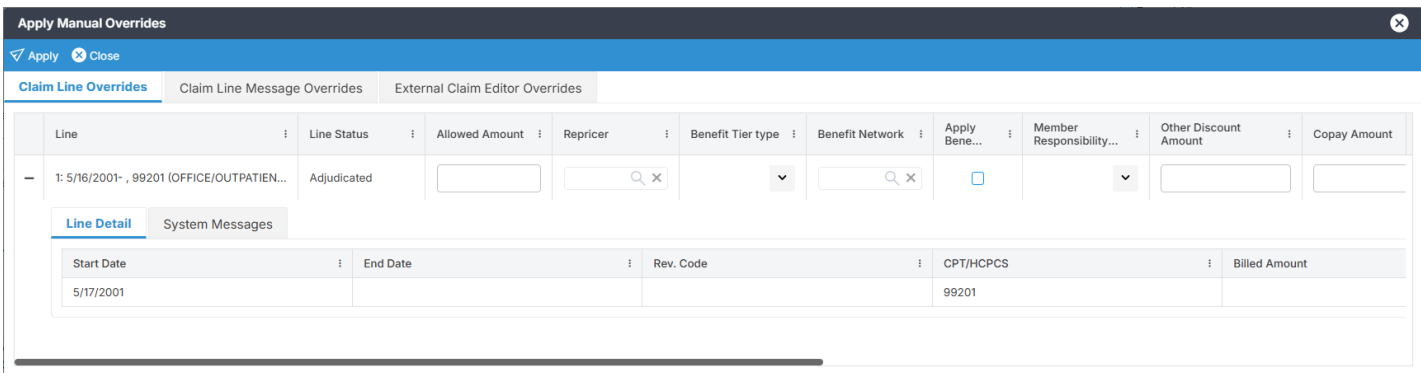

To apply manual overrides on multiple claim lines, do the following:

1. Open the claim for Edit.

NOTE You can also apply manual overrides to multiple claim lines when editing a claim that resides in an applicable workbasket, such as the Claims Review and Repair workbasket.

2. On the Edit Claim screen, click **Manual Override** in the toolbar.

The Apply Manual Overrides screen is displayed.

3. Do one or more of the following, for each applicable claim line.

- To change the allowed amount, copay amount, coinsurance amount, other insurance amount, deductible amount or QPA amount for one or more claim lines, click inside the applicable column, such as Allowed Amount, and add, change or remove the amount for that line.
- When overriding any of the cost share amounts, you can select a cost share override reason, such as:
 - Benefit Configuration Error
 - Provider Contract Terms
 - Negotiated Reimbursement

4. To remove denial messages from all denied claim lines, click the Claim Line Message Overrides tab, then click **Remove Denial Messages**.

Under the Claim Line Message Overrides tab you can also make changes to individual claim lines. For example, you can change the Line Status or the Denial Message. If you click the **Expand** icon (+) and make changes to claim line details, just like you can on the Claim Lines Overrides tab.

Chapter 2: Claims Tasks

- To add, remove or replace a denial message, click inside the Denial Message column, then select the denial message you want from the drop-down list box. If you want to remove the denial message for just that line, click the **x** next to the denial message.
 - To add an override denial reason to the claim line, click **Add** in the Add Override Denial column. When you click **Add**, the Denial Message and code will be displayed that matched the denial reason on the claim by default. Here you can add a denial reason, click **Copy** next to a denial reason to copy that denial reason to all claim lines, or click **Delete** to remove an override reason.
5. To manually override external claim editing, click the **External Claim Editor Overrides** tab.

Apply Manual Overrides

Apply Close

Claim Line Overrides Claim Line Message Overrides **External Claim Editor Overrides**

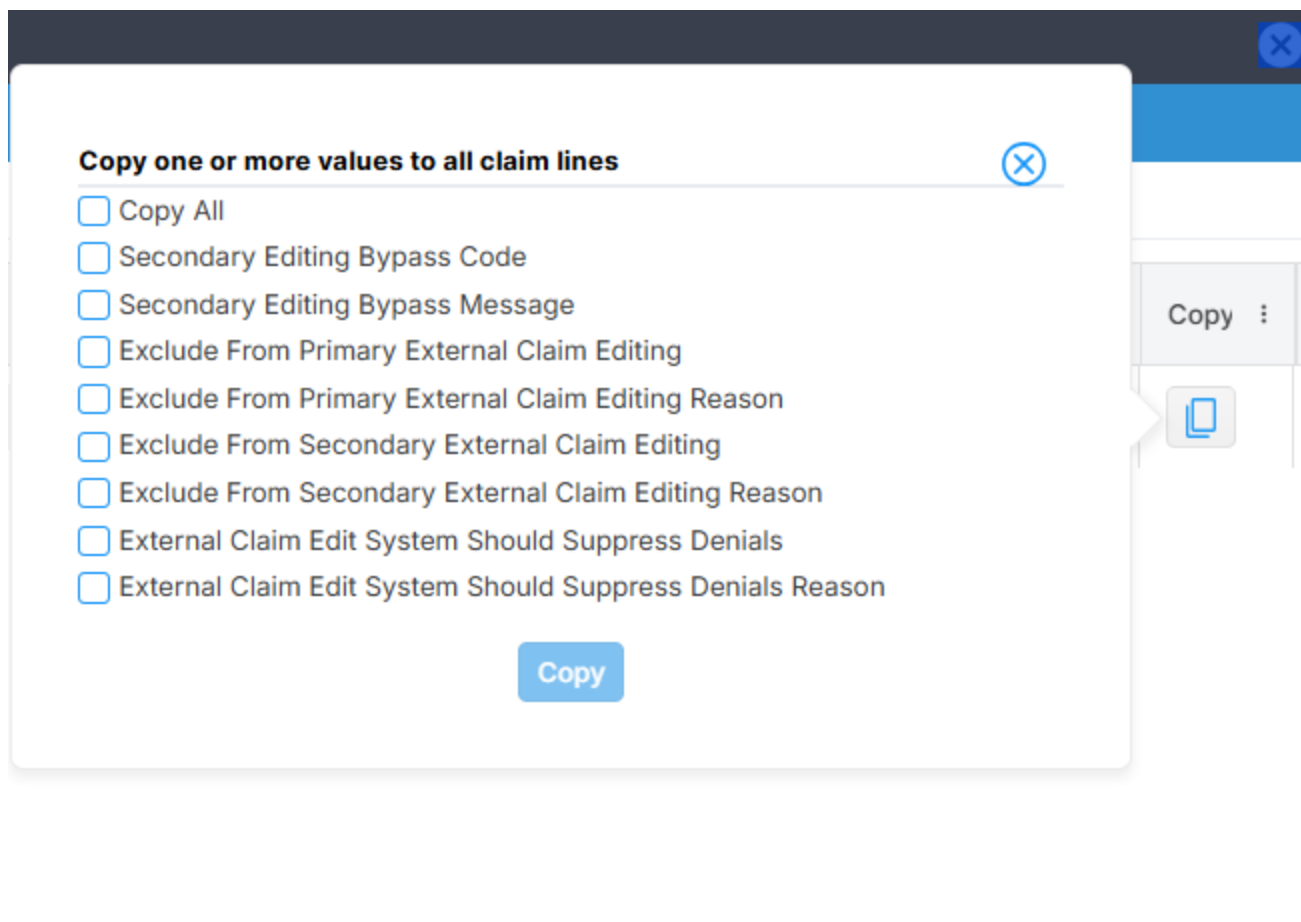

| Line | Line Status | Exclude From Primary Claim Editing | Exclude From Primary Claim Editing Reason | Exclude From Secondary Claim Editing | Exclude From Secondary Claim Editing Reason | Exter Supp |
|---|-------------|------------------------------------|---|--------------------------------------|---|------------|
| 1: 5/16/2001 - 99201 (OFFICE/OUTPATIENT...) | Adjudicated | ☐ | | ☐ | | |

[Line Detail](#)

| Start Date | End Date | Rev. Code | CPT/HCPCS | Billed Amount |
|------------|----------|-----------|-----------|---------------|
| 5/17/2001 | | | 99201 | |

6. Do one or more of the following, for each applicable claim line:
- To select a Secondary Editing Bypass Code, click inside the column, and select a code from the drop down list. To remove a selection, click the **x** next to the selection.
 - To select a Secondary Editing Bypass Message, click inside the column, and select a message from the drop down list. To remove a selection, click the **x** next to the selection.

7. If you want to apply one or more field values from one claim line to ALL the claim lines, click the **Copy** (📋) icon next to the line you want to copy. The following dialog is displayed:

Select the applicable check-boxes for the item(s) you want to copy, or select Copy All to select all items. Then, click the **Copy** (📋) icon.

8. To save the changes you have made, click **Apply** , or to close the screen without saving your changes, click **Close** .

When you click **Apply**, your changes are saved and the screen is closed.

9. Click either **Preview Changes** or **Submit**.
10. The manual override changes you have made are automatically reflected in the Manual Overrides section of the associated claim line(s).

Manually Apply Alternate Benefit Rules

You can manually add one or more alternate benefit rules and apply to the claim.

NOTE The manual rules override rules defined in the "Alternate Benefit" provision on the benefit plan component. However, if you select the Bypass Alt. Benefit Rules checkbox setting on the claim line, the claim bypasses all alternate benefit rules, including the manual rules on the claim header. You can use the manual alternate benefit rules to do any of the following:

- Replace service codes on one or more claim lines
- Bundle claim lines with a specific service code
- Split claim lines with different service codes

NOTE For Dental claims, you can use dental information from the original claim line or provide specific tooth, surface or cavity information to use with the alternate service code. You must always select a tooth number, letter or range of teeth when entering information about a tooth surface.

- Split claim lines by tooth surface
- Add, change or remove user messages on the original or alternate claim lines
- Apply alternate rules to member benefits only

To manually apply alternate benefits rules:

1. Open the claim for edit. The Edit Claim dialog is displayed.

NOTE You can manually apply alternate benefit rules to claims in a workbasket such as the Claims Review and Repair workbasket.

2. Go to the Alternate Benefit Rule Set section, and click **Add**.
3. Click the **Caret Right** icon in front of the Alternate Benefit Rule to define the rule.

NOTE You can remove an alternate rule by clicking **Times** icon or sort the order of the alternate rules by clicking **Caret Up** and **Caret Down** next to the specific rule section.

4. Enter the details for the alternate benefits override, and click **Preview Results** or **Submit**. The manual alternate benefit rules display on the Manual Overrides section of the associated claim line (s) (see ["Header Tab" on page 3-114](#)).

Manually Voiding a (Standard) Claim

When claims are created in error and should have never existed, they can be voided electronically or manually.

Claims are typically voided electronically via the 837 EDI download. A new claim is downloaded with all the same information as the original claim and a Frequency Code (8) that indicates the claim should be voided (see [" Electronic Void/Replace Claim Overview" on page 1-39](#)).

Manually voiding an External System Information Claim, such as a Pharmacy claim, works differently (see ["Manually Void an External System Claim" on page 2-73](#).)

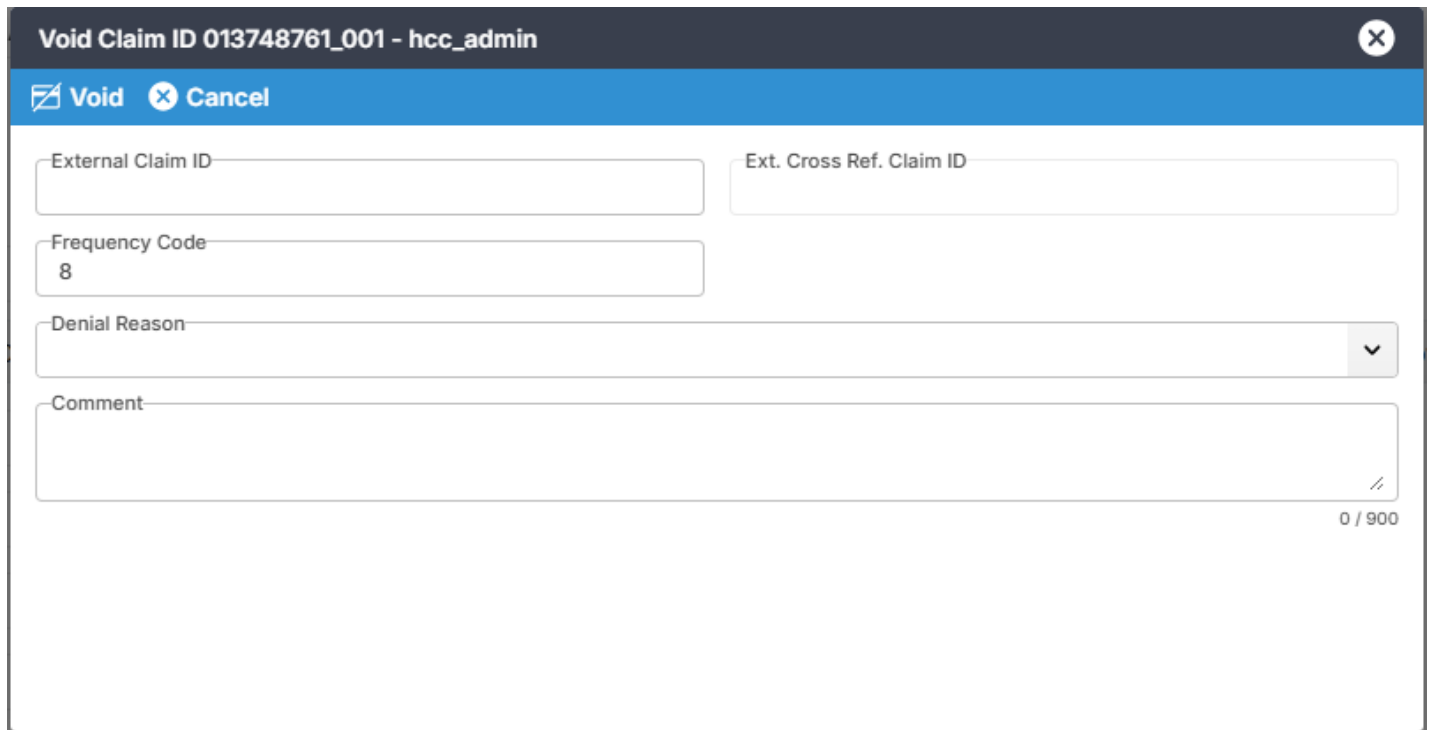

To manually void a claim:

1. Search for and open for View the claim you want to void. The Claim View page is displayed.

The screenshot displays the 'Claim - 015874530' view in the HealthEdge system. The interface includes a top navigation bar with menus like File, View, Document, Financials, Funding, Workbasket, Administration, and Help. Below this is a toolbar with icons for Refresh, Void, Replace, and Expedite. The main content area is divided into several sections: Claim Information (Claim ID, Status, Claim Type, Benefit Plan Type, Calculated Benefit Plan Type), Action Options (Manually Priced, Send to Review, Trial Claim, Manually Applied Interest, Estimated Late Claim Date, Split Claim ID), and a Member section at the bottom. The Member section shows details for Jerry Kastner, including Member ID 130216033, Birth Date 01/01/1950, and Gender Male. The page also features a tabbed interface with tabs for Header, Lines, Summary, Totals, Exceptions, Financial History, COB, Repricing Outputs, Accumulators, Issue Tracking, Attachments, Funding Request, Episodes of Care, Claim UDT, Line UDT, Assignm, and More.

2. Click **Void**.

The Void Claim dialog is displayed.

The image shows a 'Void Claim' dialog box. The title bar at the top is dark blue and contains the text 'Void Claim ID 013748761_001 - hcc_admin' on the left and a close button (X) on the right. Below the title bar is a blue header bar with two buttons: 'Void' (with a checkmark icon) and 'Cancel' (with an X icon). The main area of the dialog is white and contains several input fields: 'External Claim ID' (a text box), 'Ext. Cross Ref. Claim ID' (a text box), 'Frequency Code' (a text box containing the number '8'), 'Denial Reason' (a drop-down menu with a downward arrow), and 'Comment' (a large text area). In the bottom right corner of the comment area, there is a character count '0 / 900'.

3. Optionally, enter an External Claim ID and/or comment.
4. Select a Denial Reason from the drop-down list (required).
5. Click **Void**.

The Claim View page is redisplayed.

The log indicates that the claim has been voided and includes the denial reason.

Manually Void an External System Claim

When a claim is created in error, it can be voided electronically or manually.

Claims are typically voided electronically via the 837 EDI download. A new claim is downloaded with all the same information as the original claim, plus a Frequency Code (8), that indicates the claim should be voided. For more information see "[Electronic Void/Replace Claim Overview](#)" on page 1-39.

NOTE Manually voiding a standard claim works differently from manually voiding an external system claim (see "[Manually Voiding a \(Standard\) Claim](#)" on page 2-70.)

To manually void an external system claim:

1. Search for the external claim you want to void, and open the claim for View. The Claim View page is displayed.

The screenshot displays the 'Claim - 151072850' view in the HealthEdge system. The interface includes a top navigation bar with tabs like 'File', 'View', 'Document', 'Financials', 'Funding', 'Workbasket', 'Administration', and 'Help'. Below the navigation bar, there's a sidebar with icons for different functions. The main content area is divided into several sections:

- Claim Information:** Includes fields for Claim ID (151072850), Status (Needs Review), Claim Type (Professional), Benefit Plan Type, and Calculated Benefit Plan Type (Medical).
- Actions:** Buttons for 'Refresh', 'Void', 'Replace', and 'Expedite' are located at the top left of the main content area.
- Claim Details:** A grid of fields containing claim-specific data such as 'Last Changed On', 'Adjudicated On', 'Manual Priced', 'Send to Review', 'Trial Claim', 'Capitated Service', 'Renewed Claim', 'Voided Claim', 'Claim Source', 'Locked Claim', 'External Batch #', 'Ext. Batch Seq. #', 'External Claim ID', 'Ext. Cross Ref. Claim ID', 'Submitted Subscriber ID', 'Pay-to-Plan Primary ID', 'Underpayment Notification', 'RAP/NOA Received Date', 'Expedited', 'Encounter', 'International Claim', 'Back Out From Claim History', 'Manually Applied Interest', 'Estimated Late Claim Date', and 'Split Claim ID'.
- Member Information:** A section at the bottom showing member details like 'Member Name' (Justin Dollar), 'Member ID' (295798486), 'Birth Date' (01/01/1950), and 'Gender' (Male).

2. Click **Void**.

The Void Claim dialog is displayed.

Void Claim ID 151072850 - hcc_admin

Void

Cancel

External Claim ID

Ext. Cross Ref. Claim ID

Frequency Code

Denial Reason

Denied Supplier Responsibility

Comment

0 / 900

3. If you want to change the external claim ID, in External Claim ID field, enter a new claim ID. Otherwise, leave the external claim ID unchanged.
4. Select a Denial Reason from the drop-down list (required).
5. Click **Void**. All the claim lines on the original claim will be rejected.

The Claim View page is redisplayed.

Chapter 2: Claims Tasks

The screenshot shows the HEALTHEDGE interface for Claim - 151072850. The top navigation bar includes File, View, Document, Financials, Funding, Workbasket, Administration, and Help. The left sidebar contains icons for Home, Claim, Status, Claim Type, Benefit Plan Type, Calculated Benefit Plan Type, and a gear icon. The main content area displays claim details for Claim ID 151072850, Status Rejected, Claim Type Professional, and Benefit Plan Type Medical. The 'Voided Claim' checkbox is checked and highlighted with a red box. Other checkboxes include 'Manually Priced', 'Send to Review', 'Trial Claim', 'Capitated Service', 'Renewed Claim', and 'Locked Claim'. The 'External Claim ID' field is empty. The 'Member' section shows Member Name Justin Dollar, Member ID 295798486, Birth Date 01/01/1950, and Gender Male. The bottom of the screen shows a list of tabs: Header, Lines, Summary, Totals, Financial History, COB, Repricer Outputs, Accumulators, Issue Tracking, Attachments, Funding Request, Episodes of Care, Claim UDT, Line UDT, Assignment History, and Audit Log.

Notice the Voided Claim field now has a check mark. The External Claim ID is the one you left or entered on the Void Claim Dialog.

6. Open the Audit Log tab.

The log indicates that the claim has been voided and includes the denial reason.

7. Open the Financial History Tab.

If a payment was made on the original claim that was voided, a negative payable is created for the paid amount, but no receivable is created since it is an external claim.

Also, in the User Messages section of the new claim, a message displays indicating the claim was voided - message code 534.

Manually Replace a Claim

When claims are loaded with incomplete or erroneous information, they can be replaced electronically or manually.

Claims are typically replaced electronically via the 837 EDI download. A new claim is downloaded with all the same information as the original claim, in addition to corrected and/or newly supplied information, and a Frequency Code (7) that indicates the claim should be replaced (see "[Electronic Void/Replace Claim Overview](#)" on page 1-39).

You can also manually replace a claim by opening it for edit and clicking the **Replace** button. You must supply a reason for the replaced claim, and then display the Claim Form to add or replace information on the claim. You must also enter a new claim number.

NOTE You can only replace a claim with the same claim type. For example, you can only replace an institutional claim with an institutional claim or a professional claim with a professional claim, otherwise upon submitting the replacement claim you will see a "Claim type does not match" error.

When the new claim is submitted, the original claim is replaced and a new version is created for the new input/modified input.

If payments have been made on the original claim that was replaced, a negative payable is created for the paid amount, a new payable is created for the new claim, and a receivable will be created if the claim amount is adjusted down in the new claim.

NOTE You cannot replace a converted claim.

Manually replacing an external system information claim, such as a Pharmacy claim, works differently than a standard claim (see ["Manually Replace an External System Claim" on page 2-79](#)).

To manually replace a claim:

1. Search for and open for View the claim you want to replace.

The Claim View page is displayed.

Chapter 2: Claims Tasks

The screenshot shows the HEALTHEDGE software interface for a claim titled "Claim - 1216". At the top, there is a navigation bar with tabs for File, View, Document, Financials, Funding, Workbasket, Administration, and Help. Below this, a toolbar contains buttons for Refresh, Void, Replace (highlighted with a red box), and Expedite. The main form area is divided into several sections. On the left, there is a sidebar with icons for various functions. The main content area contains a form with fields for Claim ID (1216), Status (Needs Repair), Claim Type (Institutional), Benefit Plan Type, and Calculated Benefit Plan Type. There are also checkboxes for manually priced, send to review, trial claim, voided claim, and locked claim. A "Member" section at the bottom contains fields for Member Name (Dennis Gammon), Member ID (988272739), Birth Date (01/01/1950), and Gender (Male). The form is organized into a grid-like structure with multiple columns and rows of input fields.

2. Click **Replace**.

The Select Replace Reason dialog is displayed.

The "Select Replace Reason" dialog box is shown. It has a dark header bar with the title "Select Replace Reason" and a close button (X). The main area contains a "Reason Code" dropdown menu with the selected option "Claim/service lacks info needed for adjudication". Below the dropdown is a "Comment" text area with the placeholder "<Enter Comment>". At the bottom, there are two buttons: "OK" and "Cancel". A mouse cursor is pointing at the "OK" button.

3. Select a reason code from the drop-down list and click **OK** to continue.

The Claim Form page is displayed. It includes all the information from the original supplier invoice of the claim to be replaced.

Notice that there are now multiple versions of the claim. Clicking previous shows the claim before it was replaced.

On the latest version of the claim, the Frequency Code field display a 7, indicating that the earlier version of the claim was replaced.

User message code 535 (Claim was replaced) is displayed on claim header page. An Audit log entry is created for the replace event with the selected reason.

Manually Replace an External System Claim

When claims are loaded with incomplete or erroneous information, they can be replaced electronically or manually.

Manually replacing an external system information claim, such as a Pharmacy claim, works differently than a standard claim. To manually replace a standard claim, see ["Manually Replace a Claim" on page 2-75](#).

NOTE You cannot replace a converted claim.

NOTE You can only replace a claim with the same claim type. For example, you can only replace an institutional claim with an institutional claim or a professional claim with a professional claim, otherwise upon submitting the replacement claim you will see a "Claim type does not match" error.

To manually replace an External System claim:

- 1. Search for and open for View the external system claim you want to replace.

The Claim View page is displayed.

The screenshot displays the 'HEALTHEDGE' Claim View page for claim ID 9880064470. The top navigation bar includes 'File', 'View', 'Document', 'Financials', 'Funding', 'Workbasket', 'Administration', and 'Help'. Below the navigation bar, the claim details are organized into sections: 'Claim ID' (9880064470), 'Status' (Needs Repair), 'Claim Type' (Institutional), 'Benefit Plan Type' (Medical), and 'Calculated Benefit Plan Type'. A 'Replace' button is visible in the top navigation bar. The main content area is divided into two columns of form fields. The left column includes 'Payee', 'Submitted Payee Supplier', 'Date Received' (10/10/2024), 'Date Entered' (10/10/2024 4:01:25 AM), 'Patient Account #', 'Medical Record #', 'Clearinghouse #', and 'Submitter Name'. The right column includes 'Last Changed On' (10/10/2024 4:34:47 AM), 'Adjudicated On' (10/10/2024 4:34:47 AM), 'Manually Priced' (checked), 'Send to Review', 'Trial Claim', 'Capitated Service', 'Renewed Claim', 'Voided Claim', 'Claim Source' (External system medical claims), 'Locked Claim', 'Estimated Preview Time' (Not Available), 'Assigned Group' (hcc_super_user), and 'Assigned Owner' (hcc_admin). Below the main content area, there is a 'Member' section with fields for 'Member Name' (Kimberly Acevedo), 'Member ID' (679667967-01), 'Birth Date' (01/01/1950), and 'Gender' (Female). The bottom of the page shows a 'More' button and a 'Assign' button.

- 2. Click **Replace**.

The Select Replace Reason dialog is displayed.

Notice that there are now multiple versions of the claim. Clicking **Previous** shows the claim before it was replaced.

On the latest version of the claim, the Frequency Code field display a 7, indicating that the earlier version of the claim was replaced.

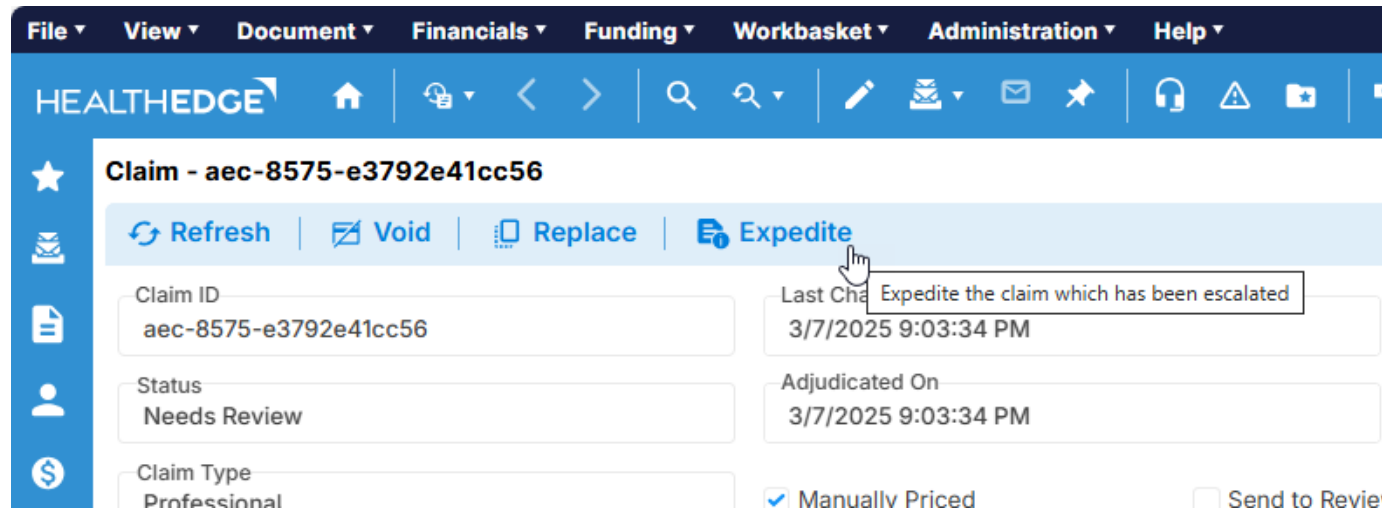

User message code 535 (Claim was replaced) is displayed on claim header page. An Audit log entry is created for the replace event with the selected reason.

Expediting Claim from Claim View Page

You can mark a claim in the Claim Review and Repair Workbasket as “expedited” from either the Claim View page or the Claim Review and Repair Workbasket page so that claim processors are aware that the claim has been expedited by a supervisor and the claim is worked upon immediately to address the escalation/urgent attention it requires.

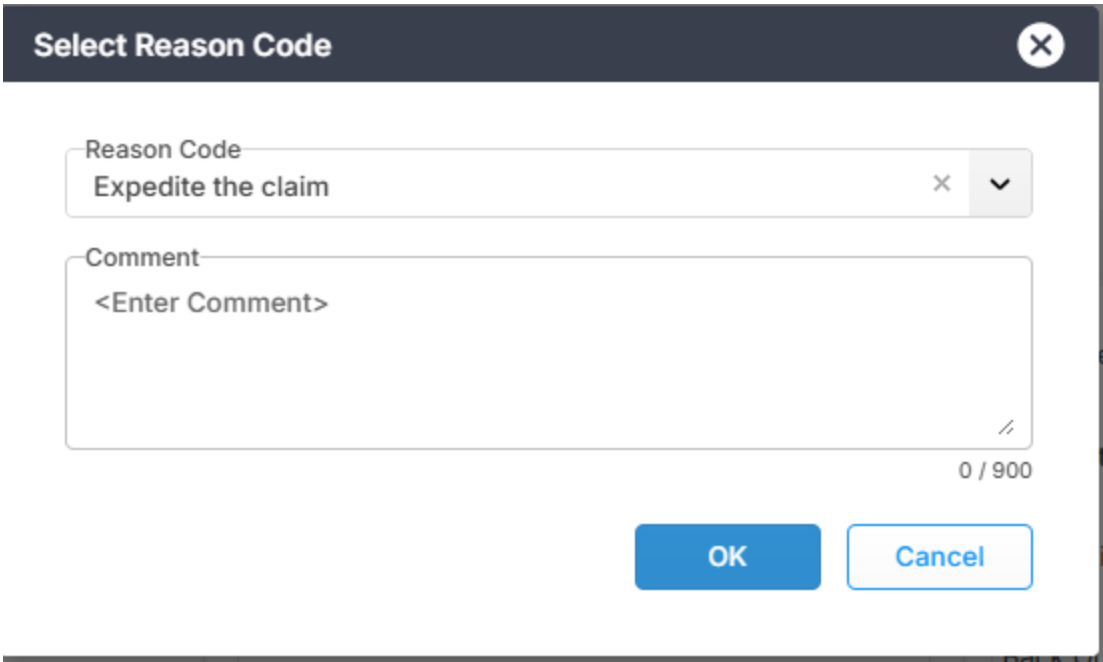

To expedite a claim from the Claim View page, do the following:

- 1. Go to the claim you want to expedite. It must have a “Needs Review” or “Needs Repair” status.

- 2. Click the **Expedite** button on the toolbar as shown in the illustration below.

The Select Reason Code dialog is displayed.

- 3. Select a reason code from the drop-down list and enter a comment, if desired.

Chapter 2: Claims Tasks

4. Click **OK**.

The claim will be marked with an expedite status.

When a claim has been expedited the Expedite checkbox on the Claim Header tab will be selected (see illustration below).

NOTE You can clear the expedited status by clicking the **Clear Expedite** button in the toolbar as shown below.

The screenshot displays the HealthEdge Claims Repricing Results interface. The top navigation bar includes tabs for File, View, Document, Financials, Funding, Workbasket, Administration, and Help. The main header shows the claim ID: aec-8575-e3792e41cc56. Below the header, there are several tabs: Header, Lines, Summary, Totals, Exceptions, Financial History, COB, Repricing Outputs, Accumulators, Issue Tracking, Attachments, Funding Request, Episodes of Care, Claim UDT, and More. The 'Repricing Outputs' tab is currently selected. Within this tab, the 'Expedited' checkbox is checked and highlighted with a red box. Other visible fields include Claim ID, Status (Needs Review), Claim Type (Professional), Benefit Plan Type, Calculated Benefit Plan Type (Medical), Claim Source (Unknown), and various other claim details. The bottom section shows a 'Member' dropdown menu.

Changing a Converted Claim to a Renewed Claim

You can change a "converted claim" to a renewed claim. Once created, renewed claims are treated like other HealthEdge originating claims, except they are always identified as "renewed claims." The renewed claim retains the same claim number. You can use the versioning tool to view the "converted claim" version of the claim.

Follow these steps:

1. Use Search to find the converted claim you want to work with.

Chapter 2: Claims Tasks

The screenshot shows the 'Claim Search - hcc_admin' interface. At the top, there's a search bar with 'Search', 'Clear', 'Search For', 'Show' (set to 'Claims'), and 'Max Results' (set to '50'). Below this are tabs for 'Claim', 'Basic *', 'Advanced', 'Dental', 'Claim Input', and 'BlueCard'. The 'Basic *' tab is active. It contains various input fields: Claim Type, Delivery Type, Claim Status, User Message, Scan Code, Capitated Claim, Procedure, Diagnosis, Service Code, Revenue Code, Batch Number, Encounter Claim, Authorization ID, Agreement ID, Patient Account #, Claim Source, Claim Payor, and System Message (Line). The 'Converted Claim' dropdown is highlighted with a red box, showing 'Yes' selected. There's also a 'Secondary Editor' field with 'No editors'.

To help you search for converted claims, select **Yes** in the Converted Claim drop-down list box on the Basics tab of the Claim Search Page. Enter any additional filters, and click **Search**.

Only Converted claims are displayed in the results section.

NOTE After a converted claim has been successfully renewed (finalized), then the claim will not be part of this search result, as the converted claim has been replaced by the renewed claim.

2. Select the converted claim you want to work with and click **View**. The Claim View page is displayed.

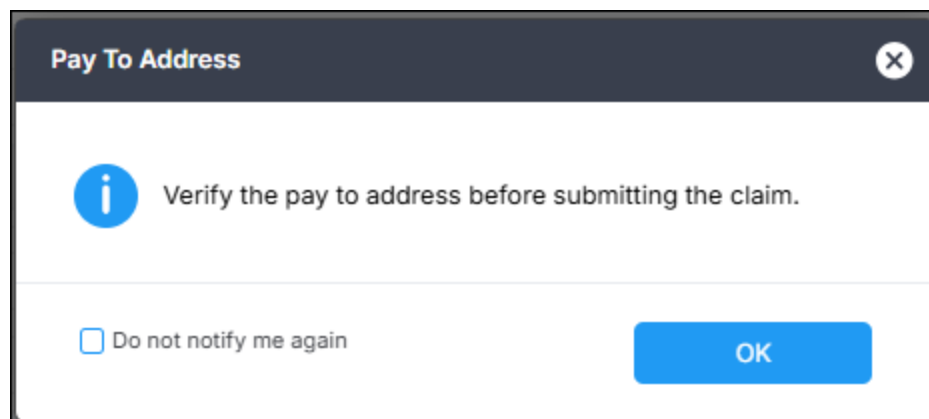

The screenshot shows the 'Claim View - 1d768847b8374f5dbb222a847' interface. At the top, there's a menu bar with 'File', 'View', 'Document', 'Financials', 'Funding', 'Workbasket', 'Administration', and 'Help'. Below this is a toolbar with various icons. The main content area shows claim details: Claim ID (1d768847b8374f5dbb222a847), Last Changed On (3/19/2025 1:46:10 AM), Status (Final), Adjudicated On (3/19/2025 1:46:10 AM), Claim Type (Professional), Benefit Plan Type, Calculated Benefit Plan Type, Claim Source (BlueCard Home), and Claim Payor (Internal). The 'Renew & Edit' button is highlighted with a red box. Below this is a table with columns: Header, Lines, Summary, Totals, Financial History, COB, Repricer Outputs, Accumulators, Issue Tracking, Attachments, Funding Request, Episodes of Care, BlueCa, and More. The 'Converted' checkbox is highlighted with a red box. At the bottom, there's a 'Member' section with Member Name (Hann Overton) and Member ID (a01f1f0c-f50f-4020-994c-0beab55dffa63).

Chapter 2: Claims Tasks

Notice in the general information section, the Converted field is checked, indicating that this is a converted claim.

3. To change the converted claim to a renewal claim, click **Renew Edit Claim** on the toolbar.

HealthRules determines the Pay To Address based on the supplier setup. If the payee-type is Supplier, the Pay to Address notification dialog is displayed. If the payee type is Subscriber, this dialog is not displayed.

You may want to verify the selection that was chosen.

To enable the Pay To notification dialog when it has been turned off, select Program Preferences from the View menu on the Main Page, select Prompt Options, and then select the checkbox next to: "Display pay to address message after converting claim."

4. Click **OK** on the Pay to Address dialog box.

The Edit Claim page is displayed.

Here you can make changes/adjustments to the claim. The General information section should now include a checkbox in the Renewed Claim field, indicating it is now a Renewed Claim.

5. Make any changes to the Renewed claim as you would a standard HealthEdge claim.

At this point, you can also cancel the renewed action by closing the claim and not saving it.

6. Click **Submit**.

The Reason Code dialog is displayed.

7. Select a reason and click **OK**.

The claim is adjudicated and the Claim View page is displayed.

NOTE After converting to a Renewed Claim, the system assumes the "paid amount" (on each claim line) has already paid. The system will create additional payables or receivables accordingly. It will do this regardless of the claim state, for example even if the Converted claim state was Denied.

On the Claim View page, you can use the **Previous** and **Next** controls (versioning controls) in the upper right section of the page to move back and forth between the previous "converted claim" and the renewed claim.

Editing a Claim Line on a Renewed Claim

When editing a Renewed Claim, if the "Clean Claim Date" field is not specified on the claim line, then the interest calculation will be skipped for the claim-line.

Working with External System Claims

What are External System Claims?

HealthRules Payer provides support for external system claims, such as "Pharmacy" claims. A number of claim attributes specifically support external system claims, and when editing or viewing an external system claim, you can enable a tab that summarizes a static set of related claims attributes.

Enabling the External System Claims tab in HealthRules Designer

To enable a user-defined External System Claims tab, in HealthRules Designer, you must set the External System Claims Source definition. External claim source options are based on a user-defined code entry set.

The Code entry name will be used as the label of the tab on the Edit Claims page and Claims View page. In our example, Pharmacy is the tab label name (see the stand-alone HealthRules Designer document: *Setting the External System Claim Source Definition*.)

For more information external system claims, select one of the following:

- ["External System Claim Overview" on page 1-24](#)
- ["Entering External System Information on a Claim" on the next page](#)

- ["Search for and View External System Claims" on page 2-93](#)
- ["Editing External System Claims" on page 2-95](#)

Entering External System Information on a Claim

Entering external system claim information includes entering the standard data elements for a claim, plus several specific attributes for the external system claim. This topic describes how to enter this external system claim information.

Some of these fields use the standard claim naming convention. When the external system claim is submitted, some of those fields will be displayed using external system claim-specific field labels on the consolidated version of the claim.

Entering External System Claims

You can enter external system claims information on either a Professional, Institutional or Dental claim form. These instructions are for a Professional claim, but in general can be applied to any claim. Note that only two fields can be added to the dental claim: External Claim # and Ext. Cross Ref. Claim #.

Do the following:

1. Enter the standard data elements for the claim form you have chosen to create.

The screenshot shows the 'Professional' tab of a claims form. The form is organized into several sections:

- Header:** Includes buttons for 'Submit', 'Submit And New', 'Clear', 'Add Line', 'Import Claim', 'Export Claim', and 'Close'.
- Navigation Tabs:** 'Professional', 'Attachments', 'Delegated Processing', 'Submission Format', 'Claim UDT', 'Line UDT', and 'Notes'.
- Patient Information:** Fields for 'PATIENT'S NAME (Last, First, Middle Initial)', 'PATIENT'S ADDRESS (No., Street)', 'CITY', 'STATE', 'ZIP CODE', 'COUNTRY', 'TELEPHONE', 'BIRTH DATE', 'SEX', 'PATIENT RELATIONSHIP TO INSURED', 'PATIENT STATUS', 'EMPLOYMENT STATUS', 'IS CONDITION RELATED TO:', 'EMPLOYMENT? (Current or Previous)', 'AUTO?', 'STATE', 'COUNTRY', 'OTHER ACCIDENT?', 'RESERVED FOR LOCAL USE', 'RELEASE AUTHORIZATION SIGNATURE?', 'DATE', 'ILLNESS/INJURY/PREG. DATE', 'QUALIFIER', 'OTHER DATE', 'QUALIFIER', 'NAME OF REFERRING PROVIDER', 'REFERRING PROVIDER ID', 'NPI', and 'REFERRING PROVIDER NPI'.
- Insurance Information:** Fields for 'INSURANCE TYPE', 'ID PREFIX', 'INSURED'S I.D. NUMBER', 'INSURED'S NAME (Last, First, Middle Initial)', 'INSURED'S ADDRESS (No., STREET)', 'CITY', 'STATE', 'ZIP CODE', 'COUNTRY', 'TELEPHONE', 'INSURED'S POLICY GROUP OR FECA NO.', 'BIRTH DATE', 'SEX', 'EMPLOYER'S NAME OR SCHOOL NAME', 'INSURANCE PLAN NAME', 'IS THERE ANOTHER HEALTH BENEFIT PLAN?', 'INSURED'S SIGNATURE?', 'NO WORK FROM', 'TO', 'HOSPITAL FROM', 'TO'.
- Additional Attributes:** Fields for 'CLAIM PAYOR', 'CLAIM SOURCE', 'EXTERNAL BATCH #', 'EXT. BATCH SEQ. #', 'TRADING PARTNER ID', 'EXTERNAL CLAIM #', 'EXT. CROSS REF. CLAIM #', 'HOST PLAN CODE', 'FREQUENCY CODE', 'DELIVERY TYPE', and 'DPI'.

2. In addition to the standard data elements for a claim, enter the following additional attributes prior to submission of the claim for processing:
 - **Claim Source:** Select the claim source from the drop down list. For example, if the external claim source is defined as "Pharmacy", select it to indicate that this claim will be submitted as a Pharmacy claim.
 - **External Claim #:** Enter the external claim number. On some external claim plans, this equates to the SCCF #. On the consolidated external system claim the field label will be SCCF #.
 - **Ext. Cross Ref Claim #:** The external cross reference claim number. On some types of external system claims, this equates to Cross reference SCCF #. On the consolidated external system claim the field label will be Cross Reference SCCF #.
 - **Host Plan Code:** Enter the host plan code (formerly local plan code) if applicable. On an external system claim, this might be the code identifying who sent the claim. This field is mapped to the Supplier Invoice Host Plan Code. This field is not available on a Dental claim form.

Chapter 2: Claims Tasks

3. To enable pricing, click the Enable Pricing checkbox.

The screenshot shows a claim entry form. At the top left, a checkbox labeled 'ENABLE PRICING' is checked and highlighted with a red box. Below this, the form is organized into columns labeled A through E. Column A contains 'Dates of Service' with 'FROM' and 'TO' fields. Column B contains 'POS'. Column C contains 'EMG'. Column D contains 'CPT/HCPCS' and 'Modifier'. Column E contains 'Diagnosis Posi'. Below these columns, there are tabs for 'NDC/UPN', 'Repricing', 'Manual Override', 'External Fees', 'External Limits', 'External Messages', 'Rendering Practitioner', 'Referring Lab Provider', and 'Service Description'. The 'Repricing' tab is currently selected. At the bottom, there are fields for 'Allowed Amount', 'Benefit Network Name', and 'Repricer Name'.

The Repricing tab is displayed. The Manual Override tab is also enabled.

4. If applicable, enter the Allowed Amount, select the Benefit Network and the Repricer Name, and indicate the Decision: priced or denied.
5. If applicable, click the Manual tab to enter manual override information, as applicable, including the Allowed amount, a Benefit Network or Benefit Tier Type (you cannot select both), a Repricer, and Member Responsibility Type (allowed amount or billed amount) from the applicable drop-down list boxes.
6. To add External information, click **External**.

The following additional tabs are enabled: External Fees, External Limits, External Messages and Rendering Practitioner.

7. Complete the information, as needed.
 - On the External Fees tab, enter the Fee Type, a user-defined code entry, the Fee Amount and/or Fee Percentage
 - On the External Limits tab, enter the limit amount, Units, or Days.
 - On the External Messages Tab, enter one or more messages provided by the external system.
 - On the Rendering Practitioner tab (Professional claim only), enter the first and last name of the rendering practitioner, as well as their specialty. This name is not used to match to a rendering practitioner only record the first and last name.
8. To add claim fee information, at the bottom of the form, click **Add Fee**.

A blank line of claim fee information is displayed.

9. Select the Fee Type from the drop-down list, for example AEA Fee. Then, enter either a Fee Amount and/or a Fee Percentage.
10. Click **Add Fee** again to enter additional fees.
11. To remove a line of fee information, select the line and click **Delete**.
12. When all claim information is entered, click **Submit**.

The claim is submitted for adjudication. Like all claims, if the claim requires repair or review, it is sent to the Repair and Review workbasket.

Search for and View External System Claims

You can quickly search for claims by an external system claim source, such as "Pharmacy" and then open the claim for viewing.

To search by external system claim source, follow these steps:

1. Search for claims in the HealthRules Manager page using any of the following methods:
 - Home page, Claims tab: Click the **Search** link next to All Claims
 - Toolbar: Click **Search**
 - Menu: Select **Document > Search**

Chapter 2: Claims Tasks

- 2. On the Claim Search page, under the Basic tab, select a value from the Claim Source drop-down list box. In our example, we select "External system pharmacy claims."

The View Claims page is displayed.

Editing External System Claims

You can edit external system claims the same as you would any standard claim in HealthRules, with some differences.

On the Edit Claim page, the Claim Source field shows the external source of the claim (in this example pharmacy claim).

ID Prefix

Denying a Claim when an Invalid Member ID Prefix was Submitted on the Claim

Some types of external system claims include a member ID prefix. By enabling the "Claim Line When An Invalid Member ID Prefix Was Submitted On The Claim" provision, the ID prefix can be used to match the claim to a member's benefit plan selection during claim adjudication. If the ID prefix on the submitted claim, or one or more claim lines, does not match the ID prefix on the benefit plan selection within the dates of service, the claim is denied.

NOTE This provision applies to all claim lines on the claim. This means if a claim has ten lines, and nine lines have valid member ID prefixes, but one line does not, then the entire claim will be denied.

Code Entries and Messages

Claims denied because of an invalid member ID prefix are denied with the following messages that display in the External System Message section of the consolidated claim:

| Code | Code Set | Short Description |
|------|---------------------|--|
| 351 | SystemMessageDomain | Invalid submitted ID prefix on the claim |

| Code | Code Set | Short Description |
|------|---------------------|---|
| 352 | SystemMessageDomain | Denied Claim for invalid member prefix on claim line [N]. |

Entering ID Prefixes on the Benefit Plan Selection

On the Account View page, on the Benefit tab, you can enter one or more ID prefixes and specify the effective service dates for those prefixes. Dates for the ID prefixes cannot overlap (how to specify member ID prefixes on the member's benefit plan selection, see the *HealthRules Manager Guide, Vol. 2: Account and Broker Administration*.)

Enable the Provision

To enable the ID Prefix matching to a benefit plan, in HealthRules Designer, at either the Benefit Plan Component or Product level, under Processing Rules, enable the provision "Deny Claim Line When An Invalid Member ID Prefix" by setting Enabled to "True." If the provision is set to "False," or not set, the system does not check the member ID prefix (see *HealthRules Designer Guide, Vol. 2: Products and Benefits*).

Request Reprocessing Claims Wizard

The Request Reprocessing wizard allows you to reprocess one or more claims with a specific status of Needs Review or Needs Repair, on-demand.

In addition, you can limit claim reprocessing candidates based on whether or not claims need to be reviewed first prior to reprocessing, you can reprocess claims based on a specific reason code and code set domain, and you can also select from a wide variety of claims criteria to limit the claims included.

NOTE Only users with the applicable permissions may use this option. User with permissions to request reprocessing for claims in Review or Repair can only initiate reprocessing request for claims that are in the Claims Review workbasket for a specific reason/error and cannot initiate a request for finalized claims.

The following claim types will not be included in this reprocessing request:

- Manually priced claims
- Converted (not renewed) claims
- Locked claims
- Claims that have been assigned to an owner, the system will attempt to reprocess claims in the workbasket with an assigned group, but not those assigned to a specific owner
- Claims specifically excluded from reprocessing via the "Do Not Reprocess Service" Provision (see ["Claim Reprocessing Overview" on page 1-28.](#))

To reprocess claims based on Claim Review or Repair reasons:

1. From the home page Claims card, select the **Request Reprocessing** icon.

The first Wizard screen, Reprocessing Based on a Claim Review or Repair Reason, is displayed.

Request Reprocessing Wizard - hcc_admin

←

Reprocessing Based on a Claim Review or Repair Reason

Indicate whether reprocessing candidates are reviewed first before claims are reprocessed

Reprocessing Trigger

Initiate a reprocessing request for a group of claims with a specific review or repair reason

Claim Status

Reason Code

Claim Reason

Next Cancel

2. In the Reprocessing Trigger field, select either Complete or Needs Review.

"Needs Review" indicates that claims need to be reviewed prior to reprocessing. "Complete" indicates claims do not need to be reviewed/approved prior to reprocessing, they are reprocessed automatically.

The Reprocessing Trigger drop-down list may only contain the option "Needs Review" to ensure that all claims reprocessed via this wizard are sent to the Reprocessed Claims workbasket. This is accomplished by defining an override in the "Claim Processing" provision in HealthRules Designer. In this case, the EventType is "Reprocessing Wizard Request" and the Override is "Review."

If the override is set to "No Reprocessing," the Request Reprocessing Claims wizard option is disabled.

3. In the next section, in the Claim Status field, select Needs Review or Needs Repair to include claims in the reprocessing batch with a specific review or repair reason.
4. If you know the code you want, enter it in the Reason Code field.

The **Next** button is enabled.

5. If need help choose the code, select it from the Claim Reason drop-down list box.

This list includes review reasons (from code set ClaimReviewUserMessageCode) and Repair reasons (from code set ExceptionDomain).

When you select the code, the Reason Code field is populated with the selected code, and the **Next** button is enabled.

Request Lock Unlock Claims Wizard

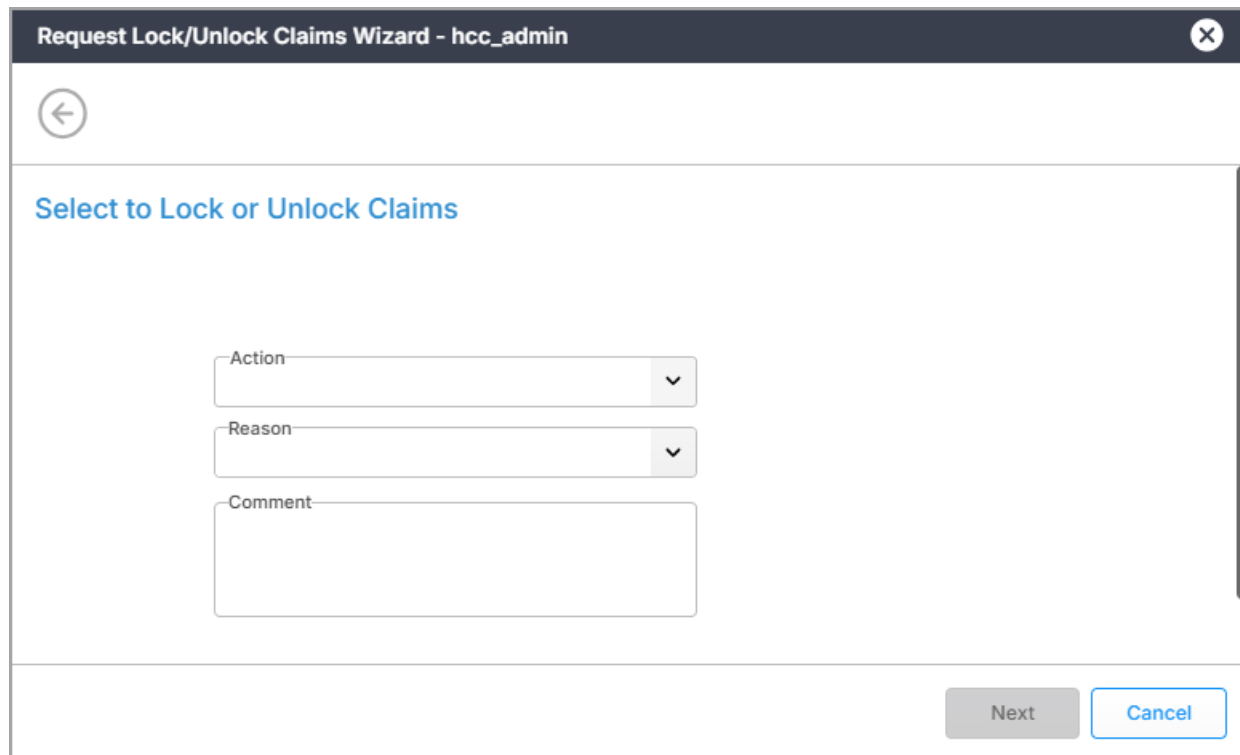

The Request Lock or Unlock Claims Wizard allows you to lock or unlock multiple claims together. You can also view the transactions performed on lock/unlocked claims on the Claims Lock Transactions page.

NOTE For the claims in the Claim Review and Repair workbasket with Needs Repair/Review status, such claims will not be locked, and an error message will be displayed in the Claim Lock Transaction.

To lock or unlock multiple claims:

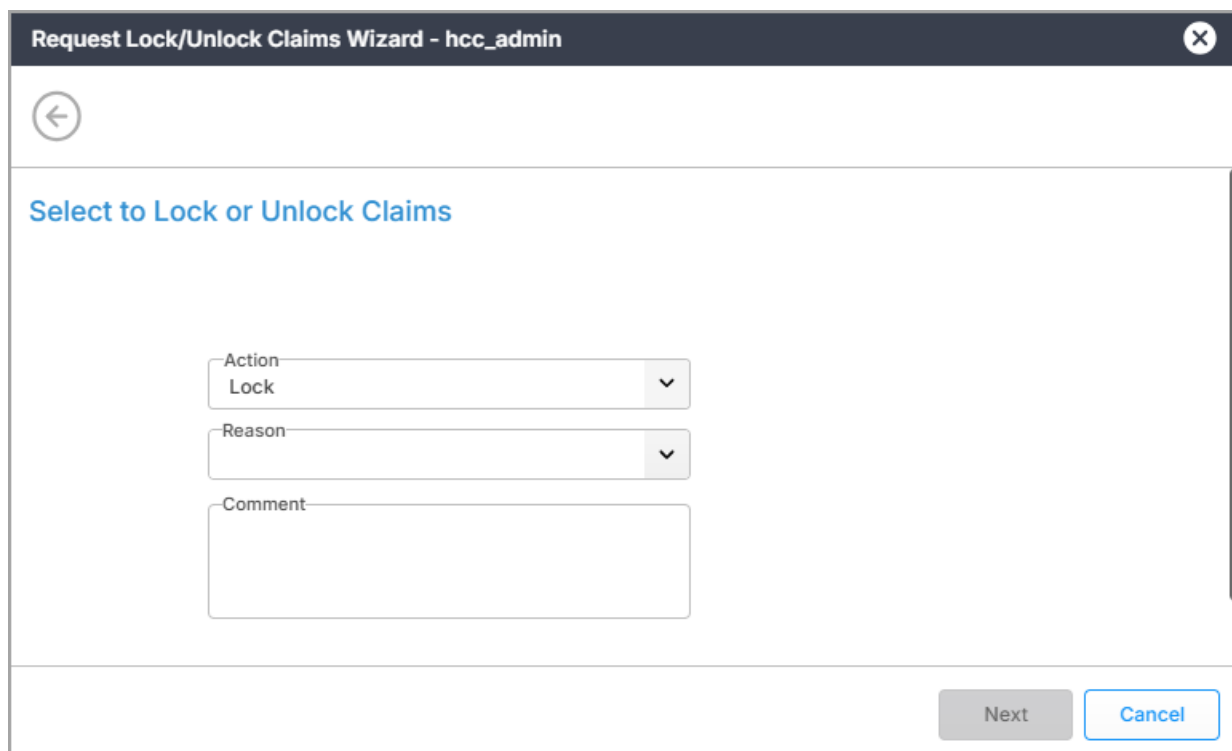

1. From the Home page Claims card, click the **Request Lock or Unlock Claims** icon.

The first wizard dialog, Select to Lock or Unlock Claims opens.

The screenshot shows a wizard dialog box titled "Request Lock/Unlock Claims Wizard - hcc_admin". The dialog has a close button (X) in the top right corner and a back button (left arrow) in the top left corner. The main content area is titled "Select to Lock or Unlock Claims" in blue text. Below the title, there are three input fields: "Action" with a dropdown arrow, "Reason" with a dropdown arrow, and "Comment" with a text area. At the bottom right, there are two buttons: "Next" (disabled) and "Cancel" (active).

- From the Action drop-down list, select Lock to lock multiple claims or Unlock to unlock multiple claims.

The image shows a software window titled "Request Lock/Unlock Claims Wizard - hcc_admin". It features a back arrow icon in the top left corner. The main content area is titled "Select to Lock or Unlock Claims" in blue text. Below this title, there are three form fields: "Action" with a dropdown menu showing "Lock", "Reason" with a dropdown menu showing a downward arrow, and a "Comment" text area. At the bottom right of the window, there are two buttons: "Next" (disabled, grey) and "Cancel" (enabled, blue).

The **Next** button is enabled.

- Optionally, you can also select a reason from the Reason drop-down list and add a comment in the Comment section.
- Click **Next**.

The next wizard page, Enter Search Criteria to Find Claims to Lock opens.

NOTE You can view the Claim Lock Transactions from the Administration menu.

Rejecting and Submitting Claims

You can select a trigger event and then go through the list of claims that are candidates for reprocessing and approve or reject them, one by one, or use the Approve All or Reject All commands to approve or reject all the claims.

Follow these steps:

1. On the Reprocessed Claims workbasket, select the trigger event with which you want to work (for example, Needs Review) located in the bottom portion of the window.

The reprocessing claim candidates are displayed in the upper portion of the page.

The screenshot displays the 'Reprocessed Claims' workbasket interface. At the top, there is a navigation bar with options like 'Close', 'Approve All', 'Reject All', 'Clear All', 'Submit', and a 'Filter By' dropdown. Below this is a table of claim candidates with columns: Approve, Reject, Claim ID / Start Date, # Lines, Lines Changed, EOC, Claim Source / BlueCard Status, Patient, Supplier, Failure Detail, Impact, and Before Amounts. Three rows are visible, each with a '+' icon in the 'Approve' column and a checkbox in the 'Reject' column. Below the table is a section for selecting a trigger event, with a dropdown menu set to 'Needs Review'. Below this is a table with columns: Trigger, Type, Name/ID, Total Impact Amount, Date, Owner, Before Allowed, and After Allowed. The first row shows 'Benefit plan component amend' with a total impact of (\$360.00) and a date of 05/09/2025, 2:37 PM. At the bottom, there is a 'Total: 1' summary row.

| Approve | Reject | Claim ID / Start Date | # Lines | Lines Changed | EOC | Claim Source / BlueCard Status | Patient | Supplier | Failure Detail | Impact | Before Amounts |

Total: 1

Once you select the trigger event row in the bottom portion of the screen, the corresponding reprocessing claim candidates are displayed in the upper portion of the screen.

2. Under the Approve column, select the checkbox for each claim you want to approve for reprocessing.
3. Under the Reject column, select the checkbox for each claim you want to reject from reprocessing.

Chapter 2: Claims Tasks

- Optionally, you can click **Accept All** or **Reject All** to select all the checkboxes for either Approve or Reject.

Note that it is not necessary to approve or reject all claims at once. Claims that are undecided when the trigger is submitted remain in the trigger, and the trigger status remains “Needs Review.”

- If applicable, click **Clear All** to remove check marks from all Reject and Approve checkboxes.
- Click **Submit**.
- The Confirm Re-adjudication dialog is displayed.

Comment

OK **Cancel**

- Review the summary information. Observe the Net column to review the dollar impact of your approved or rejected decisions. Enter an optional comment for approved claims and for rejected claims and click **OK** to re-adjudicate the claims. Or click **Cancel** to cancel the submission.

NOTE After you click OK, the system processes your decisions. This can take a noticeable amount of time, especially if the trigger had hundreds or thousands of claims. While it is being processed, the trigger status is “processing.” Once all claims in the trigger status are processed, the trigger status changes to “Complete,” if all went well, or “Failed,” if there was a problem.

- To view the Audit Log information, click the **Audit Log** tab. This tab shows all changes made to the reprocessed trigger. An entry is made whenever some or all of the choices for a trigger are approved or rejected.

About Claims that Failed to Reprocess

Claims that have failed to reprocess are displayed on the Reprocessed Claims Workbasket screen. A message is displayed in the Failure Detail column describing the failure error.

You can hover your cursor over this field to display additional "stack trace" information about the failed candidate that can be used by HealthRules Customer Support to help identify why the failure occurred.

Canceling a Claim in Needs Review State

Users with the applicable permissions can cancel a claim that has been adjusted but still needs review (is not approved).

The screenshot displays the HealthEdge software interface for managing a claim. At the top, a navigation bar includes menus for File, View, Document, Financials, Funding, Workbasket, Administration, and Help. The user is logged in as 'hcc_admin'. The main header shows 'Claim - 639010863'. Below this, a toolbar contains icons for Refresh, Void, Replace, and Expedite. A red box highlights the 'Cancel (CTRL + N)' icon, with a tooltip indicating it 'Cancel the current version by rolling back to the previous version'. The 'Status' section shows 'Needs Review' and 'Status' buttons. A red box highlights the 'Previous' button. The 'Claim Type' is 'Institutional'. The 'Benefit Plan Type' is 'Medical'. The 'Calculated Benefit Plan Type' is 'Medical'. The 'Claim Source' is 'Unknown'. The 'Status' section includes checkboxes for 'Manually Priced', 'Send to Review' (checked), 'Trial Claim', 'Capitated Service', 'Renewed Claim', 'Voided Claim', and 'Locked Claim'. The 'Header' tab is active, showing fields for Payee, Supplier, Submitted Payee, Supplier, Date Received, Date Entered, Patient Account #, Medical Record #, Clearinghouse #, Submitter Name, Claim Payer, Internal, Delivery Type, Other, Scan Code, Batch Number, Trading Partner ID, Frequency Code, Claim Filing Code, Submitter ID, External Batch #, Ext. Batch Seq. #, External Claim ID, Ext. Cross Ref. Claim ID, Submitted Subscriber ID, Pay-to-Plan Primary ID, Underpayment Notification, RAP/NOA Received Date, and various checkboxes for claim processing options.

Chapter 2: Claims Tasks

The Cancel button in the toolbar of the Claims Edit page appears only on the latest version of the claim. When the claim is canceled, the latest version of the claim is rolled back (an audit trail showing that an adjustment was initiated and canceled is still retained). You must have review permission to use the **Cancel** button.

NOTE If you have review permissions you can cancel any claim using the **Cancel** button (that is, you do not need to belong to the workbasket group the claim assigned to), since you are operating outside of the Claims Review and Repair Workbasket.

Rejecting a Claim in Needs Repair State

Users with the applicable permissions can reject a claim in needs repair state.

Users belonging to a group with the applicable permissions (Repair trigger, etc.) can reject a claim in Needs Repair directly from the Claim View screen, so long as the current claim is the original version.

Click the **Reject** icon in the Claims View toolbar when a claim is in Needs Repair.

The screenshot shows the HealthEdge Claims View interface for claim 688378769. The status is 'Needs Repair'. The 'Reject (CTRL + R)' button is highlighted in the toolbar. The claim details include:

- Claim ID: 688378769
- Last Changed On: 3/10/2025 5:11:47 PM
- Adjudicated On: 3/10/2025 5:11:47 PM
- Claim Type: Institutional
- Benefit Plan Type: [Blank]
- Calculated Benefit Plan Type: [Blank]
- Claim Source: BlueCard Home
- Assigned Group: hcc_super_user
- Assigned Owner: hcc_admin

The 'Reject (CTRL + R)' button is located in the toolbar, and the 'Needs Repair' status is highlighted in the left sidebar.

When attempting to reject a claim with a previous version, a message will be displayed notifying the user to cancel the current version and deny the finalized version.

Chapter 3: Claims Screens

There are various screens and fields when using the claims feature.

This discusses the following:

| | |
|--|--------------|
| Create Claim Page | 3-2 |
| Institutional/Professional/Dental Tab | 3-6 |
| Create Institutional Claim Page | 3-8 |
| Create Professional Claim Page | 3-23 |
| Create Dental Claim Page | 3-37 |
| ADA 2002 Version Claim Entry Form | 3-38 |
| ADA 2012 Version Claim Entry Form | 3-50 |
| ADA 2024 Version Claim Entry Form | 3-64 |
| Claims Search Page | 3-86 |
| Claim View/Edit Page | 3-104 |
| Approve Claim Page | 3-286 |
| Apply Manual Overrides Screen | 3-287 |
| Claim Batch Pages | 3-294 |

Create Claim Page

Use the Create Claim page to manually enter new claim records into the HealthRules system. You can enter an Institutional, Professional, or Dental claim. Although there are many common fields, some of the fields on the Create Claim page depend on the type of claim you are creating.

To access the Create Claim page, do one of the following:

- On the Claim Home page, click the **Create** link next to Institutional, Professional, or Dental.
- From the File menu, select **Create** and then click **Institutional**, **Professional**, or **Dental**.

NOTE HealthRules Payer supports both the 2012 and 2015 versions of the ADA Dental Claim Form. Select the version you want from the Form Version drop-down list in the toolbar.

The following image is an example of the Institutional claim form for creating a claim. The Professional and Dental Claim forms are different but have some similarities.

Create Claim Toolbar

This section describes the toolbar buttons you can use when creating an individual claim.

Submit — Submit claim for immediate adjudication. If the claim is successful, the Claim View window is displayed, showing the claim you submitted.

Submit And New — Submit claim for immediate adjudication and display a new claim form to enter.

Clear — Clear all fields on the form.

Version — Dental claims only. Select either ADA 2002 or ADA 2012 version of the claim form from the drop-down list. ADA 2012 is the default selection for all new claims.

Add Line— By default, one service line is provided on a claim form. To add another service line, click the **Add Line** toolbar button. A new service line is also added when you make an entry in the first field (for example, on an Institutional Claim, 42. REV. CD.) and press the [Tab] button.

Import Claim— Import a claim from a .txt file.

Export Claim — Export a claim to a .txt file.

Close — Close the Claim Form page. If the current document has not been saved, the system asks you to confirm your action.

Enter Batch Claims Toolbar

In addition to the toolbar buttons described in the section above, when entering claims into a claims batch, a toolbar with the following fields/buttons is also enabled:

Claim List: The Claim List drop down displays all the claims in the batch. You can select a different claim to enter from the list. Entered batch claims are indicated by a check mark.

(Back) Arrow — Display a previous claim in the batch.

(Next) Arrow — Display the next claim in the batch.

Submit Batch— Submit all claims in the batch for immediate adjudication.

Clear — Clear all fields on the form

Version — Dental claim batches only. Select either ADA 2002 or ADA 2012 version of the claim form from the drop-down list. ADA 2012 is the default selection for all new claims.

NOTE You can only change the claim version of the first claim in the batch. If you change the version of the first claim, all other claim are also changed to the same version. You can only have one form version in the same batch.

Add Line — By default, one service line is provided on a claim form. To add another service line, click the **Add Line** toolbar button. A new service line is also added when you make an entry in the first field (for example, on an Institutional Claim, 42. REV. CD.) and press the [Tab] button.

Import Claim — Import a claim from a .txt file.

NOTE For dental claims, you can only import claims in the same form version as that defined for the batch. For example, if you are creating a batch of ADA 2012 version claims, you can only import an ADA 2012 version claim, not an ADA 2002 version. If you attempt to import a claim in

the incorrect form version format, an error is displayed.

Export Claim — Export a claim to a `.txt` file.

Close and Save — Close the page. If the current document has not been saved, the system asks you to confirm your action.

Institutional/Professional/Dental Tab

Most claims are entered into HealthRules Payer through electronic data feeds, but the create options on the Claims menu allow you to enter claims manually.

The three create options display one of the following corresponding tabs on the Create Claim Page:

- [Institutional Tab](#)
- [Professional Tab](#)
- [Dental Tab](#)

Use the Institutional/Professional/Dental tab for entering system claim data and standard claim form data.

Entering Claim Form Data

Interactive Searches

You can use the **Search** icon on the right-hand side of certain fields to do an interactive search to locate a record in the system.

b.

PATIENT NAME

To perform an interactive search, enter the first few characters, and then press the Down Arrow key or the [F2] key, or click the **Search** icon. A list of records appears. When you select a record from the list, all related fields in the form automatically populate. For a complete list of interactive fields and the fields they automatically populate, refer to the "Automatic Field Population" section.

Fast Track Entry

Your system administrator may have configured the claim entry forms to use Fast Track entry. This feature allows you to skip fields your company does not normally use by pressing the Fast Track Key to advance to the next field. The Enter key is the default Fast Track key. Regardless of the configuration, you can always move to any field by clicking on it with the mouse.

3-9

Most claims are entered into HealthRules Payer through electronic data feeds, but the create options on the Claims menu allow you to enter claims manually. To enter an institutional claim, select the **Create** Institutional claim option. The Create Institutional Claim page is displayed.

System claim data fields are displayed at the top of the page, followed by the fields that occur on the standard Institutional Claim Form (CMS-1450/UB-04).

The Claim Payor field indicates whether the payables and payment is generated internally after adjudication using HealthRules Manager (type = "Internal"), or are handled by an external payer (type - "External"). The Claim Payor field is not editable, but if a user has sufficient permissions, the value can be overridden using the Manual Override section (see below).

System Claim Data

This section contains information the system needs in order to track the claim.

| Field | Description |
|-------------------|---|
| BATCH NUMBER | The batch number assigned to the claim, if a claims batch. |
| CLAIM NUMBER | Specify a claim number using one the following options:
Enter manually. Auto-assign. If this field is left blank, the system automatically assigns a claim number. The claim number appears after the claim is submitted. |
| DATE RECEIVED | Automatically fills with the current date, and can be changed if necessary. |
| SCAN CODE | If the claim was scanned into an electronic file using a document scanning application, the unique scan ID code is displayed in this field. |
| CLEARINGHOUSE # | If the claim originated from a clearinghouse, the clearinghouse number is displayed in this field. |
| SUBMITTER | The entity that submitted the claim; the member or provider. |
| REFERENCE # | The identifying number that the supplier may have included on the original invoice. The number is often generated by a practice management system. |
| BENEFIT PLAN TYPE | Medical or Dental. |
| CLEAN CLAIM DATE | When the claim is entered, it defaults to the receipt date. The date acts as a clean claim "as of" date. If the user changes it to a prior date, the system will send the claim to repair. Only a date equal to or later than the receipt date is |

| Field | Description |
|-------------------------|---|
| | valid. If the user deletes the date, the claim is considered a "non clean" claim, and interest will not be calculated on this claim. When importing a claim and the clean claim date is different from the receipt date, the clean claim date will be changed to the receipt date. The user will then need to change that clean claim date, if applicable. |
| SEND TO REVIEW | Select this checkbox to force the claim into Review. When submitted, the claim will be sent to the Claim Repair and Review Workbasket for review. |
| ENCOUNTER | Select this checkbox to mark the claim as an encounter. |
| EXTERNAL BATCH # | If the claim was loaded into the system adjudicated, the external batch number is displayed in this field. |
| EXT. BATCH SEQ. # | When a claim is part of an EDI batch load, a batch sequence number is assigned to the claim to denote its place in the batch. This sequence number can then be used to map claim to a 277 CA acknowledgment. |
| CLAIM PAYOR | This field determines if the claim will be paid internally using HealthRules, or outside of HealthRules using an external payment engine. External claims are adjudicated, pre-priced, and re-priced like internal claims. The field defaults to Internal. This setting can be changed on a claim until the claim is finalized, then it cannot be changed. For more information, see "Internal vs. External (Statistical) Claims" on page 1-10. |
| CLAIM SOURCE | Select the source of the claim from the drop-down list box. For example, External system medical claim, or some other user-defined code entry. |
| TRADING PARTNER ID | If there is a trading partner associated with the claim that was loaded via EDI batch load, the trading partner ID is displayed here. |
| EXTERNAL CLAIM # | If the claim was loaded into the system adjudicated, the external claim number is displayed in this field. |
| EXT. CROSS REF. CLAIM # | When a claim is part of an EDI data load, it can reference an external cross reference number. For some consolidated external system claims (Claim Source = External System Claim or other entry code value), this field will be re-labeled to Cross Reference SCCF #. This is a 17 digit, all numeric entry, and will only be entered when |

| Field | Description |
|----------------|--|
| | claims are being adjusted within certain external claim programs. In this case, the Cross Reference SCCF# will tie back to the original SCCF#, but the sequence number will be incremented by one. This value is not validated against any other claim. |
| HOST PLAN CODE | The Plan Code that has sent the claim. This code can be used to match to a supplier. It is a 3 digit numeric field. It is not available on Dental claim forms. |
| FREQUENCY CODE | <p>Voiding or replacing a claim is typically done electronically through the 837 EDI download.</p> <p>If you need to manually void a claim that should never have existed, select Void from the Frequency Code drop-down list box. On the claim form, enter exactly the information for the original claim you want to void, and then Submit. For more information, see Manually Voiding a Claim.</p> <p>If you need to manually replace a claim that was originally entered with incorrect or missing information, select Replace from the Frequency Code drop-down list box. On the claim form, enter exactly the information for the original claim you want to replace, adding any missing information, and correcting any incorrect information, and then Submit. For more information, see Manually Replacing a Claim.</p> |
| DELIVERY TYPE | Select the value of the delivery type from the drop-down list box. For example, Manual, Electronic, Scanned, and Other. |

Institutional Claim Form Fields

NOTE General field instructions are included below. Your health care company may have special instructions for various types of insurance. Follow your company's instructions where applicable.

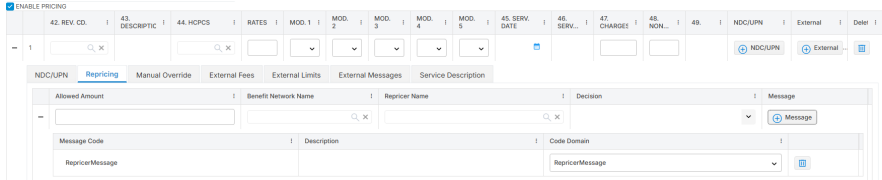

| Field | Description |
|---------------|---|
| 1. PROVIDER | |
| PROVIDER NAME | Enter the name of the billing provider. |

| Field | Description |
|---|--|
| | You can enter a partial name, and then click Search in the field to display a list of provider names. Select the provider. The remaining provider information will be pre-filled. |
| ADDRESS | Select the provider's street address from the drop-down list. Once submitted, the address will display the Rendered Service Address fields on the the consolidated claim. |
| CITY | Enter the provider's city name. |
| STATE | Enter the provider's state code. |
| ZIP | Enter the provider's 5-digit ZIP code. |
| ZIP SUFFIX | Enter the provider's 4-digit ZIP code (ZIP+4) suffix. |
| PHONE | Enter the provider's business telephone number. |
| FAX | Enter the provider's business FAX number. |
| COUNTRY | Select the name of the provider's country from the drop-down list |
| 2. PAY TO | |
| PAY TO NAME | Enter the pay to name (if different from field 1.) |
| ADDRESS | Enter the pay to street address (if different from field 1.) |
| CITY | Enter the pay to city (if different from field 1.) |
| STATE | Enter the pay to state code (if different from field 1.) |
| ZIP | Enter the pay to ZIP code (if different from field 1.) |
| ZIP SUFFIX | Enter the pay to 4-digit ZIP code (ZIP+4) suffix (if different from field 1.) |
| COUNTRY | Select the name of the provider's country from the drop-down list (if different from field 1). |
| 3A. PAT. CNTL. | Enter the institution's unique patient control number (account number) assigned to the patient. |
| 3B. MED. REC# | Enter the medical record number assigned to the patient's medical record by the provider. |
| 4. TYPE OF BILL | Enter the four-digit Type of Bill code. For example, "0111". |
| 5. FED. TAX. NO. | Enter the federal text ID number for the institution. |
| 6. STATEMENT COVERS PERIOD FROM/THROUGH | Enter the beginning and ending service dates for the period covered on the claim. Use the format MM/DD/YYYY or select the date from the calendar control. |

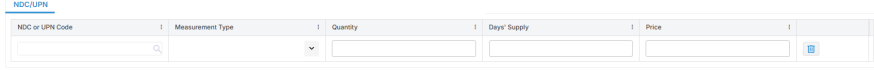

| Field | Description |
|-------------------------|---|
| 7. | This field is for "Administrative Necessary Days." Not required. |
| 8. PATIENT NAME | |
| A. PATIENT ID | Enter the patient's ID number. |
| B. PATIENT NAME | Enter the patient's name.

You can enter a partial name, and then click Search in the field to display a list of patient names. Select the patient. The patient ID number, patient address, birth date, and sex fields will be pre-filled. |
| 9. PATIENT ADDRESS | |
| A. ADDRESS | Enter the patient's street address.

Note: Both the first and second fields for address have a 25-character limit and will display any additional characters when pointing to the field (max 250 characters) |
| B. CITY | Enter the patient's holder city name. |
| C. STATE | Enter the patient's holder state code. |
| D. ZIP | Enter the patient's 5-digit ZIP code. |
| ZIP SUFFIX | Enter the patient's 4-digit ZIP code (ZIP+4) suffix. |
| E. COUNTRY | Select the name of the patient's country from the drop-down list. |
| 10. BIRTHDATE | Enter the birth date of the patient. Use the format MM/DD/YYYY or select the date from the calendar control. |
| 11. SEX | Select the patient's gender from the drop-down list. |
| 12. ADMISSION DATE | Enter the admission date for this episode of care. |
| 13. HR | Enter the admission hour. |
| ESRD DATE | For ESRD claims only, enter the ESRD onset date. |
| 14. TYPE | Select the admission type from the drop-down list. |
| 15. SRC. | Select the source of admission from the drop-down list. |
| 16. DHR | Enter the discharge hour. |
| 17. STAT | Select the patient discharge status from the drop-down list. |
| 18.-28. CONDITION CODES | Enter up to 11 two-digit alphanumeric condition codes to identify conditions that may affect the processing of the claim. |

| Field | Description |
|---|---|
| 29. ACDT STATE | If applicable, enter the two-digit accident state code. |
| 30. | If applicable, enter the accident date. Use the format MM/DD/YYYY. |
| 31.-34. OCCURRENCE CODE/DATE | Enter up to four pairs of occurrence codes and associated dates for events that may affect claim processing. Use the format MM/DD/YYYY for the occurrence dates, or select the dates from the calendar controls. |
| 35.-36. OCCURRENCE SPAN CODE/FROM/THROUGH | Enter up to two pairs of occurrence codes and associated from and through span dates for events that may affect claim processing. Use the format MM/DD/YYYY for the occurrence dates, or select the dates from the calendar controls. |
| 37. | Not required. |
| 38. RESPONSIBLE PARTY | |
| NAME | Enter the responsible party name. Use the Last Name, First Name, MI format. |
| ADDRESS | Enter the responsible party's street address. |
| CITY | Enter the responsible party's holder city name. |
| STATE | Enter the responsible party's holder state code. |
| ZIP | Enter the responsible party's 5-digit ZIP code. |
| ZIP SUFFIX | Enter the responsible party's 4-digit ZIP code (ZIP+4) suffix. |
| PHONE | Enter the responsible party's business telephone number. |
| COUNTRY | Select the name of the responsible party's country from the drop-down list. |
| 39.-41. VALUE CODES CODE/AMOUNT | In each numbered field enter up to four value codes to identify special circumstances that may affect the processing of this claim. In the amount field, enter the amount, number, or UCR value associated with the specified code. |
| ENABLE PRICING | <p>Select the ENABLE PRICING checkbox to open the Repricing and Manual Override tabs.</p>  <p>The Repricing tab enables you to enter pre-priced data, including the allowed amount, benefit network, repricer name,</p> |

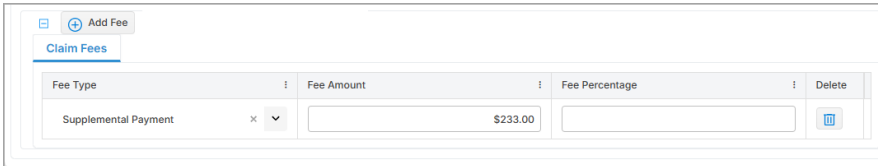

| Field | Description | | | | | | | | | | | | | | |
|----------------|---|----------------|----------------------|----------------------------|-------------------|----------------------------|----------------|----------|------------|--|--|------------|----------------|--|--|
| | <p>and decision (priced, denied) reported by the repricer. To add a message to the line item describing your repricing actions, click + Message . | + \$450.00 | | | In-Network | Allowed Amount | | | | | | | | | | | |

| Field | Description |
|---|---|
| | system-defined Override messages from the drop-down that represent denial overrides to be applied to the line during adjudication. The Code Set column in the drop-down indicates if the message originated from the UserMessageDomain, or the SystemMessageDomain. |
| 42. REV. CD. | <p>To add the first line item, click line 1, box 42. As soon as you tab to box 43, a new service line appears. Alternately, you can add additional lines by clicking the Add Line in the toolbar.</p> <p>Enter the four-digit revenue code corresponding to each description entered in column 43. The first digit is a leading "0".</p> |
| 43. DESCRIPTION | Enter a short description corresponding to the revenue code entered in column 42. |
| 44. HCPCS/RATES | Enter the HCPC code for outpatient bills in the entry field on the left side of the box. Or, for inpatient bills, enter the accommodation rate in the entry field on the right side of the box. |
| MOD. 1 - MOD. 5 | Enter the required HIPPS modifiers or assessment type indicators. |
| 45. SERV. DATE | Enter the date the service was provided. Use the format MM/DD/YYYY for the occurrence dates, or select the dates from the calendar controls. |
| 46. SERV. UNITS | Enter the number of units of service provided (for example, hospital accommodation days, or pints of blood). |
| 47. CHARGES | Enter the amount charges for each service provided. |
| 48. NON-COV. CHARGES | Enter the amount, if any, that is not covered by the primary payer for this service. |
| 49. | Not required. |
|  | <p>Click +NDC to add NDC code information for the service line. The NDC popup dialog is displayed.</p>  <p>Enter the 11-digit NDC Code. You can enter the first few digits, and then click the Search icon in the field to search for and select the code. Select the Measurement Type from the drop-</p> |

| Field | Description |
|--|--|
| | <p>down list. Enter the Quantity, and Price. If applicable, enter the number of Days' Supply of a drug that's been provided to a member.</p> <p>Click "X" to delete an NDC line.</p> |
|  External | <p>Click +External to add external fee, limits, and message information. The External popup dialog is displayed.</p>  <p>Complete the following fields:</p> <ul style="list-style-type: none"> ▪ External Fees Tab — Fee Type, Fee Amount (can be entered as a positive or negative value), Fee Percentage ▪ External Limits Tab — Amount, Units, Days ▪ External Messages Tab — Message Code |
| Delete - X | To delete a claim line, click the delete icon (" X ") next to the line you want to delete. |
| CREATION DATE | Enter the claim creation date. Use the format MM/DD/YYYY for the occurrence dates, or select the dates from the calendar controls. |
| TOTALS | The total charges and non-covered charges from all service lines are displayed in these fields. |
| 50. PAYER NAME (a. b. c.) | Enter the primary payer name on line "a." and other payer names on lines "b." and "c." |
| 51. HEALTH PLAN ID (a. b. c.) | Enter the health plan ID number for each payer. |
| 52. REL. INFO. (a. b. c.) | Select the Release of Information status of the claim from the drop-down list. Valid selections are: "Yes," "No," "Informed Consent," and "Restricted." |
| 53. ASG. BEN. (a. b. c.) | Enter the Assignment of Benefits Certification Indicator, if needed. |
| 54. PRIOR PAYMENTS (a. b. c.) | If the payer has already paid an amount to the provider towards this bill, enter the amount here. |

| Field | Description |
|-----------------------------------|--|
| 55. EST. AMOUNT DUE
(a. b. c.) | Enter the estimated amount due from patient, if any. |
| 56. NPI | Enter the National Provider ID of the provider. |
| 57. OTHER PRV. ID
(a. b. c.) | Enter the NPIs of up to three other providers. (a. b. c.) |
| 58. INSURED'S NAME | Enter the insured's name who carries the insurance benefit. |
| 59. P. REL. | Enter the patient's relationship to the named insured. For example, "Child," "Spouse," etc. |
| ID PREFIX | The ID prefix is a claim-level attribute. It is a 3-character alpha field. It is not available on Dental claim forms. Optionally, the ID Prefix field can be used to match to an ID prefix in the member's benefit plan selection. For more information, see "Denying a Claim when an Invalid Member ID Prefix was Submitted on the Claim" on page 2-56. |
| 60. INSURED'S UNIQUE ID | Enter the unique ID assigned to the insured by the health plan. |
| 61. GROUP NAME | If applicable, enter the name of the group or plan through with the insurance is provided. |
| 62. INSURANCE GROUP NO. | If applicable, enter the identification number of the group or plan through with the insurance is provided. |
| 63. TREATMENT AUTHORIZATION CODES | Enter the treatment authorization codes assigned by the payer for the services on this claim. |
| 64. DOCUMENT CONTROL NUMBER | Enter the control number assigned to the original bill by the health plan or the health plan's fiscal agent for internal control. |
| 65. EMPLOYER NAME | Enter the name of the employer that provides health care coverage to the individual identified in field 58. |
| 66. DX | Enter the Diagnosis and Procedure Code Qualifier (ICD Version Indicator) denoting the version of the International Classification of Diseases (ICD) being used to report the diagnoses and procedures. For example , "ICD-9," or "ICD-10." |
| 67. AND 67A.-67Q. | In field 67, enter the principal diagnosis code. Enter other diagnosis codes in fields 67A-67Q. |
| 68. | Not used. |
| 69. ADMIT DX | For inpatient hospital claims, enter the admitting diagnosis. |
| 70. PATIENT REASON DX | For outpatient bills, enter the patient's reason for the outpatient visit. |

| Field | Description |
|-----------------------------------|--|
| 71. PPS CODE | Enter the prospective payment system (PPS) code. |
| 72. ECI | Enter the external cause of injury (ECI) code. |
| 74. PRINCIPAL PROCEDURE CODE/DATE | For inpatient claims, enter the principal procedure code and date. |
| OTHER PROCEDURE (a.-e.) CODE/DATE | For inpatient claims, enter the other procedure codes that need to be reported on the claim (a.-e.), and the date for each code. |
| 75. | Not used. |
| 76. ATTENDING | |
| NPI | Enter the National Provider Identifier (NPI) number of the attending provider. |
| LAST NAME | Enter the last name of the attending provider. |
| FIRST NAME | Enter the first name of the attending provider. |
| QUAL./ID | Enter the secondary identifier qualifier for the operating provider. For example: "0B" for State License Number , "IG" for Provider UPIN Number, "G2" for Provider Commercial Number, etc. |
| ID | Enter a secondary ID (not NPI). |
| 77. OPERATING | |
| NPI | Enter the National Provider Identifier (NPI) number of the operating provider for a surgical procedure. |
| QUAL./ID | Enter the secondary identifier qualifier for the operating provider. For example: "0B" for State License Number , "IG" for Provider UPIN Number, "G2" for Provider Commercial Number, etc. |
| LAST NAME OR ID | Enter the last name of the operating provider or the operating provider's secondary provider ID. |
| FIRST | Enter the first name of the operating provider. |
| 78. - 79. OTHER | |
| NPI | Enter the National Provider Identifier (NPI) number of the referring, rendering or other operating practitioner. |
| LAST NAME | Enter the last name of the referring, rendering or other operating practitioner. |
| FIRST NAME | Enter the first name of the referring, rendering or other |

| Field | Description |
|---|---|
| | operating practitioner. |
| QUALIFIER | Enter the qualifier identifying the type of physician submitted. For example: "DN" for Referring Provider, "ZZ" for Other Operating, "82" for Rendering Provider |
| ID | Enter a secondary ID (not NPI). |
| 80. REMARKS | Enter remarks in the four fields provided. Typically used to enter the provider signature or authorized agent's original signature, but may be used to enter any additional remarks on the form. If the remark is very long, you can hover your cursor over a field to display the entire remark. |
| 81CC | Enter the corresponding provider taxonomy of provider NPI's entered in locations:
76a – 81CCa
77b – 81CCb
78c – 81CCc
79d – 81CCd |
| FIRST | Enter the first name of the other provider. |
| Add Claim Fee | |
|  | <p>Click Add Fee to add claim fee information to the claim.</p>  |
| Fee Type | Select the Fee Type from the drop-down list. For example, select: "Access Fee," "AEA Fee," and "State Surcharge." Fee types are user-defined through a code entry in the ExternalFeeType code set. |
| Fee Amount | Enter the fee amount |
| Fee Percentage | Enter the fee percentage. |
| Delete | Click the "X" icon to delete the fee line. |
| Add Eligibility Code | |
|  | Click Add Eligibility Code to add provider service eligibility information to the claim. |

| Field | Description |

ENABLE PAY TO

Most claims are entered into HealthRules Payer through electronic data feeds, but the create options on the Claims menu allow you to enter claims manually. To enter a professional claim, select the **Create** Professional claim option. The Create Professional Claim page is displayed.

System claim data fields are displayed at the top of the page, followed by the fields that occur on the standard Professional Claim Form (CMS-1500, formerly HCFA-1500).

System Claim Data

This section contains information the system needs in order to track the claim.

| Field | Description |
|-------------------|--|
| BATCH NUMBER | The batch number assigned to the claim, if a claims batch. |
| CLAIM NUMBER | Specify a claim number using one the following options:
Enter manually. Auto-assign. If this field is left blank, the system automatically assigns a claim number. The claim number appears after the claim is submitted. |
| DATE RECEIVED | Automatically fills with the current date, and can be changed if necessary. |
| CLEAN CLAIM DATE | When the claim is entered, it defaults to the receipt date. The date acts as a clean claim "as of" date. If the user changes it to a prior date, the system will send the claim to repair. Only a date equal to or later than the receipt date is valid. If the user deletes the date, the claim is considered a "non clean" claim, and interest will not be calculated on this claim. When importing a claim and the clean claim date is different from the receipt date, the clean claim date will be changed to the receipt date. The user will then need to change that clean claim date, if applicable. |
| SCAN CODE | If the claim was scanned into an electronic file using a document scanning application, the unique scan ID code is displayed in this field. |
| SUBMITTER | The entity that submitted the claim; the member or provider. |
| CLEARINGHOUSE # | If the claim originated from a clearinghouse, the clearinghouse number is displayed in this field. |
| REFERENCE # | The identifying number that the supplier may have included on the original invoice. The number is often generated by a practice management system. |
| BENEFIT PLAN TYPE | Medical or Dental. |
| SEND TO REVIEW | Select this checkbox to force the claim into Review. When submitted, the claim will be sent to the Claim Repair and Review Workbasket for review. |

| Field | Description |
|-------------------------|---|
| ENCOUNTER | Select this checkbox to mark the claim as an encounter. |
| CLAIM PAYOR | This field determines if the claim will be paid internally using HealthRules, or outside of HealthRules using an external payment engine. External claims are adjudicated, pre-priced, and re-priced like internal claims. The field defaults to Internal. This setting can be changed on a claim until the claim is finalized, then it cannot be changed. For more information, see "Internal vs. External (Statistical) Claims" on page 1-10. |
| CLAIM SOURCE | Select the source of the claim from the drop-down list box. For example, External system medical claim, or some other user-defined code entry. |
| EXTERNAL BATCH # | If the claim was loaded into the system adjudicated, the external batch number is displayed in this field. |
| EXT. BATCH SEQ. # | When a claim is part of an EDI batch load, a batch sequence number is assigned to the claim to denote its place in the batch. This sequence number can then be used to map claim to a 277 CA acknowledgment. |
| TRADING PARTNER ID | If there is a trading partner associated with the claim that was loaded via EDI batch load, the trading partner ID is displayed here. |
| EXTERNAL CLAIM# | If the claim was loaded into the system adjudicated, the external claim number is displayed in this field. |
| EXT. CROSS REF. CLAIM # | When a claim is part of an EDI data load, it can reference an external cross reference number. For some consolidated external system claims (Claim Source = External System Claim or other entry code value), this field will be re-labeled to Cross Reference SCCF #. This is a 17 digit, all numeric entry, and will only be entered when claims are being adjusted within certain external claim programs. In this case, the Cross Reference SCCF# will tie back to the original SCCF#, but the sequence number will be incremented by one. This value is not validated against any other claim. |
| HOST PLAN CODE | The Plan Code that has sent the claim. This code can be used to match to a supplier. It is a 3 digit numeric field. It is not available on Dental claim forms. |
| FREQUENCY CODE | Voiding or replacing a claim is typically done electronically through the 837 EDI download. |

| Field | Description |
|---------------|---|
| | <p>If you need to manually void a claim that should never have existed, select Void from the Frequency Code drop-down list box. On the claim form, enter exactly the information for the original claim you want to void, and then Submit. For more information, see Manually Voiding a Claim.</p> <p>If you need to manually replace a claim that was originally entered with incorrect or missing information, select Replace from the Frequency Code drop-down list box. On the claim form, enter exactly the information for the original claim you want to replace, adding any missing information, and correcting any incorrect information, and then Submit. For more information, see Manually Replacing a Claim.</p> |
| DELIVERY TYPE | Select the value of the delivery type from the drop-down list box. For example, Manual, Electronic, Scanned, and Other. |

Professional Claim Form Fields

NOTE General field instructions are included below. Your health care company may have special instructions for various types of insurance. Follow your company's specific instructions where applicable.

| Field | Description |
|---------------------------|---|
| 1. INSURANCE TYPE | Enter the type of insurance coverage applicable to this claim. For example, "Medicare." |
| ID PREFIX | The ID Prefix, if applicable. |
| 1a. INSURED'S I.D. NUMBER | Enter the patient's Medicare Health Insurance Claim Number (HICN) whether Medicare is the primary or secondary payer. |
| 2. PATIENT'S NAME | <p>Enter the name of the patient (Last Name, First Name, Middle Initial (if any)).</p> <p>You can enter a partial name, and then click the Search icon in the field to display a list of provider names. Select the provider. The remaining provider information will be pre-filled.</p> |
| 3. BIRTH DATE | Enter the patient's birth date. Use the format MM/DD/YYYY. |

| Field | Description |
|------------------------------------|---|
| SEX | Select the patient's gender from the drop-down list. |
| 4. INSURED'S NAME | Enter the insured's name (Last Name, First Name, Middle Initial (if any)). |
| 5. PATIENT'S ADDRESS | Enter the patient's street address.

Note: Both the first and second address fields have a 25-character limit and will display any additional characters when pointing to the field (max 250 characters) |
| CITY | Enter the patient's city name. |
| STATE | Enter the patient's state code. |
| ZIP | Enter the patient's 5-digit ZIP code. |
| COUNTRY | Select the name of the patient's country from the drop-down list |
| TELEPHONE | Enter the patient's telephone number. |
| 6. PATIENT RELATIONSHIP TO INSURED | Enter the patient's relationship to the named insured. |
| 7. INSURED'S ADDRESS | Enter the insured's street address.

Note: Both the first and second address fields have a 25-character limit and will display any additional characters when pointing to the field (max 250 characters) |
| CITY | Enter the insured's city name. |
| STATE | Enter the insured's state code. |
| ZIP | Enter the insured's 5-digit ZIP code. |
| COUNTRY | Select the name of the insured's country from the drop-down list |
| TELEPHONE | Enter the insured's telephone number. |
| 8. PATIENT STATUS | Select the insured's marital status from the drop-down list. |
| EMPLOYMENT STATUS | Select the insured's employment status from the drop-down list. |
| 9. OTHER INSURED'S POLICY NUMBER | If the patient has other insurance, complete fields 9. through 9d.

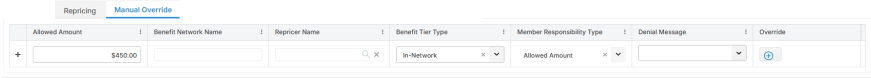

Enter the other insured's name in field 9. This is the name of the enrollee in the other insurance policy. |
| 9a. OTHER INSURED'S POLICY NUMBER | Enter the other insured's policy number. |

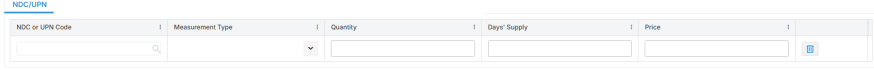

| Field | Description |
|--|---|
| b. BIRTH DATE | Enter the other insured's birth date. |
| SEX | Enter the other insured's sex. |
| c. EMPLOYER'S NAME OR SCHOOL NAME | Enter the employer's name or school name (account) through which the other insurance is obtained. |
| d. INSURANCE PLAN NAME | Enter the other insurance plan name or program name. |
| 10. IS CONDITION RELATED TO: | |
| a. EMPLOYMENT? (Current or Previous) | If the patient's condition is related to employment (current or prior), select "Yes" from the drop-down list. If not, select "No." |
| b. AUTO? | If the patient's condition is related to an automobile accident, select "Yes" from the drop-down list. If not, select "No." |
| STATE | If the patient's condition is related to an automobile accident, enter the state code for the state in which the accident occurred. |
| COUNTRY | If the patient's condition is related to an automobile accident, enter the country in which the accident occurred. |
| c. OTHER ACCIDENT? | If the patient's condition is related to another accident, select "Yes" from the drop-down list. If not, select "No." |
| 10d. RESERVED FOR LOCAL USE | Not required. |
| 11. INSURED'S POLICY GROUP OR FECA NO. | Enter the insured's policy group or FECA number. |
| a. BIRTH DATE | Enter the insured's birth date if different from field 3. |
| SEX | Enter the insured's sex if different from field 3. |
| b. EMPLOYER'S NAME OR SCHOOL NAME | Enter the insured's employer or school name (account) through which coverage is obtained. |
| c. INSURANCE PLAN NAME | Enter the insurance plan name. |
| d. IS THERE ANOTHER HEALTH BENEFIT PLAN? | If there is another health benefit plan, select "Yes" from the drop-down list. If not, select "No." |
| 12. RELEASE AUTHORIZATION SIGNATURE? | If a release authorization signature is on file, select "Yes" from the drop-down list. If not, select "No." |
| DATE | Enter the date of the release authorization signature. Use the format MM/DD/YYYY. |

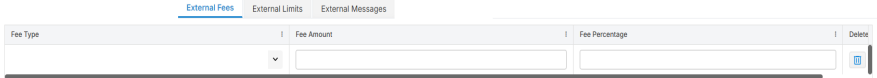

| Field | Description |
|------------------------------|--|
| 13. INSURED'S SIGNATURE? | <p>If the insured's signature is on file, select "Yes" from the drop-down list. If not, select "No."</p> <p>The patient's signature authorizes release of medical information necessary to process the claim. It also authorizes payment of benefits to the provider of service or supplier when the provider of service or supplier accepts assignment on the claim.</p> |
| 14. ILLNESS/INJURY/PREG.DATE | Enter the date of the current illness, injury, or pregnancy. Use the format MM/DD/YYYY. |
| 14a. QUALIFIER | <p>Enter a qualifier code to clarify the date entered in Field 14 (see above):</p> <ul style="list-style-type: none"> ■ 484: used to indicate the date is the last menstrual period ■ 431: used to indicate onset date of symptoms or current illness |
| 15. OTHER DATE | <p>Enter a situational/optional date along with a qualifier (see below).</p> <p>For example, you might enter the initial treatment date, last seen date, or acute manifestation date.</p> <p>Note: Where Field 15 corresponds to the original FIRST DATE OF OCCURRENCE field on older forms, the tooltip indicates the date was entered in the old format without a qualifier.</p> |
| 15a. QUALIFIER | <p>From the drop-down list, select the qualifier corresponding to the situational/optional date entered in the OTHER DATE field (see above).</p> <p>For example, if you entered an initial treatment date, select "Initial Treatment Date." Valid qualifiers include:</p> <ul style="list-style-type: none"> ■ Acute Manifestation Date ■ Accident Date ■ Hearing and Vision Prescription Date ■ Assumed Care Date |

| Field | Description |
|------------------------------------|---|
| | <ul style="list-style-type: none"> Relinquished Care Date Property and Casualty Date of First Contact Initial Treatment Date Last Seen Date Last X-Ray Date |
| 16. NO WORK FROM | If the patient is employed and unable to work, enter the from date of when the patient is unable to work. |
| TO | Enter the to date of when the patient is unable to work. |
| 17. NAME OF REFERRING PROVIDER | Enter the name of the supervising or ordering or referring provider. |
| 17A. QUALIFIER | Enter a qualifier code to clarify the provider entered in Field 17 (see above): <ul style="list-style-type: none"> DN- specified for Referring Practitioner DK- specified for Ordering Practitioner DQ- specified for Supervising Practitioner |
| 17A. REFERRING PROVIDER ID | Enter the provider ID of the supervising or ordering or referring provider. |
| 17B. REFERRING PROVIDER NPI | Enter the National Provider Identifier (NPI) of the supervising or ordering or referring provider. |
| 18. HOSPITAL FROM | Enter the date from which a medical service is provided as a result of, or subsequent to, a related hospitalization. |
| TO | Enter the to date up to which a medical service is provided as a result of, or subsequent to, a related hospitalization. |
| 19. RESERVED FOR LOCAL USE | Not required. |
| 20. OUTSIDE LAB? | If an outside lab was used for diagnostic tests, select "Yes" from the drop-down list. If not, select "No." |
| \$CHARGES | Enter the outside lab charges, if any. |
| 21. DIAGNOSIS OR NATURE OF ILLNESS | Enter up to twelve of the patient's diagnosis/condition ICD-9 or ICD-10 code(s). Use field 1. for the primary diagnosis. |

| Field | Description |
|--------------------------------|---|
| (1.-12.) | |
| DIAGNOSIS QUALIFIER | Enter the diagnosis qualifier, either ICD-9 or ICD-10, to indicate which ICD codes you are entering in field 21. |
| 22. MEDICAID RESUBMISSION CODE | Enter the Medicaid crossbowmen code, if required. |
| ORIGINAL REF. NO. | Enter the original reference no., if required. |
| 23. PRIOR AUTHORIZATION NUMBER | <p>Select the type of value, that is CLIA ID or Referral Number/Zip Code before entering the value in field 23, and then enter the prior authorization number.</p> <p>For ambulance service, use this field to enter the required five-digit Point of Pickup ZIP code, which identifies the location of the patient at the time he or she is placed on board the ambulance.</p> <p>Note: The system will use the existing logic to determine if the value in Field 23 is a referral number or zip code when the value type is Referral Number/Zip Code or left blank. If the value entered is a five-digit code and the claim is for an ambulance service, the system identifies the value as a zip code and shows it under the Ambulance Information section of the consolidated claim's header. If it is not an ambulance service, the value is identified as a referral number and shows under the Service Authorization field under the Additional Information section. If the Field 23 value is not five digits, the system identifies it as a referral number and shows it under the Additional Information section's Service Authorization field.</p> |
| ENABLE PRICING | <p>Select the ENABLE PRICING checkbox to open the Repricing and Manual Override tabs.</p>  <p>The Repricing tab enables you to enter pre-priced data, including the allowed amount, benefit network, reprice namer, and decision (priced, denied) reported by the repricer. To add a message to the line item describing your repricing actions, click + Message. The Message Code and Code Domain default to the "RepricerMessage". You can override these fields with the correct code and code domain.</p> <p>If you leave the Allowed Amount field empty, when the claim is</p> |

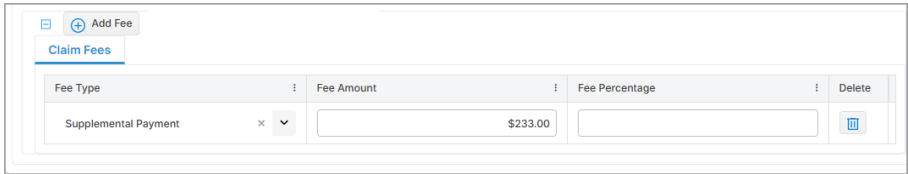

| Field | Description |
|----------------------------------|---|
| | <p>submitted, it will go to the Claim Repricing Workbasket.</p>  <p>The Manual Override tab enables you to override to the following information that the system will use during adjudication:</p> <ul style="list-style-type: none"> ▪ Allowed Amount – The amount allowed on the claim. ▪ Benefit Network – The benefit network name. ▪ Repricer Name – The repricer used to do claims repricing. ▪ Benefit Tier Type – Selection determines whether the claim is priced as In-Network or Out-of-Network. ▪ Member Responsibility Type – This field defines if the member is responsible up to the "Billed Amount" or the "Allowed Amount". The selection will override the setting in the "Member Responsibility" provision. If left blank, the setting in the "Member Responsibility" provision is used, if configured. If not configured, the default "Allowed Amount" is used. ▪ Denial Message - You can select a user-defined denial message from the Denial Message drop-down for the claim line denial - this message will force a denial of the claim line during adjudication. These messages are defined as Code entries under the code set "UserMessageDomain", with a user Message Action of "Denial." ▪ Override command - Click Override to select one or more system-defined Override messages from the drop-down that represent denial overrides to be applied to the line during adjudication. The Code Set column in the drop-down indicates if the message originated from the UserMessageDomain, or the SystemMessageDomain. |
| 24. A B DATES OF SERVICE FROM/TO | Enter the from and to dates of service. Use the format MM/DD/YYYY. |

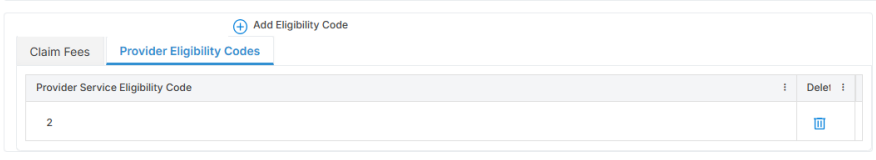

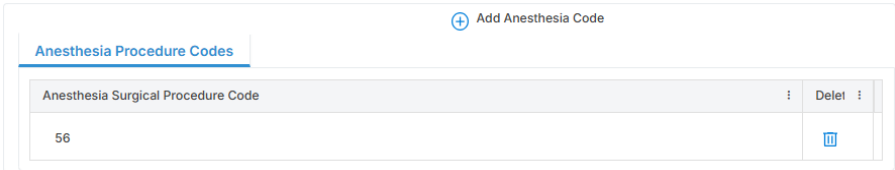

| Field | Description |
|---|---|
| B POS | Select the place of service code from the drop-down list. |
| C EMG | If the service was an emergency service, select "Yes" from the drop-down list. If not, select "No." |
| D PROCEDURES, SERVICES OR SUPPLIES | |
| CPT/HCPSCS | <p>Enter the CPT or HCPSCS code describing the service provided.</p> <p>You can enter a partial code, and then click the Search icon in the field to display a list of matching codes. Select the code.</p> |
| MODIFIER | Select up to five diagnosis code modifiers from the drop-down lists. |
| E DIAGNOSIS POINTER | Enter the diagnosis code reference number (1-12) to link the diagnosis code and dates of service with the primary diagnosis or secondary diagnosis entered in field 21. If you need to add more than eight pointers, click the Add checkbox to display an additional four pointer fields. |
| F \$ CHARGES | Enter the charge for each service. |
| G UOS | Enter the number of days or units of service. |
| H MOS | Not used. |
| I EPSDT | If the service is for Early and Periodic Screening, Diagnosis and Treatment related services, select "Yes," from the drop-down list. Otherwise, select "No." |
| J ID QUAL. | Enter the ID qualifier for the non-NPI provider ID. |
| K RENDERING PROVIDER ID # | <p>Enter the non-NPI provider ID.</p> <p>You can enter a ID, and then click the Search icon in the field to display a list of matching ID codes. Select the code.</p> |
| L NPI | Enter the NPI of the rendering provider. |
|  | <p>Click +NDC to add NDC code information for the service line. The NDC popup dialog is displayed.</p>  <p>Enter the 11-digit NDC Code. You can enter the first few digits, and then click the Search icon in the field to search for and select the code. Select the Measurement Type from the drop-down list. Enter the Quantity, and Price. If applicable, enter the number of</p> |

| Field | Description |
|---|--|
| | <p>Days' Supply of a drug that's been provided to a member.</p> <p>Click the "X" icon to delete an NDC line.</p> |
|  | <p>Click +External to add external fee, limits, and message information. The External popup dialog is displayed.</p>  <p>Complete the following fields as required:</p> <ul style="list-style-type: none"> ▪ External Fees Tab — Fee Type, Fee Amount, Fee Percentage ▪ External Limits Tab — Amount, Units, Days ▪ External Messages Tab — Message Code ▪ Rendering Practitioner Tab — First Name, Last Name, and Specialty. |
| RENDERING PRACTITIONER TAB | Enter the rendering provider details such as name, suffix, specialty and a Clinical Lab Improvement Amendment (CLIA ID). |
| REFERRING LAB PROVIDER TAB | Enter the referring LAB provider details such as Clinical Lab Improvement Amendment (CLIA ID). |
| X | To delete a claim line, click the delete icon ("X") next to the line you want to delete. |
| 25. FEDERAL TAX ID | Enter the provider's Federal Tax ID number. |
| SSN/EIN | Enter the Social Security Number or nine-digit Employer Identification Number under which payment for service is to made for reporting earnings to the IRS. |
| 26. PATIENT'S ACCOUNT NO. | Enter the patient's control number or account number in this field. |
| 27. ACCEPT ASSIGNMENT? | If the provider agrees to accept assignment under terms of the payer's program, select "Yes" from the drop-down list. Otherwise, select "No." |
| 28. CHARGED | Enter the total charge for this claim. |
| 29. PAID | Enter the total amount paid by the patient for the services billed on this claim. |

| Field | Description |
|---------------------------|---|
| 30. DUE | Enter the total balance due less any amount entered in field 29. |
| 31. PHYSICIAN SIGNATURE | Enter the legal signature of the physician or supplier as written on the paper original, or enter "Signature on File." |
| DATE | Enter or use the calendar control to select the signature date. |
| 32. FACILITY NAME | Enter the name of the facility where the service was rendered. |
| ADDRESS (2, 3) | Select or enter the street address of the facility where the service was rendered. |
| CITY | Enter the city name facility where the service was rendered. |
| STATE | Enter the state code facility where the service was rendered. |
| ZIP CODE | Enter the 5-digit ZIP code facility where the service was rendered. |
| COUNTRY | Select the name of the country from the drop-down list of facility where the service was rendered. |
| TAXONOMY | Enter the provider's taxonomy code. |
| 32a. FACILITY NPI | Enter the NPI of the service facility. |
| 32b. FACILITY IDENTIFIER | Enter the qualifier for the non-NPI facility identifier, followed by the ID number. |
| 33. BILLING PROVIDER NAME | Enter the provider or supplier's billing name.

You can enter a partial name, and then click the Search icon in the field to display a list of billing names. Select the provider. The remaining billing information will be pre-filled. |
| ADDRESS | Enter the provider or supplier's billing street address. |
| CITY | Enter the provider or supplier's billing city name. |
| STATE | Enter the provider or supplier's billing state code. |
| ZIP CODE | Enter the provider or supplier's billing 5-digit ZIP code. |
| COUNTRY | Select the provider or supplier's billings country from the drop-down list. |
| TELEPHONE | Enter the provider or supplier's billing business telephone number. |
| ENABLE PAY TO | For professional claims submitted on paper, the paper form provides for entry of only two provider-related addresses—one for the billing provider and another for the service facility location. The EDI standard for professional claims has an additional provider pay-to address. This can be different than that of the |

| Field | Description |
|---|---|
| | <p>billing provider if, for example, providers with multiple locations have a central remit-to address.</p> <p>To manually enter a pay to address, select the ENABLE PAY TO checkbox. The pay to address fields are displayed.</p> |
| PAY TO ADDRESS | Select the pay to street address from the drop-down list. The drop-down list shows the addresses associated with the entered BILLING PROVIDER NAME and ADDRESS (see above). |
| CITY | Enter the pay to address city. |
| STATE | Enter the pay to address state. |
| ZIP CODE | Enter the pay to address ZIP code. |
| ZIP SUFFIX | Enter the pay to address ZIP code +5 suffix. |
| COUNTRY | Enter the pay to address country. |
| PIN | Enter the PIN of the billing provider or group, if required. |
| GROUP NUMBER | Enter the group number of the billing provider or group, if required. |
| 33a.SUPPLIER NPI | Enter the NPI of the billing provider listed in field 33a. |
| 33b. SUPPLIER IDENTIFIER | Enter the non-NPI identifier of the billing provider listed in 33a. |
| ADD CLAIM FEE | |
|  | <p>Click Add Fee to add claim fee information to the claim.</p>  |
| FEE TYPE | Select the Fee Type from the drop-down list. For example, select: "Access Fee," "AEA Fee," and "State Surcharge." Fee types are user-defined through a code entry in the ExternalFeeType code set. |
| FEE AMOUNT | Enter the fee amount. |
| FEE PERCENTAGE | Enter the fee percentage. |
| DELETE | Click the "X" icon to delete the fee line. |
| ADD ELIGIBILITY CODE | |

| Field | Description |
|---|---|
|  Add Eligibility Code | <p>Click Add Eligibility Code to add provider service eligibility information to the claim.</p>  |
| ADD ANESTHESIA CODE | |
|  Add Anesthesia Code | <p>Click Add Anesthesia Code to add Anesthesia Surgical Procedure codes to the claim.</p>  |
| ADD PATIENT PHYSICAL CHARACTERISTICS | |
|  Add Patient Physical Characteristics | <p>Click Add Patient Physical Characteristics to add Patient Weight (In pounds), Patient Date of Death, and Patient Is Pregnant indicator to the claim.</p>  <p>Patient physical characteristics entered here will be displayed on the "consolidated" Claim View screen under the Header Tab > Submit Member Information section.</p> |

Create Dental Claim Page

Most claims are entered into HealthRules Payer through electronic data feeds, but the create options on the Claims menu allow you to enter claims manually. To enter a dental claim, select the **Create** Dental claim option. The Create Dental Claim page is displayed.

HealthRules supports both the ADA 2002, ADA 2012, and ADA 2024 versions of the Dental Claim Form. You can select the version of the form you want to enter from the Form Version drop-down in the toolbar. The ADA 2024 Version is the default version.

For more information, see:

["ADA 2002 Version Claim Entry Form" below](#)

["ADA 2012 Version Claim Entry Form" on page 3-50](#)

["ADA 2024 Version Claim Entry Form" on page 3-64](#)

ADA 2002 Version Claim Entry Form

The ADA 2002 Version of the dental claim entry form includes the following main sections of data entry fields:

- [System Claim Information](#)
- [Header Information](#)
- [Primary Payer Information](#)
- [Primary Subscriber Information](#)
- [Other Coverage](#)
- [Patient Information](#)
- [Record of Services Provided](#)
- [Missing Teeth Information](#)
- [Authorizations](#)
- [Ancillary Claim/Treatment Information](#)
- [Billing Dentist or Dental Entity](#)
- [Treating Dentist and Treatment Location Information](#)

System Claim Data

This section contains information the system needs in order to track the claim.

| Field | Description |
|-------------------|--|
| Batch Number | The batch number assigned to the claim, if a claims batch. |
| Claim Number | Specify a claim number using one the following options: Enter manually. Auto-assign. If this field is left blank, the system automatically assigns a claim number. The claim number appears after the claim is submitted. |
| Date Received | Automatically fills with the current date, and can be changed if necessary. |
| Clean Claim Date | When the claim is entered, it defaults to the receipt date. The date acts as a clean claim "as of" date. If the user changes it to a prior date, the system will send the claim to repair. Only a date equal to or later than the receipt date is valid. If the user deletes the date, the claim is considered a "non clean" claim, and interest will not be calculated on this claim. When importing a claim and the clean claim date is different from the receipt date, the clean claim date will be changed to the receipt date. The user will then need to change that clean claim date, if applicable. |
| Scan Code | If the claim was scanned into an electronic file using a document scanning application, the unique scan ID code is displayed in this field. |
| Submitter | The entity that submitted the claim; the member or provider. |
| Clearinghouse # | If the claim originated from a clearinghouse, the clearinghouse number is displayed in this field. |
| Reference # | The identifying number that the supplier may have included on the original invoice. The number is often generated by a practice management system. |
| Benefit Plan Type | Medical or Dental. |
| Send to Review | Select this checkbox to force the claim into Review. When submitted, the claim will be sent to the Claim Repair and Review Workbasket for review. |

| Field | Description |
|-------------------------|---|
| Encounter | Select this checkbox to mark the claim as an encounter. |
| Claim Payor | This field determines if the claim will be paid internally using HealthRules, or outside of HealthRules using an external payment engine. External claims are adjudicated, pre-priced, and re-priced like internal claims. The field defaults to Internal. This setting can be changed on a claim until the claim is finalized, then it cannot be changed. For more information, see "Internal vs. External (Statistical) Claims" on page 1-10. |
| Claim Source | Select the source of the claim from the drop-down list box. For example, External system medical claim, or some other user-defined code entry. |
| External Batch # | If the claim was loaded into the system adjudicated, the external batch number is displayed in this field. |
| Ext.I Batch Seq. # | When a claim is part of an EDI batch load, a batch sequence number is assigned to the claim to denote its place in the batch. This sequence number can then be used to map claim to a 277 CA acknowledgment. |
| Trading Partner ID | If there is a trading partner associated with the claim that was loaded via EDI batch load, the trading partner ID is displayed here. |
| External Claim # | If the claim was loaded into the system adjudicated, the external claim number is displayed in this field. |
| Ext. Cross Ref. Claim # | When a claim is part of an EDI data load, it can reference an external cross reference number. For some consolidated external system claims (Claim Source = External System Claim or other entry code value), this field will be re-labeled to Cross Reference SCCF #. This is a 17 digit, all numeric entry, and will only be entered when claims are being adjusted within certain external claim programs. In this case, the Cross Reference SCCF# will tie back to the original SCCF#, but the sequence number will be incremented by one. This value is not validated against any other claim. |
| Host Plan Code | The Plan Code that has sent the claim. This code can be used to match to a supplier. It is a 3 digit numeric field. It is not available on Dental claim forms. |
| Frequency Code | Voiding or replacing a claim is typically done |

| Field | Description |
|-------|---|
| | <p>electronically through the 837 EDI download.</p> <p>If you need to manually void a claim that should never have existed, select Void from the Frequency Code drop-down list box. On the claim form, enter exactly the information for the original claim you want to void, and then Submit. For more information, see Manually Voiding a Claim.</p> <p>If you need to manually replace a claim that was originally entered with incorrect or missing information, select Replace from the Frequency Code drop-down list box. On the claim form, enter exactly the information for the original claim you want to replace, adding any missing information, and correcting any incorrect information, and then Submit. For more information, see Manually Replacing a Claim.</p> |

NOTE General field instructions are included below. Your health care company may have special instructions for various types of insurance. Follow your company's instructions where applicable.

Header Information

The dental claims header information fields include the following fields:

| Field | Description |
|---|--|
| 1. Type of Transaction | If the services have already been performed, select "Statement of Actual Services" from the drop-down list. If there are no dates of service, select "Request for Predetermination/Pre-authorization." |
| EPSDT/Title XIX | Select the checkbox if the claim is through the Early and Periodic Screening, Diagnosis and Treatment Program. |
| 2. Predetermination/
Preauthorization Number | Enter the pre-authorization or predetermination number provided by the third-party payer who has pre-authorized the claim. |

Primary Payer Information

The dental claims form includes the following primary payer information fields:

| Field | Description |
|----------------------|--|
| 3. Company/Plan Name | Enter the name of the insurance company or the plan name that is the primary payer of the claim. |
| Address | Enter the primary payer street address. |
| City | Enter the primary payer city name. |
| State | Enter the primary payer state code. |
| ZIP | Enter the primary payer 5-digit ZIP code. |
| ZIP Suffix | Enter the primary payer 4-digit ZIP code (ZIP+4) suffix. |
| Country | Select the name of the primary payer country from the drop-down list. |

Other Coverage

NOTE When the claim is being submitted to the primary insurance company, the information in this section applies to the secondary carrier. When the claim is being submitted to the secondary insurance company, the information in this section applies to the primary insurance company.

| Field | Description |
|--------------------------------------|---|
| 4. Other Dental or Medical Coverage? | <p>If there is no other dental or medical coverage, select the No radio button and skip fields 5-11.</p> <p>If there is other dental or medical coverage, select the Yes radio button and complete fields 5-11.</p> |
| 5. Subscriber Name | Enter the name of the subscriber/policyholder for the other coverage. |
| Address | Enter the subscriber/policyholder street address. |
| City | Enter the subscriber/policyholder city name. |
| State | Enter the subscriber/policyholder state code. |
| ZIP | Enter the subscriber/policyholder 5-digit ZIP code. |
| ZIP Suffix | Enter the subscriber/policyholder 4-digit ZIP code (ZIP+4) suffix. |

| Field | Description |
|--------------------------------|--|
| Country | Select the name of the subscriber/policyholder country from the drop-down list. |
| 6. Birth Date | Enter the birth date of the subscriber/policy holder. |
| 7. Gender | Select the gender of the subscriber/policy holder from the drop-down list. |
| 8. Subscriber Identifier | Enter the subscriber/policyholder identification number (SSN or ID#). |
| 9. Plan/Group # | Enter the plan/group number for the other coverage. |
| 10. Relationship to Subscriber | <p>Select the claimant's relationship to the subscriber from the drop-down list. Valid selections are: "Self," "Spouse," "Dependent Child," or "Other."</p> <p>Note: The Newborn and New Adoptee on submitted dental claims are mapped to option 3-Dependent Child.</p> |
| 11. Other Carrier Name | Enter the name of the other insurance company. |
| Address | Enter the other insurance street address. |
| City | Enter the other insurance city name. |
| State | Enter the other insurance state code. |
| ZIP | Enter the other insurance 5-digit ZIP code. |
| ZIP Suffix | Enter the other insurance 4-digit ZIP code (ZIP+4) suffix. |
| Country | Select the name of the other insurance country from the drop-down list. |

Primary Subscriber Information

NOTE When the claim is being submitted to the primary insurance company, the information in this section applies to the primary carrier. When the claim is being submitted to the secondary insurance company, the information in this section applies to the secondary insurance company.

| Field | Description |
|----------|--|
| 12. Name | Enter the name of the primary subscriber/policyholder (this may or may not be the patient) for the insurance company name in field number "3." |
| Address | Enter the primary subscriber/policy holder street |

| Field | Description |
|---------------------------|--|
| | address. |
| City | Enter the primary subscriber/policy holder city name. |
| State | Enter the primary subscriber/policy holder state code. |
| ZIP | Enter the primary subscriber/policy holder 5-digit ZIP code. |
| ZIP Suffix | Enter the primary subscriber/policy holder 4-digit ZIP code (ZIP+4) suffix. |
| Country | Select the name of the primary subscriber/policy holder country from the drop-down list. |
| 11. Birth Date | Enter the birth date of the primary subscriber/policy holder. |
| 14. Gender | Select the gender of the primary subscriber/policy holder from the drop-down list. |
| 15. Subscriber Identifier | Enter the primary subscriber/policyholder identification number (SSN or ID#). |
| 16. Plan/Group # | Enter the plan/group number for the primary coverage. |
| 17. Employer Name | Enter the employer name. |

Patient Information

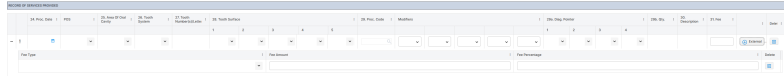

| Field | Description |
|--------------------------------|---|
| 18. Relationship to Subscriber | Select the patient's relationship to the subscriber/policyholder named in field number "12" above . |
| 19. Student Status | Select the patient's student status from the drop-down list. Valid selections are "1-FTS (full-time status)" or "2-PTS (part-time status)". |
| 20. Name | Enter the patient's full name (last, first, middle initial, suffix).

You can enter a partial name, and then click Search in the field to display a list of patient names. Select the patient. The remaining patient information will be pre-filled. |
| Address | Enter the patient's street address. |

| Field | Description |
|---|--|
| City | Enter the patient's city name. |
| State | Enter the patient's state code. |
| ZIP | Enter the patient's 5-digit ZIP code. |
| ZIP Suffix | Enter the patient's 4-digit ZIP code (ZIP+4) suffix. |
| Country | Select the name of the patient's country from the drop-down list. |
| 21. Birth Date | Enter the birth date of the patient. |
| 22. Gender | Select the gender of the patient from the drop-down list. |
| 23. Patient ID/Account #
(Assigned by Dentist) | Enter the patient ID number or account number assigned by the dentist. |

Record of Services Provided

| Field | Description |
|---------------------------------|--|
| 24. Proc. Date | If the services have already been performed, enter the procedure dates in this column. Use the format MM/DD/YYYY or select the date from the calendar control. If the claim is for a preauthorization/predetermination, leave the field blank. |
| 25. Area of Oral Cavity | Select the applicable area of oral cavity when required from the drop-down list. Valid selections include: "entire oral cavity," "maxillary arch," "mandibular arch," "upper right quadrant," "upper left quadrant," "lower left quadrant," or "lower right quadrant." |
| 26. Tooth System | Select the tooth system from the drop-down list. Valid selections include: "ADA Universal/National Tooth Designation System" or "ANSI ADA ISO Spec. 3950" (International Standards Organization System). |
| 27. Tooth Number(s)/Letters (s) | Enter the appropriate tooth number or letter when the procedure involves a specific tooth or range of teeth. |
| 28. Tooth Surface (1-5) | Select up to five the tooth surfaces from the drop-down lists. Valid selections include: "Buccal," "Distal," "Facial (or labial)," "Incisal," "Lingual," "Mesial," or "Occlusal." |
| 29. Proc. Code | Enter the appropriate procedure code. |
| 30. Description | A brief description of the procedure is displayed in this |

| Field | Description |
|---|--|
| | field when field 29 is completed. |
| 31. Fee | Enter the dentist's fee for the procedure. |
| External Fees - claim line | |
|  | <p>Click +External to add external fee information. The External entry fields are displayed.</p>  <p>External fee information entered in this section will be displayed on the "consolidated" claim, on the Claim View screen under the Lines Tab > Claim Line Fees section.</p> |
| Fee Type | Select the Fee Type from the drop-down list. For example, select: "Access Fee," "AEA Fee," and "State Surcharge." Fee types are user-defined through a code entry in the ExternalFeeType code set. |
| Fee Amount | Enter the fee amount. Can be entered as a positive or negative value. |
| Fee Percentage | Enter a percentage of the claim as the fee. You can enter positive or negative values. |
| Delete | Click X to delete the fee line. |
| 32. Other Fee(s) | Enter other fees applicable to the procedure. |
| 33. Total Fee | The total of all fees and other fees is calculated and displayed in this field. |
| Member Paid Amt | Enter amount of the total fee paid by the member. |
| Orthodontia Case Fee | Enter the total Orthodontia case fee paid by the patient. |

Missing Teeth Information

| Field | Description |
|--|---|
| 34. (Place an "X" on each missing tooth) | Select the checkbox(es) corresponding to missing teeth. |
| 34. Diagnosis Code List Qualifier | Select the appropriate diagnosis code type from the drop-down list. Valid selections include: "B=ICD-9-CM" or "AB=ICD-10-CM." |

| Field | Description |
|----------------------|--|
| 34a. Diagnosis Codes | Enter up to four applicable diagnosis code (A-D). Enter the primary diagnosis code in field "A." |
| 35. Remarks | Enter additional remarks about the procedure. |

Authorizations

| Field | Description |
|------------------------------------|--|
| 36. Parent/Guardian Signature/Date | Enter the parent or guardian's signature as written on the paper original, or enter "Signature on File," and enter or use the calendar control to select the signature date. |
| 37. Subscriber Signature/Date | Enter the subscriber/policy holder's signature as written on the paper original, or enter "Signature on File," and enter or use the calendar control to select the signature date. |

Ancillary Claim/Treatment Information

| Field | Description |
|-------------------------------------|---|
| 38. Place of Treatment | Select the place of treatment from the drop-down list. For example: "1-Provider's Office," "2-Hospital," "3-ECF," or "4-Other." |
| 39. Number of Enclosures (00 to 99) | Enter the number of enclosures in each of the fields provided for Radiograph(s), Oral Image(s), and Model(s). |
| 40. Treatment for Orthodontics? | If the treatment is not for orthodontics, select the No radio button and skip fields 41-42.

If the treatment is for orthodontics, select the Yes radio button and complete fields 41-42. |
| 41. Date Appliance Placed | If the treatment is for orthodontics, enter the date the appliance was placed. Use the format MM/DD/YYYY or select a date from the calendar control. |
| 42. Months of Treatment Remaining | Enter the total number of months required to complete the orthodontic treatment. |
| 43. Replacement of Prosthesis? | If the treatment is not for replacement of a prosthesis (crowns, bridges, dentures, etc.), select the No radio button and skip to field 45. |

| Field | Description |
|------------------------------|---|
| | If the treatment is for replacement of a prosthesis (crowns, bridges, dentures, etc.), select the Yes radio button and complete field 44. |
| 44. Date Prior Placement | If the treatment is for replacement of a prosthesis, enter that date of the prior prosthesis placement. Use the format MM/DD/YYYY or select a date from the calendar control. |
| 45. Treatment Resulting from | If the treatment is provided as the result of an accident or injury, select the appropriate description from the drop-down list. Valid selections include: "1-Occupational Injury," "2-Auto-Accident," or "3-Other Accident." |
| 46. Date of Accident | Enter the date of the accident or injury. Use the format MM/DD/YYYY or select a date from the calendar control. |
| 47. Auto Accident State | If the treatment is the result of an auto accident, select the state in which the accident occurred from the drop-down list. |

Billing Dentist or Dental Entity

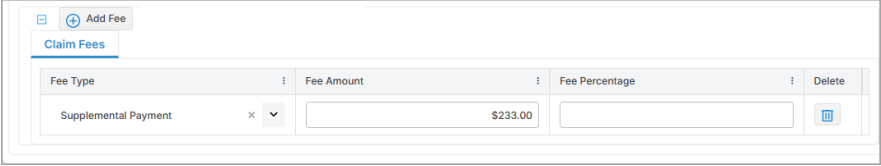

| Field | Description |
|------------|---|
| 48. Name | <p>Leave this field blank if the dentist or dental entity is not submitting the claim on behalf of the patient or insured/subscriber.</p> <p>Enter the name of the billing dentist or dental group practice/corporation responsible for billing.</p> <p>You can enter a partial name, and then click Search in the field to display a list of patient names. Select the patient. The remaining patient information will be pre-filled.</p> |
| Address | Enter the dentist's or dental group practice street address. |
| City | Enter the dentist's or dental group practice city name. |
| State | Enter the dentist's or dental group practice state code. |
| ZIP | Enter the dentist's or dental group practice 5-digit ZIP code. |
| ZIP Suffix | Enter the dentist's or dental group practice 4-digit |

| Field | Description |
|-----------------|---|
| | ZIP code (ZIP+4) suffix. |
| Country | Select the name of the dentist's or dental group practice country from the drop-down list. |
| 49. Provider ID | Enter the provider ID number if the dentist or dental group practice. |
| 50. License # | If an individual dentist is billing the insurance company, enter the dentist's license number. |
| 51. SSN/TN | Enter the Social Security Number or Tax Number of the billing dentist or dental group practice. |
| 52. Phone # | Enter the business phone number of the billing dentist or dental group practice. |

Treating Dentist and Treatment Location Information

| Field | Description |
|-------------------------|--|
| 53. Signed | Enter the treating dentist's name in this field.

You can enter a partial name, and then click Search in the field to display a list of dentist names. Select the treating dentist. The remaining dentist information will be pre-filled. |
| Date | Enter or use the calendar control to select the signature date. |
| 54. Provider ID/NPI | Enter the provider ID number or NPI if the dentist or dental group practice. |
| 55. License # | Enter the treating dentist's license number. |
| 56. Address | Enter the treating dentist's or dental group practice street address. |
| 56a. Provider Specialty | Enter the provider specialty if applicable. |
| City | Enter the treating dentist's or dental group practice city name. |
| State | Enter the treating dentist's state code. |
| ZIP | Enter the treating dentist's 5-digit ZIP code. |
| ZIP Suffix | Enter the treating dentist's 4-digit ZIP code (ZIP+4) suffix. |
| Country | Select the name of the dentist's or dental group practice country from the drop-down list. |

| Field | Description |
|---|--|
| 57. Phone # | Enter the treating dentist's business telephone number. |
| 58. Additional Provider ID | Enter the additional provider ID, if applicable. |
| Add Claim Fee | |
|  | <p>Click Add Fee to add claim fee information to the claim.</p>  <p>Fee information entered here will be displayed on the "consolidated" claim in the Claim View screen under the Header Tab > Claim Fees section.</p> |
| Fee Type | Select the Fee Type from the drop-down list. For example, select: "Access Fee," "AEA Fee," and "State Surcharge." Fee types are user-defined through a code entry in the ExternalFeeType code set. |
| Fee Amount | Enter the fee amount. Can be entered as a positive or negative value. |
| Fee Percentage | Enter the fee percentage. |
| Delete | Click the X to delete the fee line. |

ADA 2012 Version Claim Entry Form

The ADA 2012 Version of the dental claim form includes the following main sections of data entry fields:

- [System Claim Information](#)
- [Header Information](#)
- [Insurance Company/Dental Benefit Plan Information](#)
- [PolicyHolder/Subscriber Information](#)
- [Other Coverage](#)

- [Patient Information](#)
- [Record of Services Provided](#)
- [Missing Teeth Information](#)
- [Authorizations](#)
- [Ancillary Claim/Treatment Information](#)
- [Billing Dentist or Dental Entity](#)
- [Treating Dentist and Treatment Location Information](#)

System Claim Data

This section contains information the system needs in order to track the claim.

| Field | Description |
|------------------|--|
| Batch Number | The batch number assigned to the claim, if a claims batch. |
| Claim Number | Specify a claim number using one the following options:
Enter manually. Auto-assign. If this field is left blank, the system automatically assigns a claim number. The claim number appears after the claim is submitted. |
| Date Received | Automatically fills with the current date, and can be changed if necessary. |
| Clean Claim Date | When the claim is entered, it defaults to the receipt date. The date acts as a clean claim "as of" date. If the user changes it to a prior date, the system will send the claim to repair. Only a date equal to or later than the receipt date is valid. If the user deletes the date, the claim is considered a "non clean" claim, and interest will not be calculated on this claim. When importing a claim and the clean claim date is different from the receipt date, the clean claim date will be changed to the receipt date. The user will then need to change that clean claim date, if applicable. |
| Scan Code | If the claim was scanned into an electronic file using a document scanning application, the unique scan ID code is displayed in this field. |

| Field | Description |
|-------------------------|---|
| Submitter | The entity that submitted the claim; the member or provider. |
| Clearinghouse # | If the claim originated from a clearinghouse, the clearinghouse number is displayed in this field. |
| Reference # | The identifying number that the supplier may have included on the original invoice. The number is often generated by a practice management system. |
| Benefit Plan Type | Medical or Dental. |
| Send to Review | Select this checkbox to force the claim into Review. When submitted, the claim will be sent to the Claim Repair and Review Workbasket for review. |
| Encounter | Select this checkbox to mark the claim as an encounter. |
| Claim Payor | This field determines if the claim will be paid internally using HealthRules, or outside of HealthRules using an external payment engine. External claims are adjudicated, pre-priced, and re-priced like internal claims. The field defaults to Internal. This setting can be changed on a claim until the claim is finalized, then it cannot be changed. For more information, see "Internal vs. External (Statistical) Claims" on page 1-10. |
| Claim Source | Select the source of the claim from the drop-down list box. For example, External system medical claim, or some other user-defined code entry. |
| External Batch # | If the claim was loaded into the system adjudicated, the external batch number is displayed in this field. |
| Ext.I Batch Seq. # | When a claim is part of an EDI batch load, a batch sequence number is assigned to the claim to denote its place in the batch. This sequence number can then be used to map claim to a 277 CA acknowledgment. |
| Trading Partner ID | If there is a trading partner associated with the claim that was loaded via EDI batch load, the trading partner ID is displayed here. |
| External Claim # | If the claim was loaded into the system adjudicated, the external claim number is displayed in this field. |
| Ext. Cross Ref. Claim # | When a claim is part of an EDI data load, it can reference an external cross reference number. For some consolidated external system claims (Claim Source = External System Claim or other entry code value), this field will be re-labeled |

| Field | Description |
|----------------|--|
| | to Cross Reference SCCF #. This is a 17 digit, all numeric entry, and will only be entered when claims are being adjusted within certain external claim programs. In this case, the Cross Reference SCCF# will tie back to the original SCCF#, but the sequence number will be incremented by one. This value is not validated against any other claim. |
| Host Plan Code | The Plan Code that has sent the claim. This code can be used to match to a supplier. It is a 3 digit numeric field. It is not available on Dental claim forms. |
| Frequency Code | <p>Voiding or replacing a claim is typically done electronically through the 837 EDI download.</p> <p>If you need to manually void a claim that should never have existed, select Void from the Frequency Code drop-down list box. On the claim form, enter exactly the information for the original claim you want to void, and then Submit. For more information, see Manually Voiding a Claim.</p> <p>If you need to manually replace a claim that was originally entered with incorrect or missing information, select Replace from the Frequency Code drop-down list box. On the claim form, enter exactly the information for the original claim you want to replace, adding any missing information, and correcting any incorrect information, and then Submit. For more information, see Manually Replacing a Claim.</p> |

NOTE General field instructions are included below. Your health care company may have special instructions for various types of insurance. Follow your company's instructions where applicable.

Header Information

The dental claims header information fields include the following fields:

| Field | Description |
|------------------------|---|
| 1. Type of Transaction | If the services have already been performed, select "Statement of Actual Services" from the drop-down list. If there are no dates of service, select "Request for Predetermination/Preauthorization." |

| Field | Description |
|---|---|
| EPSDT/Title XIX | Select the checkbox if the claim is through the Early and Periodic Screening, Diagnosis and Treatment Program. |
| 2. Predetermination/
Preauthorization Number | Enter the preauthorization or predetermination number provided by the third-party payer who has pre-authorized the claim. |

Insurance Company/Dental Benefit Plan Information

The dental claims form includes the following primary payer information fields:

| Field | Description |
|----------------------|--|
| 3. Company/Plan Name | Enter the name of the insurance company or the plan name that is the primary payer of the claim. |
| Address | Enter the primary payer street address. |
| City | Enter the primary payer city name. |
| State | Enter the primary payer state code. |
| ZIP | Enter the primary payer 5-digit ZIP code. |
| ZIP Suffix | Enter the primary payer 4-digit ZIP code (ZIP+4) suffix. |
| Country | Select the name of the primary payer country from the drop-down list. |

Other Coverage

NOTE When the claim is being submitted to the primary insurance company, the information in this section applies to the secondary carrier. When the claim is being submitted to the secondary insurance company, the information in this section applies to the primary insurance company.

| Field | Description |
|---------------------|---|
| 4. Dental? Medical? | <p>If there is other dental coverage, select the Dental checkbox.</p> <p>If there is other medical coverage, select the Medical checkbox.</p> <p>If you select either checkbox, complete fields 5-11. If you select both checkboxes, use fields 5-11 to enter the other dental information.</p> |

| Field | Description |
|--------------------------------|--|
| 5. Subscriber Name | Enter the name of the subscriber/policyholder for the other coverage. |
| Address | Enter the subscriber/policyholder street address. |
| City | Enter the subscriber/policyholder city name. |
| State | Enter the subscriber/policyholder state code. |
| ZIP | Enter the subscriber/policyholder 5-digit ZIP code. |
| ZIP Suffix | Enter the subscriber/policyholder 4-digit ZIP code (ZIP+4) suffix. |
| Country | Select the name of the subscriber/policyholder country from the drop-down list. |
| 6. Birth Date | Enter the birth date of the subscriber/policy holder. |
| 7. Gender | Select the gender of the subscriber/policy holder from the drop-down list. |
| 8. Subscriber Identifier | Enter the subscriber/policyholder identification number (SSN or ID#). |
| 9. Plan/Group # | Enter the plan/group number for the other coverage. |
| 10. Relationship to Subscriber | <p>Select the claimant's relationship to the subscriber from the drop-down list. Valid selections are: "Self," "Spouse," "Dependent Child," or "Other."</p> <p>Note: The Newborn and New Adoptee on submitted dental claims are mapped to option 3-Dependent Child.</p> |
| 11. Other Carrier Name | Enter the name of the other insurance company. |
| Address | Enter the other insurance street address. |
| City | Enter the other insurance city name. |
| State | Enter the other insurance state code. |
| ZIP | Enter the other insurance 5-digit ZIP code. |
| ZIP Suffix | Enter the other insurance 4-digit ZIP code (ZIP+4) suffix. |
| Country | Select the name of the other insurance country from the drop-down list. |

Policyholder/Subscriber Information

NOTE When the claim is being submitted to the primary insurance company, the information in this section applies to the primary carrier. When the claim is being submitted to the secondary insurance company, the information in this section applies to the secondary insurance company.

| Field | Description |
|---------------------------|--|
| 12. Name | Enter the name of the primary subscriber/policyholder (this may or may not be the patient) for the insurance company name in field number "3." |
| Address | Enter the primary subscriber/policy holder street address. |
| City | Enter the primary subscriber/policy holder city name. |
| State | Enter the primary subscriber/policy holder state code. |
| ZIP | Enter the primary subscriber/policy holder 5-digit ZIP code. |
| ZIP Suffix | Enter the primary subscriber/policy holder 4-digit ZIP code (ZIP+4) suffix. |
| Country | Select the name of the primary subscriber/policy holder country from the drop-down list. |
| 11. Birth Date | Enter the birth date of the primary subscriber/policy holder. |
| 14. Gender | Select the gender of the primary subscriber/policy holder from the drop-down list. |
| 15. Subscriber Identifier | Enter the primary subscriber/policyholder identification number (SSN or ID#). |
| 16. Plan/Group # | Enter the plan/group number for the primary coverage. |
| 17. Employer Name | Enter the employer name. |

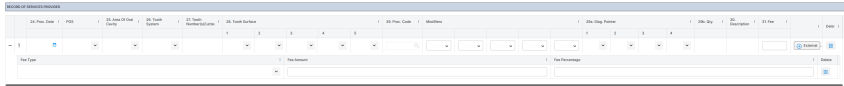

Patient Information

| Field | Description |
|--------------------------------|--|
| 18. Relationship to Subscriber | Select the patient's relationship to the subscriber/policyholder named in field number "12." |
| 19. Reserved for Future Use | Skip to field number 20. |
| 20. Name | Enter the patient's full name (last, first, middle initial, suffix). |

| Field | Description |
|---|---|
| | You can enter a partial name, and then click Search in the field to display a list of patient names. Select the patient. The remaining patient information will be pre-filled. |
| Address | Enter the patient's street address. |
| City | Enter the patient's city name. |
| State | Enter the patient's state code. |
| ZIP | Enter the patient's 5-digit ZIP code. |
| ZIP Suffix | Enter the patient's 4-digit ZIP code (ZIP+4) suffix. |
| Country | Select the name of the patient's country from the drop-down list. |
| 21. Birth Date | Enter the birth date of the patient. |
| 22. Gender | Select the gender of the patient from the drop-down list. |
| 23. Patient ID/Account #
(Assigned by Dentist) | Enter the patient ID number or account number assigned by the dentist. |

Record of Services Provided

| Field | Description |
|------------------------------------|--|
| 24. Proc. Date | If the services have already been performed, enter the procedure dates in this column. Use the format MM/DD/YYYY or select the date from the calendar control. If the claim is for a pre-authorization/pre-determination, leave the field blank. |
| POS | Select the place of service code from the drop-down list for each service line. |
| 25. Area of Oral Cavity | Select the applicable area of oral cavity when required from the drop-down list. Valid selections include: "entire oral cavity," "maxillary arch," "mandibular arch," "upper right quadrant," "upper left quadrant," "lower left quadrant," or "lower right quadrant." |
| 26. Tooth System | Select the tooth system from the drop-down list. Valid selections include: "ADA Universal/National Tooth Designation System" or "ANSI ADA ISO Spec. 3950" (International Standards Organization System). |
| 27. Tooth Number
(s)/Letters(s) | Enter the appropriate tooth number or letter when the procedure involves a specific tooth or range of teeth. |

| Field | Description |
|---|--|
| 28. Tooth Surface (1-5) | Select up to five the tooth surfaces from the drop-down lists. Valid selections include: "Buccal," "Distal", "Facial (or labial)," "Incisal," "Lingual," "Mesial," or "Occlusal." |
| 29. Proc. Code | Enter the appropriate procedure code. |
| 29a. Diag Pointer | From the drop-down lists, select the letter(s) (A-D) from field 34a that identify the diagnosis code(s) applicable to the dental procedure. You can select up to four diagnostic pointers per service line. |
| 29b. Qty. | Enter the number of times (01-99) the procedure indicated in field 29 was delivered to the patient on the date of service entered in field 24. The default value is "1." |
| 30. Description | A brief description of the procedure is displayed in this field when the code is entered in field 29. |
| 31. Fee | Enter the dentist's fee for the procedure. |
| External Fees - claim line | |
|  | <p>Click +External to add external fee information. The External entry fields are displayed.</p>  <p>External fee information entered in this section will be displayed on the "consolidated" claim, on the Claim View screen under the Lines Tab > Claim Line Fees section.</p> |
| Fee Type | Select the Fee Type from the drop-down list. For example, select: "Access Fee," "AEA Fee," and "State Surcharge." Fee types are user-defined through a code entry in the ExternalFeeType code set. |
| Fee Amount | Enter the fee amount. Can be entered as a positive or negative value. |
| Fee Percentage | Enter a percentage of the claim as the fee. You can enter positive or negative values. |
| 31a. Other Fee(s) | Enter other fees applicable to the procedure. |
| 32. Total Fee | The total of all fees and other fees is calculated and displayed in this field. |
| Member Paid Amt | Enter amount of the total fee paid by the member. |
| Orthodontia Case Fee | Enter the total Orthodontia case fee paid by the patient. |

Missing Teeth Information

| Field | Description |
|--|---|
| 33. (Place an "X" on each missing tooth) | Select the checkbox(es) corresponding to missing teeth. |
| 34. Diagnosis Code List Qualifier | Select the appropriate diagnosis code type from the drop-down list. Valid selections include: "B=ICD-9" or "AB=ICD-10." |
| 34a. Diagnosis Codes | Enter up to four applicable diagnosis code (A-D). Enter the primary diagnosis code in field "A." |
| 35. Remarks | Enter additional remarks about the procedure. |

Authorizations

| Field | Description |
|------------------------------------|--|
| 36. Parent/Guardian Signature/Date | Enter the parent or guardian's signature as written on the paper original, or enter "Signature on File," and enter or use the calendar control to select the signature date. |
| 37. Subscriber Signature/Date | Enter the subscriber/policy holder's signature as written on the paper original, or enter "Signature on File," and enter or use the calendar control to select the signature date. |

Ancillary Claim/Treatment Information

| Field | Description |
|---------------------------------|--|
| 38. Place of Service | Select the place of service code. For example: "11-Office," "12-Home," "21- Inpatient Hospital," "31-Skilled Nursing Facility," 32- Nursing Facility." |
| 39. Enclosures? | Select the checkbox (equals "Yes") to indicate that there are enclosures of any type (radio graphs, oral images, models) submitted with the claim. If there are no enclosures, leave the checkbox clear (equals "No"). |
| 40. Treatment for Orthodontics? | <p>If the treatment is not for orthodontics, select the No radio button and skip fields 41-42.</p> <p>If the treatment is for orthodontics, select the Yes radio button and complete fields 41-42.</p> |
| 41. Date Appliance Placed | If the treatment is for orthodontics, enter the date the |

| Field | Description |
|--------------------------------|---|
| | appliance was placed. Use the format MM/DD/YYYY or select a date from the calendar control. |
| 42. Total Months of Treatment | If the treatment is for orthodontics, enter the total number of months of treatment from the beginning to the end of the treatment. |
| Months of Treatment Remaining | This legacy field is displayed because the value can be submitted via EDI claims. |
| 43. Replacement of Prosthesis? | <p>If the treatment is not for replacement of a prosthesis (crowns, bridges, dentures, etc.), select the No radio button and skip to field 45.</p> <p>If the treatment is for replacement of a prosthesis (crowns, bridges, dentures, etc.), select the Yes radio button and complete field 44.</p> |
| 44. Date Prior Placement | If the treatment is for replacement of a prosthesis, enter that date of the prior prosthesis placement. Use the format MM/DD/YYYY or select a date from the calendar control. |
| 45. Treatment Resulting from | If the treatment is provided as the result of an accident or injury, select the appropriate description from the drop-down list. Valid selections include: "1-Occupational Injury," "2-Auto-Accident," or "3-Other Accident." |
| 46. Date of Accident | Enter the date of the accident or injury. Use the format MM/DD/YYYY or select a date from the calendar control. |
| 47. Auto Accident State | If the treatment is the result of an auto accident, select the state in which the accident occurred from the drop-down list. |

Billing Dentist or Dental Entity

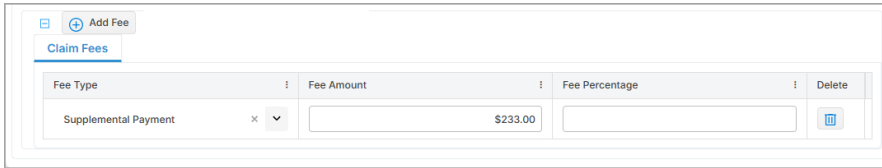

| Field | Description |
|----------|---|
| 48. Name | <p>Leave this field blank if the dentist or dental entity is not submitting the claim on behalf of the patient or insured/subscriber.</p> <p>Enter the name of the billing dentist or dental group practice/corporation responsible for billing.</p> <p>You can enter a partial name, and then click Search in the field to display a list of patient names. Select the patient. The</p> |

| Field | Description |
|-----------------------------|--|
| | remaining patient information will be pre-filled. |
| Address | Enter the dentist's or dental group practice street address. |
| City | Enter the dentist's or dental group practice city name. |
| State | Enter the dentist's or dental group practice state code. |
| ZIP | Enter the dentist's or dental group practice 5-digit ZIP code. |
| ZIP Suffix | Enter the dentist's or dental group practice 4-digit ZIP code (ZIP+4) suffix. |
| Country | Select the name of the dentist's or dental group practice country from the drop-down list. |
| 49. NPI | Enter the NPI (National Provider Identifier) for the billing dentist (use a Type 1 ID number) or dental group practice (use a Type 2 ID number). |
| 50. License # | If an individual dentist is billing the insurance company, enter the dentist's license number. |
| 51. SSN/TIN | Enter the Social Security Number or Tax Number of the billing dentist or dental group practice. |
| 52. Phone # | Enter the business phone number of the billing dentist or dental group practice. |
| 52a. Additional Provider ID | Enter an additional provider ID, if any. |

Treating Dentist and Treatment Location Information

| Field | Description |
|---------------|--|
| 53. Signed | Enter the treating dentist's name in this field.

You can enter a partial name, and then click Search in the field to display a list of dentist names. Select the treating dentist. The remaining dentist information will be pre-filled. |
| Date | Enter or use the calendar control to select the signature date. |
| 54. NPI | Enter the NPI (National Provider Identifier) for the billing dentist (use a Type 1 ID number) or dental group practice (use a Type 2 ID number). |
| 55. License # | Enter the treating dentist's license number. |
| 56. Address | Enter the treating dentist's or dental group practice street address. If the supplier or practitioner has been entered on the form, you can select the associated address from the drop-down |

| Field | Description |
|---|--|
| | <p>list. This list will contain:</p> <ul style="list-style-type: none"> Practitioner's correspondence address, which is the default. This is identified as the "Practitioner - Correspondence Address." The practice address for each supplier location associated with the specified practitioner's roles. This is identified as "Location - Supplier location name." <p>If no supplier or practitioner have been entered, you can still fill out the address fields to specify an address.</p> |
| 56a. Provider Specialty | Enter the treating dentist's provider specialty code. |
| City | Enter the treating dentist's or dental group practice holder city name. |
| State | Enter the treating dentist's state code. |
| ZIP | Enter the treating dentist's 5-digit ZIP code. |
| ZIP Suffix | Enter the treating dentist's 4-digit ZIP code (ZIP+4) suffix. |
| Country | Select the name of the dentist's or dental group practice country from the drop-down list. |
| 57. Phone # | Enter the treating dentist's business telephone number. |
| 58. Additional Provider ID | Enter any additional non-NPI provider ID for the treating dentist, if any. This is an ID assigned to the treating dentist other than a Social Security (SSN), Tax Identification Number (TIN), or NPI. |
| Add Claim Fee | |
|   | <p>Click Add Fee to add claim fee information to the claim.</p>  <p>Fee information entered here will be displayed on the "consolidated" claim in the Claim View screen under the Header Tab > Claim Fees section.</p> |
| Fee Type | Select the Fee Type from the drop-down list. For example, select: "Access Fee," "AEA Fee," and "State Surcharge." Fee types are user-defined through a code entry in the ExternalFeeType code set. |

| Field | Description |
|----------------|---|
| Fee Amount | Enter the fee amount. Can be entered as a positive or negative value. |
| Fee Percentage | Enter the fee percentage. |
| Delete | Click the X icon to delete the fee line. |

Add Claim Fee

The ADA 2012 Version of the dental claim form includes the following main sections of data entry fields:

- [System Claim Information](#)
- [Header Information](#)
- [Insurance Company/Dental Benefit Plan Information](#)
- [PolicyHolder/Subscriber Information](#)
- [Other Coverage](#)
- [Patient Information](#)
- [Record of Services Provided](#)
- [Missing Teeth Information](#)
- [Authorizations](#)
- [Ancillary Claim/Treatment Information](#)
- [Billing Dentist or Dental Entity](#)
- [Treating Dentist and Treatment Location Information](#)

System Claim Data

This section contains information the system needs in order to track the claim.

| Field | Description |
|------------------|--|
| Batch Number | The batch number assigned to the claim, if a claims batch. |
| Claim Number | Specify a claim number using one the following options:
Enter manually. Auto-assign. If this field is left blank, the system automatically assigns a claim number. The claim number appears after the claim is submitted. |
| Date Received | Automatically fills with the current date, and can be changed if necessary. |
| Clean Claim Date | When the claim is entered, it defaults to the receipt date. The |

| Field | Description |
|--------------------|--|
| | date acts as a clean claim "as of" date. If the user changes it to a prior date, the system will send the claim to repair. Only a date equal to or later than the receipt date is valid. If the user deletes the date, the claim is considered a "non clean" claim, and interest will not be calculated on this claim. When importing a claim and the clean claim date is different from the receipt date, the clean claim date will be changed to the receipt date. The user will then need to change that clean claim date, if applicable. |
| Scan Code | If the claim was scanned into an electronic file using a document scanning application, the unique scan ID code is displayed in this field. |
| Submitter | The entity that submitted the claim; the member or provider. |
| Clearinghouse # | If the claim originated from a clearinghouse, the clearinghouse number is displayed in this field. |
| Reference # | The identifying number that the supplier may have included on the original invoice. The number is often generated by a practice management system. |
| Benefit Plan Type | Medical or Dental. |
| Send to Review | Select this checkbox to force the claim into Review. When submitted, the claim will be sent to the Claim Repair and Review Workbasket for review. |
| Encounter | Select this checkbox to mark the claim as an encounter. |
| Claim Payor | This field determines if the claim will be paid internally using HealthRules, or outside of HealthRules using an external payment engine. External claims are adjudicated, pre-priced, and re-priced like internal claims. The field defaults to Internal. This setting can be changed on a claim until the claim is finalized, then it cannot be changed. For more information, see "Internal vs. External (Statistical) Claims" on page 1-10. |
| Claim Source | Select the source of the claim from the drop-down list box. For example, External system medical claim, or some other user-defined code entry. |
| External Batch # | If the claim was loaded into the system adjudicated, the external batch number is displayed in this field. |
| Ext.I Batch Seq. # | When a claim is part of an EDI batch load, a batch sequence |

| Field | Description |
|-------------------------|--|
| | number is assigned to the claim to denote its place in the batch. This sequence number can then be used to map claim to a 277 CA acknowledgment. |
| Trading Partner ID | If there is a trading partner associated with the claim that was loaded via EDI batch load, the trading partner ID is displayed here. |
| External Claim # | If the claim was loaded into the system adjudicated, the external claim number is displayed in this field. |
| Ext. Cross Ref. Claim # | When a claim is part of an EDI data load, it can reference an external cross reference number. For some consolidated external system claims (Claim Source = External System Claim or other entry code value), this field will be re-labeled to Cross Reference SCCF #. This is a 17 digit, all numeric entry, and will only be entered when claims are being adjusted within certain external claim programs. In this case, the Cross Reference SCCF# will tie back to the original SCCF#, but the sequence number will be incremented by one. This value is not validated against any other claim. |
| Host Plan Code | The Plan Code that has sent the claim. This code can be used to match to a supplier. It is a 3 digit numeric field. It is not available on Dental claim forms. |
| Frequency Code | <p>Voiding or replacing a claim is typically done electronically through the 837 EDI download.</p> <p>If you need to manually void a claim that should never have existed, select Void from the Frequency Code drop-down list box. On the claim form, enter exactly the information for the original claim you want to void, and then Submit. For more information, see Manually Voiding a Claim.</p> <p>If you need to manually replace a claim that was originally entered with incorrect or missing information, select Replace from the Frequency Code drop-down list box. On the claim form, enter exactly the information for the original claim you want to replace, adding any missing information, and correcting any incorrect information, and then Submit. For more information, see Manually Replacing a Claim.</p> |

NOTE General field instructions are included below. Your health care company may have special instructions for various types of insurance. Follow your company's instructions where applicable.

Header Information

The dental claims header information fields include the following fields:

| Field | Description |
|---|---|
| 1. Type of Transaction | If the services have already been performed, select "Statement of Actual Services" from the drop-down list. If there are no dates of service, select "Request for Predetermination/Preauthorization." |
| EPSDT/Title XIX | Select the checkbox if the claim is through the Early and Periodic Screening, Diagnosis and Treatment Program. |
| 2. Predetermination/Preauthorization Number | Enter the preauthorization or predetermination number provided by the third-party payer who has pre-authorized the claim. |

Insurance Company/Dental Benefit Plan Information

The dental claims form includes the following primary payer information fields:

| Field | Description |
|----------------------|--|
| 3. Company/Plan Name | Enter the name of the insurance company or the plan name that is the primary payer of the claim. |
| Address | Enter the primary payer street address. |
| City | Enter the primary payer city name. |
| State | Enter the primary payer state code. |
| ZIP | Enter the primary payer 5-digit ZIP code. |
| ZIP Suffix | Enter the primary payer 4-digit ZIP code (ZIP+4) suffix. |
| Country | Select the name of the primary payer country from the drop-down list. |
| 3a. Payer ID | Enter the payer identification number of the dental benefit plan.

Field Type: Numeric and/or Alphanumeric |

| Field | Description |
|-------|---|
| | Requirement: Optional. Leave it blank if unknown or not applicable. |

Other Coverage

NOTE When the claim is being submitted to the primary insurance company, the information in this section applies to the secondary carrier. When the claim is being submitted to the secondary insurance company, the information in this section applies to the primary insurance company.

| Field | Description |
|--------------------------|---|
| 4. Dental? Medical? | <p>If there is other dental coverage, select the Dental checkbox.</p> <p>If there is other medical coverage, select the Medical checkbox.</p> <p>If you select either checkbox, complete fields 5-11. If you select both checkboxes, use fields 5-11 to enter the other dental information.</p> |
| 5. Subscriber Name | Enter the name of the subscriber/policyholder for the other coverage. |
| Address | Enter the subscriber/policyholder street address. |
| City | Enter the subscriber/policyholder city name. |
| State | Enter the subscriber/policyholder state code. |
| ZIP | Enter the subscriber/policyholder 5-digit ZIP code. |
| ZIP Suffix | Enter the subscriber/policyholder 4-digit ZIP code (ZIP+4) suffix. |
| Country | Select the name of the subscriber/policyholder country from the drop-down list. |
| 6. Birth Date | Enter the birth date of the subscriber/policy holder. |
| 7. Gender | Select the gender of the subscriber/policy holder from the drop-down list. |
| 8. Subscriber Identifier | Enter the subscriber/policyholder identification number (SSN or ID#). |
| 9. Plan/Group # | Enter the plan/group number for the other coverage. |
| 10. Relationship to | Select the claimant's relationship to the subscriber from the |

| Field | Description |
|------------------------|---|
| Subscriber | drop-down list. Valid selections are: "Self," "Spouse," "Dependent Child," or "Other."

Note: The Newborn and New Adoptee on submitted dental claims are mapped to option 3-Dependent Child. |
| 11. Other Carrier Name | Enter the name of the other insurance company. |
| Address | Enter the other insurance street address. |
| City | Enter the other insurance city name. |
| State | Enter the other insurance state code. |
| ZIP | Enter the other insurance 5-digit ZIP code. |
| ZIP Suffix | Enter the other insurance 4-digit ZIP code (ZIP+4) suffix. |
| Country | Select the name of the other insurance country from the drop-down list. |
| 11a. Other Payer ID | Enter the payer identification number of any additional insurance company or dental benefit plan.

Field Type: Numeric and/or Alphanumeric

Requirement: Optional. Leave it blank if unknown or not applicable. |

Policyholder/Subscriber Information

NOTE When the claim is being submitted to the primary insurance company, the information in this section applies to the primary carrier. When the claim is being submitted to the secondary insurance company, the information in this section applies to the secondary insurance company.

| Field | Description |
|----------|--|
| 12. Name | Enter the name of the primary subscriber/policyholder (this may or may not be the patient) for the insurance company name in field number "3." |
| Address | Enter the primary subscriber/policy holder street address. |
| City | Enter the primary subscriber/policy holder city name. |
| State | Enter the primary subscriber/policy holder state code. |
| ZIP | Enter the primary subscriber/policy holder 5-digit ZIP code. |

| Field | Description |
|---------------------------|--|
| ZIP Suffix | Enter the primary subscriber/policy holder 4-digit ZIP code (ZIP+4) suffix. |
| Country | Select the name of the primary subscriber/policy holder country from the drop-down list. |
| 13. Birth Date | Enter the birth date of the primary subscriber/policy holder. |
| 14. Gender | Select the gender of the primary subscriber/policy holder from the drop-down list. |
| 15. Subscriber Identifier | Enter the primary subscriber/policyholder identification number (SSN or ID#). |
| 16. Plan/Group # | Enter the plan/group number for the primary coverage. |
| 17. Employer Name | Enter the employer name. |

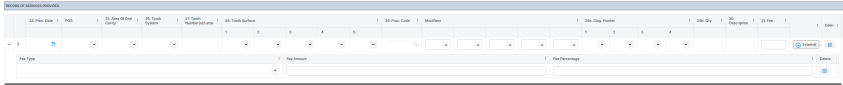

Patient Information

| Field | Description |
|--|---|
| 18. Relationship to Subscriber | Select the patient's relationship to the subscriber/policyholder named in field number "12." |
| 19. Reserved for Future Use | Skip to field number 20. |
| 20. Name | Enter the patient's full name (last, first, middle initial, suffix).

You can enter a partial name, and then click Search in the field to display a list of patient names. Select the patient. The remaining patient information will be pre-filled. |
| Address | Enter the patient's street address. |
| City | Enter the patient's city name. |
| State | Enter the patient's state code. |
| ZIP | Enter the patient's 5-digit ZIP code. |
| ZIP Suffix | Enter the patient's 4-digit ZIP code (ZIP+4) suffix. |
| Country | Select the name of the patient's country from the drop-down list. |
| 21. Birth Date | Enter the birth date of the patient. |
| 22. Gender | Select the gender of the patient from the drop-down list. |
| 23. Patient ID/Account # (Assigned by Dentist) | Enter the patient ID number or account number assigned by the dentist. |

Record of Services Provided

| Field | Description |
|---------------------------------|---|
| 24. Proc. Date | If the services have already been performed, enter the procedure dates in this column. Use the format MM/DD/YYYY or select the date from the calendar control. If the claim is for a pre-authorization/pre-determination, leave the field blank. |
| POS | Select the place of service code from the drop-down list for each service line. |
| 25. Area of Oral Cavity | Select the applicable area of oral cavity when required from the drop-down list. Valid selections include: "entire oral cavity," "maxillary arch," "mandibular arch," "upper right quadrant," "upper left quadrant," "lower left quadrant," or "lower right quadrant." |
| 26. Tooth System | Select the tooth system from the drop-down list. Valid selections include: "ADA Universal/National Tooth Designation System" or "ANSI ADA ISO Spec. 3950" (International Standards Organization System). |
| 27. Tooth Number (s)/Letters(s) | Enter the appropriate tooth number or letter when the procedure involves a specific tooth or range of teeth. |
| 28. Tooth Surface (1-5) | Select up to five the tooth surfaces from the drop-down lists. Valid selections include: "Buccal," "Distal," "Facial (or labial)," "Incisal," "Lingual," "Mesial," or "Occlusal." |
| 29. Proc. Code | Enter the appropriate procedure code. |
| Modifiers | <p>HealthRules Payer supports the addition, viewing, and editing of up to five modifiers on dental claims to align with Medicare 2024 dental coverage requirements.</p> <ul style="list-style-type: none"> ■ You can add and manage modifiers directly from the Dental Claim Input screen, similar to workflows used for Professional and Institutional claims. ■ Modifiers display next to the Procedure Code in the Dental Claim Input view. ■ In the Claim View screen, a Modifiers field with five input boxes is available in the Line Details section. |

| Field | Description |
|--|--|
| | Note: This functionality is supported only for claims submitted using the ADA 2024 version. Fee table configurations are updated to recognize modifiers, ensuring that appropriate fees are displayed and applied during claim adjudication. |
| 29a. Diag Pointer | From the drop-down lists, select the letter(s) (A-D) from field 34a that identify the diagnosis code(s) applicable to the dental procedure. You can select up to four diagnostic pointers per service line. |
| 29b. Qty. | Enter the number of times (01-99) the procedure indicated in field 29 was delivered to the patient on the date of service entered in field 24. The default value is "1." |
| 30. Description | A brief description of the procedure is displayed in this field when the code is entered in field 29. |
| 31. Fee | Enter the dentist's fee for the procedure. |
| External Fees - claim line | |
|  | <p>Click +External to add external fee information. The External entry fields are displayed.</p>  <p>External fee information entered in this section will be displayed on the "consolidated" claim, on the Claim View screen under the Lines Tab > Claim Line Fees section.</p> |
| Fee Type | Select the Fee Type from the drop-down list. For example, select: "Access Fee," "AEA Fee," and "State Surcharge." Fee types are user-defined through a code entry in the ExternalFeeType code set. |
| Fee Amount | Enter the fee amount. Can be entered as a positive or negative value. |
| Fee Percentage | Enter a percentage of the claim as the fee. You can enter positive or negative values. |
| 31a. Other Fee(s) | Enter other fees applicable to the procedure. |
| 32. Total Fee | The total of all fees and other fees is calculated and displayed in this field. |
| Member Paid Amt | Enter amount of the total fee paid by the member. |

| Field | Description |
|----------------------|---|
| Orthodontia Case Fee | Enter the total Orthodontia case fee paid by the patient. |

Missing Teeth Information

| Field | Description |
|--|---|
| 33. (Place an "X" on each missing tooth) | Select the checkbox(es) corresponding to missing teeth. |
| 34. Diagnosis Code List Qualifier | Select the appropriate diagnosis code type from the drop-down list. Valid selections include: "B=ICD-9" or "AB=ICD-10." |
| 34a. Diagnosis Codes | Enter up to four applicable diagnosis code (A-D). Enter the primary diagnosis code in field "A." |
| 35. Remarks | Enter additional remarks about the procedure. |

Authorizations

| Field | Description |
|------------------------------------|--|
| 36. Parent/Guardian Signature/Date | Enter the parent or guardian's signature as written on the paper original, or enter "Signature on File," and enter or use the calendar control to select the signature date. |
| 37. Subscriber Signature/Date | Enter the subscriber/policy holder's signature as written on the paper original, or enter "Signature on File," and enter or use the calendar control to select the signature date. |

Ancillary Claim/Treatment Information

| Field | Description |
|----------------------|--|
| 38. Place of Service | Select the place of service code. For example: "11-Office," "12-Home," "21- Inpatient Hospital," "31-Skilled Nursing Facility," 32- Nursing Facility." |
| 39. Enclosures? | Select the checkbox (equals "Yes") to indicate that there are enclosures of any type (radio graphs, oral images, models) submitted with the claim. If there are no enclosures, leave the checkbox clear (equals "No"). |
| 39a. Date Last SRP? | Enter the date of the patient's last scaling and root planing procedure. |

| Field | Description |
|---------------------------------|---|
| | <p>Field Type: Date</p> <p>Requirement: Optional. Leave it blank if the date is unknown or not applicable.</p> |
| 40. Treatment for Orthodontics? | <p>If the treatment is not for orthodontics, select the No radio button and skip fields 41-42.</p> <p>If the treatment is for orthodontics, select the Yes radio button and complete fields 41-42.</p> |
| 41. Date Appliance Placed | If the treatment is for orthodontics, enter the date the appliance was placed. Use the format MM/DD/YYYY or select a date from the calendar control. |
| 42. Total Months of Treatment | If the treatment is for orthodontics, enter the total number of months of treatment from the beginning to the end of the treatment. |
| Months of Treatment Remaining | This legacy field is displayed because the value can be submitted via EDI claims. |
| 43. Replacement of Prosthesis? | <p>If the treatment is not for replacement of a prosthesis (crowns, bridges, dentures, etc.), select the No radio button and skip to field 45.</p> <p>If the treatment is for replacement of a prosthesis (crowns, bridges, dentures, etc.), select the Yes radio button and complete field 44.</p> |
| 44. Date Prior Placement | If the treatment is for replacement of a prosthesis, enter that date of the prior prosthesis placement. Use the format MM/DD/YYYY or select a date from the calendar control. |
| 45. Treatment Resulting from | If the treatment is provided as the result of an accident or injury, select the appropriate description from the drop-down list. Valid selections include: "1-Occupational Injury," "2-Auto-Accident," or "3-Other Accident." |
| 46. Date of Accident | Enter the date of the accident or injury. Use the format MM/DD/YYYY or select a date from the calendar control. |
| 47. Auto Accident State | If the treatment is the result of an auto accident, select the state in which the accident occurred from the drop-down list. |

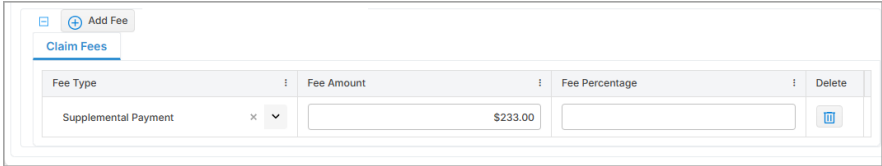

Billing Dentist or Dental Entity

| Field | Description |
|-----------------------------|---|
| 48. Name | <p>Leave this field blank if the dentist or dental entity is not submitting the claim on behalf of the patient or insured/subscriber.</p> <p>Enter the name of the billing dentist or dental group practice/corporation responsible for billing.</p> <p>You can enter a partial name, and then click Search in the field to display a list of patient names. Select the patient. The remaining patient information will be pre-filled.</p> |
| Address | Enter the dentist's or dental group practice street address. |
| City | Enter the dentist's or dental group practice city name. |
| State | Enter the dentist's or dental group practice state code. |
| ZIP | Enter the dentist's or dental group practice 5-digit ZIP code. |
| ZIP Suffix | Enter the dentist's or dental group practice 4-digit ZIP code (ZIP+4) suffix. |
| Country | Select the name of the dentist's or dental group practice country from the drop-down list. |
| 49. NPI | Enter the NPI (National Provider Identifier) for the billing dentist (use a Type 1 ID number) or dental group practice (use a Type 2 ID number). |
| 50. License # | If an individual dentist is billing the insurance company, enter the dentist's license number. |
| 51. SSN/TIN | Enter the Social Security Number or Tax Number of the billing dentist or dental group practice. |
| 52. Phone # | Enter the business phone number of the billing dentist or dental group practice. |
| 52a. Additional Provider ID | Enter an additional provider ID, if any. |

Treating Dentist and Treatment Location Information

| Field | Description |
|------------|--|
| 53. Signed | Enter the treating dentist's name in this field. |

| Field | Description |
|-------------------------------------|---|
| | You can enter a partial name, and then click Search in the field to display a list of dentist names. Select the treating dentist. The remaining dentist information will be pre-filled. |
| Date | Enter or use the calendar control to select the signature date. |
| 53a. Locum Tenens Treating Dentist? | <p>To indicate if the treating dentist is serving in a locum tenens (temporary substitute) capacity.</p> <p>Field Type: Check box</p> <p>Requirement: Optional. Leave unchecked if the provider is not a locum tenens dentist.</p> |
| 54. NPI | Enter the NPI (National Provider Identifier) for the billing dentist (use a Type 1 ID number) or dental group practice (use a Type 2 ID number). |
| 55. License # | Enter the treating dentist's license number. |
| 56. Address | <p>Enter the treating dentist's or dental group practice street address. If the supplier or practitioner has been entered on the form, you can select the associated address from the drop-down list. This list will contain:</p> <ul style="list-style-type: none"> Practitioner's correspondence address, which is the default. This is identified as the "Practitioner - Correspondence Address." The practice address for each supplier location associated with the specified practitioner's roles. This is identified as "Location - Supplier location name." <p>If no supplier or practitioner have been entered, you can still fill out the address fields to specify an address.</p> |
| 56a. Provider Specialty | Enter the treating dentist's provider specialty code. |
| City | Enter the treating dentist's or dental group practice holder city name. |
| State | Enter the treating dentist's state code. |
| ZIP | Enter the treating dentist's 5-digit ZIP code. |
| ZIP Suffix | Enter the treating dentist's 4-digit ZIP code (ZIP+4) suffix. |
| Country | Select the name of the dentist's or dental group practice country from the drop-down list. |

| Field | Description |
|---|--|
| 57. Phone # | Enter the treating dentist's business telephone number. |
| 58. Additional Provider ID | Enter any additional non-NPI provider ID for the treating dentist, if any. This is an ID assigned to the treating dentist other than a Social Security (SSN), Tax Identification Number (TIN), or NPI. |
| Add Claim Fee | |
|  | <p>Click Add Fee to add claim fee information to the claim.</p>  <p>Fee information entered here will be displayed on the "consolidated" claim in the Claim View screen under the Header Tab > Claim Fees section.</p> |
| Fee Type | Select the Fee Type from the drop-down list. For example, select: "Access Fee," "AEA Fee," and "State Surcharge." Fee types are user-defined through a code entry in the ExternalFeeType code set. |
| Fee Amount | Enter the fee amount. Can be entered as a positive or negative value. |
| Fee Percentage | Enter the fee percentage. |
| Delete | Click the X icon to delete the fee line. |

Pre-Filled Fields and Field Validation

When entering information on a claim form, sometimes entering information in one field, or searching for and "resolving" a field entry, will automatically populate information in one or more other fields. This quickens data entry of the form.

For example, on a Professional Claim form, entering a subscription ID number in the field 1a. Insured's I.D. Number, prefills many of the next fields and also prompts you for the specific member of the subscription. In another example, on an Institutional Claim, entering the first few letters in the 1. Provider field and using search to select a provider (resolve), automatically populates the provider's address fields, federal tax number, and more.

Some field entries automatically trigger validation of the field, or validate that the data entered in one field does not conflict with data entered in another field.

For example, on a Professional claim, making a selection in the 24K Rendering Provider ID field automatically populates the name in the 31 Physician Signature field. If you then enter a Federal Tax ID in field 25, the system validates the tax id, then compares it to the Billing Provider Name.

In some cases, the system compares entered data and identifies useful information for the user. For example, on a Professional claim, if the Billing Provider does not have an explicit role relationship with the rendering practitioner, the billing provider name will display in red text along with **Broken Link** icon. While you are notified of this condition, you may continue without taking action, or you can enter suppliers and practitioners that do have a proper role relationship.

NOTE This *is not* the same process as "matching," where the system takes the data on the claim and uses the matching engine to find the corresponding members, supplier, supplier location and rendering practitioner records in your database (see ["Consolidation/Matching" on page 1-12](#)).

Data Validations/Errors

When searching for data in selected fields, if you enter a string of characters that do not correspond to a record in your database, a validation error will be displayed in red text in the upper right corner of the claims form page.

Institutional Claim

Field 1. Provider (Error stating no provider found displayed in top right)

Field 8a. Patient ID (Error stating no patient found displayed in top right)

Field 8b. Patient Name (Error stating no patient found displayed in top right)

Field 5. Federal Tax ID

81CC Taxonomy Code (If multiple provider taxonomy codes are present on the claim, the system will take the first provider taxonomy with a valid qualifier code as defined in the HCC level "Provider Taxonomy Qualifier" provision. Error stating unknown taxonomy code displayed in top right.)

NOTE Users can clear the data entered in the Field 33. Billing Provider Name field and resume matching.

Professional Claim

The following fields will display red text if there is no match to an existing Member or Provider:

Chapter 3: Claims Screens

Field 1a. Insured's ID Number (Error stating no patients found displayed in top right)

Field 2. Patient's Name (Error stating no patients found displayed in top right)

Field 17. Name of Referring Provider (Error stating no provider found displayed in top right)

Field 25. Federal Tax ID

Field 33. Billing Provider Name (Error stating no provider found displayed in top right)

Unnumbered Field Taxonomy (Under Address fields beneath Facility Name Field 32.)

Red text will also be displayed in Field 33 and 25 when the Billing Provider in field 33 does not have a role relationship with the Rendering Provider in field 24K (along with **Broken Link** icon).

NOTE Users can clear the data entered in the Field 1. Provider field and resume matching.

Editable Fields

To allow users the ability to capture the original data from the claim form the following auto-look up fields can be edited:

Institutional Claim Form:

Field 1. Provider (Some or all data and the data in fields 25, 32 and 33 should remain)

Field 5. Fed Tax No.

Field 56. NPI

Field 81CC Taxonomy Code (If multiple provider taxonomy codes are present on the claim, the system will take the first provider taxonomy with a valid qualifier code as defined in the HCC level "Provider Taxonomy Qualifier" provision.)

Professional Claim Form:

Field 32. Facility Name (Even if left blank)

Field 32a. Facility NPI

Field 32b. Facility Identifier

Field 33. Billing Provider Name (Some or all data in fields 25, 32 and 33 should remain)

Field 33a. Supplier NPI (The data in fields 25, 32 and 33 should remain)

Field 25. Federal Tax ID

Field 33b. Supplier Identifier (The data in fields 25, 32 and 33 should remain)

Unnumbered Field Taxonomy (Under Address fields beneath Facility Name Field 32.)

Form Totals

The claim line charge and total charged fields are validated if populated. If the line totals do not equal the amount in the Total field, the amount will display in red text. The claim can not be submitted until line charges and totals are equal.

Attachments Tab

Use the Attachments tab on the Create Claim page for attaching supplementary documents (Explanation of Benefits, admission summary, collection note, diagnostic report, discharge summary, payment receipt, physician order, and so forth) to the claim.

NOTE EDI837 attachments can only be added through electronic transactions.

NOTE External reference numbers can only be entered on the Consolidated claim through the Edit Claim page.

EOB Attachments

When you select EOB as the attachment type, the screen is automatically expanded to include entry fields for the EOB. EOB attachments you enter here will be available on the Claims View and Claims Edit screens, in the COB tab.

For more information about entering EOB attachments, see the ["COB Tab" on page 3-254](#)

All Other Attachment Types

All other attachment types only use three entry fields:

- Attachment Type: Select the attachment type from the drop-down list.
- Transmission Type: Enter the transmission type.
- Comment: Enter a comment about the attachment, if applicable.

Delegated Processing Tab

Use the Delegated Processing tab to enter the claim adjudication details provided by the participating providers or the delegated organizations on the claim level and the claim line level for all claim types. The submitted claim includes the information, Participating Provider, Benefit Tier Type, Paid Date, Paid Amount, Allowed Amount, Non-Covered Amount, and Member Responsibility. You can also add other claim adjustment values such as Claim Adjustment Message Code, Group Code, Quantity, and Amount.

The image below displays the Delegated Processing tab for an institutional claim.

Fields and Commands

| Field | Description |
|--|---|
| Delegated Processing Attributes (Claim Level) | |
| Participating Provider | To select the provider's participation status, click inside the column, and select either "Par" or "Non Par" from the drop-down list. To remove a selection, click the "X" next to the selection. |
| Benefit Tier Type | To select a Benefit Tier Type, click inside the column, and select either "In-Network" or "Out-of-Network" from the drop-down list. To |

| Field | Description |
|--|---|
| | remove a selection, click the "X" next to the selection. |
| Paid Date | The delegated claim paid date. Use the format MM/DD/YYYY or select the date from the calendar control. |
| Paid | This field's value is equal to the amount actually paid by the delegated entity to the supplier for the service. |
| Allowed | The total allowed amount of the delegated claim. |
| Non-Covered | The total amount not covered on the delegated claim. |
| Member Responsibility | To select a Member Responsibility Type, click inside the column, and select either "Billed Amount" or "Allowed Amount" from the drop-down list. To remove a selection, click the "X" next to the selection. |
| Clear | Click Clear to remove all the information added to the Delegated Processing Attributes. |
| Add Messages | <p>Click "+" to add the following message code details:</p> <ul style="list-style-type: none"> ▪ Message Code - The message code for the message. ▪ Group Code - The delegated claim group code. ▪ Quantity - The quantity associated with the delegated claim. ▪ Amount - The total amount of the delegated claim. |
| Click the "X" icon to delete the information added for the message code. | |
| Delegated Processing Attributes (Claim Line Level) | |
| Line# | <p>To add the Delegated Processing Attributes, click the plus icon in the column to add all the information from the Delegated Processing Claim Level.</p> <p>Note: The information for all the other fields next to Lines# field (StartDate, End Date, POS, CPT/HCPSCS, Rev. Code, and Charges) populates as per the information entered in the Enable Pricing section on the Create Claim dialog for all claim types.</p> |
| Start Date | The delegated claim line start date. |
| End Date | The delegated claim line end date. |
| POS | The place of service code. |
| CPT/HCPSCS | The CPT or HCPSCS code describing the service provider. |

| Field | Description |
|-----------|-----------------------------------|
| Rev. Code | The specified revenue code. |
| Charges | The delegated claim line charges. |

Notes Tab

Use the Notes tab on the Create Claim Page for attaching any type of general note to the claim. For example, if you mark a Claim for automatic review, you can describe your reasons for doing so in the Notes section.

When a user opens the final claim record, or opens the claim record from the Claims Review and Repair workbasket, they can click the Audit Log tab to display any notes entered for the claim.

Line UDT Tab

User Defined Term (UDT) is a mechanism for adding non-standard data to the information model.

The Line UDT tab allows you to set the attribute values for the pre-defined UDTs on the claim lines.

NOTE The UDTs in the Line UDT tab are based on the UDTs defined under the Claim Line User Defined Term definition for the Health Care Company in HealthRules Designer.

You can click the **Plus** icon next to the line to view the available UDTs. You must enter the values for all attributes flagged as required under the Required column to submit or save the claim. The Valid Claim Line UDT policy helps validate claim line UDT values.

You can also set the default tree view in the UDT tab by selecting the Collapse UDTs checkbox to hide all or clear the checkbox to display all UDT attributes. The checkbox setting is preserved and displays the UDT tree in the selected view the next time you log on. You can also click the **Caret Up** or **Caret Down** icons in front of the UDT to display or hide attributes as needed. However, the expand or collapse view on a specific UDT is not preserved and reverts to the view setting associated with the checkbox.

Two validation policies ensure that valid values are entered on the claim line UDTs. The two policies include:

- Valid Claim Line UD T policy - This policy validates claim line UDT values.

- **Invalid Claim Line UDT Input policy** - This policy checks the HealthRules Payer web service to ensure that claim line UDTs defined in Connector have UDT and attribute names that match the ClaimLine UDT definition in HealthRules Designer.

NOTE Currently, claim line UDT information cannot be included in a service definition.

Claims UDT Tab

A *User Defined Term (UDT)* is a mechanism for adding non-standard data to the information model. UDTs can be used throughout the application without the need for custom programming. UDTs are available only if defined in HealthRules Designer for the Health Care Company by your System Administrator.

The **UDT** tab allows you to set the attribute values for the predefined UDTs when creating, editing and viewing the entity. You must enter the mandatory attribute values that are flagged as required to save the entity.

You can also set the default tree view in the **UDT** tab by selecting the **Collapse UDTs** checkbox to hide all or clear the checkbox to display all UDT attributes. The checkbox setting is preserved and displays the UDT tree in the selected view the next time you log on. You can also click the **Caret Up** or **Caret Down** icons in front of the UDT to display or hide attributes as needed. However, the expand or collapse view on a specific UDT is not preserved and reverts to the view setting associated with the checkbox.

NOTE You can also set the tree view for the entity via the **Program Preferences** dialog. The view setting in one location automatically updates the UDT tree view setting in all other locations for the entity.

NOTE Claim level UDTs can be included in a service definition, allowing you to use them in a wide variety of ways.

Claims Search Page

Use the Claim Search page to search for specific claims matching the search criteria you enter on the page.

Note: You must enter at least one search criteria before clicking the **Search**.

["Claim Line Level Search Results" on page 3-100](#)

| Click | To |
|-------------|---|
| Search | Start a search using current criteria. |
| Clear | Clear all search criteria. |
| Search For | Open menu of other documents available for search (perform a different search, for example Account, Member, etc.). |
| Show | Select how you want to display the search results. To show claim level search results (one row per claim), select "Claims" from the drop-down list. To show line level search results (one row per claim line), select "Lines" from the drop-down list. |
| Max Results | Display the maximum number of results to display in the results table. |
| Close | Close Search window. |

This page consists of the following four search criteria tabs:

- [Claim](#)
- [Basic](#)
- [Advanced](#)
- [Claim Input](#)

After entering your search criteria and clicking the **Search**, the [claims search results](#) are displayed.

Note: If the claim is replaced multiple times and each version of replaced claim has a different external claim ID, then the search can be performed only based on the external claim id (using the Advanced tab of claim search popup) of the latest replacement claim. Any external ID of intermediate replaced claim does not return the claim.

Claim Search Claim Tab

The Claim tab contains fields used to search based on member information, rendering practitioner information, supplier information, and service dates.

For example, if you search for a Member ID, only the claims for that member will be displayed in the search results.

HealthEdge

| Field | Description |
|--|---|
| Member Last Name | Filters by member's surname. |
| Member First Name | Filters by member's first name. |
| Member Birth Date | Filters by member's birth date. |
| Service Dates | |
| From | Filters by start date for the service. |
| To | Filters by end date for the service. |
| Supplier | |
| Note: The returned supplier information is for matched suppliers on the consolidated claims only. It does not include supplier information entered on the supplier invoice. To search on supplier invoice information, use the Claim Input tab. | |
| Name | Filters by the name of the supplier billing the services on the claim. |
| ID | Filters by the identification number of the supplier billing the services on the claim. |
| Rendering Practitioner | |
| Practitioner ID | Filters by identification number of the rendering practitioner providing the services on the claim. |
| Last Name | Filters by rendering practitioner's surname. |
| First Name | Filters by rendering practitioner's first name. |

Claim Search Basic Tab

The Basic tab displays additional basic claims fields you can use to filter search results.

For example, to search for capitated claims, open the Basic tab, and then select **Yes** from the Capitated Claim drop-down list. When you search, only capitated claims will be displayed in the search results.

The following table describes the fields available on the Basic tab.

| Field | Description |
|------------------|---|
| Claim Type | Filters by claim type (Professional, Institutional, or Dental). |
| Delivery Type | Filters by how the claim was delivered: Electronic, Manual, Other, or Scanned. |
| Claim Status | Filters by claim status (Consolidated, Denied, Final, Needs Repair, Needs Repricing, Needs Review, or Rejected). |
| User Message | Filters by user message code from the Claim header. |
| Scan Code | Filters by a unique code assigned when the claim was scanned using a document scanning application. |
| Capitated Claim | Filters by whether or not the claim is a capitated claim. |
| Procedure | Filters by procedure code. |
| Diagnosis | Filters by diagnosis code. |
| Service Code | Filters by industry-standard service code. |
| Revenue Code | Filters by revenue codes. |
| Batch Number | Filters by the batch number of the batch in which the claim was transmitted. |
| Transaction Type | Filters by transaction type.

For dental claims, the transaction types include Predetermination or Request for Actual Services. |
| Authorization ID | Filters by unique authorization identification number associated with the claim. |
| Agreement ID | Filters by unique acquirement identification number associated with the claim. |

| Field | Description |
|-----------------------|--|
| Patient Account # | Filters by the patient account number as reported by the provider. |
| Claim Source | Filters by claim source. Select the claim source from the drop-down list box. Examples could be pharmacy claim, external system medical claim, or some other user-defined code entry. |
| Claim Payor | Filters by claim payer type (internal or external). The default type is "internal". |
| Converted Claim | Filters by whether or not the claim is a "converted claim" . |
| Tooth Number | For dental claims, filters by the tooth number specified on the claim. |
| Oral Cavity | For dental claims filters by the code identifying the area of the oral cavity in which service is rendered. For example, 01 is the Maxillary area and 40 is the Lower Right Quadrant. |
| Surface | For dental claims, filters by the various surfaces of a tooth, such as buccal, lingual, or distal. |
| System Message (Line) | Filters by the line level system message code. System messages are generated during processing. For example, when a line is capitated, a message displays in the line details, indicating that charges are under a capitation agreement. |
| User Message (Line) | Filters by the line level user-added message code. |
| Responsibility Action | Filters by the line level responsibility action for DOFR claims. Select a value from the drop-down list box. For example, No Pay, Pay Claim, or Submit to other carrier. |
| Secondary Editor | <p>If you have one or more secondary editors configured, you can select a configured and enabled secondary editor (such as Cotiviti, or Zelis) and search for all claims in a "Waiting for External System" status for that editor.</p> <p>This field allows you to search for claims that are currently waiting for a specific secondary editor configured to process as batch mode (Realtime = False).</p> <p>The search results show all claims with a "Waiting for External Status" for the selected secondary editor.</p> |

Claim Search Advanced Tab

You can search based on Account, Episode of Care, and other information from the Advanced tab.

Reference Number

The Advanced tab contains the following fields:

| Field | Description |
|-----------------|---|
| Account | |
| Name | Filters by the account name of the employer group or insurance purchasing group to which the member belongs. |
| ID | Filters by the account identification number. |
| Payment Number | Filters by the payment number.

Note: Rejected payments have a 0 payment number. They can be uniquely identified by using the transaction number. |
| Date Received | |
| From | Filters by the start date range for a date range during which the claim was received. |
| To | Filters by the end date for a date range during which the claim was received. |
| Episode of Care | |
| Definition Name | Filters by the episode of care definition name referred to by at least one claim line on the claim. You can search by a partial definition name (you do not have to enter the entire name).

For example, you can search for all claims with at least one line referring to a "Medicare Benefit Period" episode of care definition. |

| Field | Description |
|----------------------|--|
| EOC ID | <p>Filters by the identification number of the created episode of care referred to by at least one claim line on the claim.</p> <p>For example, you can search for all claims with at least one line referring to episode of care "103".</p> |
| External Data | |
| Claim Number | <p>Filters by the external claim number. Created manually or system-generated. This is useful to search by when the claim has had many versions.</p> <p>Enter one or more starting characters of the external claim number, and search to return all claims that start with those characters.</p> <p>If the claim is a "converted claim", the claim number is the external claim number.</p> |
| Batch Number | <p>Filters by the batch number assigned to the claim, if a claims batch.</p> <p>If the claim is a "converted claim", the batch number is the external batch number.</p> |
| Reference Number | Filters by the Practice Management System (PMS) number on the originally submitted supplier invoice. The supplier may use this number to reference their submitted invoice on correspondence. |
| Auth Number | <p>Filters by the Authorization Number that may have been submitted on the claim. The supplier can optionally create an Authorization Number. This number is not verified.</p> <p>Authorization numbers populate on field 23 on the Professional Claim and on #63 on the Institutional Claim Form.</p> <p>The Authorization ID may or may not be the same as the submitted Authorization Number.</p> |

Claim Search Claim Input Tab

For all three types of claims (institutional, professional, dental), you can search and filter on supplier information found on the supplier invoice (claim entry forms), including Supplier Name and Supplier Address.

NOTE This search criteria will not retrieve any supplier information from a consolidated claim (final, denied, etc.), or from a "converted" supplier invoice. To search for matched supplier information on the consolidated claim, go to the [Claim tab](#).

You can also use the External Member Inputs section to search and filter on external member information. This will search the Submitted Subscriber Information and Submitted Member information sections on consolidated claims (Institutional and Professional claims only). If a match is found, the Member Name and Member ID columns in the search results will display the name and id from the Member section, if available, or show the name and id from the Submitted Member section.

The Claim Input tab contains the following fields:

| Field | Description |
|------------------|---|
| Supplier Inputs | |
| Supplier Name | Filter by the supplier's name as entered on the original supplier invoice. This could have been entered manually or imported via EDI. You can enter the entire name, or the first few characters with which the name starts. |
| Supplier Address | Filters by the street address of the supplier as it appears on the supplier invoice.

If you enter an address in this field, to do a successful search you must also specify one or more of the following search criteria fields: City, State/Province, Country and/or Zip/Postal code. |
| Supplier City | Filters by the supplier's city as it appears on the supplier invoice. If you enter a city in this field, to do a successful search, you must also specify one or more of the following search criteria fields: |

3-94

HealthEdge

| Field | Description |
|--------------------------------|--|
| | State/Province, Country, and/or Zip/Postal code. |
| Supplier State/Province | Filters by the supplier's state or province as it appears on the supplier invoice. If you enter a state in this field, the system will automatically populate the Country field with "United States".

Note: If the state you want does not appear in the list, you can manually enter the state on the supplier invoice. |
| Supplier Zip/Postal Code | Enter the supplier ZIP or postal code as it appears on the supplier invoice. You cannot specify ZIP code +4. ZIP code +4 is not a valid search. |
| Supplier Country | Select a country from the drop-down list box. If you enter a country in this field, to do a successful search, you must also specify one or more of the following search criteria fields: City, Zip/Postal code. |
| Submitted Member Inputs | |
| Submitted Subscriber ID | Filters by the subscriber id in the Submitted Subscriber Information section of the consolidated claim. |
| Submitted ID Prefix | Filters by the id prefix in the Submitted Subscriber Information section of the consolidated claim.

Note: You must enter other criteria when searching by subscriber prefix. |
| Submitted Member Last Name | Filters by the member's last name in the Submitted Member Information section of the consolidated claim.

Note: The last name field supports partial text matching. |
| Submitted Member First Name | Filters by the member's last name in the Submitted Member Information section of the consolidated claim.

Note: The first name field supports partial text matching. |
| Submitted Member Birth Date | Filters by the date of birth in the Submitted Member Information section of the consolidated claim. |

Claim Search Results

After entering your search criteria on one or more of the Claim Search tabs, and then click **Search** on the toolbar, the claim search results are displayed below Claim Search tabs.

Search Results: 50

You have the option of performing a claim or claim line search by selecting "Claims" or "Lines" from the Show drop-down list in the Claim Search toolbar. The search results columns vary depending on the type of search. For more information see ["Claim Level Search Results,"](#) or ["Claim Line Level Search Results"](#) below.

If a column you want to see does not appear in your result set, you can use the Column Chooser to add additional, columns to the results table (right click on the column header row, and then select **Column Chooser** from the shortcut menu).

You can expand the columns so that the populated data fully displays; the system will add a horizontal scroll bar, as needed, to allow you to view the columns.

NOTE It is highly recommended that you do not add ALL columns on the screen as this can negatively impact usability.

For more information about the Column Chooser, see "Viewing Record Lists with the Results Grid" in *Vol. 1: Getting Started*.

You can select a claim or claim line from the search results, and then click **View**, **Edit**, or **Export** from the search results toolbar.

Claim Level Search Results

When you select Show "Claims" from the Search toolbar, a claim level search is performed and claim search results display as one row per claim.

NOTE The claim search returns the claim header if any of the lines are capitated.

The following table describes the columns that display when you select to show claim level search results.

| Default Column | Description |
|----------------------|---|
| Claim ID | Shows the unique claim identification number. |
| Authorization Number | <p>Shows the Authorization Number that may have been submitted on the claim. The supplier can optionally create an Authorization Number. This number is not verified.</p> <p>Authorization numbers populate on field 23 on the Professional Claim and on #63 on the Institutional Claim Form.</p> <p>The Authorization ID may or may not be the same as the submitted Authorization Number.</p> |
| Provider Name | Shows the name of the service provider. |
| Member ID | Shows the identification number of the member on the claim. |
| Member Name | Shows the member's full name. |
| Converted | Shows the converted claim indicator. When selected, indicates converted claim. |
| Billed | Shows the total billed amount of all claim lines charges. |
| HCC Amount | Shows the system-calculated health care company amount. The health care company owes this total amount that for the claim. For capitated claims, it represents what would have been paid for the claim if it was not capitated. |

| Default Column | Description |
|--|---|
| Allowed | Shows the total allowed amount of the claim. |
| Capitated Service | Shows the results of a capitated claim when one claim line is capitated. |
| Last Changed On | <p>The most recent date and time the claim was updated. Claim updates are captured as transactions and updates the date and time on the field with the latest transaction date and time. For example, adjusting a claim updates the date and time on the 'Last Changed On' field to indicate the old claim version is no longer current but retains the date and time on the 'Adjudicated On' field in the previous version because the claim is not reprocessed. The previous version was modified, but not adjudicated.</p> <p>In some instances, the system may continue updating the claim after adjudication and display a date and time on the 'Last Changed On' field that is after the date and time on the 'Adjudicated On' field. For example, this includes instances like recording an audit log entry, triggering workbasket assignment rules to assign to a user, and more.</p> |
| Workbasket State | Shows the claim condition in the Claim Review and Repair Workbasket, such as "Review" or "Repair." |
| Start | Shows the earliest start date on the claim. |
| Status | Shows the claim status (Consolidated, Denied, Final, Needs Repair, Needs Repricing, Needs Review, or Rejected). |
| If your results do not display all information required, use the Column Chooser to add the following columns to the results. | |
| Adjusted Claim | <p>Shows the adjusted claim indicator. If the claim has been adjusted the checkbox is selected.</p> <p>Adjusting financials allows you to keep the claim as it was originally entered and processed, but overrides the dollar amounts that it calculated.</p> |
| Balance Billed | Shows the difference between Billed Amount and Allowed Amount that the member has to pay to the provider. |
| Claim Batch Number | Shows the batch number of the batch in which the claim was transmitted. |
| Claim Payor | Shows whether the claim was paid internally or externally. External claims are adjudicated, prepriced, and re-priced like |

| Default Column | Description |
|---------------------------|---|
| | internal claims. |
| Claim Type | Shows the claim type (Professional, Institutional, or Dental). |
| Co-Insurance | Shows the co-insurance amount for the claim. |
| Co-Payment | Shows the co-payment amount for the claim. |
| Deductible | Shows the total deductible amount for all lines of the claim. |
| Delivery Type | Shows how the claim was delivered (Electronic, Manual, Other, or Scanned). |
| End Date | Shows the last date of service on the claim. |
| Entry Date | Shows the date the claim was entered. |
| Group | Shows the owner of the claim in the Claim Review and Repair Workbasket. |
| Location Name | Shows the name of the supplier location. |
| Location ID | Shows the supplier location identification number. |
| Location NPI | Shows the supplier location National Provider Identification (NPI) number. |
| Location Practice Address | Shows the supplier location address. |
| Location Practice City | Shows the supplier location city. |
| Location Practice State | Shows the supplier location state. |
| Location Practice Zip | Shows the supplier location zip code. |
| Member Penalty | Shows the total member penalty on the claim. |
| Non-Covered | Displays the difference between the allowed amount for the service billed and the allowed amount for the service up to which the health care company can pay. Totals the amount not covered on the claim. |
| Owner | Shows who is responsible for any issues filed that relate to the claim. |
| Paid from Member Accounts | Shows the amount paid from the member account. |
| PHI Restricted | Shows the PHI indicator. If PHI viewing restrictions or permissions exist (as specified in the PHI tab of Member View), the checkbox is selected. |

| Default Column | Description |
|-----------------------------|--|
| Receipt Date | Shows the date the claim was received. |
| Reference Number | Shows the Practice Management System (PMS) number on the originally submitted supplier invoice. The supplier may use this number to reference their submitted invoice on correspondence. |
| Revenue Code | Shows the revenue code billed on the claim. Institutional claims only. |
| Scan Code | Shows a unique code assigned to the claim if it was scanned using a document scanning application. |
| Supplier ID | Shows the unique supplier identification number of to which the payment was made. |
| Total Capped Non-Covered | Shows the difference between the allowed amount for the service billed and the allowed amount for the service up to which the health care company may pay. |
| Total Member Responsibility | Shows the total amount the member owes for the claim. |
| Total Other Discount | Shows the total of all Other Discount values from all claim lines on the claim. |
| Type of Bill | Shows the type of bill code which maps to the Admitting Status (for example, if the claim is submitted with a Type of Bill "111" the Admitting Status is "Inpatient.") |
| VIP | Shows the VIP indicator. If the checkbox is selected, the member on the claim has been flagged as a VIP member and additional VIP permissions are required to view the information. |

Claim Line Level Search Results

When you select Show "Lines" from the Search toolbar, line level search is performed and search results display as one row per claim line.

NOTE Normally, a claim line level search returns only the lines matching the search criteria entered (not necessarily all lines on a multi-line claim, if the other lines do not match the criteria). However, if any of the claim lines are capitated, the claim search returns all lines for a capitated claim, regardless of whether each line itself is capitated.

The following table describes the columns that display when you select to show claim line level search results.

| Default Column | Description |
|----------------------|---|
| Claim ID | Shows the unique claim identification number. |
| Line | Shows the claim line number. |
| Provider Name | Shows the name of the service provider. |
| Authorization Number | <p>Shows the Authorization Number that may have been submitted on the claim. The supplier can optionally create an Authorization Number. This number is not verified.</p> <p>Authorization numbers populate on field 23 on the Professional Claim and on #63 on the Institutional Claim Form.</p> <p>The Authorization ID may or may not be the same as the submitted Authorization Number.</p> |
| Member Name | Shows the member's full name. |
| Converted | Shows the Converted Claim Indicator. When selected, indicates converted claim. |
| Billed | Shows the billed amount on the claim line. |
| Member ID | Shows the identification number of the member on the claim. |
| HCC Amount | <p>Shows the system-calculated health care company amount. This is the amount the health care company owes for the claim line.</p> <p>For capitated claims, it represents what would have been paid for the claim if it was not capitated (line-specific).</p> |
| Paid | <p>Shows the line-specific amount actually paid by the health plan to the supplier for the service.</p> <p>If the service on claim is capitated, the Payment Amount is zero.</p> |
| Allowed | Shows the total allowed amount of the claim. |
| Capitated Service | Shows the results of a capitated claim when one claim line is capitated (line-specific). |
| Last Changed On | The most recent date and time the claim was updated. Claim updates are captured as transactions and updates the date and time on the field with the latest transaction date and time. For example, adjusting a claim updates the date and time on the 'Last Changed On' field to indicate the old claim version is no longer |

| Default Column | Description |
|--|--|
| | <p>current but retains the date and time on the 'Adjudicated On' field in the previous version because the claim is not reprocessed. The previous version was modified, but not adjudicated.</p> <p>In some instances, the system may continue updating the claim after adjudication and display a date and time on the 'Last Changed On' field that is after the date and time on the 'Adjudicated On' field. For example, this includes instances like recording an audit log entry, triggering workbasket assignment rules to assign to a user, and more.</p> |
| Workbasket State | Shows the claim state in the Claim Review and Repair Workbasket, such as "Review" or "Repair." |
| If your results do not display all information required, use the Column Chooser to add the following columns to the results. | |
| Adjusted Claim | <p>Shows the adjusted claim indicator. If the claim has been adjusted the checkbox is selected.</p> <p>Adjusting financials allows you to keep the claim as it was originally entered and processed, but overrides the dollar amounts that it calculated.</p> |
| Balance Billed | Shows the difference between Billed Amount and Allowed Amount that the member has to pay to the provider (line-specific). |
| Capped Non-Covered | Shows the difference between the allowed amount for the service billed and the allowed amount for the service up to which the health care company may pay (line-specific). |
| Claim Batch Number | Shows the claim batch number of the batch in which the claim was transmitted. |
| Claim Payor | Identifies if the claim is paid internally or externally. External claims are adjudicated, prepriced, and re-priced like internal claim. |
| Claim Type | Shows the claim type (Professional, Institutional, or Dental). |
| Co-Insurance | Shows the co-insurance amount for the claim line. |
| Co-Payment | Shows the co-payment amount for the claim line. |
| Deductible | Shows the total deductible amount for the claim line. |
| Delivery Type | Shows how the claim delivery type (Electronic, Manual, Other, or Scanned). |
| End Date | Shows the last date of service on the claim line. |

| Default Column | Description |
|---------------------------|--|
| Entry Date | Shows the date the claim was entered. |
| Group | Shows the owner of the claim in the Claim Review and Repair Workbasket. |
| Location Name | Shows the name of the supplier location. |
| Location ID | Shows the supplier location identification number. |
| Location NPI | Shows the supplier location National Provider Identification (NPI) number. |
| Location Practice Address | Shows the supplier location address. |
| Location Practice City | Shows the supplier location city. |
| Location Practice State | Shows the supplier location state. |
| Location Practice Zip | Shows the supplier location zip code. |
| Member Penalty | Shows the total member penalty on the claim line. |
| Member Responsibility | Shows the member responsibility amount for the claim line. |
| Oral Cavity | For dental claims, shows the code identifying the area of the oral cavity in which service was rendered. For example, 01 is the Maxillary area and 40 is the Lower Right Quadrant. |
| Other Discount | If an Other Discount amount has been applied to the claim line, it displays in this field. |
| Owner | Shows who is responsible for any filed issues that related to the claim. |
| Paid from Member Accounts | Shows the amount paid from the member account (line-specific). |
| PHI Restricted | Shows the PHI indicator. If PHI viewing restrictions or permissions exist (as specified in the PHI tab of Member View), the checkbox is selected. |
| Practitioner Name | Shows the rendering practitioner name. |
| Receipt Date | Shows the date the claim was received. |
| Reference Number | Shows the Practice Management System (PMS) number on the originally submitted supplier invoice. The supplier may use this number to reference their submitted invoice on correspondence. |
| Revenue Code | Shows the revenue code billed on the claim line. Institutional |

| Default Column | Description |
|----------------|---|
| | claims only. |
| Scan Code | Shows the unique code assigned to the claim if it was scanned using a document scanning application. |
| Service Code | Shows the industry-standard service code billed on the claim line. |
| Start Date | Shows the date indicating the earliest start date on the claim line. |
| Status | Shows the claim status (Consolidated, Denied, Final, Needs Repair, Needs Repricing, Needs Review, or Rejected). |
| Supplier ID | Shows the unique supplier identification number to which the payment was made. |
| Surface | For dental claims, shows the various surfaces of a tooth, such as buccal, lingual, or distal. |
| Tooth Number | For dental claims, shows the tooth included in the service. |
| Type of Bill | Shows the type of bill code which maps to the Admitting Status (for example, if the claim is submitted with a Type of Bill "111" the Admitting Status is "Inpatient.") |
| VIP | Shows the VIP indicator. If the checkbox is selected, the member on the claim has been flagged as a VIP member and additional VIP permissions are required to view the information. |

Claim View/Edit Page

The Claims View page and Claim Edit page share much of the same information and are described together in this section. In addition, some of the fields on both pages differ based on the type of claim: Professional, Institutional or Dental. Differences between the two pages and the claim form-specific fields are noted.

The Claim View page shows all available information about a consolidated claim, including summary claim information (ID, status, versions, etc.), header (member, provider) information, and claim line details. It also includes claims related information in the financial history, issue tracking, attachments, and audit log tabs.

The Claim Edit page shows many of the same fields in edit mode, allowing you to edit selected fields. The following shows an example of the Claim View page with summary information.

Claim View page - Toolbar Icons

When viewing a claim, the following additional icons appear on the right of the standard toolbar. They are not visible when viewing other record types.

NOTE If approving a claim out of the Claim Review and Repair Workbasket with approve only permission, the Claim View page displays as the read-only "[Approve Claim](#)" page. In this mode, the page displays only the **Approve**, **View Input**, and **Close** buttons.

Edit — Open the claim for edit. Claims in a workbasket are also available for edit.

Adjust Financials — Adjust the financial information for the current claim.

This option is only active for Final or Denied claims, and if the claim is assigned to a user group/user with the applicable permissions, claims that are in Needs Review status.

Deny Claim— Deny a claim for a reason you select (Active for Final claims, or if you have the applicable permissions, when a claim is in Needs Review state). This icon works the same way as adjust financials icon and checks the “manually priced” checkbox. Claims denied using this option will be excluded from automated reprocessing, just like claims that have been through Adjust Financials process.

View Input— View the claim form used to enter the current claim. Note that View Input always shows the data entered on the original claim form (either through EDI feed, or manually entry). It does not show changed data, if it is later edited on the consolidated claim.

In addition, the following Action buttons are available when viewing a claim:

Refresh— Click to refresh the page with the most up to date information.

Void— Click to void a claim that should never have existed. This button is not visible for rejected or consolidated claims, or for converted claims. Also, if you are not viewing the latest version of the claim, the **Void** button is not available.

When you click **Void**, the Void Claim dialog is displayed. Here you enter an External Claim ID and External Cross Reference Claim ID, select a denial reason code and (optionally) enter a comment about the voided claim. Click **Void** on the Void Claim dialog to complete the void claim transaction.

Expedite — Allows you to flag the claim in Repair or Review status as "Expedited" so that the Expedite checkbox on the Claim Header tab is selected. This indicates to claim processors that the claim has been expedited by a supervisor and the claim is to be worked upon immediately to address the escalation/urgent attention it requires. Users must have the applicable permissions to perform the operation.

Claim Edit page - Toolbar Icons

When editing a claim, the following toolbar icons are available:

Approve — When a claim is in Needs Review state, approves the claim. Users must have the applicable permissions to perform the operation.

Submit — Submits the edited claim for adjudication. Or, when the claim is in Needs Review state, it submits any changes you make during the edit without approving review triggers. Users must have the applicable permissions to perform the operation.

Preview Result — Allows you to preview the results of changes made to the claim before submitting.

Deny Claim—This option is used to deny claim lines by applying manual override. It does not do any financial adjustments. Therefore, the “manually priced” checkbox is not selected. Claims denied using this method are still eligible to be selected for automatic reprocessing, but the overrides added by user will still be retained during any automated reprocessing event.

Manual Override — Allows you to change one or more deny override reasons, remove manual denials, or add, change or remove allowed amounts on *multiple* claim lines at the same time.

View Input — View the claim form used to enter the current claim. Note that View Input always shows the data entered on the original claim form (either through EDI feed, or manually entry). It does not show changed data, if it is later edited on the consolidated claim.

Close — Close the edit page without saving changes.

Summary Information

3/9/2025 3:06:27 PM | |
| Claim Type
Institutional | ☐ Manually Priced | ☒ Send to Review |
| Benefit Plan Type
▼ | ☐ Trial Claim | |
| Calculated Benefit Plan Type
Medical | ☐ Capititated Service | ☐ Renewed Claim |
| | Claim Source
Unknown | ☐ Voided Claim |
| | | ☐ Locked Claim |

Summary claim information is included on both the Claim View page and the Claim Edit page. Summary information includes claim ID, status, delivery type, benefit plan type (entered on the claim form), calculated benefit plan type (defined for the Health Care Company), last changed date, version selection, adjudication date, manually priced, and locked status. This section also indicates when a claim is a "converted claim" or a "renewed claim."

NOTE If there are voided or stopped payments associated with the claim you are editing, and these payments have not been reissued, in view mode, the following message is displayed: "There are void or stopped payments for this claim which have not been reissued. Adjustments will not be included in payment cycle runs until those payments have been reissued."

Fields

The following claim header level fields are displayed at the top of the Claim View/Edit page:

| Field | Description |
|------------------------------|---|
| Claim ID | The claim ID number. This is the unique identifier assigned by the system (as defined in the HCC Claims ID Generation Rules provision). |
| Status | <p>The current status of the claim. The claim status may be:</p> <ul style="list-style-type: none"> ▪ Consolidated – the incoming claim (from either claim entry, or electronic EDI-837 submission) has been successfully matched to data in the HealthRules database and transformed into the standardized HealthRules format for adjudication. ▪ Needs Repair – the claim has been flagged for repair during the data validation process. ▪ Needs Review – the claim has been flagged for review during the data validation process. ▪ Rejected – the claim has been rejected during the data validation process. The claim must be re-submitted. ▪ Denied – the claim has been denied. ▪ Final – the claim has been adjudicated and finalized. ▪ Needs Repricing – the claim has been flagged as requiring repricing during the adjudication process (see "Adjudication Process Overview " on page 1-7). |
| Claim Type | The claim type (institutional, professional, or dental). |
| Benefit Plan Type | The benefit plan type as captured on the supplier invoice (for example, medical or dental). |
| Calculated Benefit Plan Type | The benefit plan type as determined by member matching (for example, medical or dental). |
| Last Changed On | The most recent date and time the claim was updated. Claim updates are captured as transactions and updates the date and time on the field with the latest transaction date and time. For example, adjusting a claim updates the date and time on the 'Last Changed On' field to indicate the old claim version is no longer current but retains the date and time on the 'Adjudicated On' field in the previous version because the claim is not reprocessed. The previous version was modified, but not adjudicated. |

| Field | Description |
|------------------|---|
| | <p>In some instances, the system may continue updating the claim after adjudication and display a date and time on the 'Last Changed On' field that is after the date and time on the 'Adjudicated On' field. For example, this includes instances like recording an audit log entry, triggering workbasket assignment rules to assign to a user, and more.</p> |
| Information icon | <p>Hold your cursor over the Information icon to display a window showing the Endorsement Effective Date and Endorsement Expiration Date.</p> <p>If multiple adjudication passes were needed to accurately adjudicate the claim, the number of adjudication passes is displayed.</p> <p>Also, one of these Adjudication Reasons may be displayed:</p> <ul style="list-style-type: none"> ■ Results from later line(s) affect earlier lines - multiple passes were needed to view future claim lines so that a current claim line could be adjudicated ■ Allowed amount expression - During the first adjudication pass, the allowed amount expression in the supplier contract was unknown, requiring additional adjudication passes. ■ Benefit tier expression - During the first adjudication pass, the benefit tier expression in the supplier contract was unknown, requiring additional adjudication passes. ■ Supplier benefit network expression - During the first adjudication pass, the supplier benefit network was unknown, requiring additional adjudication passes. ■ Benefit label expression - During the first adjudication pass, the benefit label was unknown, requiring additional adjudication passes. <p>A message will be displayed when the maximum number of adjudication passes has been met. When the maximum passes have been met, based on a validation policy setting, the claim is</p> |

| Field | Description |
|---------------------------------|---|
| | either automatically sent to the Repair and Review workbasket, or it finalizes using the information from the final pass. |
| Adjudicated On | The date and time the claim was last processed by the claim adjudication process. Adjudication is performed with any of the key actions such as submit, approve, reject, and deny. When opening a claim in review for edit, the claim typically auto-adjudicates and will also update the date and time on the field. |
| Manually Priced | If the checkbox has been selected, the claim has been manually priced. |
| Capitated Service | If the checkbox has been selected, the claim line is for a capitated service. If cleared (not selected), the claim is not for a capitated service. |
| Send to Review | If the checkbox has been selected, the claim is sent to the review workbasket. |
| Encounter | If the checkbox has been selected, the claim is marked as an encounter. |
| Renewed Claim | If the checkbox has been selected, the claim is a "renewed" claim. This means it has been changed from a "converted" claim to a "renewed" claim in the HealthRules Payer system (see "Changing a Converted Claim to a Renewed Claim" on page 2-86). |
| Claim Source | Indicates the source of the claim, for example, Pharmacy, External system medical claim, OrthodontiaScheduler, or some other user-defined code entry. |
| Trial Claim | If the checkbox is selected, the claim is a trial claim. Trial claims are created using the Trial Claim service. |
| Voided Claim | A check mark appears in the checkbox if the claim is a voided claim. Claims can be voided manually or electronically. |
| Locked Claim | The checkbox is selected when the claim is locked for editing for certain users who lack required permission. |
| Editing/Pricing Results (Link). | Click this link to go to the Individual Claim Inquiry page in HealthEdge Source for the claim being viewed, providing immediate access to claim details. |

Viewing Claim Versions

When there are multiple version of a claim, view other versions of the claim by clicking the **Previous** and **Next** hyperlinks located at the top right-hand side of the general claim information.

The **Previous** and **Next** links display only the "Final" or "Denied" versions of the claim.

The screenshot shows the HealthEdge Claims interface. At the top, there's a navigation bar with menus like File, View, Document, Financials, Funding, Workbasket, Administration, and Help. Below this, the claim ID 1741283874900 is displayed. A sidebar on the left contains icons for different claim types. The main area shows claim details: Claim ID, Status (Final), Claim Type (Professional), Benefit Plan Type, and Calculated Benefit Plan Type (Medical). There are also checkboxes for 'Manually Priced', 'Send to Review', 'Trial Claim', 'Capitated Service', 'Renewed Claim', 'Voided Claim', 'Claim Source Unknown', and 'Locked Claim'. At the top right, there are 'Previous' and 'Next' buttons highlighted with a red box, and an 'Estimated Preview Time' of less than 1 second. Below the claim details, there's a table with columns for Header, Lines, Summary, Totals, Exceptions, Financial History, COB, Repricing Outputs, Accumulators, Issue Tracking, Attachments, Funding Request, Episodes of Care, Claim UDT, Line UDT, Assignm, and More.

Manually Priced

The Manually Priced checkbox is selected after the claim was subject to Adjust Financials or Deny operations.

Converted Claims

Converted claims are:

- Those claims that have already been paid that get loaded into HealthRules during "cut-over" from a legacy system.
- Claims that have already been paid that are added to HealthRules during production time frame to include external adjudicated claims from another system (most commonly pharmacy, optical, or mental health claims).

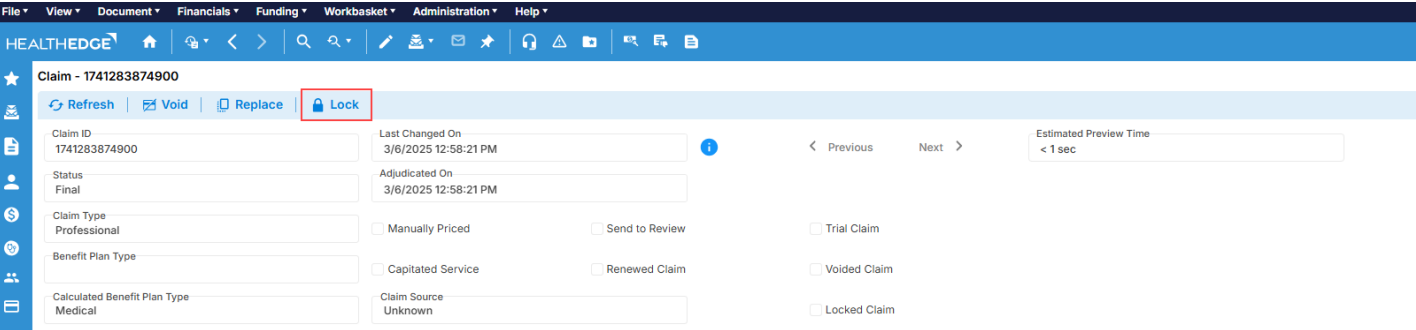

Converted claims are indicated by a check mark in the Converted field.

You can click **Renew Claim** to change the converted claim into a Renewed claim, thus giving it all the same capabilities of a standard claim. The claim will be flagged as a "renewed" claim (see ["Changing a Converted Claim to a Renewed Claim" on page 2-86](#)).

Locked Claims

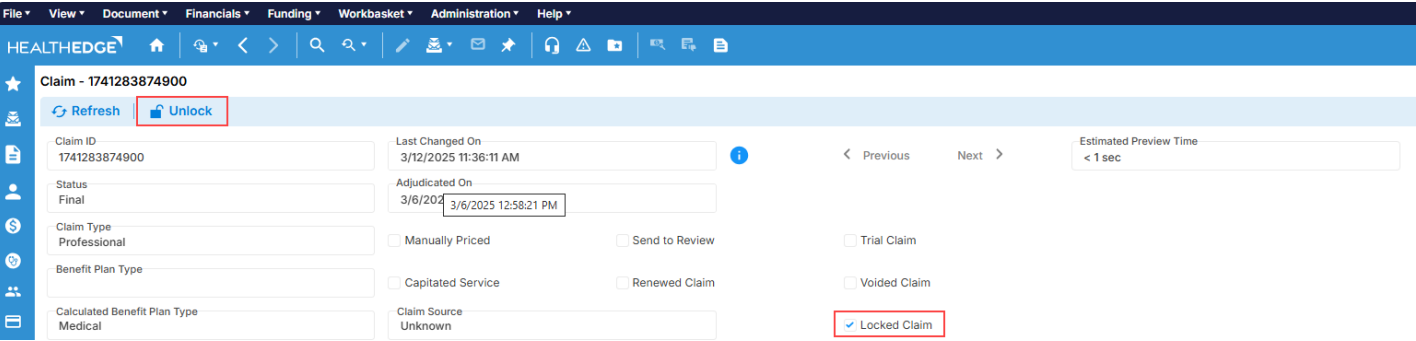

The claims can be locked from the claim’s view page to stop any users who lack the required permission from modifying the claims.

To lock a claim, click the **Lock** button and select a reason to lock a claim. The illustration below displays the **Lock** button on a claim’s view page:

NOTE You need to have the required “Lock” permission to lock/unlock a claim, for more information, see *HealthRules Administration Console* user guide. The **Lock** button will not appear on a claim if you don’t have the required permission.

After a claim is locked, the **Lock** button changes to **Unlock** and the Locked Claim checkbox is selected, as shown in the illustration below:

Please note the following:

- A claim can only be locked from the claim’s view page and not during the claim editing.
- Only finalized (Final or Denied) claims can be locked.

- Converted (both converted/delegated encounters) claims cannot be locked.
- When a claim has been locked, the following functions will be disabled:
 - Open for Edit
 - Deny
- Locking and unlocking a claim will not create a new version of the claim.
- Locking a claim does not alter it if the claim will be included in a payment cycle.
- Locked claims are excluded from all Claim Reprocessing events (i.e., Contract and Benefit Plan Component Amend)

Claims View/Edit Page Tabs

View Mode

The Claims View page displays the following tabs:

- [Header](#)
- [Lines](#)
- [Summary](#)
- [Totals](#)
- [Financial History](#)
- [COB](#)
- [Repricer Outputs](#)
- [Issue Tracking](#)
- [Attachments](#)
- [Funding Request](#)
- [Episodes of Care](#)

- [Claim UDT](#)
- [Line UDT](#)
- [Assignment History](#)
- [Audit Log](#)

Edit Mode

The Claim Edit page displays the following tabs:

- [Header](#)
- [Lines](#)
- [Summary](#)
- [Totals](#)
- [COB](#)
- [Repricer Outputs](#)
- [Attachments](#)
- [Episodes of Care](#)
- [Claim UDT](#)
- [Line UDT](#)
- [Assignment History](#)
- [Audit Log](#)

Header Tab

The Header tab shows basic information about members and providers, as well as accounting totals, additional information, and accident/emergency dates. Each section of the Header tab is described below. All sections from all claim types (professional, institutional, and dental) are included. Sections that are unique to a particular claim type are identified.

Split Claim ID

The top of the header tab includes basic information about the claim, including the following:

| Field | Description |
|-------------------|---|
| Payee | The claim payee type (this is determined by the system and may be the supplier or subscriber). This field does not have a corresponding field on the UB04 paper form. |
| Submitted Payee | The submitted payee type from the original claim. |
| Date Received | The date the claim was received. This is the date the health care company first received the claim. For example, the date stamped on the paper claim by the mail room when it was first received by the health care company. This date is entered by the data entry operator, or for EDI claims by the system. |
| Date Entered | If entered manually into the system, the claim entry date. This date is time-stamped by the system. |
| Patient Account # | The patient ID number. |
| Medical Record # | The medical record number. |
| Clearinghouse # | The clearinghouse trace number. |
| Claim Payor | Indicates whether the payables and payment is generated internally after adjudication using HealthRules Manager (type = "Internal"), or are handled by an external payer (type = "External"). The Claim Payor field is not editable, but if a user has sufficient permissions, the value can be overridden using the Manual Override section (see below). |
| Delivery Type | The claim delivery type indicating how the claim was delivered to the |

| Field | Description |
|--------------------------|---|
| | HealthRules Payer system. For example, "manual," "electronic," "scanned," or "other." |
| Scan Code | For paper claims, the claim scan code. |
| Batch Number | If claims were entered in a batch through HealthRules Manager, the batch number. |
| Trading Partner ID | The trading partner ID number. |
| Frequency Code | The frequency code specifying the submission frequency of the claim. For example, "admit through discharge," "interim - first claim," "void/cancel of prior claim," "replacement of prior claim," etc. Valid values correspond to the third position of the Uniform Billing Claim Form Bill Type field. |
| Claim Filing Code | The claim filing indicator from the 837 EDI claim submission is displayed in this field. The field may be edited. |
| External Batch # | The external claim batch number. |
| Ext. Batch Seq. # | The external claim batch sequence number within the batch. |
| External Claim ID | The external claim number. |
| Ext. Cross Ref. Claim ID | The external claim cross reference number. Indicates that the claim was adjusted. |
| Submitted Subscriber ID | The Submitted Subscriber ID from the 837 EDI claim submission is displayed in this field. The field may be edited. |
| Pay-to-Plan Primary ID | The Pay-To-plan Primary Identifier is displayed in this field. This identifier may be used by trading partners for their subrogation payment requests. |
| International Claim | If the checkbox is selected, it indicates the claim is an international claim. |
| Submitter Name | Name of the person responsible for creation and formatting of the claim submission. |
| Submitter ID | ID of the person responsible for creation and formatting of the claim submission. |
| Expedited | The checkbox is selected when a claim has been flagged as "expedited" by either clicking the Expedite button on the Claim View page, or the Claim Review and Repair Workbasket page. This indicates to claim processors that the claim has been expedited by a supervisor and the |

| Field | Description |
|-----------------------------|---|
| | claim is to be worked upon immediately to address the escalation/urgent attention it requires. |
| Encounter | The checkbox is selected when a claim is an encounter. |
| Back Out From Claim History | |
| Manually Applied Interest | The checkbox is selected only when the Interest Override section fields are manually populated. |
| Underpayment Notification | Underpayment notification date for the adjusted claims |
| RAP/NOA Received Date | Displays Request for Anticipated Payment (RAP)/Notice of Admission Date (NOA) received date of the Type of Bill (TOB) 32A. If you have a 329 claim without a corresponding 32A claim, and you manually edit the NOA received date on the 329 claim, the system will maintain the NOA received date upon preview or submission. Additionally, when a 329 claim is entered into the system with an admission date different from that of the 32A claim, the NOA received date on the 329 claims will be empty. However, if you manually edit the NOA received date on the 329 claim, the system will maintain the NOA received date upon preview or submission. |

Member

The Member section includes general information about the member, including the linked member name, and the linked name.

PHI and VIP Notations: A "P" symbol next to the Name field indicates that the member record includes PHI viewing restrictions or permissions (as specified in the PHI tab of Member View). A "V" symbol next to the member or account indicates VIP permissions.

Dental Claim Information

| ▼ Dental Claim Information | | |
|---|---|---|
| Transaction Type
Statement Of Actual Services | Predetermination Number | Total Case Fee |
| ☒ EPSDT/Title XIX | No. of Oral Images | ☐ Do Not Prorate |
| Treatment Place
Providers Office | No. of Radiographs | |
| Total Months | No. of Models | |
| Remaining Months | Appliance Placed Date | |
| ☐ Enclosures | Prior Placement Date | |
| ☐ Orthodontics Treatment | ☐ Prosthesis Replacement | |
| ▶ Missing Teeth Information | | |

On a dental claim, this section provides information on the type of dental service that was provided, including: transaction type, whether or not the claim is being submitted through the early and periodic screening, diagnosis and treatment program information and more. The section also allows to click the **Eye** icon next to the Total Case Fee field of a banding claim to view details of the associated scheduled claims on the Orthodontia Claims page.

NOTE The **Eye** icon only displays if the total case fee is available on the banding claim.

If the "COB Detection Parameters" provision is set, you may use the Other Dental Coverage and/or Other Medical Coverage fields to help detect possible COB claims. For example, you could select the Other Dental Coverage checkbox and click Preview Results to detect if a COB claim exists.

The patient's missing teeth can be identified by tooth number, and any supporting comments can be added in the Missing Teeth Remarks sub-section.

For more information about working with dental claims, see the *Working with Orthodontia Guide*.

This section displays the provider linked Supplier Name, Supplier ID, Classification, and Supplier Location Names. Click a linked Supplier or Supplier Location record to display information about the record.

NOTE To view the detailed information about the Exact Match Methods, use the info icon with the tooltip "Used Exact Match Method" next to the Location Name field. Clicking this info icon opens a pop-up menu "Exact Match Method Definition Details," which displays information such as: Used Match Definition, Is Exact Match, Used Exact Match Method, Address Standardization Used, Time Spent on Matching (in milliseconds), Terminated Records Included.

NOTE When editing a Classification, the drop-down list will only show the classifications (provider taxonomies) that have been assigned to the selected supplier or supplier location.

NOTE If the selected supplier has more than 200 locations, use the **search**  icon next to the Location Name field to look up the location. This **search** icon is only displayed if the selected supplier has more than 200 locations.

Provider > Submitted Supplier Information

The Submitted Supplier Information displays the supplier name and address that was originally entered on the Supplier Invoice. It includes the Supplier NPI, Tax ID and the CLIA ID of the rendering practitioner submitted via the Connector service or supplier invoice.

NOTE If a claim submitted through the Connector service has a zipcode or referral number (the Connector service can have only one value) and a CLIA ID, clicking View Input on the claim will display the zip code or referral number in Field 23 based on existing logic to determine the value type. If the claim submitted through the Connector service has a CLIA ID, clicking View Input on the claim will display the CLIA ID in Field 23 only if there is no referral number or zip code.

Provider > Pay To Address - Pay Supplier

The Pay to Address - Pay Supplier section includes the address of the payee to which the payment will be sent. The system determines the payee and retrieves the applicable payment address.

Provider > Submitted Pay To

For professional claims submitted on paper, the paper form provides for entry of only two provider-related addresses—one for the billing provider and another for the service facility location. The EDI standard for professional claims has an additional provider pay-to address. This can be different than that of the billing provider if, for example, providers with multiple locations have a central remit-to address. If a submitted pay to is included in the EDI feed, or if it has been manually entered on the [Create Claim page](#), it is displayed here. These fields are applicable to both professional and institutional claims. They are not applicable to dental claims.

Provider > Referring Physician

This section includes the linked name and ID of the practitioner who referred the service for this claim.

Submitted Referring Physician Information

This section displays the submitted data from the claim, which includes practitioner name, last, first, and middle names, ID, ID Qualifier, and suffix. You can change or remove the Submitted Referring Physician information.

Provider > Rendering Facility

On a professional claim, this section displays the location name of the rendering facility on the claim, and the associated ID. You can click the linked value in the Location Name field to display the Supplier Location screen and view the location where the services were rendered.

Provider > Submitted Rendered Facility Information

On a professional claim, this section displays the location information from box 32 where the service was rendered. This includes the location name, ID, NPI and classification. This information is streamed to the ALL_CLAIM_FACT table in the datawarehouse.

Provider > Provider Service Eligibility Codes

This section displayed submitted provider service eligibility codes. Used primarily by Blue Card customers.

Provider > Physicians

On an institutional claim, this section displays the linked name and ID of the physicians associated with the claim and their specialties.

The following sample shows the Physicians section when you are editing the claim.

| Physicians | | | | | | |
|---------------------------|---|--|---|-------|-----------|--|
| | Name | ID | Specialty | Clear | Submitted | |
| Attending Physician | <input type="text" value="Ricki Nord"/> | <input type="text" value="246851915"/> | <input type="text" value="Pediatrics, Pediatric Cardiology"/> | | | |
| Referring Physician | <input type="text"/> | <input type="text"/> | <input type="text"/> | | | |
| Operating Physician | <input type="text"/> | <input type="text"/> | <input type="text"/> | | | |
| Other Operating Physician | <input type="text"/> | <input type="text"/> | <input type="text"/> | | | |
| Other Physician | <input type="text"/> | <input type="text"/> | <input type="text"/> | | | |

You add physicians by searching for them by clicking the **search** icon in the ID column. You add physicians in the Other Physicians area by clicking the plus sign (+).

You remove physicians by clicking the **eraser** icon in the Clear column. Other physicians are removed by clicking the **delete** icon in the Delete column.

You view the submitted information about a physician by selecting the **view** icon in the Submitted column.

This displays the submitted data from the claim, which includes practitioner first, middle, and last names, NPI, and practitioner ID. You can change or remove the submitted physician information when editing the claim.

NOTE The attending physician on Institutional claims and the treating dentist on dental claims are associated with the Missing Attending Practitioner validation policy. If the validation policy is enabled, the system will evaluate the type of bill on the claim to determine if the attending physician is available on Institutional inpatient claims and the treating dentist on dental claims. If the information is missing, the system will send the claim to review, repair or display a warning based on the Enforcement Level configuration on the policy.

Provider > Treating Dentist

On a dental claim, this section includes the linked name of the dentist and the ID. It also includes specialties of the treating dentist, and submitted treating dentist information, including the name and NPI.

Provider > Practice Address

The address of the provider's practice is displayed in this section.

Rendered Services Address

The address where services were performed is displayed in this section.

Provider Service Eligibility Codes

| ▼ Provider Service Eligibility Codes | | Add |
|---|-----|--------|

Payment Prohibited by State | ✕ ▼ | Delete |
| Eligibility Code
Provider Is Not Eligible | ✕ ▼ | Delete |

One or more provider service eligibility codes associated with the provider on the claim are displayed in this section. Valid codes include:

Code Description

- 1 Provider is eligible to render service under state licensure regulations.
- 2 Provider is not eligible to render service under state licensure regulations.
- 3 State regulations prohibit payment for service.
- 4 No License Applicable
- 5 Unlicensed Provider
- 6 Unknown Licensure Status
- 7 No Credentialing Applicable
- 8 Uncredentialed Provider

- 9 Unknown Credential Status
- A Federally Sanctioned Provider

The Admission Data section displays the following admission data submitted on an institutional claim:

- Admission Date
- Admit Time
- Admission Type
- Discharge Time
- Admission Source
- ESRD Onset Date
- Member Status
- Status Code
- Statement From and Through Dates
- Type of Bill
- Admitting Status

About Type of Bill and Admitting Status

The Admitting Status reflects the setting in which facility services were rendered -- inpatient or outpatient. The Admitting Status is determined based on the Type of Bill submitted on the claim.

In HealthRules Payer, the Type of Bill code maps to the Admitting Status (for example, if the claim is submitted with a Type of Bill "111" the Admitting Status is "Inpatient."

The Type of Bill may have an unknown or missing value. When a claim is received with Type of Bill that cannot be mapped to "Inpatient" or "Outpatient," the system will send the claim to repair, and allow you to either correct the Type of Bill or manually set the Admitting Status. You can override the Admitting Status to "Inpatient," "Outpatient" or "Unknown". If you override the Admitting Status the Claim Type field is re-set to the corresponding claim type ("11", "12," or "20").

Exclude Secondary Editors

You can manually override the payee and claim payer type, or add one or more alternate benefit rules to apply to the claim. The manual rules override rules defined in the "Alternate Benefit" provision on the benefit plan component. However, if you select the Bypass Alt. Benefit Rules checkbox setting on the claim line, the claim bypasses all alternate benefit rules, including the manual rules on the claim header. You can remove the manual rules and sort the order for applying the rules as necessary.

Fields/Commands

| Field | Description |
|-------|--|
| Payee | Select either "Subscriber" or "Supplier" from the Payee drop-down list to override the payee that the system assigned to the claim. This allows you to re-direct payment to the subscriber or supplier |

| Field | Description |
|---|--|
| | as required for the claim, regardless of any Assignment rules that might be enabled. The Payee field in the header general information will reflect the change after submitting the override. You can remove an override by selecting the "X" next to the drop-down list. If the payee override is removed, the system will assign a payee to the claim as the system normally would, (that is, by either using the submitted payee, or by evaluating any Assignment rules that might be enabled). |
| Claim Payor | <p>To override the Claim Payor field (claim payer type) displayed on the Claim Header tab header section, select the claim payer type ("External" or "Internal") from the drop-down list.</p> <p>Note: If you attempt to change from "External" to "Internal" for a Claim with a Payee type of Subscriber, an error will be generated. There is a validation policy that checks for a valid payer and payee combination.</p> |
| Admitting Status (Institutional Claims Only - not pictured above) | To manually override the Admitting Status on an institutional claim, click Edit on the toolbar, and then select an Admitting Status from the drop-down list ("Inpatient," "Outpatient," or "Unknown"). |
| Action Type (Required) | Click the action type you want to apply on the claim. |
| Applies To Member Benefit Only | Select the checkbox to apply the alternate rule to member benefits only. |
| User Message for Submitted Line | Select a message to display on the original claim lines. If a message is not selected, the claim lines display the associated system message code. |
| User Message for Alternate Line | Select a message to display on the new claim lines that are created as a result of the alternate benefit rules. If a message is not selected, the claim lines display the associated system message code. |

Alternate Service List

Click **Add** to define the service codes.

| | |
|------------------------------|---|
| Alternate Service (Required) | Click the Search icon to look up the service code you want to use as an alternate. |
| Percent of Charges | Enter the percentage to pay on the claim. |

Alternate Benefit Dental Information

| Field | Description |
|-------|-------------|
|-------|-------------|

This section displays for dental claims.

Click **Add** to use dental information from the original claim line or provide specific tooth, surface or cavity information to use with the alternate service code. You must always select a tooth number, letter or range of teeth when entering information about a tooth surface.

| | |
|-------------------------------------|---|
| Use Original Line Information | Allows using the tooth system, tooth, surface and oral cavity of the original claim line. |
| Specify Teeth Information | <p>Allows specifying a new tooth system, tooth, surface and oral cavity for the alternate claim line by clicking Add Row.</p> <p>Note: To enter a range of tooth numbers or letters, enter a range such as 5-10 in the field and press the [Tab] key. Entering a range adds new rows with pre-filled information from the first line for each number or letter. You can update the information as necessary.</p> <p>You can click Copy to make a copy of a line or click Delete to delete a line.</p> |
| Applies to Claim Line(s) (Required) | <p>Click the More icon to select the claim lines to apply the alternate benefit rules. You can click the Select All icon to select all claim lines and click the Clear All icon to deselect claim lines.</p> <p>Note: The Processed By Alternate Benefits checkbox is automatically selected if a claim line is already processed by a pre-defined or manual alternate benefit rule.</p> |

Exclude Secondary Editors

This section allows you to specify one or more configured secondary editors from processing the entire claim.

| | |
|----------------|---|
| Exclude Editor | Select the configured secondary editor that you want to exclude from processing the current claim from the Exclude Editor drop-down list. |
|----------------|---|

Penalty Override

This section allows you to manually apply penalty while editing a claim.

| | |
|--------------------------|---|
| Apply Configured Penalty | When the Apply Configured Penalty checkbox is selected a penalty will be applied to the claim in addition to the calculated interest. |
|--------------------------|---|

| Field | Description |
|-------|--|
| | <p>Note: This is applicable only when the "Claim Payment Interest Calculation" provision has been configured with Penalty Option>Penalty Method of "charge penalty when indicated on claim".</p> <p>For more information, see the <i>HealthRules Designer User Guide, Vol. 4: Operating Provision Reference</i>.</p> |

Interest Override

This section allows you to manually enter values to override the late claim interest when the system-calculated interest resulted from a Texas Prompt Pay Penalty.

| | |
|---|---|
| Total Interest Amount | Enter the Texas Penalty amount. |
| Percent Interest to Additional Payee | Enter the percentage of the interest amount to send to the additional payee. |
| Tier Description | Enter the tier description assigned to the interest override |
| Interest Penalty Amount | Enter the amount interest penalty amount to send to the additional payee |
| Percent Plus Interest to Additional Payee | Enter the percentage of the "Plus Interest" to send to the additional payee |
| Additional Payee | Click the Search icon to look up the additional payee you want to add. |
| Lien Holder ID | Enter the unique lien holder identifier. |

The Diagnosis section includes segments for the Principal and Admitting diagnosis, as well as separate sections for any External Diagnoses, and Additional Diagnoses. All sections include fields for the diagnosis code, code description and code set, as well as the Present on Admission (POA) Indicator assigned to the primary and secondary diagnoses.

You can add to the External or Additional Diagnoses lists by clicking the **Add** command, and re-order the Additional Diagnoses list into the correct priority order by using the **Move Down** and **Move Up** commands.

Use the **Delete** command to delete a diagnosis from the External or Additional Diagnoses lists.

The submitted DRG type, code and description for the Reason for Visit may also be entered.

NOTE If an incoming claim has an invalid diagnosis code, a blank diagnosis code field will be displayed. From the Claim Review and Repair workbook, you can either delete the blank code fields or select the correct code using the ellipsis [...] button to correct the problem.

The Claim Notes and Claim Lines Notes sections displays claim and line-level notes submitted via professional and institutional Electronic Data Interchange (EDI) claim transactions. The section shows a summary of all notes that includes the note code type and the first 120 characters of the note text. You can point to the note summary to view the note text and also click the note summary to see the short description associated with the note type code and the entire note.

If the supplier invoice was submitted with an invalid note code, the Note Type field on the consolidated claim is left blank and displays an input exception message. You can click the input exception message to view the claim note or line note and edit as needed.

You can also click **Add** to enter a new note, if necessary. The note text has a 1000 character limit and must be available if a note code type is selected.

Note: If you want to send claims with invalid note type codes to review and repair, you can turn on the Claim Note Code Validation and the Claim Line Note Code Validation policies under the Claim or ClaimLine document types.

Post Pay Recovery

▼ Post Pay Recovery

☐ Post Pay Recovery

Adjustment Reason

Savings

Reference Fee Savings

A Post Payment Recovery Claim is a claim that is determined to have a reduction in payment on it that is owed to either a member or a provider. You cannot manually select this checkbox. This checkbox is selected when a claim is adjusted and a reason code that corresponds to post pay recovery was selected. You can configure which reasons correspond to a post pay recovery claim

The reason that was selected that corresponds to a Post Pay Recovery claim shows in the Adjustment Reason field.

The amount in the Savings field is calculated as the difference between the total paid amount from the previous final version of the claim and the total paid amount on the current version of the claim.

The amount in the Reference Fee Savings field is calculated as the difference between the total Reference Fee on the current and the previous non post pay versions of the claim.

NOTE The amount in the Reference Fee Savings field populates when the concerned benefit plan component is set up with a Reference Fee provision.

Claim Fees

On Professional, Institutional, and Dental (ADA 2012 and ADA 2002) claim forms, you can add claim fee information.

Fee Types are user-defined code entries, defined in the ExternalFeeType code set. Some examples might include: Access Fee, AEA Fee, or State Surcharge. Information includes fee type, and amount and/or percentage, as applicable.

You add, edit, or delete this information when editing claims or adjusting financials.

The fee amount may be entered as a positive or negative value. A negative fee amount displays in parentheses, such as (\$25).

Post Payment Recovery Claim Fees

A Post Payment Recovery Claim is a claim that is determined to have a reduction in payment on it that is owed to either a member or a provider.

To have HealthRules Payer calculate the account and vendor fees, you must have the following configured in HealthRules Designer:

- Claim Adjustment Reason Codes for Post Pay Recovery — These codes, when selected, indicate that the claim has savings on it that should be returned to either the member or the provider; that is, the claim is a Post Pay Recovery Claim. (These reasons are located under Setup > Health Care Company. For more information on configuring these reason codes, refer to the *HealthRules Designer Guide, Volume 2: Operating Provisions Reference*.)

Chapter 3: Claims Screens

- **Post Pay Recovery Fee Provision** – You must have one or more account fees or vendor fees configured with an indicated service and fee percentage. You can configure both account fees and vendor fees. For more information on how to configure benefit plan components, refer to the *HealthRules Designer Guide Volume 2: Products and Benefits*.

When savings are found on a claim (as indicated in the Post Pay Recovery section), HealthRules Payer compares the configured Post Pay Recovery Provision against the claim. If one or more provisions match the claim, HealthRules Payer calculates the fee using the configured amount for each provision. The fee amount (recorded in the Fee Amount field) and the associated fee type (recorded in the Fee Type field) show on the claim in the Claim Fees section under the Post Pay Recovery section on the Header tab of the claim.

When savings are found and fees are calculated, the Fee Type, Fee Amount, and Fee Percentage fields are populated. You cannot edit these fields when they are populated from these calculations.

External System Processing Results

The External System Processing Results section displays additional details about external systems that detect fraud, price, or perform other actions on a claim. It can include details about the actions that were taken on the claim, or discovered about a claim.

Example ClaimsXten external claims editing return fields

The fields returned depend on the enabled external claims editing system.

For more information, see your CES or ClaimsXten documentation.

When using third party groupers/pricers, successful grouping of a claim can be viewed on the Claim Header tab in the External System Processing Results section.

Example 3M MS DRG Return Fields

The fields returned and displayed vary from grouper to grouper. Details are given below.

For more information about these return fields, see your 3M or Optum documentation.

Fraud Detection (External Claim Edit) Return Fields

| ClaimsXten Return Fields | |
|--------------------------|--|
| Status | The status of the claim after fraud detection processing, such as "Successfully processed." |
| Date First Submitted | The date when the claim was first successfully sent to an external claims editing application. |
| Flags | Any defined flags that have been triggered as a result of |

| ClaimsXten Return Fields | |
|---------------------------------|--|
| | processing the claim are displayed here, sometimes along with a descriptive message. |
| Responses and Error Details | |
| Error Severity | If applicable, the code indicating the error severity. |
| Ic Claim Set Id | The claim set ID. |
| Date Created | The date the outbound response from ClaimsXten was sent to HealthRules Payer. |
| Outbound Id | The outbound claim ID. |
| External Claim System | |
| Response Date | Date the response for the transaction was returned by ClaimsXten. |
| Under Review By External System | The checkbox is selected if the claim is awaiting review from external claim editor. |
| Return Code | Display "Success" if no error is encountered. If Cotiviti returns a failed transaction, the Fault Code will be displayed. |
| Return Description | Brief description of the error.

Note: This field is populated only if an error is returned instead of a recommendation for the transaction |
| Response and Error Details | |
| Request File Status | This field displays the claim response/errors during Cotiviti processing. |

3M GPS and GPCS Return Fields

| 3M MS DRG Fields | |
|----------------------------|---|
| DRG | DRG type, code returned by the grouper, and DRG description. |
| Risk of Mortality | Identifies the likelihood of dying during the hospital stay as Minor, Moderate, Major, or Extreme. |
| Severity of Illness | Severity of illness is used for payment. Severity level may be Minor, Moderate, Major, or Extreme. |
| Admit Diagnosis Used | Identifies diagnoses present on admission. |
| ICD Version Qualifier Used | The qualifier that indicates the version of International Classification of Diseases (ICD) reported. For example, "9" means the ICD- 9. |

| 3M MS DRG Fields | |
|--|---|
| Diagnosis Affected DRG Flag | How the diagnosis affected the DRG assignment. |
| Grouper Version Used | <p>The grouper version used to calculate DRG. Version is entered or derived from the submission date.</p> <p>Grouper version numbers for 3M are 3-digit numbers. For example, version 29 of the grouper is specified as 290.</p> |
| Major Diagnostic Category | Major diagnostic category at discharge. |
| Grouper Pricer Parameter | Grouper Pricer Parameter record name used. |
| Alternate DRG Grouper | The alternate Grouper Pricer Parameter record name used for grouping, if defined, and if the primary Grouper Pricer Parameter record returned a fatal error and is unable to group. This field is only displayed if an alternate Grouper/Pricer Parameter record has been defined and used for grouping. |
| MS DRG Edit Codes

GPCS Errors | <p>APR DRG Grouper edit codes returned after grouping are displayed in this section. Including the following fields for each edit:</p> <ul style="list-style-type: none"> ■ Type ■ Code ■ Description <p>For GPCS, any errors returned are also displayed, including the following fields for each error:</p> <ul style="list-style-type: none"> ■ GPCS Error Type ■ Error Type ■ Error Severity ■ Description ■ Field Name ■ Ancillary Text |

Optum EASYGroup Return Fields

| Optum EASYGroup MS DRG Fields | |
|-------------------------------|---|
| DRG | DRG type, code returned by the grouper, and DRG description. |
| Grouper Type | EasyGroup grouper type. |
| Grouper Version | EasyGroup grouper version. |
| POA Bypassed | Indicates whether or not POA editing bypassed. |
| System Return Code | Legacy implementation. Returns same codes as EasyGroup Optimizer. |

| Optum EASYGroup MS DRG Fields | |
|---|---|
| Optimizer Return Code | Edit codes returned from EasyGroup Optimizer. |
| Grouper Return Code | Edit codes returned from EasyGroup MS DRG grouper. |
| Pricer Return Code | Edit codes returned from EasyGroup pricer. |
| Editor Return Code | Edit codes returned from EasyGroup editor. |
| Mapper Return Code | Edit codes returned from EasyGroup mapper. |
| EasyGroup Date-Sensitive Code (DSC) Edit Summary Section | <p>Edit codes returned from EasyGroup DSC Editor.</p> <p>\ Including the following fields for each edit:</p> <ul style="list-style-type: none"> ▪ Type ▪ Code ▪ Description <p>For GPCS, any errors returned are also displayed, including the following fields for each error:</p> <ul style="list-style-type: none"> ▪ GPCS Error Type ▪ Error Type ▪ Error Severity ▪ Description ▪ Field Name ▪ Ancillary Text ▪ Occurrence ▪ Schedule |

| Optum EASYGroup APR DRG Fields | |
|--------------------------------|--|
| DRG | DRG type, code returned by the grouper, and DRG description. |
| Grouper Type | EasyGroup grouper type. |

| Optum EASYGroup APR DRG Fields | |
|---|---|
| DRG Procedure Indicator | Indicator shows how each procedure code was utilized by the Grouper. For example, 0 = Non-operating room procedure, 1 = Non-operating room procedure, needed for DRG assignment, etc. |
| Grouper Version | EasyGroup grouper version number. |
| Risk of Mortality | APR-DRG code indicating risk of mortality. For example, 0 = Not applicable, 1= Minor, 2 = Moderate, etc. |
| Severity of Illness | APR-DRG code indicating severity of illness. For example, 0 = Not applicable, 1= Minor, 2 = Moderate, etc. |
| POA Bypassed | Code showing eligibility or reason for bypassing Present on Admission indicator. |
| System Return Code | Legacy implementation. Returns same codes as EasyGroup Optimizer. |
| Optimizer Return Code | Edit codes returned from EasyGroup Optimizer. |
| Grouper Return Code | Edit codes returned from EasyGroup MS DRG grouper. |
| Pricer Return Code | Edit codes returned from EasyGroup pricer. |
| Editor Return Code | Edit codes returned from EasyGroup editor. |
| Mapper Return Code | Edit codes returned from EasyGroup mapper. |
| EasyGroup Date-Sensitive Code (DSC) Edit Summary Section | Edit codes returned from EasyGroup DSC Editor. |

| Optum EASYGroup EAPG Grouper Fields | |
|-------------------------------------|---|
| Claim Processed Flag | Flag indicating the claim processing results. |
| System Return Code | System Return Code. |
| Grouper Return Code | Grouper Return Code. |
| Claim Disposition | Overall Claim disposition based on all edits. |
| Claim Processed Warning Flag | Flag indicating a claim processing warning. |
| Optimizer Return Code | Optimizer return code. |
| Pricer Return Code | Pricer return code. |
| Number of Visits | Total number of visits on the claim. |
| Editor Return Code | Editor return code. |

| Optum EASYGroup IRF Fields | |
|---|--|
| Grouper Type | EasyGroup grouper type. |
| Grouper Version | EasyGroup grouper version number. |
| RIC | Code indicating rehabilitation impairment category. This code is required for IRF pricing. |
| CMG | Code indicating original/clinical casemix group. |
| System Return Code | Legacy implementation. Returns same codes as EasyGroup Optimizer. |
| Optimizer Return Code | Edit codes returned from EasyGroup Optimizer. |
| Grouper Return Code | Edit codes returned from EasyGroup MS DRG grouper. |
| Pricer Return Code | Edit codes returned from EasyGroup pricer. |
| Editor Return Code | Edit codes returned from EasyGroup editor. |
| EasyGroup Date-Sensitive Code (DSC) Edit Summary Section | Edit codes returned from EasyGroup DSC Editor. |

| Optum EASYGroup SNF Fields | |
|-------------------------------------|---|
| System Return Code | Legacy implementation. Returns same codes as EasyGroup Optimizer. |
| Optimizer Return Code | Edit codes returned from EasyGroup Optimizer. |
| Editor Return Code | Edit codes returned from EasyGroup editor. |
| Grouper Return Code | Edit codes returned from EasyGroup SNF RUG reader. |
| Grouper Type | EasyGroup grouper type defined for the SNF RUG reader. |
| Grouper Version | The SNF RUG reader version number. |
| Pricer Return Code | Edit codes returned from EasyGroup pricer. |
| Pricer Type | The EasyGroup SNF pricer type. |
| Overall Claim Disposition | The overall claim disposition based on all edits. |
| AIDS Factor | The AIDS adjustment factor. |
| Markup Factor | The markup or discount factor. |
| Highest Admit Diagnosis Disposition | The highest admitting diagnosis disposition. |
| Total Reimbursement | The total reimbursement for this claim. |
| PPS Total | The total prospective reimbursement amount for |

| Optum EASYGroup SNF Fields | |
|--|---|
| | SNF PPS claims. |
| Third Party Payment | The total reimbursement for this claim minus patient coinsurance. |
| Coinsurance | The total patient coinsurance for this claim. |
| EasyGroup Admitting Diagnosis Edits (ACE) Summary Section | Edit codes returned from EasyGroup ACE Editor. |

3M GPS and Optum EasyGroup Outpatient

| Outpatient Fields | |
|-------------------------------------|---|
| System Return Code | Legacy implementation. Returns same codes as EasyGroup Optimizer. EasyGroup only. |
| Optimizer Return Code | Edit codes returned from EasyGroup Optimizer. EasyGroup only. |
| Editor Return Code | Edit codes returned from EasyGroup editor. EasyGroup only. |
| Grouper Return Code | Edit codes returned from grouper. EasyGroup only. |
| Grouper Type | The grouper type used to assign the APC code. |
| Grouper Version | The grouper version used to assign the APC code. |
| Pricer Return Code | Edit codes returned from EasyGroup pricer. EasyGroup only. |
| Pricer Type | The pricer type used to price the claim. |
| Pricing Method Indicator | Medicare, Medicaid or other pricing method indicator code. For example, 00 = Standard DRG processing, etc. EasyGroup only. |
| # Secondary Diag. Codes | The number of secondary diagnosis codes used during processing 3M GPS only. |
| Patient Type | Patient or visit type code. For example, 01 = Inpatient, 02 = Outpatient, etc. EasyGroup only. |
| APC Status | APC status code. For example, 0 = No errors found, 1 = Procedure APC errors, etc. EasyGroup only. |
| Overall Claim Disposition | Code indicating overall disposition of the claim, including claim diagnosis and procedure edits. For example, 00 = No errors found, 01 = Claim contains line item rejection, etc. |
| Highest Admit Diagnosis Disposition | Highest reason code for admission disposition. EasyGroup only. |

| Outpatient Fields | |
|--------------------------------|--|
| Comorbidity Category | The comorbidity category code associated with the ESRD monthly bill. For example, 00=No Comorbidity Adjustment, 01=GI Bleed, 02=Pneumonia, etc. EasyGroup HHA and ESRD only. |
| HHRG | EasyGroup Home Health Agency (HHA) claims only. Not used for APC, ASC, or ESRD. Home Health Resource Group. |
| Alternate HHRG | EasyGroup HHA claims only. Not used for APC, ASC, or ESRD. Alternate Home Health Resource Group. |
| Alternate HHRG Flag | EasyGroup HHA claims only. Not used for APC, ASC, or ESRD. Alternate Home Health Resource Group flag. |
| Alternate Reimbursement | EasyGroup HHA claims only. Not used for APC, ASC, or ESRD. Alternate reimbursement. |
| Alternate Add-On Reimbursement | Home Health Agency (HHA) claims only. Not used for APC, ASC, or ESRD. Alternate add-on reimbursement. EasyGroup only. |
| Hold Harmless Amount | Hold harmless add-on payment amount. EasyGroup only. |
| Core Based Statistical Area | Home Health Agency (HHA) claims only. Not used for APC, ASC, or ESRD. Core Based Statistical Area. Easygroup only. |
| Edits | Grouper return codes are displayed in this section. |

Claims Impacted

For claims that are processed by external claims editing services, such as ClaimsXten, this section displays a list of claims that were impacted by the service. Information includes claim ID, Send To Review indicator, Case ID, and more.

External System Information

When processing certain types of external system claims, this section can include the Submitted ID Prefix and the Local Plan Code.

The ID prefix is a claim-level attribute. Optionally, the ID Prefix can be used to match to an ID prefix in the member's benefit plan selection (see ["Denying a Claim when an Invalid Member ID Prefix was Submitted on the Claim" on page 2-96.](#))

The Local Plan Code can be used to match a claim to a supplier.

Claim Editing Results

The Claim Editing Results section displays claim level results from primary claims editing systems, such as Source or Optum CES, and/or secondary editing systems such as Cotiviti or CXT.

▼ Claim Editing Results

| Edit Type | System | Status | Date First Submitted | Response Date | Return Code | Return Description | Under Review by Editor | User Message | Provider Type |
|-----------|--------|------------------------|----------------------|---------------|-------------|--------------------|--------------------------|--------------|---------------|
| Primary | CXT | Successfully processed | 3/26/2025 | | | | ☐ | | |

Lines Tab

The Lines tab shows summary information about each line of the claim.

Three out-of-the-box views are available for the Claims tab. The Classic view is the original view, which includes the summary of the line item in a collapsible bar. The Classic view is the default view. The Benefits view and the Pricing view show the claim lines in a grid. You can use the drop-down list to switch between the views for the claim lines.

The list can also contain custom views that are available based on the type of claim you are viewing. These views are called *organization views*. Organization views are available to all users in HealthRules Payer. You can still reorder or change the columns that show once you select an organization view. For more information on organization views, see *HealthRules Designer Organization Views Guide*.

You can create a view that is available only to you. This view is called a *user view* (see ["User Views" on page 3-168](#)).

Classic View

The Classic view includes the summary of the line item in a collapsible bar. When you expand the line item, you can expand or collapse headings as needed. Disabled headings contain no data.

The following sample shows a Dental claim.

(Line Number and Name)

For each line, the line section summary heading shows:

- line number
- DOS range
- diagnostic code
- HCC Amount
- paid amount
- member responsibility amount

NOTE Individual lines are numbered consecutively (1, 2, 3, etc.). When HealthRules Payer splits lines during adjudication, lines are numbered with a "point number" (for example, Line 1, may be split into Lines 1.1 and 1.2). If you are using the Burgess Source® external claims editor, the split lines are re-numbered using whole line numbers as required by Burgess Source. For example HealthRules split Lines 1.1 and 1.2 become Lines 1 and 2.

This section displays the current status of the claim line, indicates if the claim has been excluded from external claim editing services and/or reinsurance, displays the original claim line number, and the clean claim date.

The following table describes the top section (line number and name section) of the Lines tab.

| Field | Description |
|---------------------------|--|
| Line Status | <p>Indicates if the line is Adjudicated, Final, Denied, Rejected, Needs Review, Needs Repair, or Needs Repricing.</p> <p>If rejected, even accidentally, you can not edit the claims line. The workaround is if the line was rejected by accident, you can duplicate the line and adjudicate it. That way, it will process the new line and leave the rejected line alone. Otherwise, you could resubmit the claim as a whole.</p> |
| Excluded from Reinsurance | Select if the claim is excluded from reinsurance. Reinsurance is insurance that is purchased by an insurance company from one or more other insurance companies (the reinsurer) as a means of risk management. The companies enter into a reinsurance agreement that details the conditions upon which the reinsurer would pay a share of the claims. |
| Clean Claim Date | When a claim is entered, the default claim date is the receipt date. The date acts as a clean claim "as of" date. You can change or delete the Clean Claim Date. If you have multiple lines on a claim, a message |

| Field | Description |
|-------------------------|--|
| | prompts you to populate all lines with the new or deleted date. If a clean claim date does not exist on claim lines, no interest can be calculated for the claim (see "Create Claim Page" on page 3-2). |
| Orig. Line Number | <p>This field captures the original line number from the EDI 837. If the original line number from the EDI 837 is present, that number is populated in the Orig. Line Number field of any new, manually-created, claim lines copied from that line.</p> <p>The Orig. Line Number field is viewable on all claims, and can be updated if needed when editing a claim.</p> <p>If you copy a line to create a new line on the claim, and no EDI 837 data is present in the field, the HealthRules line number of the original line is populated in this field. For example, if you copy Line 1 to create Line 2, and no EDI original claim line number is present, the Orig. Line Number field will display "1" for the new Line 2.</p> <p>Original line numbers are not captured for converted claims.</p> <p>If the line splits during adjudication, the HealthRules line numbers increment and the Original Line Number remains the same for all lines.</p> <p>On an externally edited claim (for example, by CES or CXT), the Orig.Line Number remains the same as the originally referenced Orig.Line Number before the service codes or other elements changed.</p> |
| Secondary Edits Applied | <p>This checkbox is selected whenever a Cotiviti edit(s) fires on a claim line.</p> <p>Note: This checkbox is not available for Dental claims.</p> |

Institutional and Professional Claims

The Lines tab for institutional and professional claims includes the following main sections:

- [Message Codes](#)
- [Line Details](#)
- [Capitation Adjudication Details](#)

Chapter 3: Claims Screens

- [Benefit Adjudication Details](#)
- [Pricing Details](#)
- [Alternate Service Pricing Details](#)
- [Reporting Category List](#)
- [Claim Line Notes](#)
- [Claim Line Fees](#)
- [Claim Line Delegated Processing](#)
- [External System Limits](#)
- [External System Message Codes](#)

Dental Claims

The Lines tab for dental claims includes the following main sections:

- [Message Codes](#)
- [Line Details](#)
- [Dental Services](#)
- [Capitation Adjudication Details](#)
- [Benefit Adjudication Details](#)
- [Pricing Details](#)
- [Alternate Service Pricing Details](#)
- [Reporting Category List](#)
- [Claim Line Delegated Processing](#)

Benefits View and Pricing View

The Benefits view allows you to view insurance-related information, benefit information, and network information that is applied to the claim line.

The Pricing view allows you to view code-related columns. Code columns include modifier codes, the message codes, the service codes, the revenue codes, and the place of service codes. When you click the code, a pop-up opens that includes one or more additional descriptions for the codes.

You have the ability to view wrap plan information and totals from the benefits and pricing views. When you select the **Show all wrap plans and totals** checkbox above the grid next to **Manage Views**, all the claim lines within the claim expand to show the base benefit plan, the additional wrap plans, and the total for the claim lines. The labels for these values are shown in the third, unlabeled column.

You can also show the wrap plans and totals for an individual claim line. The Show Wrap And Totals column shows checkboxes for individual claim lines. When you select the checkbox for the claim line, the claim line expands and shows the base benefit plan, the wrap plan, and the total for the indicated claim line.

The Show Wrap And Totals column and the unlabeled column are static; you cannot move or sort by these columns.

Shared Columns

Some columns are shared between the Benefits view and the Pricing view. The columns that are shared are based on the type of claim. The columns that are specific to professional claims include:

- Line Number
- Show Wrap And Totals
- Unlabeled column (shows labels for base benefit plan, wrap plan, and totals)
- Line Status
- DOS From
- DOS To
- Place of Service

Chapter 3: Claims Screens

- Service Code
- Units

The columns that are specific to institutional claims include:

- Line Number
- Show Wrap And Totals
- Unlabeled column (shows labels for base benefit plan, wrap plan, and totals)
- Line Status
- Revenue Code
- Service Code
- DOS From
- Units

The columns that are specific to dental claims include:

- Line Number
- Show Wrap And Totals
- Unlabeled column (shows labels for base benefit plan, wrap plan, and totals)
- DOS From
- DOS To
- Area of Oral Cavity
- Total Number(s) Letter(s)
- Tooth Surface
- Service Code
- Units

Columns Specific to Benefits View

The Benefits view allows you to view insurance-related information for the claim. When you select Benefits from the drop-down list, the following columns are present when viewing a claim:

- Benefit Tier
- Tier Name
- Line Status
- Billed
- Allowed
- Deductible
- Coinsurance
- Copay
- Member Responsibility
- Paid
- Message Code(s)
- Benefit Plan
- Benefit Network
- Benefit Provision

Columns Specific to Pricing View

The Pricing view allows you to view code-related columns for the claim. When you select Pricing from the drop-down list, the following columns are present when viewing a claim:

- Billed
- Allowed
- Non-Par

Chapter 3: Claims Screens

- Contracted
- Fee Provision
- Fee Component
- Benefit Tier
- Tier Name
- Benefit Network

Line Number

When you click the line item number, a screen opens with the claim line information.

When viewing the claim, you can click the claim line number to view the details that are specific to the claim line. You are unable to edit any information when viewing a claim line.

When editing the claim, you can click the claim line number to edit the details that are specific to the claim line. The following actions are available when you edit a single claim line:

- Add Line
- Copy Clean Claim Date
- Copy Claim Line
- Copy Documentation Requests
- Copy Rendering Practitioner (This action is available on professional claims only.)
- Copy Service Date (This action is available on dental claims only.)

NOTE After you save changes to a claim line, you must also save the claim as a whole.

Service Code, Revenue Code, Modifier Code, and Message Code

When present on the claim line, you can click the code in the column. A pop-up opens that includes a short description and a long description of the selected code.

NOTE When processing or denying a claim line, entering an invalid modifier code or attempting to remove it will trigger a "repair exception (61) - Invalid modifier code." To resolve this, you need to select the Ignore Input Exception checkbox.

Place of Service Code

When present on the claim line, you can click the code in the column. A pop-up opens that includes the place of service code and a description.

Fee Component

When present on the claim line, you can click on the fee component in the column. A warning message opens indicating if you have insufficient permissions to view the document.

Supplier Contract

When present on the claim line, you can click on the supplier contract in the column. A warning message opens indicating if you have insufficient permissions to view the document.

Benefit Network

When present on the claim line, you can click on the benefit network in the column. A warning message opens indicating if you have insufficient permissions to view the document.

Fee Provision

When present on the claim line, you can click View in the Fee Provision column. A pop-up opens describing how fees are allocated.

Details for Tooth Number(s)/Letter(s), Tooth Surface(s), and Oral Cavity Area

When additional information is available for the Tooth Number(s)/Letter(s) column, the Tooth Surface (s) column, and the Oral Cavity Area column, three vertical dots show on the right side of the cell. You can click the vertical dots to view the additional information.

User Views

A user view is a type of template that HealthRules Payer follows to display specific columns based on the type of claim. A user view is specific to the user who creates the view. In contrast, organizational views are templates that are available to all users across all of HealthRules Payer to all users.

You may need to create a view specific to you if an organizational view is unavailable for your needs. By creating a view specific to you, you save time from having to consistently modify the column chooser to see certain fields that are dependent on the claim you are working on and the job you need to complete.

You can switch between user views and organizational views while working on a claim. You can also modify or re-order the columns that show once you select a user view or an organizational view.

Add a View

Based on your permissions, you can create a new user view for a specific claim type or for all claim types.

1. Within the claim you are working on, click the Lines tab.
2. Click **Manage Views**.

The Manage View screen opens.

3. Click **Add**.

The fields in the bottom of the screen become editable.

4. Enter the name of your view.
5. Select the types of claims that are applicable to your view.
6. Select the columns you want to use in your view, then use the arrows to move columns from the Available list to the Selected list.
 - To select all the columns in the list, select the checkbox in the header of the list. Then click the double-right arrow.
 - You can optionally search for columns you want using the text field at the top of the list. The columns that contain your search criteria are shown.
7. (Optional) Reorder the columns you want to show by selecting the column you want to move, then click the appropriate arrow (see ["Manage Views Page" on the next page](#)).
8. (Optional) Select the columns you want to remove from the Selected list, then use the arrows to move the columns back to the Available list (see ["Manage Views Page" on the next page](#)).
9. Click **Save**.

Copy a View

You can create a new view by copying an existing template.

1. Within the claim you are working on, click the Lines tab.
2. Click **Manage Views**.

The Manage View screen opens.

3. Click **Copy**.
4. The fields at the bottom of the screen populate with the information in the view you want to copy.
5. Edit the view as necessary (see ["Add a View" on the previous page](#) or ["Manage Views Page" below](#)).
6. Click **Save**.

Delete a View

You can delete only user views from within HealthRules Manager. You can delete organization views and user views from within HealthRules Designer. For more information, see *HealthRules Designer Organizational Views Guide*. The views that have a lock next to them are out-of-the-box views that cannot be deleted or edited.

1. Within the claim you are working on, click the Lines tab.
2. Click **Manage Views**.

The Manage View screen opens.

3. Click to highlight the view you want to delete.
4. Click **Delete**.

A confirmation message opens.

5. Click **Yes** to delete the view.

Manage Views Page

The following section describes the fields available on the Manage Views page.

Fields and Commands

The following table describes the fields and commands available on the Manage View page.

| Field/Command | Description |
|---------------|---|
| Close | Click Close to close the Manage Views screen. |
| Add | Click Add to add a new template. |
| Copy | After you select the existing view, click Copy to make a copy of the view. You can make |

| Field/Command | Description |
|---|--|
| | edits to the copy. |
| Delete | After you select an existing user view, click Delete to delete the view. |
| Lock Icon | The lock icon is on out-of-the-box views that cannot be edited or deleted. You can make copies of the out -of-the-box views. |
| View Name | The column in the table contains the read-only name of the view. |
| Claim Type | The column in the table contains the read-only list of the claim types that are available to the view. |
| View Type | The column in the table contains the type of view. |
| Save | Click Save to save your new or edited view. |
| Save And New | Click Save and New to save your new or edited view and create a new view. |
| Clear | Click Clear to clear the view name, the selected claim types, and the columns in the Selected list. |
| View Name | Enter or edit the name of the view you are working on. |
| Claim Type | Select the claim types that the view should be available for. |
| Available | This list contains all the columns that can be included in the view. Select the columns you want to include in your view. Use the arrows to move the columns into the Selected list. |
|  | When you select all the columns in the Available list, the double-right arrows become active. Use this button to move all the columns into the Selected list. |
|  | When you select one or more columns in the Available list, the right arrow becomes active. Use this button to move the selected columns into the Selected list. |
|  | When you select one or more columns in the Selected list, the left arrow becomes active. |

| Field/Command | Description |
|---|--|
| | Use this button to move the selected columns into the Available list. |
|  | When you select all the columns in the Selected list, the double-left arrows become active. Use this button to move all the columns into the Available list. |
| Selected | This list contains the columns that are included in the view. Select the columns you do not want to include in your view. Use the arrows to move the columns into the Available list. You can also reorganize the columns to be in the order you want them to show in. |
|  | When you select one or more columns in the Selected list, this up arrow with the horizontal line becomes active. Use this arrow to move the selected columns to the top of the Selected list. |
|  | When you select one or more columns in the Selected list, this up arrow becomes active. Use this arrow to move the selected columns up one place in the list. |
|  | When you select one or more columns in the Selected list, this down arrow becomes active. Use this arrow to move the selected columns down one place in the list. |
|  | When you select one or more columns in the Selected list, this down arrow with the horizontal line becomes active. Use this arrow to move the selected columns to the bottom of the list. |

Message Codes

On non-covered claims, there is a message section above Line Details.

Some system messages produced during processing display in this section.

For example, when lines are split during adjudication, the associated system messages are displayed in this section (see also, ["Line Details > Message Codes" on page 3-187](#)).

Line Details

The Line Details section varies depending on the type of claim.

This section includes the beginning and ending dates of service, the point of service codes indicating where the service took place, the codes describing the service, and the amount charged for the service. It also includes the linked benefit plan and benefit network, network and provider availability, and the service authorization and/or service category, if applicable.

NOTE The network and provider availability fields display a "Y" or "N" value if a network or provider matches the definition of the "Network Adequacy" provision.

If a line is denied, but not tied to a Benefit Plan, the system will assign the "closest" benefit plan and display that benefit plan in the Benefit Plan for Line Denial/Rejected field.

Within the Line Details are a number of sections which vary depending on claim type:

- ["Institutional Claim" below](#)
- ["Professional Claim" on page 3-176](#)
- ["Dental Claim" on page 3-178](#)

Institutional Claim

On an institutional claim, the line details section shows the dates of service, revenue code, CPT/HCPCS code, modifiers, charges, and units of service. If the line is room and board line, the room and board checkbox is checked. The benefit plan, benefit network, and service (if any) used to adjudicate the line are also displayed.

Chapter 3: Claims Screens

Line Details > Dental Services

On a dental claim, this section identifies the teeth and surfaces that were included in the service, and the oral cavity area, if applicable.

| ▼ Dental Services Teeth = 2, 3 | | | | | | | | | | Clear | Add Row |
|--------------------------------|------------------------|---------------------------|---------------|------------|------------|---|------------|------|--------|-------|---------|
| Area of Oral Cavity | Tooth System | Tooth Number(s)/Letter(s) | Tooth Surface | | | | | Copy | Delete | | |
| | | | 1 | 2 | 3 | 4 | 5 | | | | |
| Upper Left Quadr... ✕ ▼ | ADA Universal N... ✕ ▼ | 2 | Distal ✕ ▼ | Distal ✕ ▼ | Facial ✕ ▼ | ▼ | Facial ✕ ▼ | | | | |
| Upper Left Quadr... ✕ ▼ | ADA Universal N... ✕ ▼ | 3 | Distal ✕ ▼ | Distal ✕ ▼ | Facial ✕ ▼ | ▼ | ▼ | | | | |

When adding/editing teeth information, you can do the following:

- Enter the Area of Oral Cavity, and/or tooth system. Enter the number of teeth and tooth surfaces.
- To enter a range of tooth numbers or letters, type the range, such as 5-10, into the field and press the **[Tab]** key. New rows are automatically added for each number or letter, with the number or letter pre-filled. Also, any information which has also been added on the line at the time of entering a range will also pre-fill the new lines.
- To copy an existing row, click the **Copy** icon in the row you want to copy. A new row is displayed, pre-filled with the copied information - you can then change the applicable fields.
- To delete a row click the delete control in the line you want to delete.
- Click **Add Row** to add a new row of teeth information.

Line Details > Identified Cases

This section lists identified Case Instances of type “Disability”, “Workers Compensation”, and “Subrogation” that apply to the system processing.

Fields/Columns

The Identified Episodes of Care sub-section displays the following fields/columns.

| Field | Description |
|---------------------------|--|
| Current References | The current references fields/columns below display information about any currently active references to episodes of care from the current version of the claim line. |
| Episode of Care ID | The episode of care ID number is displayed in this column. Click on the ID link to display the episode of care record. |
| Definition Name | The name of the episode of care definition used to create the episode of care is displayed in this column. Click on the name link to display the episode of care definition. |
| Triggering Claim Line | If the checkbox is selected, the claim line triggered the creation of the episode of care. If the checkbox is cleared, the claim line was included in the episode of care. |
| Manually Added | If the claim line was manually added to the episode of care, "Yes" is displayed in this column. Otherwise, "No" is displayed. |
| Earliest Start Date | The earliest start date of the episode of care is displayed in this column. |
| Triggering Claim ID | The claim ID number of the claim that triggered |

| Field | Description |
|----------------------------|--|
| | the creation of the episode of care. |
| Triggering Line # | The line number of the claim line that triggered the creation of the episode of care. |
| Triggering Supplier | The name of the supplier which provided the service that triggered the creation of the episode of care. |
| Outdated References | The outdated references fields/columns below display information about any outdated references to episodes of care from the current version of the claim line. Outdated references may occur because of changes to claim service codes and subsequent re-processing. |
| Show Outdated References | To display any outdated episode of care references for this version of the claim line, select this checkbox. If any outdated references exist for this version of the claim line, the information will be displayed in the following fields. |
| Episode of Care ID | The episode of care ID number is displayed in this column. Click on the ID link to display the episode of care record. |
| Definition Name | The name of the episode of care definition used to create the episode of care is displayed in this column. Click on the name link to display the episode of care definition. |
| Triggering Claim Line | If the checkbox is selected, the claim line triggered the creation of the episode of care. If the checkbox is cleared, the claim line was included in the episode of care. |
| Manually Added | If the claim line was manually added to the episode of care, "Yes" is displayed in this column. Otherwise, "No" is displayed. |
| Active | Outdated references will always be inactive, so "No" will always display in this field. |
| Service Line Start Date | The service start date of the service specified on the claim line. |
| Earliest Start Date | The earliest service start date within the |

| Field | Description |
|-----------------------------|---|
| | specified episode of care. |
| Endorsement Effective Date | The endorsement effective date. |
| Endorsement Expiration Date | The endorsement expiration date. |
| Triggering Supplier | The name of the supplier which provided the service that triggered the creation of the episode of care. You can click on the link to display the supplier record. |
| Related Claim ID | The claim ID of the claim that referenced the episode of care. |
| Related Claim Line | The number of the claim line that referenced the episode of care. |

Line Details > NDC or UPN Codes

This section identifies drugs administered during the service, by NDC code. It may also include the submitted NDC from an 837 file, quantity, price per unit, the number of days' supply of a drug that's been provided to a member.

NOTE When capturing the NDC from 837 files, if the incoming submitted NDC format is valid, the system will display the NDC in the Submitted NDC field and the NDC/UPN Code field. However, if the NDC format is invalid, the system will display the NDC as received from the 837 file and will allow you to edit the value as needed.

Line Details > Message Codes

▼ Message Codes

| | | |
|--|--|---------------|
| <div>Message Code</div> <div>147</div> | <div>Description</div> <div>Services rendered by an out of network provider.</div> | <a>Delete |
| <div>Message Action</div> <div>Informational</div> | <div>Responsibility</div> <div></div> | |
| <div>Message Code</div> <div>27</div> | <div>Description</div> <div>Coinurance Amount</div> | <a>Delete |
| <div>Message Action</div> <div>Informational</div> | <div>Responsibility</div> <div></div> | |

This section displays any system and/or user messages applied to the claim during adjudication.

If a user message was used to deny the claim, either both the user message and any applied system messages will be displayed (as pictured above), or only the user message, depending on your HCC processing rules configuration.

Informational Messages

Informational (not Denied) messages can be removed by clicking the Delete control next to the message while editing the claim line. When you remove the message, it is retained in the Line Details > Manual Override > Removed Informational Message(s) section of the claim line. If you want to reinstate the message, you can delete it from the Removed Informational Message(s) section.

When informational messages are common to multiple split lines, such as 1.1, 1.2, 1.3 and so on, removing a message from a split line, removes the common message from all split lines and places the removed message in the Removed Informational Message(s) section on the original line (base line), in this example line 1. To return the informational message to the split lines, you can delete it from the Removed Informational Message(s) section in the original line.

Line Details > User Messages

The User Messages section is applicable for manually added user messages. For example, if the claim line was denied manually, this section displays the user message selected at the time of denial.

Note: Any user messages automatically added by the system due to their use within pricing or benefit provisions will show within the messages section.

The section displays the following fields:

| Field | Description |
|----------------|--|
| Code | The user message code for the message. |
| Description | The long description for the message. If no long description has been entered for the message code, the short description is displayed. |
| Action | User Message Codes may have a message action of "Informational" or "Denial." (see the Data Maintenance Code Entry section in the <i>HealthRules Manager Guide, Vol. 10: System Administration.</i>) |
| Responsibility | User Message Codes with a denial action may have a responsibility (supplier or |

| Field | Description |
|-------|--|
| | member) assigned (see the Data Maintenance Code Entry section in the <i>HealthRules Manager Guide, Vol. 10: System Administration</i> .) |

Line Details > External Messages

Any messages received from external system that processed the claim line; repricer messages or external claim editing messages.

Move Down Move Up Delete

On a professional consolidated claim, the Diagnosis section includes a Primary Diagnosis and an Other Diagnoses segment. These segments include the diagnosis code, diagnosis description, and code set for each diagnosis entered on the claim.

You can add to the Other Diagnoses list by clicking the **Add** command, and re-order the other diagnosis codes into the correct priority order by using the **Move Down** and **Move Up** commands.

Use the **Delete** command to delete a diagnosis from the Other Diagnoses list.

NOTE If an incoming claim has an invalid or missing diagnosis code on the claim line, a blank diagnosis code displays. From the Claim Review and Repair workbasket, you can either delete the blank code or select the correct code using the ellipsis [...] button to correct the problem.

Line Details > Rendering Practitioner

On both professional and institutional claims, this section includes the linked name, ID, role, Hospice Employee (professional only), and specialty (professional only) of the practitioner who rendered the service for this line. The "Copy to all lines" feature allows you to copy the rendering practitioner and/or specialty to all or specific claim lines.

You can enable the Missing Rendering Practitioner Validation Policy under the ClaimLine document type under Validation Policies in HealthRules Designer to trigger when the rendering practitioner is not submitted or is missing in the claim input. The policy will not fire when the Rendering Practitioner submitted on the claim is not found in HealthRules Payer.

Submitted Rendering Practitioner

This section displays the submitted data from the claim, including last, first, and middle names, NPI, ID (institutional only), suffix, and Clinical Lab Improvement Amendment (CLIA ID, professional only). You can change or remove the Submitted Rendering Practitioner information. If the submitted information is updated, HealthRules will attempt to match it to an existing practitioner and update the matched Rendering Practitioner link.

If a claim submitted through the Connector service has a zipcode or referral number (the Connector service can have only one value) and a CLIA ID, clicking **View Input** on the claim will display the zip code of referral number in Field 23 based on existing logic to determine the value type. If the claim submitted through the Connector service has a CLIA ID, clicking **View Input** on the claim will display the CLIA ID in Field 23 only if there is no referral number or zip code. Also, any claims created before this release with a referral number or zip code in Field 23 will use the existing logic to determine the value type and display the referral or zip code when you click the **View Input** icon on the claim.

Line Details > Supervising Practitioner

On a professional claim, this section includes the linked name and ID of the practitioner who supervised the service for this line.

Submitted Supervising Practitioner

This section displays the submitted data from the claim, which includes practitioner name, last, first, and middle names, NPI, practitioner id, and suffix. You can change or remove the Submitted Supervising Practitioner information. If the submitted information is updated, HealthRules will attempt to match to an existing practitioner and update the matched to Supervising Practitioner link.

Line Details > Ordering Practitioner

On a professional claim, this section includes the linked name and ID of the practitioner who ordered the service for this line.

Submitted Ordering Practitioner

This section displays the submitted data from the claim, which includes practitioner name, last, first, and middle names, NPI, other id, other id type, suffix, and address. You can change or remove the Submitted Ordering Practitioner information. If the submitted information is updated, HealthRules will attempt to match to an existing practitioner and update the matched to Ordering Practitioner link.

Line Details > Submitted Facility Location

The screenshot shows the 'Lines' tab selected at the top. Below it, the 'Submitted Facility Location' section is expanded, revealing a form with the following fields:

- Location Name (text input)
- Location Other ID (text input)
- Location NPI (text input)
- Address (text input)
- ☐ Ignore Address Check
- ☐ Undeliverable Address
- City (text input)
- State/Province (dropdown menu)
- Latitude (text input)
- Zip/Postal Code (text input)
- Longitude (text input)
- Country (dropdown menu)
- County (text input)

For professional claims, the Line Details section in the Lines tab includes a "Submitted Facility Location" section to capture the submitted rendering service facility location information received via a Connector service or consolidated on the Supplier Invoice. The section includes the Location Name, Location Other ID, Location NPI, Address, City, State, Zip Code, Country, and other fields.

Line Details > Manual Override

The claim line Manual Override section allows you to manually override numerous adjudication results, including, but not limited to pricing, benefit tier, external editing, and the matched DOFR. Upon claim submission, this information is used to adjudicate the claim.

This section allows you to manually override one claim line at a time, which can be time consuming if you have multiple claim lines you want to change. To manually override *multiple* claim lines, use the **Manual Override** button on the Edit Claim screen (see ["Apply Manual Overrides to Multiple Claim Lines" on page 2-64](#)).

Wrap-Around Manual Overrides

The Wrap-Around Manual Override section allows you to manually override the Allowed Amount and Benefit Network. When a claim line has multiple wrap benefit plans, only the first Wrap-around Plan's allowed amount will be overridden. The allowed amount for all subsequent Wrap-around Plans will be set based on the member responsibility resulting from the first Wrap-around Plan's results. When manually overriding the Benefit Network, HealthRules Payer will compare the value to each individual Wrap-around Plan's configured Benefit Network.

NOTE If the base benefit plan is overridden along with the wrap benefit plan, the wrap benefit plan will adjudicate with respect to the details mentioned in the Wrap-Around Manual Override section regardless of the "Apply Benefit Network to Base only" checkbox selected in the Manual Override section.

Exclude from Primary External Claim Editing vs. External Claim Edit System Should Suppress Denials

HealthRules Payer users can manually override a primary claim editor's edit by setting the "Exclude from Primary External Claim Editing" checkbox on the claim line, which results in the claim line not being sent to the external claim editor, such as CES or ClaimsXten.

The External Claim Edit System Should Suppress Denials field provides additional flexibility by allowing users to send a claim line back to ClaimsXten with an override that bypasses a ClaimsXten re-denial, but still allows additional ClaimsXten rules to be applied to the line.

If both boxes are checked, the Exclude From Primary External Claim Editing checkbox wins, i.e., HealthRules will not send that line back to ClaimsXten.

| Section/Field | Description |
|---------------------------|--|
| Header Information | |
| Amount Allowed | The allowed amount for this claim line. |
| Repricer Name | If a repricer has been specified, the name of the repricer is displayed here. |
| Benefit Tier Type | Indicates if the benefit will be processed as in-network or out-of-network benefit level, regardless of whether the supplier, practitioner, practitioner role or supplier location is currently in network or out-of-network.

If blank, the system will determine if the claim should be processed as in network or out of network. |

| Section/Field | Description |
|----------------------------|--|
| | <p>When there is more than one in network tier configured for a benefit plan in the network definition and the Benefit Tier Type is set to in network, then the system will assume the claim should be paid at the first configured benefit tier in the list of in-network tiers.</p> <p>You can only specify a Benefit Network or a Benefit Tier Type, but not both.</p> |
| Benefit Network Name | The benefit network name. You can only specify a Benefit Network or a Benefit Tier Type, but not both. |
| Member Responsibility Type | <p>Defines if the member is responsible up to the billed amount or the allowed amount of the claim line. When the field is not set, the system will determine member responsibility based on the "Member Responsibility" provision if configured, or use the default - allowed amount.</p> <p>Note: For external system claims, when a claim line is submitted with member responsibility type of Balance Billed and is denied, the claim line will default the allowed amount and non-covered amount as the billed amount.</p> |
| Other Discount Amount | The sum of other discount amounts applied after all other calculations have taken place. |
| Copay Amount | The copay amount of the claim line. |
| Coinsurance Amount | The coinsurance amount of the claim line. |
| Deductible Amount | The deductible amount of the claim line. |
| Cost Share Override Reason | <p>When overriding any of the cost share amounts, the cost share override reason is displayed, such as:</p> <ul style="list-style-type: none"> Benefit Configuration Error Provider Contract Terms |

| Section/Field | Description |
|---------------------------------|---|
| | <ul style="list-style-type: none"> ■ Negotiated Reimbursement |
| Qualifying Payment Amount | <p>The insurer's median contracted rate. This is generally the median contracted rate recognized by the plan or issuer for the same or a similar item or service by a similar provider in the same geographic region. The QPA helps determine the patient cost-sharing in a surprise billing situation.</p> <p>For adjudication, the QPA provision of the Benefit Plan Component or Product uses the the manually overridden QPA amount.</p> <p>Note: If there is no QPA provision in Benefit Plan Component or Product, the manually overridden QPA will not affect any cost share calculations.</p> <p>If, for example, a claim matches the "Qualifying Payment Amount" provision and the QPA is \$20, the claim is sent for review. If you manually override the QPA to \$40, and the provision is set to calculate the member responsibility based on the lowest QPA (\$40), Allowed (\$44), and Billed (\$50), the member responsibility is based on the new QPA value of \$40.</p> <p>Note: You can also override the QPA amount when you click Adjust Financials.</p> |
| Supplier Contracted | Indicates the related supplier is contracted. This information is used to determine whether or not the member should be balanced billed. |
| Processed by Alternate Benefits | Indicates if a claim line is already processed by a pre-defined or manual alternate benefit rule. Exclude Secondary Editors |
| Bypass Alt. Benefit Rules | Applies to services defined with Alternate Benefit Rules only! Select this checkbox to bypass the alternate benefit rules to which the line would normally apply. When this checkbox |

| Section/Field | Description |
|-----------------------------|--|
| | <p>is selected, the originally submitted service code will be used instead of the alternate service defined by the Alternate Service Rule Set.</p> <p>If the alternate benefit created new claim lines, the new lines are no longer displayed as claim lines, and those lines are not available for downstream processes like creating a Remittance advice, claim encounter data reporting, etc.</p> <p>Removing the check mark from the Bypass Alt. Benefit Rules checkbox will once again apply alternate benefit rules to the claim line, if applicable.</p> |
| Override Eligibility Denial | <p>You can override the denial on a claim denied for the following eligibility reasons:</p> <ul style="list-style-type: none"> ▪ 61 Denied - date of service before coverage effective ▪ 62 Denied - coverage terminated ▪ 1000 Denied - for member not covered through discharge <p>To override the denial on a claim denied for one of the above eligibility reasons, select the benefit plan against which you want to adjudicate the claim from the drop-down list, and select Preview Results or Submit. The denial will be overridden, claim status will change to "Final," and the Message Code "1003 - Denial for eligibility overridden by user" will be added to the claim line.</p> <p>Note: Only benefit plans active at the time of service are available for selection for eligibility override.</p> |
| Denial Message | Selected message indicating the denial |

| Section/Field | Description |
|---|---|
| | reason. Only one per claim line. |
| Apply Denial Message to Base Only | If the checkbox is selected, it indicates that the denial message will apply only to the benefit base plan. If the checkbox is left blank, the denial message will apply to both the Benefit Base and Wrap-Around plans. |
| Service Authorization | Search for the service authorization to manually assign to the claim line. You can also remove previously assigned service authorizations from the claim line. |
| Wrap-Around Manual Overrides | |
| Allowed Amount | Enter the allowed amount for the wrap-around benefit plan that will override the amount from the wrap benefit plan. |
| Benefit Network | Enter the benefit network for the wrap-around benefit plan that will override the benefit network from the wrap benefit plan. |
| Cost If Paid As Primary Allowed Amount | Enter |
| Denial Message | <p>You can select a denial message from the dropdown only if you have the WrapManualOverride claim processing permission.</p> <p>Note: When the runtime property <code>DENIAL_MESSAGE_TO_BASE_PLAN_ONLY</code> is enabled, you select the denial message, the Apply Denial to Base Only checkbox should be automatically checked, and you can edit the checkbox.</p> |
| External Editing | |
| Exclude From Primary External Claim Editing | <p>Select this checkbox to exclude the claim line from external claim editing. External claim editing applies a variety of business rules to incoming claims to detect and correct unbundled claim lines, obsolete service codes, and other claims coding problems.</p> <p>If you are using secondary external claims editing, and you have selected to exclude the</p> |

| Section/Field | Description |
|--|---|
| | line from re-sending to the external claims editor, this checkbox will be selected. For more information about secondary external claims editing, see the <i>HealthEdge Secondary Claims Editing Integration Guide</i> . |
| Exclude from Secondary External Claim Editing | Select this checkbox to exclude the line from re-sending to the external editor. |
| External Claim Edit System Should Suppress Denials | <p>For users of ClaimsXten only:</p> <p>Select this checkbox to instruct ClaimsXten to suppress/ignore edits that would deny the claim line, but still run other types of non-denial edits that apply to the line, such as Pay Percent edits. In this situation, ClaimsXten will not return a Deny recommendation to HealthRules.</p> <p>For example, a claim is submitted to ClaimsXten for editing. The claim line results are returned from ClaimsXten; the results for one of the claim lines has a disposition of Deny and a recommendation of Review. If you do not want to deny the line but you want ClaimsXten to still apply other types of non-denial edits to the line (such as a Pay Percent edit for example), you can open the claim for edit from the Review and Repair Workbasket, select this checkbox for the claim line, and submit the claim. The claim line will get sent back with the claim to ClaimsXten. If ClaimsXten has been configured to recognize and act on this checkbox, ClaimsXten will not re-deny the claim line, but can still apply other types of edits to potentially realize additional cost savings.</p> <p>If a claim line that has this checkbox checked gets split into multiple lines, each of the new lines will “inherit” the checked value from the source line. In this case, if a user checks the</p> |

| Section/Field | Description |
|--|---|
| | box on a line that gets split into multiple lines but wants to deny some of the new lines, the user would need to let the claim come back from ClaimsXten with the new lines and then manually deny the lines that should get denied. |
| Secondary Editing Bypass Code | Displays the override reason code for Cotiviti Edits. |
| Exclude From Primary External Editing Reason | Displays the reason the claim line was excluded from primary external editing. |
| Exclude From Secondary External Editing Reason | Displays the reason the claim line was excluded from secondary external editing. |
| External Claim Edit Suppress Denial Reason | Displays the reason the external editor suppress/ignore edits that would deny a claim line. |
| Secondary Editing Bypass Message | Displays the Override message for the Cotiviti Edits. |
| Base Plan User Messages | <p>To add a user defined message to the base plan, click Add and complete the fields in the section. You can add multiple user messages.</p> <p>Select a user-defined message from the drop-down list. The corresponding Code and Description fields, and if applicable, the Action and Responsibility fields, will be populated based on the selected user message. Messages with a Denial action are not included in the drop-down list.</p> |
| Wrap-Around Plan(s) User Messages | <p>To add user defined messages to a wrap-around plan, click Add and complete the fields in the section. You can add multiple user messages.</p> <p>Select a user-defined message from the drop-down list. The corresponding Code and Description fields, and if applicable, the Action and Responsibility fields, will be populated based on the selected user message. Messages with a Denial action are not</p> |

| Section/Field | Description |
|--|--|
| | <p>included in the drop-down list.</p> <p>Note: The system will allow you to enter a wrap-around user message, even is no wrap-around plan is associated with this claim. The information will not be retained on Submit.</p> |
| Override Denial | To add an Override Denial Reason, click Add and select an override denial Reason. |
| Included Cases | To include a case instances for the member, click Add and select a Case Instance. the Case Type will be populated automatically. You can add multiple case instances. |
| Excluded Cases | To exclude a case instances for the member, click Add and select a Case Instance to exclude. The Case Type will be populated automatically. You can exclude multiple case instances for the member. |
| Matched Supplier Contract DOFR Definition | <p>Select the Supplier Contract DOFR you want to be the decisive DOFR from drop-down list.</p> <p>If there a multiple DOFRs, and you selected a DOFR from the benefit plan and another one from the supplier contract, the usual overlapping DOFR logic is applied to the manually selected DOFRs. The one with the more restrictive action (and a bank account) will be used to determine the risk responsibility for the line (flagged as the “decisive” DOFR).</p> <p>For reporting purposes, any matching DOFRs that have been manually overridden are streamed to the data warehouse with a manual override flag.</p> |
| Matched Benefit Plan DOFR Definition | <p>Select the Benefit Plan DOFR you want to be the decisive DOFR from drop-down list.</p> <p>If there a multiple DOFRs, and you selected a DOFR from the benefit plan and another one</p> |

| Section/Field | Description |
|--|--|
| | <p>from the supplier contract, the usual overlapping DOFR logic is applied to the manually selected DOFRs. | Exclude Episodes of Care | <p>To exclude the reference to an episode of care from an included service on the claim line, do the following:</p> <ol style="list-style-type: none"> 1. Click Add. 2. Select the episode of care definition of the episode of care from which you want to exclude the selected claim line. 3. Click Next. 4. Then select the specific episode of care, based on the selected definition, from which you want to exclude the selected claim line. 5. Click Finish. |

Line Details > Pricing Prior to External Claim Editing

This section allows you to view the original paid amount before sending the claim to a primary and secondary external claim editing application so that you can evaluate the total amount saved by using the external editing application integrated with the health plan.

NOTE For this functionality, currently, only the ClaimXten external claim editing application has been integrated.

▼ Pricing Prior to External Claim Editing

Paid Prior to Primary Editing

Paid Prior to Secondary Editing

External Editor Savings

NOTE If HealthRules Payer is integrated with a primary and secondary external claim editing application, the value listed in the External Editor Savings field will represent the total savings achieved by both the applications.

For this, you need the following two settings of HCC Operating Provision External Claim Editing System, configured as:

- Enabled - True
- System Invocation - After Adjudication

This section includes the following fields:

| Section/Field | Description |
|--|---|
| Pricing Prior to External Claim Editing | |
| Paid Prior to Primary Claim Editing | Displays the original paid amount before the claim is sent to the external claim editing system.

Note: The "Paid Prior to Primary Claim Editing" field will be blank when there are no edits from the primary editor. |
| Paid Prior to Secondary Editing | Displays the paid amount before the claim is sent to the secondary claim editing system.

Note: The "Paid Prior to Secondary Editing" field will be blank when there are no edits from the secondary editor. |
| External Editor Savings | Displays the savings achieved by the integration with an External Claim Editor. |

Line Details > Repricer Outputs

In View mode, repricer output information cannot be changed.

In Edit mode, you can change repricing information and message codes on a claim in Final or Denied state. You cannot edit claim lines that have been replaced, for example by an external claim editor, such as CES or ClaimsXten. If the claim is in the Claim Repricing workbasket, you can edit the claim, but you can only change repricing information after having clicked the **Preview Result**.

The repricing information includes the allowed amount, repricer decision, dates, benefit network, and repricer name.

Chapter 3: Claims Screens

When you change repricing information, your changes are automatically made on the corresponding [Repricer Outputs tab](#).

The screenshot shows the 'Lines' tab with the 'Repricer Outputs' section expanded. It contains several input fields: 'Allowed Amount' set to '\$499.00', 'Request Date' set to '04/01/2025 12:01:00 AM', 'Repricer Decision' set to 'Priced', and 'Response Date' set to 'Now'. Below these are fields for 'Benefit Network Name', 'Repricer Name' (filled with 'Hugo Albin's Vegan Food Cart'), and 'Repricing Provision'. A 'Calculated Fee' field is also present, along with a checkbox for 'Repricer not used because of cap'. The 'MessageCodes' section is also expanded, showing 'Message Code' as 'RepricerMessage' and 'Code Domain' as 'RepricerMessage'. At the bottom, there are expandable sections for 'Repricer Admin Charges' and 'Repricer Payment Charges'.

After making your changes, you can then Preview or Submit your changes, as needed. When you click **Submit** or **Preview Result**, the Claim Repricing Warning dialog is displayed.

If you answer Yes to the prompt, your repricing information is saved, and:

- If you clicked **Submit**, the claim is submitted for adjudication
- If you clicked **Preview Result**, on the claim line you made changes to, the **Resend** button is enabled. You can click the **Resend** button to resend the claim line to the repricer.

| Field | Description |
|-------------------------|--|
| Repricer Outputs | |
| Amount Allowed | The allowed amount for the claim line. |
| Decision | The repricing decision, such as Priced, Denied, Waiting for Repricing, or Not Contracted. |
| Request Date | Date sent to the Repricer. |
| Response Date | Date response returned from the Repricer. You can click Now to enter the current date and time. |

| Field | Description |
|--|---|
| Benefit Network Name | Click the ellipsis (...) to look up the benefit network for this line. |
| Repricer Name | Click the ellipsis (...) to look up the Repricer who sent the claim. |
| Fee calculated for repricer

<p>When a Repricer is used to price some claims, two fees can be used to calculate the percentage of savings realized. <i>RepricerPayment Terms</i>, the repricer fee, describes the amount owed the Repricer for use of its network. <i>AdminCharges</i> are the administrative fees that the employer group owes the Health Care Company (HCC) for handling and paying the claim.</p> <p>The savings is the difference between the amount the provider bills and the amount the Repricer returns to the claim line. The Repricer Outputs section identifies the Repricer name and benefit network.</p> | |
| Repricing Provision | Provision configured in HealthRules Designer. |
| Calculated Fee | Fee Calculated before sending to the Repricer. |
| Repricer not used because of cap | Select the checkbox to calculate savings when price is not used due to capitation. |
| Message Codes

<p>In Edit mode, click Add to add a new repricer message. The Message Code and Code Domain fields default to the "RepricerMessage ". You can override these fields with the correct code and code domain.</p> | |
| Message Code | Click the Search icon to search for and select a message code to associate with the repricing output. |
| Code Domain | The Code Domain of the selected message code is displayed in this field. You can override the displayed Code Domain by selecting from the drop-down list. |
| Description | The Short Description of the selected message code is displayed in this field. |
| Repricer Admin Charges | |
| Admin Charge Type | The name of the fee charged to the employer group for handling this repriced claim, such as Account Admin Fee. Defined in the code set. |
| Savings Recognized | Savings for the line after taking into account the "Repricer Contract Cost" provision settings and overall savings for the claim. |

| Field | Description |
|---------------------------------|---|
| Amount | Amount this line contributes to the Admin Charges for the Claim. |
| Line Effective Savings | Savings for line after the contract cost provision's settings regarding negative savings have been applied. |
| Raw Savings | (Billed amount) - (Allowed amount) for this line. |
| Admin Terms | Part of the "Repricer Contract Costs" provision that applies. For example, "calculate savings based on service date on line when line allowed amount is greater than billed include." |
| Repricer Payment Charges | |
| Repricer Charge Type | The name of the fee owed by the Health Care Company (HCC) to the Repricer for repricing this claim. |
| Savings Recognized | Savings for the line after taking into account the "Repricer Contract Cost" provision settings and overall savings for the claim. |
| Amount | Amount this line contributes to the Repricer Payment Fees for the Claim. |
| Line effective Savings | Savings for line after the contract cost provision's settings regarding negative savings have been applied. |
| Raw Savings | (Billed amount) – (Allowed amount) for this line. |
| Payment Terms | Part of the "Repricer Contract Costs" provision that applies. For example, "calculate savings based on service date on line when line allowed amount is greater than billed ignore." |

Line Details > Pricing

The Pricing section includes the following fields showing how the line was priced:

| Field | Description |
|--------------------|---|
| Allowed Amount | |
| HCC Amount | The HCC amount for the claim line.

If the service is not capitated, the HCC amount and the Paid Amount are the same. If the service is capitated, this amount represents what would have been paid were the service not capitated. |
| Paid Amount | The amount paid toward the claim line. |
| Member Paid Amount | The amount the member has paid toward the claim line. |
| Member | The amount the member is responsible for paying. |

| Field | Description |
|---------------------|--|
| Responsibility | |
| Member Reserve Used | The total amount of the member care reserve allocated to this line. This amount (member responsibility) will be deducted from the amount paid to the provider. |

For each base plan the following fields are displayed:

| Field | Description |
|-------------------------|---|
| Base Plan | |
| Total Interest/Discount | The total interest. |
| Authorization Required | If selected (checked), authorization was required.
If cleared (not checked), authorization was not required. |
| Status | Displays the current status of the claim. For example, "Adjudicated" or "Denied." |
| Allowed Amount | The allowed (contracted) amount for the claim line for the base plan |
| Provider Penalty | Total amount of provider penalties associated with the line. |
| Bonus Amount | If a "Claim Bonuses" Provision is present in the benefit plan component or product used to adjudicate the claim line, the Bonus Amount field is displayed.

The bonus amount applied to the claim line. This is typically a percentage of the allowed amount. The sum of all claim line bonuses is displayed at the claim header level in the Totals Tab. |
| Other Discount | This field displays the amount of the "Other Discount" applied to the claim line payment amount after all other calculations, such as copay, deductibles, COB, Medicare sequestration, etc. have been made.

Note: The Claim Payment or Claim Financial History screens do not show the other discount amounts. |
| Sales Tax Amount | Sales tax amount applied on the line. |
| Member Reserve Used | The total amount of the member care reserve allocated to this line. This amount (member responsibility) will be deducted from the amount paid to the provider. |
| HCC Amount | If the service is not capitated, the HCC amount and the Paid |

| Field | Description |
|------------------------|---|
| | Amount are the same. If the service is capitated, this amount represents what would have been paid were the service not capitated. |
| Paid Amount | The amount the member has paid toward the claim line. |
| Non-Covered | The amount not covered by the line. |
| Capped Non-Covered | Total amount not covered on the line. |
| Co-Insurance | Co-insurance amount. |
| Deductible | The deductible amount. |
| Co-Payment | The co-payment. |
| Balance Billed | Total balance billed amount. |
| Member Penalty | Total amount of member penalties associated with the line. |
| Member Responsibility | The amount the member is responsible for paying. |
| Interest/Discount Paid | <p>The interest or penalty paid, or discount taken on the claim line for the base plan. This field is only displayed if interest or a penalty has been paid or discount taken.</p> <p>If a penalty is taken it is applied to the entire claim. If there are multiple claim lines, the penalty amount will only be displayed in this field for the first (non-denied) claim line. All other claim lines will display \$0.00.</p> |
| Considered Charge | <p>This field shows the charge amount that was used for determining member liability. For example, if the base plan is set to consider the lesser of the allowed amount or the billed amount and the billed amount is lesser, this field would show the total billed amount of one or more lines used to determine member liability.</p> <p>If the claim was not processed using the Calculate Member Liability Based on Lesser of Billed and Allowed provision, the field will be blank.</p> <p>If you want to see details about how the amount was calculated, click the more information button next to the field. The Considered Charge Line Details dialog is displayed.</p> |
| Amount Pre Lesser Than | HealthRules Payer supports supplier contracts that evaluate the aggregated billed and the aggregated allowed (contracted) amount of all the claim lines on the claim, and pay the whole claim |

| Field | Description |
|-------------------------------|--|
| | <p>at the lesser of the two amounts.</p> <p>This field shows the amount the claim line would have paid without the "lesser of" rule in the supplier contract.</p> |
| Reference Fee | <p>The Reference Fee is the Calculated Reference Fee minus the member responsibility (if the provision is set to deduct member responsibility).</p> <p>If the Calculated Reference Fee minus member responsibility yields a negative amount, the reference fee is set to zero. If the "Reference Fee Schedule" provision is not set to deduct member responsibility, the Reference Fee will equal the Calculated Reference Fee.</p> |
| Calculated Reference Fee | <p>Used for claim-level reference fee calculations. This is the amount of the Claim Total Reference fee available attributed to this line. It is capped on the allowed amount except on the last claim line. This is because there's the potential for "leftover" reference fee dollars that are not allocated because of capping. To avoid leftover reference fee dollars, the last non-denied line on the claim gets all remaining reference fee dollars that haven't been allocated yet (i.e. the capping does not occur on the last line). Although this may sometimes make the last line look odd, it ensures that the entire claim-level reference fee gets applied.</p> |
| Calculated Line Reference Fee | <p>This is the fee for only the service on the current line, calculated using the "Reference Schedule" provision (for example, something like 60% of Billed). This amount is not affected by any claim level calculations regarding net claim reference fee or net claim member responsibility.</p> |
| Carry Over Reference Fee | <p>Carry Over Reference Fee amount.</p> |
| Rollover Benefit Amount | <p>The member's rollover benefit amount for limit applied on the claim line.</p> |
| Threshold Rollover Benefit | <p>The amount from the Rollover Benefit Account has been added to the member's member responsibility threshold for the defined benefit period.</p> |
| MRT Amount Accrued | <p>Displays the total member responsibility threshold amount accrued on the current claim line. Field will remain blank if no value is applicable.</p> |

| Field | Description |
|---|---|
| MRT Units Accrued | <p>Displays the total member responsibility threshold units accrued on the current claim line.</p> <p>Note that the MRT Units Accrued field is displayed only if a value is applicable. In cases where there is no applicable value, this field will not be displayed in the line's Pricing section.</p> |
| Qualifying Payment Amount | <p>The Qualifying Payment Amount (QPA) is the median contracted rate recognized by the plan or issuer as provided in 2019 for the same or a similar item or service, by a similar provider in the same geographic region. The QPA helps determine the patient cost-sharing in a surprise billing situation.</p> <p>Note: Surprise billing describes a situation when an insured patient unknowingly receives care from an out-of-network provider and then is presented with a bill for services and payment obligation beyond what the patient's insurer will cover. For example, this most often happens with providers with whom the patient does not interact before the service, such as pathologists and radiologists.</p> <p>Note: The calculation logic for this field will be finalized in a future release.</p> |
| <p>Note: If a "Reference Schedule" Provision is present in the benefit plan component used to adjudicate the line, the following reference fee fields are displayed.</p> | |
| Member Resp. Based On | <p>Displays whether member responsibility for the claim line is calculated based on the allowed amount or the reference fee. This is based on the benefit plan or benefit plan component "Reference Fee Schedule" provision setting.</p> |
| Wrap-Around Plan | |
| Authorization Required | <p>If selected (checked), authorization was required.</p> <p>If cleared (not checked), authorization was not required.</p> |
| Status | <p>Displays the current status of the claim. For example, "Adjudicated" or "Denied."</p> |
| Interest/Discount Paid | <p>The interest paid or the discount taken on the claim line for the wrap-around plan. This field is only displayed if interest/discount has been paid.</p> |
| Allowed Amount | <p>The allowed (contracted) amount for the claim line for the wrap-around plan.</p> |

| Field | Description |
|-----------------------|--|
| Provider Penalty | Total amount of provider penalties associated with the line. |
| Bonus Amount | <p>If a "Claim Bonuses" Provision is present in the benefit plan component or product used to adjudicate the claim line, the Bonus Amount field is displayed.</p> <p>The bonus amount applied to the claim line. This is typically a percentage of the allowed amount. The sum of all claim line bonuses is displayed on the claim header in the Totals section.</p> |
| Sales Tax Amount | Sales tax amount applied on the line. |
| Member Reserve Used | The total amount of the member care reserve allocated to this line. This amount (member responsibility) will be deducted from the amount paid to the provider. |
| HCC Amount | If the service is not capitated, the HCC amount and the Paid Amount are the same. If the service is capitated, this amount represents what would have been paid were the service not capitated. |
| Paid Amount | The amount the member has paid toward the claim line. |
| Wrap-Around Plan | The Wrap-Around Plan ID. Click on the hyper-link to display the wrap-around plan. |
| Non-Covered | The amount not covered by the line. |
| Co-Insurance | Co-insurance amount. |
| Deductible | The deductible amount. |
| Co-Payment | The co-payment. |
| Member Penalty | Total amount of member penalties associated with the line. |
| Member Responsibility | The amount the member is responsible for paying. |
| Member Reserve Used | The total amount of the member care reserve allocated to this line. This amount (member responsibility) will be deducted from the amount paid to the provider. |
| Considered Charge | This field shows the charge amount that was used for determining member liability. For example, if the wrap-around plan is set to consider the lesser of the allowed amount or the billed amount and the billed amount is lesser, this field would show the total billed amount of one or more lines used to determine member liability. |

| Field | Description |
|---|---|
| | <p>If the claim was not processed using the Calculate Member Liability Based on Lesser of Billed and Allowed provision, the field will be blank.</p> <p>If you want to see details about how the amount was calculated, click the more information button next to the field. The Considered Charge Line Details dialog is displayed.</p> |
| COB | |
| This section displays wrap-around plan COB information. | |
| Member Savings | <p>Difference between the Wrap-around allowed amount and the Base Plan's Member Responsibility.</p> <p>Note: You can manually modify the member savings amount value via Adjust Financials in the COB section for a Wrap-Around Plan on the Lines tab. When you modify the member Savings value, the Manually Priced checkbox is selected.</p> |
| HCC Savings | Difference between the Wrap-around's "paid as primary" and the actual Wrap-around paid amount. |
| Conclusion | Specifies whether the Wrap-around Plan will pay as primary or secondary. |
| Pay as primary | If selected, indicates if the claim was paid as primary. |
| Medicare is primary | If selected, indicates if Medicare is the primary insurance. |
| Cost if paid as primary | |
| Allowed Amount | Wrap-around Plan's allowed amount as primary. |
| Penalty Amount | The amount assigned to the supplier as a penalty when they do not follow the proper procedure. |
| Stop Loss Amount | The amount of the stop loss that was paid on this line. This amount is captured to allow adjustment of subsequent stop loss payments by the amount of stop loss already paid for the confinement. |
| Amount Pre Lesser Than | The amount before the lesser-of provision cap was applied on the line. |
| Allocated to First Day | If selected, indicates that the pricing method implies that the line amount is allocated to the first day of the confinement. |
| Benefit result if paid as primary | |

| Field | Description |
|--------------------------------|--|
| Amount Due | The amount for which the member is responsible for non-participating claims, due to balance billing. |
| HCC Amount | Wrap-around Plan's paid amount as primary. |
| Paid Amount | Base's Paid amount used during the COB calculation. |
| Non-Covered | Wrap-around Plan's non-covered as primary. |
| Co-Insurance | Wrap-around Plan's co-insurance as primary. |
| Deductible | Wrap-around Plan's deductible as primary. |
| Co-Payment | Wrap-around Plan's co-payment as primary. |
| Member Penalty | Wrap-around Plan's member penalty as primary. |
| Member Responsibility | Wrap-around Plan's total member responsibility as primary. |
| Alternate Benefit Differential | The difference between the submitted and alternate code allowed amounts. |
| User Messages | This section shows user messages associated with the claim line, including user message code, description, action, and responsibility. |
| Message Codes | This section shows system messages associated with the claim line, including user message code, description, action, and responsibility. |

If the claim is adjudicated as a secondary claim, the COB is populated with the following details.

| Field | Description |
|------------------------------|--|
| Total Case Fee | <p>The total case fee on the banding claim for the Orthodontia treatment.</p> <p>Note: This field is only available in the COB-Orthodontia section and is used as the allowed amount to calculate secondary insurance payments.</p> |
| Member Savings | The member savings as a result of adjudicating the claim as the secondary payer. |
| HCC Savings | The healthcare company savings as a result of adjudicating the claim as the secondary payer. |
| Conclusion | Indicate the rule used to determine how the healthcare company (HCC) will price and apply benefits for claim adjudication. The rule is based on the settings configured for the COB provision in HealthRules Designer and can include "Pay Co-pay Coinsurance," Pay as Primary," and more. |
| Adjusted HCC Amount for Case | Displays the total schedule claims paid before reprocessing the banding claim and recalculating scheduled claims due to benefit changes. |
| Total HCC Amount for | Displays the maximum payment limit for the entire treatment |

| Field | Description |
|---|---|
| Case | <p>and includes the banding claim amount. If reprocessed due to benefit changes, the field shows the current maximum payment amount available for the remaining months of treatment, and includes the banding claim and recalculated scheduled claims.</p> <p>For an Orthodontia COB example, see the <i>Working with Orthodontia Claims Guide</i>.</p> |
| Cost if Paid as Primary | |
| The sections below display the amounts if the plan paid as the primary payer. | |
| Allowed Amount | The maximum amount (before calculating benefits) the plan will pay for the health care service. |
| Penalty Amount | The amount to withhold from the provider. This can be due to reasons such as a payment suspension or when an authorization is not obtained in a timely manner. |
| Stop Loss Amount | The additional amount the health care company will pay the provider after the member meets the deductible and reaches the maximum out-of-pocket amount. This typically applies to high-cost cases that exceed the parameters of a case. |
| Amount Pre Lesser Than | <p>HealthRules Payer supports supplier contracts that evaluate the aggregated billed and the aggregated allowed (contracted) amount of all the claim lines on the claim, and pay the whole claim at the lesser of the two amounts.</p> <p>This field displays the amount the claim line will pay without the "lesser of" rule in the supplier contract.</p> |
| Allocated to First Day | Indicates if the allowed amount is allocated to the first day. For example, for inpatient services, the confinement price for diagnosis-related group (DRG) is typically applied to the first line (first day) of the claim. |
| Benefit result if paid as primary | |
| Amount Due | The amount that the member is responsible for non-participating claims, due to balance billing. This could be in addition to any co-payments, deductibles or co-insurance when using an out-of-network provider or the fee that exceeds the allowable charge for a specific service. |
| HCC Amount | The healthcare company amount based on benefits. |

| Field | Description |
|---|--|
| Paid Amount | The healthcare company payment amount based on benefits. |
| Non-Covered | The member charge for services not covered by the plan. |
| Member Responsibility | The member responsibility on the claim based on benefits. |
| Alternate Benefit Differential | This is a read-only field that displays the difference between the submitted and alternate code allowed amounts if an alternative code is applied toward member benefits when processing COB claims. |
| Co-Payment | The amount the member must pay up-front before receiving the service. |
| Co-Insurance | The percentage of the claim for which the member is responsible after any applicable co-pays or deductible are satisfied. |
| Deductible | The amount the member has to pay towards the claim before insurance payments begin. |
| Member Penalty | The fee the member has to pay. This can be due to a reason like not following the necessary authorization requirements. |
| Resp. Threshold Amount and/or Resp. Threshold Unit(s) | The amounts or units in the claim line that are the member's responsibility if the member responsibility threshold amount is configured as "first dollar" coverage and used to adjudicate the line. |

Line Details > COB for Orthodontia

This section includes any coordination of benefits associated with the Orthodontia banding claim.

| Field | Description |
|----------------|--|
| Total Case Fee | <p>The total case fee on the banding claim for the Orthodontia treatment.</p> <p>Note: This field is only available in the COB-Orthodontia section and is used as the allowed amount to calculate secondary insurance payments.</p> |
| Member Savings | The member savings as a result of adjudicating the claim as the secondary payer. |
| HCC Savings | The healthcare company savings as a result of adjudicating the claim as the secondary payer. |

| Field | Description |
|---|---|
| Conclusion | Indicate the rule used to determine how the healthcare company (HCC) will price and apply benefits for claim adjudication. The rule is based on the settings configured for the COB provision in HealthRules Designer and can include "Pay Co-pay Coinsurance," Pay as Primary," and more. |
| Adjusted HCC Amount for Case | Displays the total schedule claims paid before reprocessing the banding claim and recalculating scheduled claims due to benefit changes. |
| Total HCC Amount for Case | <p>Displays the maximum payment limit for the entire treatment and includes the banding claim amount. If reprocessed due to benefit changes, the field shows the current maximum payment amount available for the remaining months of treatment, and includes the banding claim and recalculated scheduled claims.</p> <p>For an Orthodontia COB example, see the <i>Working with Orthodontia Claims Guide</i>.</p> |
| Cost if Paid as Primary | |
| The sections below display the amounts if the plan paid as the primary payer. | |
| Allowed Amount | The maximum amount (before calculating benefits) the plan will pay for the health care service. |
| Penalty Amount | The amount to withhold from the provider. This can be due to reasons such as a payment suspension or when an authorization is not obtained in a timely manner. |
| Stop Loss Amount | The additional amount the health care company will pay the provider after the member meets the deductible and reaches the maximum out-of-pocket amount. This typically applies to high-cost cases that exceed the parameters of a case. |
| Amount Pre Lesser Than | <p>HealthRules Payer supports supplier contracts that evaluate the aggregated billed and the aggregated allowed (contracted) amount of all the claim lines on the claim, and pay the whole claim at the lesser of the two amounts.</p> <p>This field displays the amount the claim line will pay without the "lesser of" rule in the supplier contract.</p> |

| Field | Description |
|---|--|
| | line (first day) of the claim. |
| Benefit result if paid as primary | |
| Amount Due | The amount that the member is responsible for non-participating claims, due to balance billing. This could be in addition to any co-payments, deductibles or co-insurance when using an out-of-network provider or the fee that exceeds the allowable charge for a specific service. |
| HCC Amount | The healthcare company amount based on benefits. |
| Paid Amount | The healthcare company payment amount based on benefits. |
| Non-Covered | The member charge for services not covered by the plan. |
| Member Responsibility | The member responsibility on the claim based on benefits. |
| Alternate Benefit Differential | This is a read-only field that displays the difference between the submitted and alternate code allowed amounts if an alternative code is applied toward member benefits when processing COB claims. |
| Co-Payment | The amount the member must pay up-front before receiving the service. |
| Co-Insurance | The percentage of the claim for which the member is responsible after any applicable co-pays or deductible are satisfied. |
| Deductible | The amount the member has to pay towards the claim before insurance payments begin. |
| Member Penalty | The fee the member has to pay. This can be due to a reason like not following the necessary authorization requirements. |
| Resp. Threshold Amount and/or Resp. Threshold Unit(s) | The amounts or units in the claim line that are the member's responsibility if the member responsibility threshold amount is configured as "first dollar" coverage and used to adjudicate the line. |

Line Details > External System Line Processing Results

The External System Line Processing Results sections displays results from integrated external claims editing and/or grouping and pricing systems such as ClaimsXten or CES claims editing systems, and/or 3M or Optum's prospective payment systems.

> External Claim Editing

This sub-section describes the fields and messages returned from external claim editing services, such as CES system or ClaimsXten system.

Sample External System Line Processing Results for ClaimsXten external claim editor.

ClaimsXten Claim Line Return Fields

For a more detailed explanation of the ClaimsXten return fields below, refer to your ClaimsXten documentation.

| ClaimsXten Return Fields | |
|------------------------------------|---|
| External Claim Edits | |
| Disposition | If applicable, the final disposition of the claim line, such as "Deny" or "Pay." |
| Adjusted Charges | If applicable, the adjusted charges made to the claim line. |
| New Service Code | If applicable, the new service code applied to the line. |
| Filtered From External Processing | A selected checkbox indicates that the line was specifically filtered from being included in external processing. |
| Adjusted Units | If applicable, the adjusted units value after processing. |
| External Source | Displays the source supported by HealthRules Payer for external system information claims. For example, Cotiviti. |
| Deny Line | A selected checkbox indicates that the line was denied by the external processing |
| User Message Code | Displays the user message code for the message. |
| Secondary Editor Bypass Code | Displays the Bypass Code for Cotiviti real-time files. |
| Secondary Editor Payer Bypass Code | Displays the Bypass Code for Cotiviti real-time files. |
| Flags | |
| Mnemonic | The rule acronym for the rule invoked for the claim line |
| Message | An optional message indicating the action taken. |
| Action | The action taken as a results of the flag/mnemonic. |
| Error Level | The severity of the error. |

| ClaimsXten Return Fields | |
|---|--|
| Percent Adjustment | If applicable, the percentage applied to the Allowed Amount of the claim line. |
| Added/Removed Modifiers | |
| Added Modifiers | The modifier(s) added to the claim line. |
| Removed Modifiers | The modifier(s) removed from the claim line. |
| Line Cases (Information returned from ClaimsXten) | |
| Justification ID | The justification ID. |
| Service | The service. |
| Case Line Id | The claim line case ID. |
| Customer Adjustment Code | The customer adjustment code. |
| Claims Line Outbound Id | The claim line outbound ID. |
| Payment Status | The payment status. |
| Rule Type | The rule type. |
| Msg | The message assigned to the results. |
| Supporting Lines | |
| RelatedClaim1 | Displays the related Cotiviti historical claim value. |
| RelatedLine1 | Displays the related Cotiviti historical claim line value. |

> PPS

This sub-section describes the fields and messages returned from prospective payment systems such as 3M GPS or Optum EasyGroup.

Sample External System Line Processing Results for EasyGroup MS DRG

Successful pricing results can be viewed on individual claim lines (Lines tab) in the External System Line Processing Results section.

The fields returned and displayed vary from grouper to grouper. Details are given below.

For more information about these return fields, please see your 3M or Optum documentation.

3M APR DRG Claim Line Return Fields

| 3M APR DRG Claim Line Return Fields | |
|-------------------------------------|---|
| Schedule From Date | The start date for the effective date range of the schedule used to process the claim. |
| Grouper Version | Identifies the grouper type and version used for processing. |
| Cost Outlier | The dollar amount of the portion of the hospital's total reimbursement that is above the cost outlier threshold. |
| Total Payment | DRG calculated total claim payment. |
| Transfer Payment | DRG calculated transfer payment. |
| Schedule to Date | The end date for the effective date range of the schedule used to process the claim. |
| Weight | A factor indicating the hospital resources used for that DRG relative to other DRGs. |
| Low Cost Outlier Threshold | The dollar amount, in cost dollars, that if the claim costs are lower, makes the claim eligible for a cost outlier payment in the DRG Payment formulas. |
| Schedule Type | Number associated with the schedule type. |
| Acute Care Days | The portion of the length of stay that occurred in an Acute Care setting. |
| Charge Point | The dollar amount above which the claim's total charges will qualify for a high cost outlier payment. |
| High Cost Out Threshold | The dollar amount, in cost dollars that, if the claim costs are greater, makes the claim eligible for a cost outlier payment in the DRG Payment formulas. |
| Alternate Care Payment | DRG calculated alternate payment. |
| Inlier Payment | The portion of the total claim payment qualifying as an inlier. |

3M GPS Claim Line Return Fields

| 3M GPS DRG Return Fields | |
|--------------------------|--|
| Schedule From Date | The start date for the effective date range of the schedule used to process the claim. |
| Schedule To Date | The end date for the effective date range of the schedule |

| 3M GPS DRG Return Fields | |
|-----------------------------|---|
| | used to process the claim. |
| Grouper Version | Identifies the grouper type and version used for processing. |
| Weight | A factor indicating the hospital resources used for that DRG relative to other DRGs. |
| Charge Point | The dollar amount above which the claim's total charges will qualify for a high cost outlier payment. |
| Cost Outlier | The dollar amount of the portion of the hospital's total reimbursement that is above the cost outlier threshold. |
| Low Cost Outlier Threshold | The dollar amount, in cost dollars, that if the claim costs are lower, makes the claim eligible for a cost outlier payment in the DRG Payment formulas. |
| High Cost Outlier Threshold | The dollar amount, in cost dollars that, if the claim costs are greater, makes the claim eligible for a cost outlier payment in the DRG Payment formulas. |
| Total Payment | DRG calculated total claim payment. |
| Transfer Payment | DRG calculated transfer payment. |
| Schedule Type | Number associated with the schedule type. |
| Acute Care Days | The portion of the length of stay that occurred in an Acute Care setting. |
| Alternate Care Payment | DRG calculated alternate payment. |
| Inlier Payment | The portion of the total claim payment qualifying as an inlier. |

| 3M GPS APC Return Fields | |
|--------------------------|---|
| APC Rate | The line item APC rate amount. Price is generated from APC rates and weights. |
| Payment | The line item payment amount. |
| Fee | The line item fee amount obtained from the fee schedule. |
| Discount Factor | The discount factor. |
| Status Indicator | Procedure status indicator. |
| Denial or Rejection Flag | Flag indicating line has been denied or rejected. |

| 3M GPS APC Return Fields | |
|--------------------------------|---|
| Grouper Version | Identifies the grouper type and version used for processing. |
| Cost Outlier | The dollar amount of the portion of the total reimbursement that is above the cost outlier threshold. |
| Cost Outlier Threshold | The claim level cost outlier threshold. |
| Claim Payment Without Outliers | Claim payment amount without outliers. |
| Item Cost Outlier | The line item cost outlier amount. |
| Item Payment With Outlier | The line item payment with outlier amount. |
| Item Payment Without Outlier | The line item payment without outlier amount. |
| Item Cost Outlier Threshold | The line item cost outlier threshold amount. |
| APC Grouper Edits Section | Edits returned from the APC Grouper are displayed in this section. |

| 3M GPS EAPG Return Fields | |
|--------------------------------|--|
| EAPG Category | Final EAPG category code for the line item. |
| EAPG Type | Final EAPG type code for the line item. |
| EAPG Weight | Relative weight used in EAPG payment calculation. |
| Grouper Version | Identifies the grouper type and version used for processing. |
| Schedule Type | Number identifying the schedule type. |
| Visit ID | ID number for the visit with which the line item can be associated. |
| Item Action Flag | Identified the line items to include in the grouping logic. |
| Professional Service Exclusion | Indicates that the line was excluded from grouping, editing, and reimbursement. |
| Payment Action | Line item payment category code, such as 00= Not processed, 01=Full Payment, etc. |
| Total Payment | Total payment amount for the line item. |
| Add On Payment | A set amount to reimburse for fixed costs, such as capital costs. |
| Blended Payment | A payment amount that includes both procedures subject to transitioning and procedures not subject to transitioning. |

| 3M GPS EAPG Return Fields | |
|----------------------------|--|
| EAPG Payment | Standard EAPG-based payment for the claim. |
| Existing Payment | Payment amount that represents the old payment methodology portion of the blended payment. |
| Payment Percent | Indicates percentage of full payment for the line item payment. |
| Paid Units of Service | The number of paid units of service used in the reimbursement calculations. |
| EAPG Grouper Edits Section | The edits returned by the EAPG grouper are displayed in this section. |

Optum EasyGroup Claim Line Return Fields

| Optum EasyGroup DRG Return Fields | |
|-----------------------------------|--|
| Pricer Type | Pricer type used to price this claim line. |
| Outlier Payments | Add-on payment amount for patients who qualify for cost or LOS outliers. |
| Total Reimbursement | Total patient reimbursement. |
| Mean Length of Stay | Geometric or arithmetic mean length of stay, depending on payment system. |
| Long LOS Outlier Trim | High length of stay (LOS) trim used to identify long stay or day outliers. |
| Per Diem Rate | For Inpatient Psychiatric Facility claims only. The per diem reimbursement rate (per diem calculation before variable day adjustments). |
| Inlier Rate | For Inpatient Psychiatric Facility claims only. ECT payment (additional payments for outlier cases, and a per treatment adjustment for electro-convulsive therapy (ECT) treatments). |
| Additional Mean Length of Stay | For Long Term Care claims only. Alternate arithmetic or geometric (depending on PPS) mean length of stay. |
| DRG Weight | DRG-specific weight utilized for patient pricing. |
| Transfer Flag | Flag indicating whether the line is not reimbursed as a transfer, or reimbursed as a standard transfer. |
| Pricing Method Indicator | Medicare or Medicaid pricing method indicator code. |
| Outlier Type | Outlier type code for the line. For example, 1=Not an outlier, 2=Long stay outlier, 3=Cost outlier, etc. |

| EAPG Pricer Return Fields | |
|---------------------------|--|
| EAPG Code | EAPG Return value code. Click the link for a description of the returned code. |
| EAPG Category | Final EAPG Category number for the line item. |
| EAPG Type | Final EAPG Type for the line item. |
| EAPG Weight | Relative weight used in EAPG calculation. |
| Grouper/Type Version | Identifies the grouper type and version used for processing. The first two digits identify the grouper type. The last three digits identify the grouper version. |

| EAPG Pricer Return Fields | |
|---------------------------|---|
| Reimbursement Type | Number associated with the scheme in the schedule. |
| Pricer Return Code | Pricer return code, if any. |
| Visit ID | Identifies the visit with which the line item is associated. |
| Visit Type | Identifies the type of visit. |
| Action Flag | The line item action flag used. |
| Prof. Service Excl Flag | A line level output indicating a line item was excluded from grouping, editing and reimbursement. |
| Payment Action | Line item payment category. |
| Paid Units | The paid units of service used in reimbursement calculations. |
| Procedure Disposition | The CMS procedure disposition code. |
| Total Payment | The line item payment amount. |
| Add On Payment | A set amount to reimburse for things such as capital costs. If there are multiple lines, only the first non-denied line will display this value. All other lines will be blank. |
| Blended Payment | The amount that includes procedures subject to transitioning, and procedures not subject to transitioning. |
| EAPG Payment | Standard EAPG-based payment for claim. |
| Existing Payment | Payment representing the old payment methodology portion of the blended payment. |
| Payment Percent | Indicates the percentage of full payment. |

| Optum EasyGroup IRF Return Fields | |
|-----------------------------------|---|
| Pricer Type | Pricer type used to price this claim line. |
| Payment CMG | This field contains a payment-related casemix group. |
| Base Reimbursement | Base reimbursement amount for the claim line under the IRF grouper/pricer. |
| Outlier | Outlier add-on payment amount for the claim line. |
| Total PPS Payment | Total PPS payment for the claim line. This amount is equal to the Base Reimbursement + Outlier. |
| Total Reimbursement | Total reimbursement amount for the claim line. |
| Penalty | This field contains the dollar amount of any applicable penalty. |
| Payment Flag | The payment flag code for the line. For example, 00=CMG-based case payment, 01=Transfer, etc. |

| Optum EasyGroup IRF Return Fields | |
|-----------------------------------|--|
| Transfer Flag | The transfer flag code for the line. For example, 00= Not a transfer, 01- Paid using CMG-specific per diem, etc. |
| HIPPS Weight Used | The HIPPS weight used for the payment. |
| HIPPS Length of Stay | Average length of stay for payment HIPPS code. |
| Assessment Date | The assessment transmission date in format YYYYMMDD. |

| Optum EasyGroup SNF Return Fields | |
|-----------------------------------|---|
| RUG | The RUG (resource utilization group) extracted from the HIPPS code. |
| Pricer Line Return Code | The SNF Pricer return code for this claim line. |
| Payment RUG | The RUG used for pricing this claim line. |
| RUG Rate | The per diem rate for the RUG. |
| Grouper Line Return Code | The SNF RUG reader return code for this line. |
| Highest Procedure Disposition | The highest procedure disposition for this claim line. |
| Adjusted RUG Rate | For SNF PPS claims, this field displays the wage-adjusted per diem rate for the RUG. For SNF non-PPS claims, this field displays the fee schedule rate. |
| Fee Type | The fee schedule type used for pricing this claim line. |
| Total Reimbursement | The total reimbursement for this claim line. |
| Third Party Payment | Payment for this claim line minus patient coinsurance. |
| Coinsurance | The total patient coinsurance for this claim line. |
| HIPPS Code | The HIPPS code used for RUG assignment. |

3M GPS and Optum EasyGroup Outpatient

| Outpatient Return Fields | |
|--------------------------|--|
| APC | A reference to the APC code returned by the grouper. |
| Rate | Rate amount for the line. |
| Payment Adjustment Flag | A flag indicating whether or not the claim is subject to a payment adjustment. |
| Pricer Line Return Code | The APC pricer line results. |

| Outpatient Return Fields | |
|---------------------------------------|--|
| Weight | APC weight for the line. |
| Third Party Payment | Total third-party payment amount. |
| Pricing Payment Status | Pricing payment status return code and description for the line. |
| Discount Factor | Discount factor for the line. |
| Total Reimbursement | <p>This field is calculated by HealthRules Payer using return data from the interface, because EasyGroup does not provide a consolidated Total Reimbursement (combining all factors) at the line level.</p> <p>Total Reimbursement= Third-Party Payment + Line Item Outlier Payment</p> <p>Total Reimbursement sets the Allowed Amount in the HealthRules claim line</p> <p>Note: EasyGroup does NOT provide a Total Reimbursement calculation at the line level in the return data. Because HealthRules Payer will rely on its internal benefit adjudication, HealthRules Payer will only take the Third Party Payment plus the Outlier as the reimbursement amount from the EasyGroup pricer. HealthRules Payer will then apply member cost share and deductible to determine final line level results.</p> |
| Co-payment | Member cost share from HealthRules Payer adjudication. |
| Deductible | Deductible from HealthRules Payer adjudication. |
| Outlier Payment | Add-on line item amount for patients who qualify for LOS or cost outliers. |
| Procedure Payment Status | Procedure payment status code for the line. |
| Multiple Procedure Discount Indicator | Multiple procedure discount indicator for the line. |
| Highest Procedure Disposition | <p>Highest procedure disposition error code. Possible values are:</p> <p>00 = No errors found</p> <p>01 = Claim contains line item rejections</p> <p>02 = Claim contains line item denial</p> |

| Outpatient Return Fields | |
|--|--|
| | 03 = Claim suspension
04 = Claim RTP
05 = Claim rejection
06 = Claim denial |
| Total Units Used | The number of units used during processing. 3M GPS only. |
| Reimbursement Covered Services Indicator | Reimbursement covered services indicator code for the line. |
| Reimbursement APC Code | A reference to the APC code returned by the pricer for the purpose of determining reimbursement. Optum EasyGroup contract ASC only. |
| Grouper Pricer Parameter | The grouper/pricer parameter record used. This field is currently only populated for Optum EasyGroup outpatient groupers and pricers and the 3M GPS Medicare ASC grouper/pricer. |
| Edits Section | Edit codes returned by the APC or ASC grouper are displayed in this section. |
| External System Properties | The name and value pairs returned from the external system. |

Line Details > External System Line Processing Results - External Editors

The External System Line Processing Results - External Editors section displays line level results from primary claims editing systems, such as Source or Optum CES, and/or secondary editing systems such as Cotiviti or CXT.

This section includes a grid summary display of the primary and secondary editing results for the selected line, including the following columns:

- Edit Type – Primary/Secondary
- External Source - Source, CES, CXT, Cotiviti, etc.
- Disposition

- Adjusted Charges
- Adjusted Units
- New Service Code
- Deny Line
- Filtered from External Processing
- User Message Code
- Secondary Editor Bypass Code
- Secondary Editor Payer Bypass Codes

The summary results rows can be expanded to show the Burgess (Source) Edits, or Edit Flags, Added Modifiers, Removed Modifiers, and/or Line Cases (supporting lines) tabs depending on the editor and results returned.

Line Details > Other Insurance Payments (Used for adjudication)

This sub-section shows payment information from other insurance relating to this claim line. This information is created when an EOB attachment is entered for a claim in the Line section. Message codes can also be attached to the Other Insurance payments.

This information is also available on the ["COB Tab" on page 3-254](#)

Capitation Adjudication Details

If the service provided follows under a capitated arrangement, the Capitated Adjudication Details will display both the "matched to" and "applied" DOFRs.

Within the Matched DOFR Definition section, every DOFR (both Plan and Contract) that the service qualified for will be displayed. In the following example, the service qualified for two Plan DOFRs. The first has an Action of "Submit to other carrier" and the second has an Action of "No Pay".

Within the top section of the Capitation Adjudication Details and the Responsible Party Per DOFR Type, the DOFR that was actually applied to the claim line is displayed. In this case, the "Submit to other carrier" DOFR was applied.

Benefit Adjudication Details

The Benefit Adjudication Details section shows the benefit tier and tier name selected during adjudication. When determining the network tier, the system creates a list of tier candidates based on rendering practitioner or rendering facility, supplier and supplier location benefit networks (if they apply to all practitioners), and supplier parent benefit networks. It then selects the network to use when applying benefits by finding the benefit network on the member that exists in the list of tier benefit networks and the supplier benefit networks.

The adjudication details also show the benefit provision that applies to the claim. It also shows the benefit quota name, benefit label, and any bounds (exclusions, maximums, limits, deductions) that were applied.

The Benefit Provision sub-section includes the matched provision, along with the calculated values for co-payment and/or co-insurance.

Bypass External Editing

Member Responsibility Threshold

Member Authorization

Authorization Penalties

Variables Used

Member Care Reserves Used

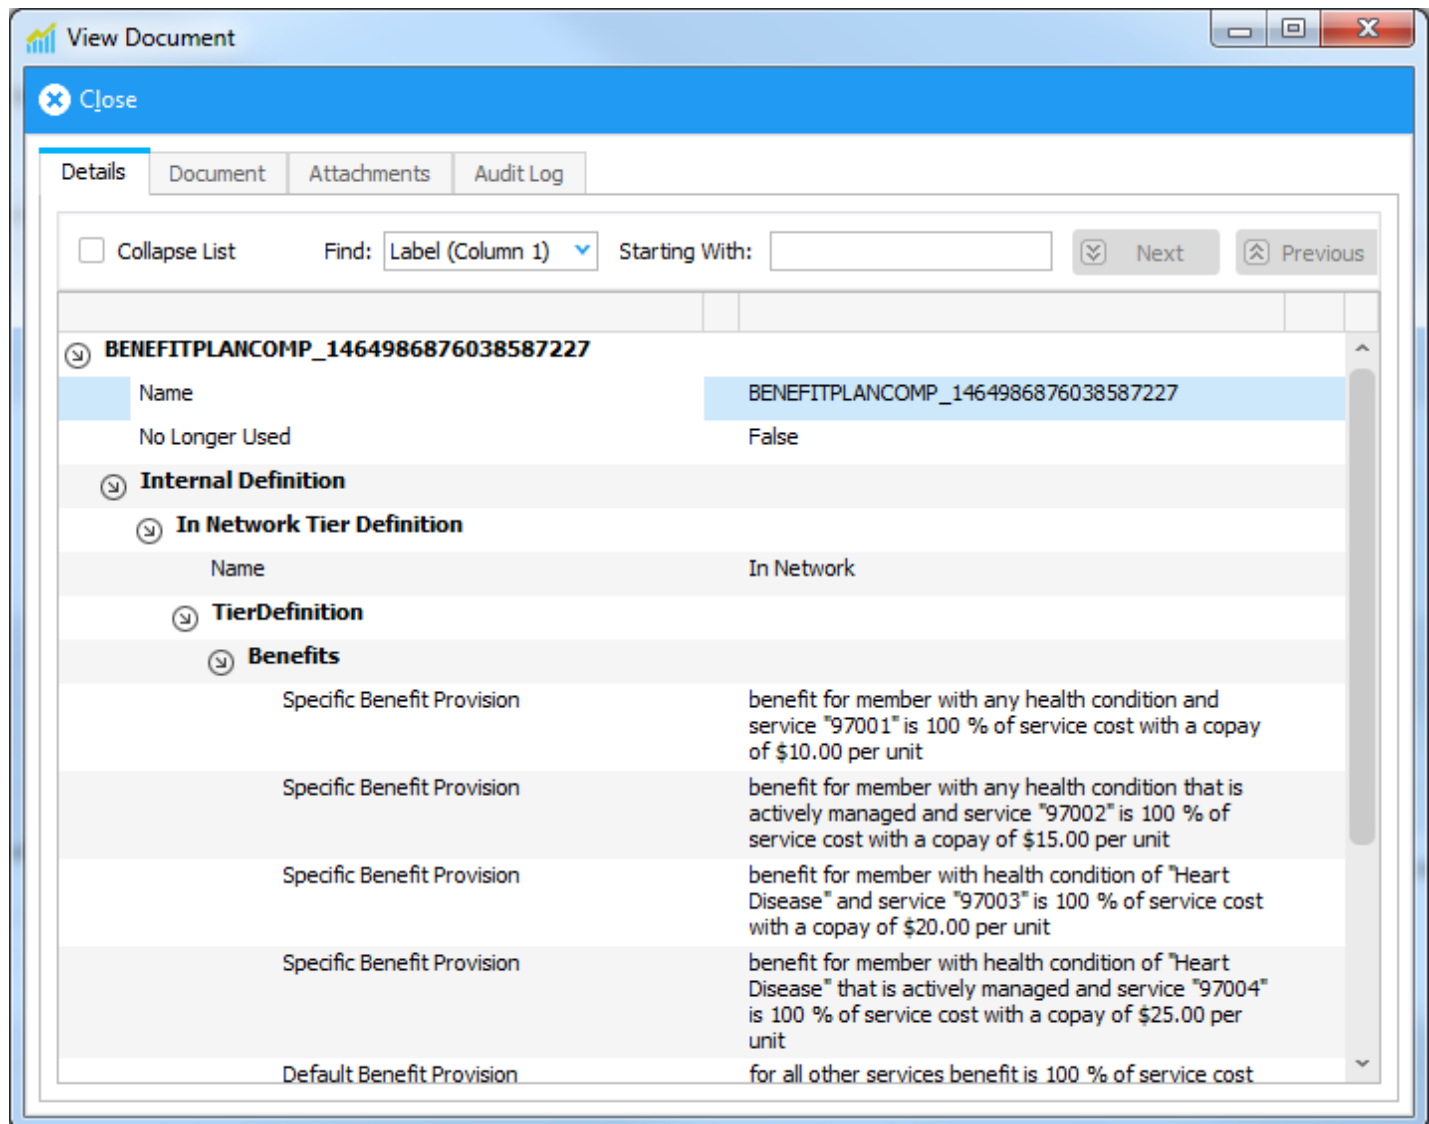

In the Benefit Provision section, the matched benefit provision is displayed, along with the calculated co-payment and/or co-insurance values. If a reference fee differential (the difference between the supplier's allowed amount and the reference fee) has been applied, that is displayed as well. For benefits denied because the service was provided after the coverage termination (expiration) date, the coverage expiration date is also displayed.

NOTE The Coverage Expiration Date shown in the Benefit Provision section is the last date on which coverage was provided. This is the day prior to the day on which coverage is terminated. For example, if the Coverage Expiration Date was 3/31/2018 and the service was rendered on 3/31/18, the benefit would be paid. If the service was rendered on 4/1/2018 (the Termination Date), the benefit would not be paid.

If a "Member Responsibility Threshold" provision has been set for "first dollar coverage" in the benefit plan or benefit plan component used to adjudicate the line, the Member Responsibility Threshold subsection is displayed. It shows the HealthRules language used in the provision, and the claim line amount or units applied toward the threshold.

Information is displayed for both the base plan and wrap-around plan(s) (if any).

Click **View** next to a benefit provision in this section to display the View Document dialog which displays the benefit plan component and its details, including exclusions, limits deductibles, etc. that were in effect at the time of adjudication.

The information in this dialog pertains to the version of the claim you are currently working with.

Member Care Reserve Used

If the a member care reserve has been established for this member, and the "Member Care Reserve" provision is set in the benefit plan, the Member Reserve ID, Used Amount and Monthly Amount of the member care reserve is displayed.

NOTE You can adjust the member care reserve Used Amount field by clicking the **Adjust Financials** button, and then entering a new Used Amount. The new Used Amount value will be allocated to the line from the member care reserve. If you enter a lower amount that frees up dollars from the member care reserve amount for the month. You can manually adjust prior claims in the month to allocate the newly available member care reserve dollars. Re-allocation of member care reserve amount dollars does not happen automatically (no claim reprocessing is triggered).

Pricing Details

The Pricing Details section shows the pricing information for both the base plan and wrap-around plan (if there is one) for the selected claim line. Information includes the following fields:

| Field | Description |
|----------------------------|--|
| Pricing Details | |
| Non Participating Provider | If the provider <i>is not</i> contracted with your health plan for your benefit plan (is a non-participating provider), this checkbox is selected. Both base and wrap plans. |
| Supplier Contracted | <p>If the service is priced using the supplier's contract (direct or network), then this checkbox is selected. Base plan only.</p> <p>Under certain scenarios this checkbox may be selected even when the service is not priced using the supplier's contract. For example, if "As Contracted" is selected in the Reimbursement Method field in the Service Agreement Details in an Authorization, or if the "Suppliers Are Contracted Under Non-par Terms" provision on the benefit network is set to "True."</p> |
| Supplier Contract | If the provider is contracted with your health plan for your benefit plan, the Supplier Contract ID is displayed in this field. You can click on the link to display the supplier contract. Both base and wrap plans. |
| Fee Component | If the provider is contracted with your health plan for your benefit plan, and a re-useable fee component was used to price the claim line, the Fee Component ID is displayed in this field. Base plan only. |
| Fee Detail | Click the System ID link to view the Fee Details used to price the line. Base plan only. |
| Fee Table | Click the Fee Table link to view the Fee Table used to price the line. Base plan only. |

| Field | Description |
|----------------------------|---|
| Parent Provision | If the Parent Provision field is displayed, it indicates that a supplier contract with a base fee with defined services is used to direct pricing to an associated fee component. This is useful for reporting purposes. |
| Fee Provision | If the provider is contracted with your health plan for your benefit plan, the fee provision used to price the line displays in the text box. Both base and wrap plans. |
| Pre-Denial Allowed Amounts | <p>Displays the amount the insurance would have paid before denying the claim. The amount is based on the pricing details on the supplier contract.</p> <p>For example, if a claim was denied due to a missing authorization or exceeding the service limit, the amount the insurance would have paid displays in the Pre-Denial Allowed Amount field.</p> |
| Calculation Method | <p>Displays the Calculation Method based on the claim line's Base Fee. For example when the Base Fee applied a "per calendar month" rate, the Calculation Method will be set to "Per Interval".</p> <p>Other examples of Calculation Methods are as follows:</p> <ul style="list-style-type: none"> ■ Percent Billed ■ Per Unit ■ Per Diem ■ Benefit Interval |
| Pricing Label | Displays the pricing label defined in the base fee. |

Fee Calculation Details

| Field | Description |
|---|--|
| Fee | The calculated Fee based on the entered details. |
| Comments | User comments. |
| RBRVS Section - Describes the resource-based relative value scale pricing schedule. | |
| Schedule | Medicare RBRVS fee schedule name. |
| ZIP code | Associated ZIP code. |

| Field | Description |
|-------------------|---|
| Work RVU | The Work relative value units (RVUs) used in the calculation to determine the Allowed Amount. RVUs are essentially a weighted value assigned to each CPT code. |
| Practice RVU | The practice relative value units (RVUs) used in the calculation to determine the Allowed Amount. RVUs are essentially a weighted value assigned to each CPT code. |
| Malpractice RVU | The malpractice relative value units (RVUs) used in the calculation to determine the Allowed Amount. RVUs are essentially a weighted value assigned to each CPT code. |
| Conversion Factor | The conversion factor used to convert the relative value units into actual dollar amounts. |
| Facility | The facility where services are provided. The Facility pricing amount generally covers services to inpatients or in a hospital outpatient clinic setting, but can include other settings. |
| Work GPCI | The work Geographic Practice Cost Index (GPCI) used to reflect the variations in the cost of providing services between different geographic areas. |
| Practice GPCI | The practice Geographic Practice Cost Index (GPCI) used to reflect the variations in the cost of providing services between different geographic areas. |
| Malpractice GPCI | The malpractice Geographic Practice Cost Index (GPCI) used to reflect the variations in the cost of providing services between different geographic areas. |
| Budget Adjuster | The "budget neutral" applied to the RBRVS pricing schedule. |

Reference Fee Details

If a "Reference Schedule" Provision is present in the benefit plan component used to adjudicate the line, the following reference fee fields are displayed (see the *HealthRules Designer User Guide, Vol. 2: Products and Benefits*.)

| Field | Description |
|-------------------------|---|
| Reference Fee Provision | HealthRules Language for the "Reference Fee" provision used to price the claim. |
| Calculated Fee | Displays the Calculated Fee. This amount is the price calculated using the appropriate fee provision in the "Reference Fee Schedule" Provision. For example, if the billed amount is \$100, and the |

| Field | Description |
|-----------------|--|
| | Reference Fee is 80% of the billed amount, the calculated fee amount is \$80. |
| Reference Fee | Displays the Reference Fee. This amount equals the Statistical Fee if the amount is 0 or greater. If the Statistical Fee is negative, the Reference Fee is set to 0. |
| Statistical Fee | Displays the Statistical Fee. This amount equals the Calculated Fee minus Member Responsibility (if the "Reference Schedule" Provision is set to deduct member responsibility). If the provision is not set to deduct member responsibility, the Statistical Fee will be the same as the Calculated Fee. |

Line Details > Alternate Service Pricing Details

▼ Alternate Service Pricing Details

Service

☐ Non Participating Provider☐ Supplier Contracted

Supplier Contract

Fee Component

If the claim line uses an alternate service pricing provision, the section displays pricing details for the alternate service. This includes the service definition, whether or not the provider is non-participating, and whether or not the supplier is contracted. The Supplier Contract and Fee Component is also listed.

Other Discount Details

The Other Discount section displays all discounts applied to the line and includes:

- Other Discount Type
- Discount Applies To
- Other Discount Provision (link)
- Match Related Discount Type (link)
- Calculated Discount Amount
- Discount Percentage
- Discount Amount

Line Details > Reporting Category List

If one or more reporting categories have been defined for this claim line, the following reporting category fields are displayed in this section:

- Category Name
- Category Type
- Category Description

Reporting categories allow you to categorize services on a claim in different ways to meet reporting needs. This allows the claim benefit and contract provisions to be defined specifically for claim adjudication purposes only, rather than defining them for the combination of claim adjudication *and* reporting.

For example, reporting category lists may be created to:

- report on claim lines based on the general ledger account to which the claim matches
- report on claim lines for a specific product for services rendered by the member's PCP
- report on claim lines for a specific product that matches a reporting category with a specified definition

NOTE Clicking on the "Category Type" value's hyperlink still allows you to display the reporting category information as it does today, including the category description. However, the information displayed via the hyperlink is as of the current date, whereas the new Category Description field displays the description that pertained to the category as of the claim line's date of service.

Documentation Requests

You can track requests for supporting documentation using the "Documentation Requests" section on the Claim View/Edit page Lines tab.

This section allows you to enter the following documentation request information at the line level:

- Request Date

- Receipt Date
- Note

You can add multiple documentation requests to a claim line, if needed, by clicking the **Add** link on the Documentation Requests section header for each new documentation request. To delete an existing documentation request from a claim line, click the **Delete** link.

This new section also includes an "Offsets Prompt Pay" checkbox. When this checkbox is selected (the default value), HealthRules Payer will take the documentation request into account when determining whether and how much late claim interest is owed under the "Prompt Pay With Documentation Requests" interest calculation method. If the checkbox is not selected, or if a different interest calculation method is being used, the system will ignore the documentation request when calculating interest, as if the documentation request was not present. This provides users with a way to manually "bypass" a documentation request during interest calculation without deleting the documentation request information if prompt pay regulations or other circumstances prohibit the health plan from offsetting late claim interest with a particular documentation request.

NOTE You cannot enter or edit documentation request information on replaced lines or split lines. You can only add or edit documentation request information on original, "un-split" lines. When an original "un-split" line has one or more documentation requests, and the line is subsequently split, the documentation request information is copied from the original lines to the split lines.

Claim Notes

| Claim Notes | | Add |

| Claim Note - DGN | Migraine without aura | Delete |
| Note Type
DGN | Diagnosis Description | |
| Note
Migraine without aura | | |

The Claim Notes and Claim Lines Notes sections displays claim and line-level notes submitted via professional and institutional Electronic Data Interchange (EDI) claim transactions. The section shows a summary of all notes that includes the note code type and the first 120 characters of the note text. You can point to the note summary to view the note text and also click the note summary to see the short description associated with the note type code and the entire note.

If the supplier invoice was submitted with an invalid note code, the Note Type field on the consolidated claim is left blank and displays an input exception message. You can click the input exception message to view the claim note or line note and edit as needed.

You can also click **Add** to enter a new note, if necessary. The note text has a 1000 character limit and must be available if a note code type is selected.

Note: If you want to send claims with invalid note type codes to review and repair, you can turn on the Claim Note Code Validation and the Claim Line Note Code Validation policies under the Claim or ClaimLine document types.

Claim Line Fees

On Professional, Institutional and Dental (ADA 2012 and ADA 2002) claim forms, you can add Claim line fees information. This section lists claims line fees by Fee Type.

Fee Types are user-defined code entries. Some examples might include: Access Fee, AEA Fee, or State Surcharge. Information includes fee type, and amount and/or percentage, as applicable.

You add, edit or delete this information when editing claims or adjusting financials.

The fee amount may be entered as a positive or negative value. A negative fee amount displays in parentheses, such as (\$25).

| Participating Provider | The provider is participating with the delegated entity for this benefit plan, this checkbox is selected. |
| Benefit Tier Type | Indicates if the claim line is being processed as "In-Network" or "Out-of-Network". |
| Paid Date | The delegated claim line paid date. |
| Member Responsibility | The delegated claim line member responsibility amount. |
| Paid Amount | The delegated claim line paid amount. |
| Allowed Amount | The delegated claim line allowed amount. |
| Non-Covered Amount | Total amount not covered on the delegated claim line. |
| Message Codes | |
| Message Code | The message code for the message. |
| Input Message Code | The delegated claim line input code. |
| Quantity | The quantity associated with the delegated claim line. |
| Description | The message code description. |
| Group Code | The delegated claim line group code. |
| Amount | The amount of the delegated claim line. |

External System Limits

This section lists the External System Limits. Some kinds of external system claims will display DME services in this section. The Limit Amount and Limit Qualifier fields display limits on how much will be paid for the service billed on the claim line. These limits are for either institutional or professional claims. Limits can be in the form of amounts, units, or days.

NOTE HealthRules accepts limits in days, not months. Prior to loading a limit in months, you should take steps to convert the information from months to days, for example via Biztalk, or a similar service.

NOTE If you only want External System Limits to apply to DME, but you are also processing claims that have external limits for any other codes, you must open the claim for edit and remove the codes if you don't want external limits applied. Otherwise, they will be processed like they are for DME.

External System Message Codes

This section displays external system message codes. For some types of external system claims, these are message codes received from an external system that communicates information about how the claim was adjudicated.

Line Details > Line Pointers

When a claim has been processed using an external claim editor, such as ClaimsXten, this section displays information about the source claim line, destination claim lines, and/or supporting claim lines that were involved during processing.

Source lines are the original claim line that was edited. Supporting lines are the lines created as result of an external edit.

Information includes the Claim ID, Claim Line and Case ID for both source and supporting lines.

For example, a claim is sent to the external claim editor. It is returned with an "Expand Quantity " rule acronym case where the claim is split into a number of lines. In this case, the Source is the original claim line, and the Supporting lines are the new claim lines that were created.

The Summary tab displays a summary of the most useful claim information to help you quickly answer information about a claim. This tab is available on both the Claim View and Claim Edit pages.

If the claim has financial activity it will be displayed first in the summary. Information in the Financials section always shows as of the current day - it will be the same when viewed on the summary tab for each version of the claim. If the claim is in review, then the exceptions on the claim are displayed. If some or all of the claim lines have been denied, the denial reasons and dollars are displayed.

When editing a claim, if you click **Preview Results**, the adjudication information on the Claim Summary tab will be updated with any changes made during the edit session.

NOTE If there is more than one payee in the history of the claim, the amounts in the box with "Amount Paid to Date" will not be displayed - you can navigate to the Financial History tab to understand the payment history.

Fields and Commands

| Field | Description |
|--------------------|---|
| Financials section | |
| Payment Date | The payment date and time of the most recent payment on the claim. No date/time displays when payment is outstanding. |

| Field | Description |
|---|--|
| Transaction Date | Transaction date and time. |
| Payment No. | Payment number. |
| Transaction No. | Transaction number. Click the linked number to display the associated Claim Payment View page. Field is empty when payment is outstanding. |
| Payment Status | Current payment status, such as Issued or Not Issued. |
| Total Pmt Amount | Total Payment Amount |
| Net Claim Paid | The sum of claim payables on the payment. |
| Net Int. / Discount Paid | <p>Sum of interest/discount payables on the payment. Discounts display as negative values in parentheses, such as (\$20).</p> <p>If a penalty has been defined through the "Claims Payment Interest Calculation" provision in HealthRules Designer, this field may display one of the following, depending on the defined penalty method:</p> <ul style="list-style-type: none"> ▪ The penalty amount ▪ The total interest or penalty amount, whichever is higher ▪ A combined amount of the interest plus the penalty. |
| Payee | Name of the claims payee. |
| Paid to Address | Paid to address. |
| Adjusted | A selected checkbox indicates that an adjustment has been made on the claim. |
| Amounts Paid section - These amounts display if there is only <u>one</u> payee in the claim's history. If there are multiple payees, no information is displayed in these fields and you will need to open the Financial History tab for additional information. | |
| Amount Paid to Date | <p>Amount of money, both claim and interest, already paid out to the payee (includes withholds). This is money where the check has been finalized including with a future date. Receivables created and either not yet recouped or recouped will be deducted from this amount. Does not include voided/stopped payments.</p> |
| Claim Amount | Total of claims payables included on the payment. This amount includes amounts withheld as part of a withhold arrangement. |

| Field | Description |
|---|---|
| Interest Amount | Amount of interest on the claim. |
| Outstanding Payments | All payments not yet included in a finalized payment. |
| Voided / Stopped Payment Amount | Dollar amount associated with void or stopped payment. |
| Member Information section - The information in this section is specific to the version of the claim you are viewing. | |
| Member | Member name. |
| Birth Date | Member's birth date. |
| Relationship | Relationship to subscriber. |
| Member ID | Member ID. |
| Gender | Member gender. |
| Account | Account to which member is assigned. |
| Supplier/Provider Information section - The information in this section is specific to the version of the claim you are viewing. | |
| Supplier | Supplier name. |
| Location | Supplier location. |

|--|--|
| Submitted Totals | |
| Submitted Charges | Submitted total charges at the time of claim submission |
| Member Paid to Provider | The amount the member paid the provider at the time of service. |
| Claim Totals | |
| Total amounts for the claim are displayed in this tab. If there is both a base plan and a wrap-around plan, the sum of the total amounts from each plan are displayed in this tab. | |
| Billed Amount | Total billed amount of all claim lines charges. |
| Allowed Amount | Total allowed amount of all claim lines. |
| Provider Penalty | Total of provider penalties for all claim lines. |
| Interest/Discount Paid | Total of all interest paid or all discounts taken for all claim lines. Displays only if interest has been paid, or discount applied for this |

| Field | Description |
|----------------------------|--|
| | claim. Discounts display as a negative value, for example (\$25.00). |
| HCC Amount | The total amount that the healthcare company owes for the claim. For capitated claims, it represents what would have been paid for the claim if it was not capitated. |
| Paid Amount | This fields value is equal to the amount actually paid by the health plan to the supplier for the service. If the service on claim is capitated, the Paid Amount is zero. |
| Member Amount | Total amount the member owes for the claim. |
| Member Paid Amount | Total amount paid by the member accounts, such as HSA. |
| Sales Tax Amount | Total sales tax applied on the claim from all claim lines. |
| Member Paid to Provider | Total amount paid by the member to the provider as indicated on the original claim. |
| Rollover Benefit | The member rollover benefit amount for limits applied to the claim |
| Threshold Rollover Benefit | The amount from the Rollover Benefit Account that has been added to the member's member responsibility threshold for the defined benefit period. |
| Total MRT Amount | Displays the total member responsibility threshold amount on the claim. Field will display "\$0.00" if no value is applicable. |
| Total MRT Units | Displays the total member responsibility threshold units on the claim. Field will display "0" if no value is applicable. |
| Other Discount | Shows the sum of all discounts applied to the claims payment after all other calculations have taken place. |
| Amount Pre Lesser Than | <p>HealthRules Payer supports supplier contracts that evaluate the aggregated billed and the aggregated allowed (contracted) amount of all the claim lines on the claim, and pay the whole claim at the lesser of the two amounts.</p> <p>This field shows the amount the claim would have paid without the "lesser of" rule in the supplier contract.</p> |
| Calculated Reference Fee | Total of all calculated line level reference fee amounts on the claim. The calculated reference fee is calculated from the Reference Fee Schedule benefit plan (or benefit plan component) provision. |
| Reference Fee | Total of all line level reference fee amounts on the claim. Note that the reference fees is the calculated reference fee minus member responsibility if configured to be reduced, and if not configured to |

| Field | Description |
|--|--|
| | be reduced, will be same as the calculated reference fee. The reference fee can never be negative. If provision results in a negative reference fee, it will be set to zero. |
| Reference Fee Differential | <p>Total of all line level reference fee differential amounts on the claim. The reference fee differential amount is the difference between the supplier's allowed amount and the reference fee. If reference-based pricing is enabled, and the reference fee is greater than the supplier's allowed amount, the system will cap the reference fee at the supplier's allowed amount.</p> <p>For more information about reference fees and reference-based pricing, see the <i>HealthRules Designer Guide, Vol. 4: Operating Provision Reference</i>, "Reference Schedule" provision.</p> |
| Plan Totals <p>If there is a wrap-around plan, a base plan section and a wrap-around plan section are also displayed. These sections give the separate totals for the base plan and wrap-around plan.</p> | |
| Deductible | Total deductible amount for all claim line. |
| Co-Payment | Co-payment amount for the plan. |
| Co-Insurance | Co-insurance amount for the plan. |
| Member Penalty | Total of member penalties for all claim lines. |
| Capped Non-Covered | This value is the difference between the allowed amount for the service billed and the allowed amount for the service up to which the healthcare company can pay. (Base plan only) |
| Interest/Discount Paid | Total of all interest or discount paid for all claim lines. Displays only if interest has been paid, or discount applied for this claim. Discounts display as a negative value, for example (\$25.00). |
| HCC Amount | The total amount that the healthcare company owes for the claim. For capitated claims, it represents what would have been paid for the claim if it was not capitated. |
| Paid Amount | This fields value is equal to the amount actually paid by the health plan to the supplier for the service. If the service on claim is capitated, the Paid Amount is zero. |
| Member Amount | Total amount the member owes for the claim. |
| Member Reserve Used | Total amount deducted from the member care reserve for this claim and plan. |

| Field | Description |
|--|---|
| Non-Covered Amount | Total amount not covered on the claim. Base plan only. |
| Balance Billed Amount | Shows the difference between Billed Amount and Allowed Amount that the member has to pay to the provider. Base plan only. |
| Sales Tax Amount | The sum of all sales tax amounts on all lines within the plan (base plan or wrap-around plan). |
| Wrap Around Plan | If a wrap-around plan is attached to the base plan, the wrap-around plan name is displayed. Click on the link to display the wrap-around plan. Wrap-around plan only. |
| Note: If a "Reference Schedule" provision is present in the benefit plan component used to adjudicate the line, the following reference fee fields are displayed. | |
| Calculated Reference Fee | This is the claim Calculated Reference Fee amount calculated using the appropriate fee provision from the "Reference Schedule" provision in the benefit plan component. |
| Reference Fee | <p>The Reference Fee is the Calculated Reference Fee minus the member responsibility (if the provision is set to deduct member responsibility).</p> <p>If the Calculated Reference Fee minus member responsibility yields a negative amount, the reference fee is set to zero. If the "Reference Fee Schedule" provision is not set to deduct member responsibility, the Reference Fee will equal the Calculated Reference Fee.</p> |
| Note: If a "Claim Bonuses" provision is present in the benefit plan component used to adjudicate the line, the following field is displayed. | |
| Bonus Amount | This amount is the total of all bonuses applied to each claim line. This bonus amount is added to the HCC Amount. |
| Qualifying Payment Amount | Displays the total Qualifying Payment Amount (QPA) from all claim lines. QPA is the insurer's median contracted rate. This is generally the median contracted rate recognized by the plan or issuer for the same or a similar item or service by a similar provider in the same geographic region. The QPA helps determine the patient cost-sharing in a surprise billing situation. |
| Savings and Fees | |
| Captures all external fees on the claim or claim line level. | |
| Post Pay Rec. Savings | The total amount recovered after the claim has been finalized. |

| Field | Description |
|-----------------------|--|
| Reference Fee Savings | The difference between the total Reference Fee on the current and the previous non post pay versions of the claim.

Note: The amount in the Reference Fee Savings field populates when the concerned benefit plan component is set up with a Reference Fee provision. |
| Claim Fees | |
| Fee Type | This indicates the type of fee that is collected from the claim. These values are configured in HealthRules Designer and generally indicate who is owed money. |
| Fee Amount | This indicates the amount of money that is due to the member or provider. |
| Fee Percentage | This value is the percentage of the cost that was recovered. |

External System Information Tab

The external system information tab summarizes much of the external system claim data found in the claim header and lines. This tab is available on both the Edit Claim and Claim View pages. In Edit mode, you can make changes to any of the attributes displayed in the tab.

The name of this tab is based on a user-defined code entry that describes an external system, such as "Pharmacy."

NOTE The external system information tab must be enabled in HealthRules Designer via the External System Claim Source definition. For more information see the HealthRules Designer document "Setting the HCC External System Claim Source Definition."

Fields and Commands

| Field | Description |
|---------------------|---|
| External Claim ID | This is the claim number from the external system. For some types of external system claims, this might be labeled SCCF#. |
| Submitted ID Prefix | This field captures the ID Prefix. Not available on Dental claims. The ID prefix is a claim-level attribute.

Optionally, the ID Prefix field can be used to match to an ID prefix in the member's benefit plan selection (see "Denying a Claim when an Invalid |

| Field | Description |
|--|---|
| | Member ID Prefix was Submitted on the Claim" on page 2-96). |
| External Cross Ref Claim ID | This is a reference to an external system claim number. For some types of external system claims this represents the Cross Reference SCCF #. |
| Local Plan Code | This the health plan identifier for where the claim was submitted by the provider. Not available on Dental claims. |
| Submitted Supplier Information Section | |
| Supplier ID. | This is the provider ID |
| Claim Fees | |
| Fee Type | The user defined code entry that defines the type of fee, such as AEA, Access Fee and State Surcharge. |
| Fee Amount | The fee dollar amount. |
| Fee Percentage | The fee percentage. |
| Lines | |
| Manual Override Section | |
| Benefit Tier Type | Indicates if the claim is being processed in-net work or out-of-network. If a value is not set the system will determine whether the service is in network or out of network. |
| Member Responsibility Type | Indicates if balance billing is allowed or not on the claim. The values are Billed Amount of Allowed Amount. If left blank, the system will determine if balance billing should be allowed. |
| Submitted Rendering Practitioner Information section (Professional Claim only) | |
| First Name | First name of the rendering provider. |
| Last Name | Last name of the rendering provider. |
| NPI | The National Provider Identifier specified for this rendering provider. |
| Specialty | The specialty of the rendering practitioner. |
| Claim Line Fees | |
| Fee Type | The claim line fee type, a user-defined code entry, such as AEA, Access Fee and State Surcharge. |
| Fee Amount | The claim line fee amount. |
| Fee Percentage | The claim line fee percentage. |
| External System Limits | |
| Limit Type | The type of limit, such as amount, units or days. |

| Field | Description |
|--------------------------------|--|
| Amount | The limit amount that will be paid for the service billed on the claim line. |
| External System, Message Codes | |
| Message Code | The external system message code(s). |
| Commands | |
| Add command | Click this command to add an other item to the applicable section. |
| Delete command | Click this command to delete the currently selected item in a section. |

| 1 | | | Pay As Primary |

Attachments

The COB (Coordination of Benefits) tabs display claim and line-level COB information including COB payments and adjustments submitted for the claim by other insurance carriers. The tab also displays COB information related to Orthodontia, when available. The information on the tab may originate from one or more EOBs entered as attachments on a new claim form or entered on the claim header or claim line. The top of the tab displays amounts used for adjudication and the bottom of the tab displays the submitted amounts.

The tab also allows you to override the information and manually allocate to each claim line the dollar amounts to use for COB claim adjudication that will properly reflect the net effect of prior payments and adjustments made by all other carriers. Any changes to the information automatically update in the appropriate claim header or claim line sections. You can click **Preview Results** or **Submit** to view the manually adjusted amounts.

NOTE When COB amounts come in at the COB claim level and are automatically distributed equally among COB claim lines, the **COB Amounts Distributed** checkbox is selected. However, if you update the values, the checkbox will be cleared.

Fields and Commands

| Field | Description |
|--|---|
| Other Insurance Payments (Used for adjudication) section - This section lists the payment details from the Other Insurance Payments section on the claim that can be used for COB claim adjudication. You can click to view claim line information. | |
| Line # | The number of the claim line that pertains to this row of Other Insurance payment and adjustment information. Click the Plus icon to display claim line details. |
| Paid | The amount the other insurance paid on the claim line. |
| Co-Pay | The co-payment on the claim line. |
| Co-Insurance | The co-insurance amount on the claim line. |
| Deductible | The deductible amount on the claim line. |
| Billed | The billed amount on the claim line. |
| Allowed | The allowed amount on the claim line. |
| Discount | The discount amount on the claim line. |
| Member Penalty | The member penalty amount on the claim line. |
| Member Responsibility | The member responsibility amount on the claim line. |
| Provider Penalty | The provider penalty amount on the claim line. |
| Non-Covered | The other insurance non-covered amount on the claim line. |
| Per Day Limit | The other insurance per-day limit amount for the claim line. |
| Tax Amount | The other insurance tax amount on the claim line. |
| Other Insurance Payments - Claim Line Details - This section displays when you click the Plus icon next to the claim line. | |
| Start Date | Claim line start date. |
| End Date | Claim line end date. |
| Rev. Code | The specified revenue code. |
| CPT/HCPCS | The CPT or HCPCS code describing the service provided. |
| Billed Amount | The claim line billed amount. |

| Field | Description |
|---|---|
| HCC Amount | The claim line HCC amount. |
| Paid Amount | The claim line paid amount. |
| Member Responsibility | The claim line member responsibility amount. |
| COB Section - This section displays by claim line the COB member and HCC savings based on whether the COB is paid as primary or secondary. You can click each line to see the cost and benefits if paid as primary or secondary. | |
| Line # | The COB claim line number. |
| Member Savings | The member savings on the claim line as a result of the COB. |
| HCC Savings | The Healthcare company savings on the claim line as a result of the COB. |
| Conclusion | Indicate the rule used to determine how the healthcare company (HCC) will price and apply benefits for claim adjudication. The rule is based on the settings configured for the COB provision in HealthRules Designer and can include "Pay Co-pay Coinsurance," "Pay as Primary," and more. |
| COB Line Details - This information displays when you click the Plus icon next to the claim line. | |
| Cost if paid as primary tab - This tab displays the cost to the HCC if the claim line was paid as primary. | |
| Allowed Amount | The maximum amount (before calculating benefits) the plan will pay for the health care service. |
| Penalty Amount | The amount to withhold from the provider. This can be due to reasons such as a payment suspension or when an authorization is not obtained in a timely manner. |
| Stop Loss Amount | The additional amount the health care company will pay the provider after the member meets the deductible and reaches the maximum out-of-pocket amount. This typically applies to high-cost cases that exceed the parameters of a case. |
| Amount Pre Lesser Than | <p>HealthRules Payer supports supplier contracts that evaluate the aggregated billed and the aggregated allowed (contracted) amount of all the claim lines on the claim, and pay the whole claim at the lesser of the two amounts.</p> <p>This field displays the amount the claim line will pay without the "lesser of" rule in the supplier contract.</p> |
| Allocated to First Day | Indicates if the allowed amount is allocated to the first day. For |

| Field | Description |
|--|--|
| | example, for inpatient services, the confinement price for diagnosis-related group (DRG) is typically applied to the first line (first day) of the claim. |
| Benefit results if paid as primary tab - This tab displays the benefits associated with the claim line if the claim line was paid as primary. | |
| Allowed Amount | The amount that the member is responsible for non-participating claims, due to balance billing. This could be in addition to any co-payments, deductibles or co-insurance when using an out-of-network provider or the fee that exceeds the allowable charge for a specific service. |
| HCC Amount | The healthcare company amount based on benefits. |
| Paid Amount | The healthcare company payment amount based on benefits. |
| Non-Covered | The member charge for services not covered by the plan. |
| Member Responsibility | The member responsibility on the claim based on benefits. |
| Co-Payment | The amount the member has to pay up-front before receiving the service. |
| Co-Insurance | The percentage of the claim for which the member is responsible after any applicable co-pays or deductible are satisfied. |
| Deductible | The amount the member has to pay towards the claim before insurance payments begin. |
| Member Penalty | The fee the member has to pay. This can be due to a reason like not following the necessary authorization requirements. |
| <p>COB for Orthodontia Section - This section is similar to the COB section and displays any coordination of benefits for the lines associated with Orthodontia claims. The section also displays the total case fee on the banding claim for the Orthodontia treatment. You can click each line to see the cost and benefits if paid as primary or secondary, including the total HCC amount for case. The total HCC amount for the case is the maximum payment limit for the entire treatment including the banding claim. If reprocessed, the field displays the maximum payment amount available for the remaining months of treatment including the banding claim.</p> <p>Note: For an Orthodontia COB example, see the <i>Working with Orthodontia Claims Guide</i>.</p> | |
| <p>Attachments Section</p> <p>This section lists attachments on a claim. This information can be entered directly through the COB tab in Claims Edit mode or added through the Claim Entry Form on the Attachments tab. This section displays all types of attachments, but is used primarily for</p> | |

| Field | Description |
|--|---|
| Explanation of Benefits (EOBs) associated with the Other Insurance specified on the claim. | |
| Attachment - Explanation of Benefits for [Name] section | |
| Attachment Type | Explanation of Benefits |
| Transmission Type | Indicates the method by which the attachment was sent to the health care company. |
| Comment | Descriptive comments about the attachment. |
| Company sub-section | |
| EOB Date | The date of the EOB. |
| Payer Priority | The priority of this other payer (insurance carrier) in the context of COB processing, such as primary, secondary, etc. |
| Claims ID | This other payer's claim ID for this claim. |
| Other Insured ID | This is the ID of the other carrier associated with the claim. |
| Subscriber sub-section | |
| First, Last, Middle | The name of the subscriber who holds the health insurance policy associated with this other payer. |
| Company - [Company Name] section | |
| Company Name | Name of the COB company associated with the EOB. |
| Group Number | The company's group plan number. |
| Insurance Type | The insurance type, such as medical or dental. |
| Group Name | The company's group plan name. |
| Message Codes sub-section | |
| Message Code | The user-defined message code. |
| Description | The message code description. |
| Group Code | The claim adjustment group code. |
| Amount | The amount of the adjustment. |
| Quantity | If applicable, the quantity associated with the adjustment. |
| Submitted Other Insurance Payments (Claim Level Totals) sub-section | |
| Paid | Total paid by this other payer for the claim. |
| Co-Pay | Total co-pay amount reported by the other payer on the EOB for the claim. |
| Co-Insurance | Total co-insurance amount paid by other insurance on the claim. |

| Field | Description |
|--|---|
| Deductible | Total deductible amount paid by other insurance on the claim. |
| Billed | Total amount billed on the claim. |
| Allowed | Total allowed amount on the claim. |
| Discount | Total discount amount on the claim |
| Member Penalty | Total member penalty amount on the claim |
| Member Responsibility | Total member responsibility amount on the claim |
| Provider Penalty | Total provider penalty amount on the claim |
| Non-Covered | Total non-covered amount on the claim |
| Per Day Limit | The other insurance per-day limit amount on the claim line. |
| Tax Amount | The other insurance tax amount on the claim line. |
| Submitted Other Insurance Payments (Line Level) sub-section | |
| Line # | The claim line number. |
| Paid | The paid amount on the claim line. |
| Co-Pay | The co-pay amount on the claim line. |
| Co-Insurance | The co-insurance amount on the claim line. |
| Deductible | The deductible amount on the claim line. |
| Billed | The billed amount on the claim line. |
| Allowed | The allowed amount on the claim line. |
| Discount | The discount amount on the claim line. |
| Member Penalty | The member penalty on the claim line. |
| Member Responsibility | The member responsibility on the claim line. |
| Provider Penalty | The provider penalty on the claim line. |
| Non-Covered | The total non-covered amount on the claim line. |
| Per Day Limit | The other insurance per-day limit amount on the claim line. |
| Tax Amount | The other insurance tax amount on the claim line. |
| Message Codes | Add user-defined message codes. |
| Delete | Delete line |

Repricer Outputs Tab

The Repricer Outputs tab displays a summarized view of the repricing information for each claim line.

Repricer Outputs

Resend All

| Line # | Allowed Amount | Repricer Decision | Request Datte | Response D | Benefit Network | Repricer | Resend | |
|------------|----------------|-------------------|---------------|------------|-----------------|------------|-------------|--------------------|
| 1 | | | | | | | | |
| Start Date | End Date | Rev. Code | CPT/HCPCS | Amount | Paid Amount | HCC Amount | Paid Amount | Member Responsibil |
| 3/6/2025 | 3/6/2025 | 0310 | 99203 | | \$85. | \$85.00 | \$85.00 | \$85.00 |

View Mode

For each line the allowed amount, repricer decision, request and response dates, and more are displayed. In View mode, this information cannot be changed.

For additional information on a claim line, click the expand line control [+]. Claim line information includes the Start/End date, Rev. Code, CPT/HCPCS codes, Billed Amount, HCC Amount Paid Amount and Member Responsibility.

Edit Mode

When you are editing a claim, you can change the repricing information directly on this tab.

You can enter or change the allowed amount, select a different repricer decision, change the request and response dates, and select the associated benefit network and repricer.

When entering the Response Date, you can click the **Now** control to enter the current date and time in the field.

Response Date

04/21/2025 04:51:50 PM

Now

Optionally, you can open the Line tab and make changes to the Repricer Outputs section for a the specific claim line. Any changes you make in that section will automatically be updated in the Repricer Outputs tab.

Resending Claim Lines to the Repricer

If you change repricing information and click **Preview Results**, the Claim Repricing Warning dialog is displayed.

Click **Yes** to enable the line(s) for repricing. When enabled for resending to the repricer, the Resend control () is displayed in the Resend column, and the **Resend All** button is displayed.

You can:

- Send a specific claim line to the repricer by clicking the resend control ()
- Send all eligible claim lines to the repricer by clicking the **Resend All**.
- Or, when you are done making edits to the claim, when you click **Submit**, any claim lines marked as "Waiting for Repricing" are sent to the repricer.

Copying the Request Date and the Benefit Network

When you are editing a claim line, often the Request Date and the Benefit Network are the same on multiple line items. You can use the copy function to copy either or both the Request Date and the Benefit Network to the other claim lines.

When you click **Copy** you have the following options:

- Copy both the Response Date and the Benefit Network by selecting **Copy All**
- Copy only the value of the Response Date by selecting **Response Date**
- Copy only the value of the Benefit Network by selecting **Benefit Network**
- Select which line items you want to copy the information to, including all of the line items or individual line items. Select the appropriate option, and then click **OK**.

Accumulators Tab

The Accumulators tab is only available when you view a claim. With the Accumulator tab, you have easier access to the information you need to complete a given task without having to open or collapse multiple sections within a claim. The tab shows the accumulators that are directly impacted by the claim for both internal claims users and shared accumulator partners (if defined). You can view the tab when viewing a dental, institutional, professional, and converted claims.

Filters

The following describes the filters that are available for the Accumulators tab.

| Filter | Description |
|-----------------------------|--|
| Service Date | <p>The dates available are based on the type of claim. Institutional claims use the Statement From date and the Statement Through date, if set. If these dates are not set, the earliest Service Start date and the latest Service End dates are used.</p> <p>Professional and dental claims use the earliest Service Date Start date and the latest Service End date.</p> |
| Processed Date | The date that the claim was processed against the benefit plan. The processed date must be after the service date. |
| Unlabeled drop-down list | The drop-down list contains the benefit plans or wrap around plans referenced by the claim during adjudication. |
| Filter by Accumulator Level | Use the drop-down list to filter the accumulators by the associated level. The available options are Family and Individual. |
| Filter by Accumulator Tier | Use the drop-down list to filter the accumulators by the associated tier. The available options are All, In-Network, Out of Network, and Out of Area. |
| Filter by Accumulator Type | Use the drop-down list to filter the accumulators by the associated bound. The available options are Deductible, Limit, Maximum, and Member Responsibility Threshold. |
| Filter by Provision Label | Enter text to filter the accumulators by the associated provision label. You can enter partial strings. HealthRules attempts to match the string entered with a provision label that begins with the same text. |
| Filter by Claim Line | Enter the claim line number to filter which accumulators were applied to the claim line. |
| Member Accumulators | Click this link to view the Member Accumulators screen. |

| Filter | Description |
|--------|---|
| Export | Click this link to export the accumulator information. You can save the accumulator information as a spreadsheet (XLSX or XLS file) or as a CSV file. |

Columns

The following describes the columns that are available on the Accumulators tab.

| Column | Description |
|-----------------|--|
| Effective Date | This column contains the date range of the accumulator that was effective and applied to the claim. |
| Tier | This column contains the benefit tier associated with the bound. |
| Provision Label | This column contains the provision label of the applied accumulator. |
| Level | This column contains the accumulator level that was applied to the line item. |
| Defined | This column contains the defined value of the bound that was applied to the associated claim line. |
| Total Used | <p>This column contains the total amount or number accumulated toward the bound.</p> <p>Note: The logic that calculates the number of service units used for accumulators makes it consistent for both current and historical claim lines as follows:</p> <ul style="list-style-type: none"> ■ For base plans, units are included for claim lines having an allowed amount greater than or equal to \$0 ■ For wrap plans, units are included only for claim lines having an allowed amount greater than (but not equal to) \$0. This is because wrap plan accumulators do not |

| Column | Description |
|--------------------|---|
| | start to accrue until after the base plan's unit limit has been exhausted |
| Used In This Claim | This column contains the amount or number accumulated toward the bound for the associated claim. |
| Remaining | This column contains the amount or number remaining that may be accumulated toward the bound. |
| Provision | This column contains the provision defining the bound and the label. You can click the horizontal dots to view the provision in its entirety. |

Associated Claim Line

The individual accumulators are separated and are in collapsable sections. When you expand the accumulator, you can see the details of the claim line that the accumulator is applied to.

| Columns | Description |
|---------------|---|
| Claim ID | This column contains the ID of the associated claim. Click the link to open the claim. |
| Line # | This column contains the claim line number associated with the accumulator. |
| DOS From | This column contains the start date of the date of service. |
| DOS To | This column contains the end date of the date of service. |
| Service Code | This column contains the service code on the claim line. You can click the service code to view the code and a long description of the service. |
| Revenue Code | This column contains the revenue code on the claim line. You can click the revenue code to view the code and a long description of the revenue. |
| Billed Amount | The column contains the billed amount on |

| Columns | Description |
|--------------|---|
| | the claim line. |
| Contributing | The column contains the amount that contributes to the accumulator. |
| Info | The column contains an information icon. You can click the information icon to view additional information on the claim line. The additional information can include the Claim ID, Line #, DOS From, DOS To, Service Code, Revenue Code, System of Origin, Receipt Date, Processed Date, Supplier, Supplier Location, Rendering Practitioner, Billed Amount, and Contributing Amount.. |

Repricer Claims Charges Tab

Within the claim, if a Repricer has been used AND contract costs have been configured, the Repricer Claim Charges tab displays. The Repricer Claim Charges tab holds charges relating to all versions of a claim. This tab populates as the last step of adjudication.

When you expand the Repricer, two additional tabs display:

- Admin Charges
- Repricer Payment Fees

Admin Charges Tab

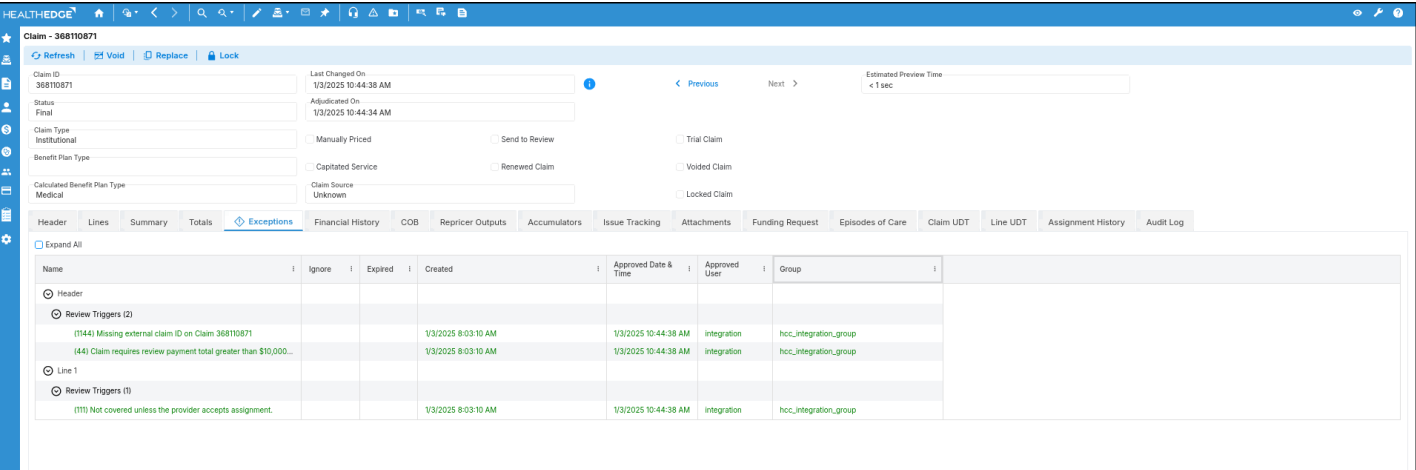

The Admin Charges tab displays the overall savings, showing administrative Total Savings and Total Amount, and the Savings Recognized and Amount for each line. The Savings Recognized of the Account Admin Fee is based on the percentage of savings calculation. For example, if the calculation is 10% of the savings, if the savings is \$35.00, then the fee amount is \$3.50. The Total Amount is the sum of all Fee Amounts for all lines.

Repricer Payment Fees Tab

The Repricer Payment Fees tab displays the individual savings for each line and the Total Savings of all Repricer fees for all lines. It shows the fee amount and the percentage of savings.

The Total Amount of the Repricer Payable Amount is based on the percentage of savings calculation. The Total Amount is the sum of all Fee Amounts for all lines Tab.

Exceptions Tab

If the claim needs Review or Repair, an Exceptions tab shows information about the claim. If review triggers have already been approved for the claim, they appear in green text.

You can select the Expand All checkbox to expand all exceptions and associated details lines.

- **Name**
- **Ignore**
- **Expired**
- **Created**
- **Approved Date & Time:** Displays the date and time when each claim trigger was cleared or approved.
- **Approved User:** Displays the name of the person who cleared the trigger.
- **Group:** Displays the group associated with the user from which the claim was cleared or approved.

Removing a check from the Expand All checkbox minimizes all lines.

Reading the Exceptions Tab

Exceptions can appear in various colors, including:

- Blue = Indicates where the exception is within the claim.
- Red = Indicates Review or Repair Exceptions
- Orange = Indicates Input Exceptions
- Green = Indicates Input Exceptions which have been ignored by the user

Orange colored exceptions imply there was invalid data submitted on the original claim form. The orange color is only used to indicate a warning to the user. The user cannot fix these warnings since they correspond to the claim entry form and not the consolidated claim.

In the example below, there are two input exceptions associated with Line 1. The majority of input exceptions indicates the value entered on the input form.

Also, notice the input exceptions are underlined. You can click the underlined text, and the associated control or section is highlighted in red to indicate the claim fields which need attention.

The majority of time there is a repair exception associated with the input exception so it may save time when repairing a claim to use the links to jump to the error on the claim. Also, notice that the original diagnosis value is not present on the consolidated claim. This implies the server could not 'translate' the input diagnosis code so the value was cleared.

The column next to the exception list is labeled Ignore. You can select the corresponding checkbox in the Ignore column to indicate to ignore the Input exceptions. Once the checkbox is selected, the exception turns green and will stay green the next time this claim is opened (figure below).

| | |
|---|-------------------------------------|
| Line 1 | |
| Repair Exceptions (0) | |
| Input Exceptions (2) | |
| <u>Unknown or duplicate diagnosis in professional claim header (value: ZYW.0)</u> | ☒ |
| Diagnoses | |
| <u>Unknown or duplicate diagnosis in professional claim header (value: ABC.0)</u> | ☒ |
| Warnings (0) | |
| Review Triggers (0) | |

NOTE It is not required or necessary to mark these exceptions as Ignored. The system will always process the claim exactly the same whether you mark these exceptions as ignored or not.

Another thing to note is each Header and Line # section are underlined as well. You can also click the underlined Line # to jump to the specific line of the claim.

Financial History Tab

The Financial History tab shows a transactional/payment view of what happens over the life of the claim as of the current system date.

Header Information

Header information includes the amount paid on the claims to date, any outstanding payments, outstanding receivable amount, the claim amount, fees, and interest or discount amount, and the amount of voided/stopped payments related to the claim, if applicable.

You can display claim history for one selected payee or all payees on the claim payment.

Below the header information you can toggle between the Detail View and the Summary View.

Detail View

The Detail View (the default view) shows payments made, payments in review, received payments (unreported payment received), unreported manual adjustments applied to receivable for the claim, adjustments with a receivable, and amount recouped on that receivable.

NOTE External claims will display no receivable information.

NOTE Predetermination dental claims will display no payable information.

NOTE Rollover text providing field descriptions are available on most fields/columns. Just click your mouse once anywhere within the page, and then hold your cursor over a field to display the text.

About Zero Dollar Payables

When a claim line is adjudicated so that the benefit plan is known, but the line pays \$0 or is denied for some reason (such as an exclusion), a \$0 payable is created. Also, \$0 payables are created when the member is not enrolled so that benefit plan cannot be determined. These \$0 payables are included in the Claims Financial History tab transactions results.

When a Benefit Plan is Changed During Date of Service

When a benefit plan changes during the claim's dates of service, the system will show split payments under the claim for the applicable benefit plans. In addition, the system will create different transactions (payment CVCs) for each payment and the different plans that apply.

For example, the Financial History tab will show two payments split with different transaction IDs when it includes a DOS where a benefit plan change occurs on 1/4/2021:

Claim Lines 1 – 10 under payment (example: 1) DOS: (1/1/2021-1/3/2021)

Claim Lines 11 – 20 under payment (example: 2) DOS: (1/4/2021-1/6/2021)

Fields and Commands

| Field | Description |
|--------------------------------------|--|
| Header and Filter Information | |
| Claims Totals as of | Today's date. |
| Amount paid to date | Amount of money, both claim and interest, already paid out to the payee (includes withholds). This is money where the check has been finalized including with a future date. Receivables created and either not yet recouped or recouped will be deducted from this amount. Does not included voided/stopped payments. |
| Claim | Total of claims payables included on the payment. This amount includes amounts withheld as part of a withhold arrangement. |
| Interest/Discount | <p>Total amount of interest or discount payables on the claim paid to date. Discounts display as a negative value, for example (\$25.00). The interest may be based on the date of service or payment date and is determined based on the configuration under the Interest Provision Based on Date provision.</p> <p>If a penalty has been defined through the "Claims Payment Interest Calculation" provision in HealthRules Designer, this field may display one of the following, depending on the defined penalty method:</p> <ul style="list-style-type: none"> ■ The penalty amount ■ The total interest or penalty amount, whichever is higher ■ A combined amount of the interest plus the penalty. |
| Payee | Defaults to most recent payee. Select another payee from the drop-down list if applicable to see information specific to that |

| Field | Description |
|---|--|
| | payee. |
| Outstanding Payments | All payments not yet included in a finalized payment. |
| Voided/Stopped Payment Amt | Dollar amount associated with voided or stopped payments. |
| Outstanding Receivable Amount | The amount of outstanding receivables for this claim.

Note: External claims will display no receivable information. |
| Detail View Table Columns- Click  Detail View to display the Detail View. | |
|  Summary View | Click to display the Summary View. |
| Payment line | Shows a line of payment/transaction information, including payment date, payment number, whether or not the payment has been issued, transaction number, and the pay to supplier name. |
| View Payment | Click this link to display the Claims Payment View page, which shows details about this payment. For more information, see the "Claims Payment View page" in Vol. 9: Financials. |
| Expanded columns - Click  to expand a line to show column details. | |
| Transaction Date | Date the claim transaction was finalized . |
| Line Number | The claim line number. If a line has been split, for example into three lines from the same claim, it is denoted using the format 1.1, 1.2, 1.3 and so on. |
| Payable Type | Indicates if the payment is for claims or interest. |
| Billed Amount | Billed amount for the claim line. |
| Allowed Amount | Allowed amount defined for the claim line. |
| Claim Paid | The claim paid amount for the claim line. |
| Interest/Discount Paid | Amount of interest paid, discount applied, or penalty amount on the claim line. Discounts display as a negative value, for example (\$25.00). |
| Tier Description | Description assigned to the Day Range used to calculate the interest. |
| Days Late | Number of days used to calculate the interest. Number of days is calculated as follows: Paid Date + Buffer Days - Interest Calculated Based On setting. |
| Withhold Amount | Withhold amount taken from the claim line. |

| Field | Description |
|--|--|
| Interest Withhold Amount | The amount to be paid to the "additional payee" assigned to the interest calculation. |
| Recoupment Amount | The amount of money withheld on this claim line that is applied against an outstanding receivable for the payee and bank account. |
| Reference Fee | The Reference Fee equals the Statistical Reference if 0 or greater (If the Statistical Fee is negative, the Reference Fee amount will be set to 0.) The Reference Fee is also displayed on the the Totals tab, and the Lines Tab Pricing and Pricing Details sections. |
| Calculated Reference Fee | The Calculated Reference Fee is the amount calculated using the appropriate fee provision from the "Reference Schedule" Provision. This is also displayed on the Totals tab, and the Lines Tab Pricing and Pricing Details sections. |
| Statistical Reference Fee | The Statistical Reference Fee equals the Calculated Reference Fee minus Member Responsibility (If provision is set to deduct member responsibility. If not, the Statistical Fee Payable will be the same as the Calculated Fee Payable.) This is also displayed on the Claims View Lines Tab in the Pricing Details section. |
| Receivable Created ID/Amount | <p>When a receivable is created against the claim line, the receivable ID is displayed in this field. Click the linked ID to display additional information about the receivable. The amount of the receivable is also displayed.</p> <p>Note: External claims will display no receivable information.</p> |
| Payable ID | Payable ID for the claim or interest payable. |
| Reissued Payable | Indicates if the payable is from a previously stopped or voided payment that was reissued. |
| Benefit Plan | Benefit Plan against which the claim line was adjudicated. |
| Summary View Information - Click  Summary View to display the Summary View | |
|  Detail View | Click to display the Detail View. |
|  Export | Click to export the summary view details to an xlsx, xls, or csv file. |
| Payment Date | The payment date and time. No date/time displays when payment is outstanding. |
| Transaction Date | Transaction date and time. No date/time displays when |

| Field | Description |
|------------------------------|--|
| | payment is outstanding. |
| Payment No. | The payment number. |
| Transaction No. | Transaction number. Click the linked number to display the associated Claim Payment View page. Field is empty when payment is outstanding. |
| Payment Status | The payment status, such as Issued, Not Issued, or Outstanding. |
| Void/Stopped Date | If voided or stopped payment, shows the date and time. Field is empty when payment is outstanding. |
| Payee Name | Name of the claims payee. |
| Payment Bank Account | The bank account from which the payment was made. Field is empty when payment is outstanding. |
| Net Claim Paid | The sum of claim payables on the payment. |
| Net Interest/Discount | Sum of interest/discount payables on the payment. Discounts display as negative values in parentheses, such as (\$20). |
| Claim Receivables Created | Sum of claim receivables created for the payment. |
| Interest Receivables Created | Sum of interest receivables on the payment. |
| Claim Recouped | Sum of claim recouped amount. |
| Recouped on Received Payment | Sum of claim recouped amount from received payments. |
| Interest Recouped | Sum of interest recouped amount. |

Funding Request Tab

The Funding Request tab displays the details of what funding requests a claim has been reported on over its history.

You can view the claim line details, administrative charges, and external fees related to the funding request by clicking the **Plus** icons.

NOTE When viewing items in the Self-Funding tab, if you paid a claim in error, then paid the correct claim, both claim payments will appear as separate transactions in the results grid, making it look like a claim was paid twice. In this case, the only way to recoup that money is to manually collect it from the recipient of the claim that was paid in error.

Fields and Commands

| Field | Description |
|----------------------------|---|
| Funding Request Tab Fields | |
| Funding Request ID | The funding request ID. Click the link to view the funding request. Click the Plus icon to display Claim Lines and Admin Charges Sub-tabs. |
| Funding Request Date | The creation date of the funding request. |
| Bill To Account | The name of the "bill to" account specified in the Self Funding Payment Cycle. Click the link to view the account. |
| Funding Status | The current status of the funding request reporting this claim. |
| Removed Claim | Indicates if the claim was removed from the funding request. |
| Payment Cycle | The associated payment cycle ID. Click the link the view the payment cycle. |
| Supplier Name | The name of the supplier on the claim. Click the link to view the supplier. |
| Total Amount | The total amount is equal to the sum of claim amount, interest amount, and reference amount. |
| Claim Amount | The amount of all claims in this funding request. |
| Interest Amount | The amount of interest in this funding request. |
| Reference Amount | Total reference amount in this funding request. |
| External Fee Amount | Total external fee amount in this funding request. |
| Claim Lines tab | |
| Line Number | The claim line number. Click the link to view this line on the claim. If admin charges have been set in the benefit plan component, you can click the Plus icon to display administrative charges for this claim line. |
| Line Amount | The amount for the claim line. |
| Interest Amount | The interest billed for the claim line. |

| Field | Description |
|--|--|
| Reference Fee | The total reference fee amount for the claim line. |
| Claim Payor | The claim payer, for example, internal or external. |
| Admin Charges tab | |
| Admin Charge Type | The type of admin charge. |
| Amount | The total amount of admin charges by admin type. |
| Admin Charges Sub-tab | |
| Admin Charge Type | The administrative charge type. |
| Admin Charge Amount | The total of administrative charges on the funding request for the administrative charge type. |
| Total Claim External Fees tab | |
| Fee Type | The type of external fee. |
| Fee Amount | Amount of external fee at the claim level for the specified fee type. |
| Total Claim and Claim Line External Fees tab | |
| Fee Type | The type of external fee. |
| Fee Amount | The total amount of external fees for both claim and claim lines for the fee type. |

Episodes of Care Tab

| | | | | | | | | | |
|---|-----------------------|--------------------|-----------------------|--------------------|-----------------|-------------------------|---------------------|-------------------------|---------------------|
| | | | | | | | | | |
| Episodes of Care | | | | | | | | | |
| Current References | | | | | | | | | |
| Line Number ↑ | Triggering Claim Line | Episode Of Care ID | Definition Name | Active | Manually Added | Service Line Start Date | Earliest Start Date | Triggering Supplier | |
| No Data Found | | | | | | | | | |
| Outdated References | | | | | | | | | |
| ☐ Show Outdated References | | | | | | | | | |
| Line Number ↑ | Related Claim ID | Related Claim Line | Triggering Claim Line | Episode Of Care ID | Definition Name | Active | Manually Added | Service Line Start Date | Earliest Start Date |
| No Data Found | | | | | | | | | |

This Episodes of Care tab lists all episodes of care associated with the claim.

This tab displays the following fields for each claim line associated with an episode of care:

| Field | Description |
|--------------------|-------------|
| Current References | |

| Field | Description |
|--|---|
| This section lists episodes of care currently linked to the claim. | |
| Line Number | The claim line number that either triggered the creation of the episode of care or is included in the episode of care. |
| Triggering Claim Line | <p>If the claim line triggered the creation of the episode of care the Triggering Claim Line checkbox is selected.</p> <p>If the claim line was included in an existing episode of care the Triggering Claim checkbox is cleared.</p> |
| Episode of Care ID | <p>The ID number of the episode of care associated with the claim line.</p> <p>You can click through to the Member Episode of Care tab to view episode of care details by clicking the Episode of Care ID.</p> |
| Definition Name | <p>The Definition Name of the episode of care definition used to create the episode of care.</p> <p>You can click through to the Episode of Care definition in HealthRules Designer by clicking the Definition Name.</p> |
| Active | <p>The status of the episode of care for the line. If the status is "Active," "Yes" is displayed. If the episode of care is not active, "No" is displayed.</p> <p>Episodes of care may become inactive for a variety of reasons. For example, if a claim is edited by correcting a service code that was a triggering service, the system would make the episode of care inactive. Another example may have to do with the timing of incoming claims. If there were two episodes of care separated by, say six months, and another claim comes in for the middle of that period, it could mean that all the claims should be included in the first episode of care. The system would deactivate the second episode of care, and link all the claims to the first episode of care.</p> |

| Field | Description |
|---|---|
| Service Line Start Date | The latest service start date for the specified claim line is displayed in this field. |
| Earliest Start Date | The earliest service start date when the episode of care was created. |
| Outdated References

To display outdated episode of care reference for the current claim, click the Show Outdated References checkbox. This section lists episodes of care that were linked to the claim in the past but are no longer linked because of subsequent editing and/or reprocessing. | |
| Line Number | The line number from the current claim for which the corresponding outdated references are shown. |
| Related Claim ID | The claim number of the claim the corresponding episode of care originated from. This field only contains a claim ID different from the current claim when it references the triggering claim and the current claim was referenced through an included service. |
| Related Claim Line | The related claim line number from the related claim (see above). |
| Triggering Claim Line | If the referenced claim line number of the current claim (displayed in column 1) is referenced through a triggering service, this checkbox is selected. If not, it is cleared. |
| Episode of Care ID | The ID of the instantiated episode of care referenced. |
| Definition Name | The name of the episode of care definition from which the instantiated episode of care was created. |
| Active | If the instantiated episode of care is active, "Yes" is displayed in this field. If the episode of care is not active, "No" is displayed. |
| Service Line Start Date | The claim line service start date. Note that this is the service start date of the line number of the current claim referenced in column 1. |
| Earliest Start Date | The earliest start date for the referenced |

| Field | Description |
|-----------------------------|--|
| | episode of care. If the episode of care has been terminated, the date is reset to 01/01/1900. |
| Endorsement Effective Date | The endorsement effective date and time of the referenced episode of care. This is the date and time the episode of care reference became active. |
| Endorsement Expiration Date | The endorsement expiration date and time of the referenced episode of care. This is the date and time the episode of care reference became outdated. |

Issue Tracking Tab

The Issue Tracking tab lists issues that have been filed relating to the claim. Information includes the Issue Type such as Account, member or provider, the owner of the issue, the group to which the issue is assigned, status, the date entered, and more.

| | | | | | | | | | | | |
|-------------------------|------------|-------|-----------------|-------------------|--------|---------|--------------|--------|----------|--------------|--|
| Issue Tracking | | | | | | | | | | | |
| Issues Related To Claim | | | | | | | | | | | |
| Issue ID ↑ | Issue Type | Owner | Owner Full Name | Assigned To Group | Status | Summary | Date Entered | Medium | Priority | Last Updated | |
| No Data Found | | | | | | | | | | | |

Claim Attachments Tab

| | | | | | | | | | | | |
|--|------|-------------|----------------|------|-----------------|----------------|-------------|------|--|--|--|
| Attachments | | | | | | | | | | | |
| Add Attachments | | | | | | | | | | | |
| Add | | | | | | | | | | | |
| View and Edit Attachments | | | | | | | | | | | |
| ☒ Show Only Active Attachments | | | | | | | | | | | |
| File Name | Link | Description | Classification | User | External Ref. # | Date Entered ↓ | Deactivated | Edit | | | |
| Click the 'Add Attachment' button to add an attachment | | | | | | | | | | | |

You can use the Attachments tab to attach supplementary documents to a claim, such as admission summaries, diagnostic reports, payment receipts, Electronic Data Interchange (EDI) transactions, and so forth.

NOTE EOB (Explanation of Benefits) attachments must be added directly to the COB tab on the Claim View page.

About EDI Attachments

On the Consolidated Claim form on the Attachments tab, you can view, but not edit, certain attachments, such as electronic claims from EDI transactions. You must have Claim Processing View and Attachment View permission to view EDI attachments. If you have the proper permissions and the claim was created through an 837 EDI transaction, you will see a link for [EDI837.xml](#). If you click this link, the EDI 837 Health Care Claim displays in Internet Explorer. If Internet Explorer is not installed and there is no file association for XML files, you are asked to save the file to disk.

If a claim goes through a Repricer that sends back the claim in the form of an 837, multiple attachment links may display. One attachment, classified as Original EDI 837, is the attachment for the original claim. The second attachment, classified as EDI 837 from Repricer, contains claim data after the claim is repriced. If there are multiple Repricers, you receive a Repriced 837 EDI for each claim line repriced by a different Repricer.

Adding Documents Manually

On the Attachments tab you can manually add documents with the following classifications:

- Benefit Plan Summary Document
- Claim
- Enrollment
- Financial

NOTE You cannot manually add an EDI 837 or EDI Repricer 837 attachment. These attachment types are only created through electronic interfaces.

About External Claims Editing Request and Response Attachments

If your system is configured to capture the requests and/or responses for a specific claim to and/or from an external claims editing system (ClaimsXten™ (CXT) or Claims Edit System (CES) or Source).

Chapter 3: Claims Screens

The requests and/or responses for the specific claim can be viewed from the HealthRules Manager Claims View Page Attachment tab. This feature is useful for anyone testing or viewing recommendations from CXT or CES or Source.

Note the following:

- Each time a claim is processed, the new request/response will be attached to the claim. The attachments are not associated with a specific claim version.
- Users with appropriate permissions can globally enable or disable the capture of CXT/CES/Source requests & responses (that is, overall for the entire system, not on a per-user, or per-group, basis).
- If request/response capturing was enabled but is then disabled, any requests and responses captured on already-processed claims (attachments), are left as-is (that is, they are not discarded).
- The XML file attachments are named with the claim number and the claim editor type. For example, "026399386.X10.xml".
- The External Ref. # displayed on the Attachment tab corresponds to the icClaimSetID embedded in the response xml file.

For more about enabling the trace feature, see the *HealthRules Payer Tracing Guide*.

Audit Log Tab

The Audit Log tab shows summary information for any changes made to the particular claim along with any comments associated with that change. An entry is also made every time the claim is viewed. You can hide view-only entries by selecting the Hide View Entry checkbox.

NOTE When changes are made to claim entities or fields via the Manual Override process, a "+" icon will appear next to the relevant records within the Claims Audit Log tab. This icon is visible only when the runtime property `ALLOW_CLAIM_FIELD_UPDATE_LOG` is set to true. Clicking the "+" icon expands the screen showing the additional information:

- **User Action:** The action performed by the user, such as Change Override (CO) Add Override (AO) Remove Override (RO)
- **Line Number:** The line number where the manual override was applied.
- **Field Name:** The name of the updated field, such as "Practitioner" or "Copay."
- **Old Value:** The previous value of the field before the override.
- **New Value:** The updated value of the field after the override.

Line UDT Tab

User Defined Term (UDT) is a mechanism for adding non-standard data to the information model.

The Line UDT tab allows you to set the attribute values for the pre-defined UDTs on the claim lines.

NOTE The UDTs in the Line UDT tab are based on the UDTs defined under the Claim Line User Defined Term definition for the Health Care Company in HealthRules Designer.

You can click the **Plus** icon next to the line to view the available UDTs. You must enter the values for all attributes flagged as required under the Required column to submit or save the claim. The Valid Claim Line UDT policy helps validate claim line UDT values.

You can also set the default tree view in the UDT tab by selecting the Collapse UDTs checkbox to hide all or clear the checkbox to display all UDT attributes. The checkbox setting is preserved and displays the UDT tree in the selected view the next time you log on. You can also click the **Caret Up** or **Caret Down** icons in front of the UDT to display or hide attributes as needed. However, the expand or collapse view on a specific UDT is not preserved and reverts to the view setting associated with the checkbox.

Two validation policies ensure that valid values are entered on the claim line UDTs. The two policies include:

- Valid Claim Line UDT policy - This policy validates claim line UDT values.
- Invalid Claim Line UDT Input policy - This policy checks the HealthRules Payer web service to ensure that claim line UDTs defined in Connector have UDT and attribute names that match the ClaimLine UDT definition in HealthRules Designer.

NOTE Currently, claim line UDT information cannot be included in a service definition.

Claims UDT Tab

A *User Defined Term (UDT)* is a mechanism for adding non-standard data to the information model. UDTs can be used throughout the application without the need for custom programming. UDTs are available only if defined in HealthRules Designer for the Health Care Company by your System Administrator.

The **UDT** tab allows you to set the attribute values for the predefined UDTs when creating, editing and viewing the entity. You must enter the mandatory attribute values that are flagged as required to save the entity.

You can also set the default tree view in the **UDT** tab by selecting the **Collapse UDTs** checkbox to hide all or clear the checkbox to display all UDT attributes. The checkbox setting is preserved and displays the UDT tree in the selected view the next time you log on. You can also click the **Caret Up** or **Caret Down** icons in front of the UDT to display or hide attributes as needed. However, the expand or collapse view on a specific UDT is not preserved and reverts to the view setting associated with the checkbox.

NOTE You can also set the tree view for the entity via the **Program Preferences** dialog. The view setting in one location automatically updates the UDT tree view setting in all other locations for the entity.

NOTE Claim level UDTs can be included in a service definition, allowing you to use them in a wide variety of ways.

Assignment History Tab

The Assignment History tab allows to capture the claim details when claim ownership is modified in the Claim Review and Repair workbasket.

This tab displays the following fields tracking the claim ownership changes:

| Field | Description |
|-------------------|---|
| Assigned to Group | The name of the group assigned to the claim. |
| Assigned to User | The name of the user assigned to the claim. |
| Assigned Date | The date on which the claim was assigned. |
| Ownership Time | The length of the time (in days/hours) for which claim ownership remained with the group or user. |
| Comment | The comments added while assigning the claim ownership. |

Delegated Processing Tab

Use the Delegated Processing tab to enter the claim adjudication details provided by the participating providers or the delegated organizations on the claim level and the claim line level for all claim types. The submitted claim includes the information, Participating Provider, Benefit Tier Type, Paid Date, Paid Amount, Allowed Amount, Non-Covered Amount, and Member Responsibility. You can also add other claim adjustment values such as Claim Adjustment Message Code, Group Code, Quantity, and Amount.

The image below displays the Delegated Processing tab for an institutional claim.

Fields and Commands

| Field | Description |
|--|---|
| Delegated Processing Attributes (Claim Level) | |
| Participating Provider | To select the provider's participation status, click inside the column, and select either "Par" or "Non Par" from the drop-down list. To remove a selection, click the "X" next to the selection. |
| Benefit Tier Type | To select a Benefit Tier Type, click inside the column, and select either "In-Network" or "Out-of-Network" from the drop-down list. To remove a selection, click the "X" next to the selection. |
| Paid Date | The delegated claim paid date. Use the format MM/DD/YYYY or select the date from the calendar control. |
| Paid | This field's value is equal to the amount actually paid by the delegated entity to the supplier for the service. |
| Allowed | The total allowed amount of the delegated claim. |
| Non-Covered | The total amount not covered on the delegated claim. |
| Member Responsibility | To select a Member Responsibility Type, click inside the column, and select either "Billed Amount" or "Allowed Amount" from the drop-down list. To remove a selection, click the "X" next to the selection. |
| Clear | Click Clear to remove all the information added to the Delegated Processing Attributes. |
| Add Messages | Click "+" to add the following message code details: |

| Field | Description |
|--|---|
| | <ul style="list-style-type: none"> ▪ Message Code - The message code for the message. ▪ Group Code - The delegated claim group code. ▪ Quantity - The quantity associated with the delegated claim. ▪ Amount - The total amount of the delegated claim. |
| Click the "X" icon to delete the information added for the message code. | |
| Delegated Processing Attributes (Claim Line Level) | |
| Line# | <p>To add the Delegated Processing Attributes, click the plus icon in the column to add all the information from the Delegated Processing Claim Level.</p> <p>Note:The information for all the other fields next to Lines# field (StartDate, End Date, POS, CPT/HCPSC, Rev. Code, and Charges) populates as per the information entered in the Enable Pricing section on the Create Claim dialog for all claim types.</p> |
| Start Date | The delegated claim line start date. |
| End Date | The delegated claim line end date. |
| POS | The place of service code. |
| CPT/HCPSC | The CPT or HCPSC code describing the service provider. |
| Rev. Code | The specified revenue code. |
| Charges | The delegated claim line charges. |

Review Triggers (1)

(41) Claim is manually marked as requiring a Review

The Approve Claim page is displayed when approving a claim out of the Claims Review and Repair Workbasket with approve only permission.

The Approve Claim page provides a view-only (no editing or adjusting of financials allowed) display of all claim details. To approve the displayed claim, click **Approve** in the main toolbar.

The Approve Claim page displays the same field and tabs as the Claim View/Edit page. For more information about the fields and tabs shown on the Approve Claim page, see ["Claim View/Edit Page" on page 3-104](#)

For information about how to approve a claim out of the Claim Review and Repair Workbasket with approve only permission, see ["Approve a Claim \(Approve Only Permission\)" on page 4-12](#)

Apply Manual Overrides Screen

The Apply Manual Overrides screen shows a summarized view of claim lines. From the **Claim Line Overrides** tab you can:

- Remove denial messages from all lines
- Change or remove denial reasons on one or more claim lines
- Add override denial reasons for one or more claim lines
- Add, change or remove the Allowed Amount on one or more lines.
- You can also copy one or more selected values from a specific claim line to ALL claims lines.
- Override the Qualifying Payment Amount (QPA) Amount. QPA is the insurer's median contracted rate. This is generally the median contracted rate recognized by the plan or issuer for the same or a similar item or service by a similar provider in the same geographic region. The QPA helps determine the patient cost-sharing in a surprise billing situation.

NOTE You can also override the QPA amount when you click **Adjust Financials**.

To access this screen, on the Edit Claim screen, click **Manual Override** in the toolbar.

After making changes to one or more claim lines using this feature, when you click **Apply**, the same change is automatically reflected in the Manual Overrides section of each applicable claim line (see ["Apply Manual Overrides to Multiple Claim Lines" on page 2-64](#)).

Fields and Commands

| Field | Description |
|--------------------------------------|--|
| Commands and buttons | |
| Apply button | Click to apply any changes you have made. |
| Close button | When you are done with your work click close. If you have not clicked Apply to save your changes, no changes will be applied. |
| Remove Denial Messages button | Click to remove denial messages from all claim lines on the claim. |
| Line Information | |
| Line | The line number and a summary of the line are displayed in this column. Click the + control button to display additional information about the line. |
| Line Status | The current status of the line, such as adjudicated, denied, etc. |
| Allowed Amount | The allowed amount of the claim line. You can click within the column and remove the amount or enter a different amount. |
| Repricer | The name of the repricer, if applicable. To select a Repricer, click inside the column, enter the first few characters of the repricer name, click Search (🔍), and select from list. To remove a selection, click the x icon next to the selection. |
| Benefit Tier Type | The benefit tier type, if applicable. To select a Benefit Tier Type, click inside the column, and select either In-Network or Out-of-Network from the drop down list. To remove a selection, click the x next to the selection. This field is unavailable for selection if a Benefit Network has already been selected in the Benefit Network column. |
| Benefit Network | The benefit network, if applicable. To select a Benefit Network, click inside the column, enter the first few characters of the network name, click Search (🔍), and select from list. To remove a selection, click the x icon next to the selection. This field is unavailable for selection if a Benefit Tier Type has already been selected in the Benefit Tier Type column. |
| Apply Benefit Network To Base Only | This indicates that the benefit network set in the manual override section will override the base benefit plan's benefit |

| Field | Description |
|----------------------------|--|
| | network, with no change to the benefit network applied to the wrap-around benefit plan. |
| Member Responsibility Type | The member responsibility type, if applicable. To select a Member Responsibility Type, click inside the column, and select either Billed Amount or Allowed amount from the drop down list. To remove a selection, click the x next to the selection. |
| Other Discount Amount | The sum of other discount amounts applied after all other calculations have taken place. |
| Copay Amount | The copay amount of the claim line. You can click within the column and remove the amount or enter a different amount. |
| Coinsurance Amount | The coinsurance amount of the claim line. You can click within the column and remove the amount or enter a different amount. |
| Deductible Amount | The deductible amount of the claim line. You can click within the column and remove the amount or enter a different amount. |
| Cost Share Override Reason | <p>When overriding any of the cost share amounts, you can select a cost share override reason, such as:</p> <ul style="list-style-type: none"> ▪ Benefit Configuration Error ▪ Provider Contract Terms ▪ Negotiated Reimbursement |
| Qualifying Payment Amount | <p>The insurer's median contracted rate. This is generally the median contracted rate recognized by the plan or issuer for the same or a similar item or service by a similar provider in the same geographic region. The QPA helps determine the patient cost-sharing in a surprise billing situation.</p> <p>For adjudication, the "Qualifying Payment Amount (QPA)" provision of the Benefit Plan Component or Product uses the the manually overridden QPA amount.</p> <p>Note: If there is no QPA provision in Benefit Plan Component or Product, the manually overridden QPA will not affect any cost share calculations.</p> <p>If, for example, a claim matches the "Qualifying Payment</p> |

| Field | Description |
|------------------------------------|---|
| | <p>Amount" provision and the QPA is \$20, the claim is sent for review. If you manually override the QPA to \$40, and the provision is set to calculate the member responsibility based on the lowest QPA (\$40), Allowed (\$44), and Billed (\$50), the member responsibility is based on the new QPA value of \$40.</p> <p>Note: You can also override the QPA amount when you click Adjust Financials.</p> |
| Supplier Contracted | Indicates the related supplier is contracted. This information is used to determine whether or not the member should be balanced billed. |
| Processed by Alternate Benefits | Indicates if a claim line is already processed by a pre-defined or manual alternate benefit rule. Exclude Secondary Editors |
| Bypass Alt. Benefit Rules | <p>Applies to services defined with Alternate Benefit Rules only! Select this checkbox to bypass the alternate benefit rules to which the line would normally apply. When this checkbox is selected, the originally submitted service code will be used instead of the alternate service defined by the Alternate Service Rule Set.</p> <p>If the alternate benefit created new claim lines, the new lines are no longer displayed as claim lines, and those lines are not available for downstream processes like creating a Remittance advice, claim encounter data reporting, etc.</p> <p>Removing the check mark from the Bypass Alt. Benefit Rules checkbox will once again apply alternate benefit rules to the claim line, if applicable.</p> |
| Denial Message | <p>If the claim line is denied, the denial message. You can remove a denial message by clicking the X icon next to it, or you can click inside the column to display a drop-down list of possible denial message. Selecting one of these effectively denies the claim line with the selected message.</p> <p>You can use the Remove Denial Messages button above the columns to remove the denials on all claim lines.</p> |
| Override Denial/ Add button | Click inside this column next to the applicable claim line to add an override denial reasons. When you click Add , the Denial Message and code will be displayed that matched the denial reason on the claim by default. |

| Field | Description |
|---|---|
| | <p>Here you can select a denial reason from the drop-down list box. Selecting one of these effectively overrides the denial for the selected claim line with the selected message.</p> <p>You can use the Copy feature, either under the Override Denials tab or on the claim line itself, if there are multiple claim lines for which you want to specify the same denial reason.</p> <p>You can also click inside the Delete column to delete a denial reason.</p> |
| Copy (All) | If you want to apply one or more field values from one claim line to ALL the claim lines, click the Copy  icon next to the line you want to copy. You can then select the applicable checkboxes for the item(s) you want to copy, or select Copy All to select all items, and then click the Copy icon. |
| Claim Line Details - When you click the + control on a claim line, details are displayed in one or more tabs. | |
| Override Denials Tab | |
| Denial Reason | The selected denial reason. If applicable, select a different denial reason from the drop-down list box. You can click the x icon to delete the denial override reason. |
| Copy | Click the Copy button to copy a override denial reason and paste it into the denial reason field for all claim lines. |
| Delete | Click to delete a denial reason. |
| Line Details Tab | |
| Start/End Date | The starting and ending effective dates of the claim line. |
| Rev. Code | The specified revenue code. |
| CPT/HCCPCS | The CPT or HCCPCS code describing the service provided. |
| Billed Amount | The claim line billed amount. |
| HCC Amount | The claim line HCC amount. |
| Paid Amount | The claim line paid amount. |
| Member Responsibility | The claim line member responsibility amount. |
| System Messages | |
| Code | The system message code. |

| Field | Description |
|----------------|---|
| Description | The short description of the system message code. |
| Action | The action associated with this message code, such as "denial." |
| Responsibility | The responsible entity, such as the supplier. |
| User Messages | |
| Code | The system message code. |
| Description | The short description of the system message code. |
| Action | The action associated with this message code, such as "denial." |
| Responsibility | The responsible entity, such as the "supplier." |

Using the External **Claim Editor Overrides** tab you can exclude the claim line from being sent to either the primary and/or secondary claim editor or to send the claim line to the External Claim Editor but bypass the edit rules.

| Paid Amount | The claim line paid amount. |
| Member Responsibility | The claim line member responsibility amount. |

Claim Batch Pages

Claim batches allow you to group together similar claims for processing. For example, you can create a batch that groups together multiple institutional claims received on the same day for a specific product. Optionally, you can assign ownership of the batch to a specific group or individual.

See the following Claim Bath pages for additional information:

- Enter Batch - Select the Claim Batch page
- Create Claim Batch page
- List of Claims Page
- Claims Batch Entry Workbasket

Create Claims Batch page

Creating a new batch involves entering a batch number, the number of claims, the total amount of the claims and other descriptive information. You can assign ownership of the batch to a specific group of users or to an individual of a specific group.

| Claim Type | The claim type. |
| Account | The associated account name. |
| Entry Type | The entry type. |
| Last Assignment Date | The last assignment date. |
| Product | The name of the associated product, if applicable. |

Entering a Claims Batch

You can search for and select the claims batch you want to work with and then enter all the claims in the batch into the Claims Entry page, one after the other.

To enter a batch of claims:

1. In the Claims tab of the HealthRules Manager page, click the **Enter Batch Claims** link beside the type of claim you wish to process, or from the File menu, select **Create**, then select **Batch Claims**, and then select **Enter Institutional Batch Claims**, **Enter Professional Batch Claims**, or **Enter Dental Batch Claims**.

The Enter Batch - Select the Claim Batch page is displayed.

2. On the left side of the page, enter search criteria to help you find the batch you want to work with, such as the batch number, claim type or owner, and click **Search**. The right side of the page displays a resulting list of batches from which to choose.

Claim batches with an Open status have not yet been entered. Claim batches with an On Hold status have been partially entered into the Claims system and require completion. Claims with a status of Submitted are completed (processed) claims that were submitted without error.

Enter Batch - Select the Claim Batch - hcc_admin

Max Results: 50

| Claim Batch # | Status | Receipt Date | Group | Owner |
|---------------|--------|--------------|-------|-------|
|---------------|--------|--------------|-------|-------|

OKCancel

3. Click the row of the batch you want to process and click **OK**.

The Create Claims page is displayed.

NOTE If an owner has been specified for the batch, only the owner can select the batch and enter the claims into the system. If no owner is specified, any claims user can select and enter the batch.

Notice the Batch Number, Claim Number, and Date Received fields are pre-filled with information entered for the batch.

4. Complete the remainder of the fields as you would for any new claim(see ["Create a Claim Record" on page 2-3.](#)) You can search for a batch to work with, select it for entry, and complete entering the batch claims. You can also reassign the claim to another claims adjuster (see ["Using the Claim Batch Entry Workbasket" on page 3-300](#)).
5. When finished entering claim information, click the **Next** arrow toolbar button to process the next claim in the batch. You can click the **Back** arrow icon to return to the previous claim, or you can click the Claims List drop-down to select any of the claims in the batch.

A check mark displays next to claims that have been successfully entered.

You can navigate between claims in the batch that are incomplete, however, depending on what information has been left off the form, the system will display a number of dialogs (two for the Professional, and four for the Institutional claim):

- Incomplete Input "This claim must contain at least one valid service line"
- Incomplete Input "This claim is not complete. Would you like to continue to the next claim and resolve these issues later"

The Institutional Claim has two additional dialogs:

- Please enter a valid statement from date
- Please enter a valid statement through date

6. When all claims in the batch have been successfully entered, click the **Submit Batch** toolbar button.

Incomplete Claims

If claims have not been completed, when click the Submit button, a dialog appears indicating the claim ID that needs to be completed.

Batch Totals

Totals must match when submitting the batch. For example, if five claims are entered in the batch and the batch total is 500.00, the sum of the five claims in the batch must total \$500.00, otherwise, the Inconsistent Total Amounts dialog will appear and display a message similar to the following:

"The total of each claim must match the total amount set in the claim batch. Please review the inputs and resubmit the batch. Batch Total 500.00 Claim Totals 1400.00"

Claim 1 100.00
Claim 2 100.00
Claim 3 1000.00
Claim 4 100.00
Claim 5 100.00"

Click **OK** to remove the dialog and correct claim line amount.

Claim Batch Entry Workbasket

All types of Claim batches appear in your Workbasket under the Claim Batch Entry option.

Batch claims that have not been processed have a status of “open.” Partially completed batches have a status of “on hold.” Batch claims that have been submitted are also displayed in the workbasket.

You can search for a batch to work with, select it for entry, and complete entering the batch claims. You can also reassign the claim to another claims adjuster.

Using the Claim Batch Entry Workbasket

All types of Claim batches appear in your Workbasket under the Claim Batch Entry option.

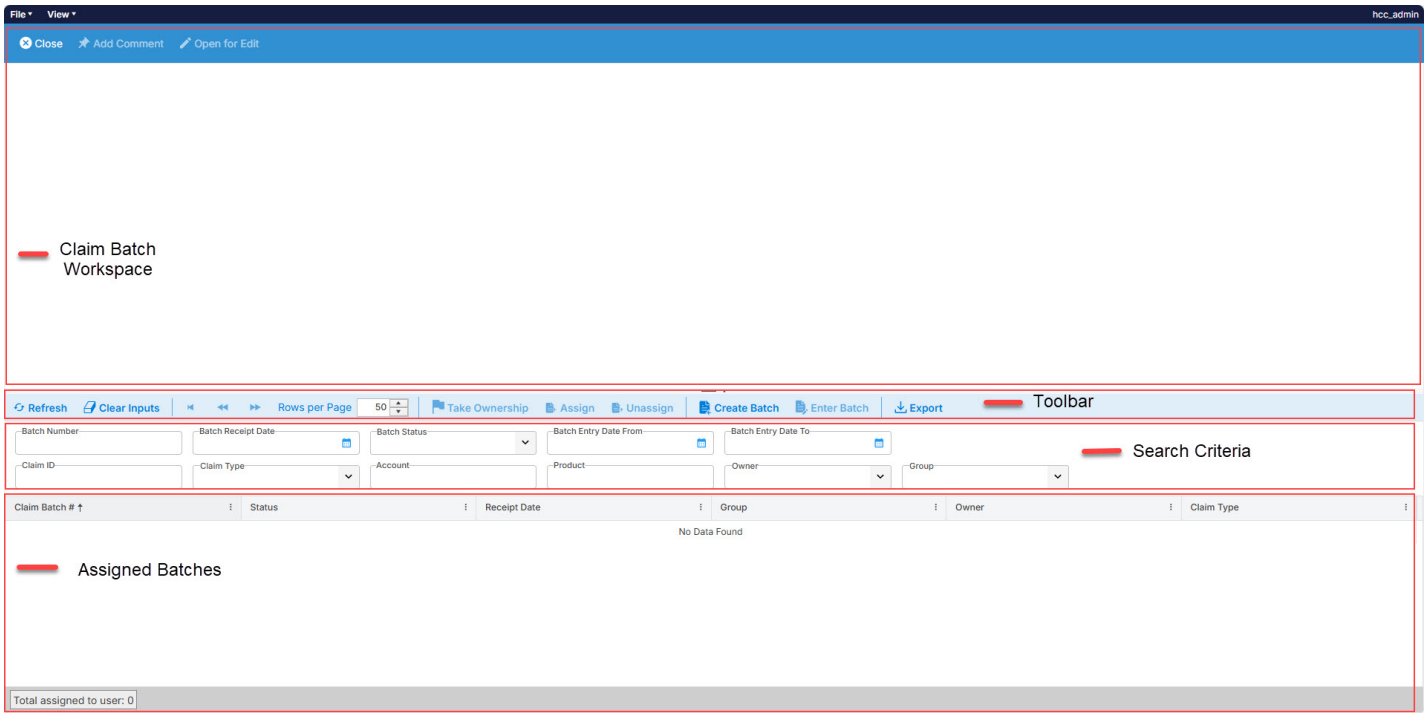

Batch claims that have not been processed have a status of “open.” Partially completed batches have a status of “on hold.” Batch claims that have been submitted are also displayed in the workbasket.

You can use search criteria to find the batch you want to work with from a list of batches assigned to you, and then you can enter the batch claims. You can also use this option to change the batch assignment (if you have the authority), and to create a new batch.

To open the Claim Batch Entry Workbasket:

1. Click on the **Claim Batch Entry** option located in the Workbasket drop-down list.

The application displays the Workbasket - Claim Batch Entry page. Any batches assigned to the user display at the bottom of the page.

Claim Batch Entry Toolbar

| Command | Description |
|-------------------------|---|
| Refresh | Click to refresh the list of available claim batches at the bottom of the page. You can enter search criteria and then click Refresh to filter the displayed batches. If new batches have been entered since you first access the page, clicking Refresh will add any newly assigned batches to the list. |
| Clear button | Clear all search criteria fields. |
| Beginning button | Return to the beginning of the list. Used after scrolling and paging through rows of claims batches to return to the beginning of the list. |
| Back button | Displays the most recent group of batches, based on the number of rows displayed on page. If you decide to displays 10 rows on a page, each group will contain 10 rows. In this case, clicking the Back button displays the previously displayed 10 rows. |
| Next button | Displays the next group of batches, based on the number of rows displayed on page. If you decide to displays 10 rows on a page, each group will contain 10 rows. In this case, clicking the Next button displays the next 10 rows. |

| Command | Description |
|-----------------------|---|
| Rows on Page | Number of rows to display at one time on the page. |
| Take Ownership | If this button is enabled when you select a specific claim batch row, it means you can click the toolbar button to take ownership of the selected claim. The claims will then be assigned to you. |
| Assign | Assign the select claims batch to a specific group of user. |
| Unassign | Remove any assignments from the selected claims batch. |
| Create Batch | Create a new batch. The Create Claim Batch page displays (see Creating a New Batch.) |
| Enter Batch | Click to enter claims from the selected batch. The Enter Claims page displays (see Entering a Claims Batch.) |
| Export | Export a batch. Saves the information to an specified file name and format. |

Searching for a Claims Batch

To search for a batch, complete one or more of the search criteria fields and click the **Refresh** toolbar button. For example, you can enter a specific batch number, a specific claim number, the batch receipt date, the claim type and more. To remove all the entries in the search criteria field, click the **Clear** toolbar button.

About Claims Batch Assignments

When you create a batch of claims, you can assign them to a group of users or to a specific user. If you have the proper authority, you can select a claims batch and click the **Take Ownership** toolbar button to reassign the claim batch to yourself.

NOTE While assigning a group/user to an existing claim batch entry or creating a new batch entry, you will only see the active groups/users in the dropdown list.

You can also choose a claim batch and assign it to another user by clicking the **Assign** toolbar button.

Or you can remove the assignment by clicking the **Unassign** toolbar button, so that any claims user can access it.

Entering a Batch

Select a batch from the bottom of the page and click the **Enter Batch** toolbar button. The Batch Entry page appears

For information on entering a batch of claims, refer to [“Entering a Claims Batch.”](#)

Creating a New Batch

You have the ability to create a new batch from the toolbar. Click the **Create Batch** toolbar button. The Claim Batch Entry page appears (see [Creating a New Batch](#)).

Printing a Claim Batch List

When you select a claim batch, the details of the batch display in the upper portion of the page. Under the List of Claims section, all claims in the batch are listed.

To print a Claim List, click **Claim List**.

The Preview page displays, showing how the printed list will look.

Click the **Print** icon to send the job to your printer.

Chapter 4: Claims Workbaskets

There are several claims related workbaskets.

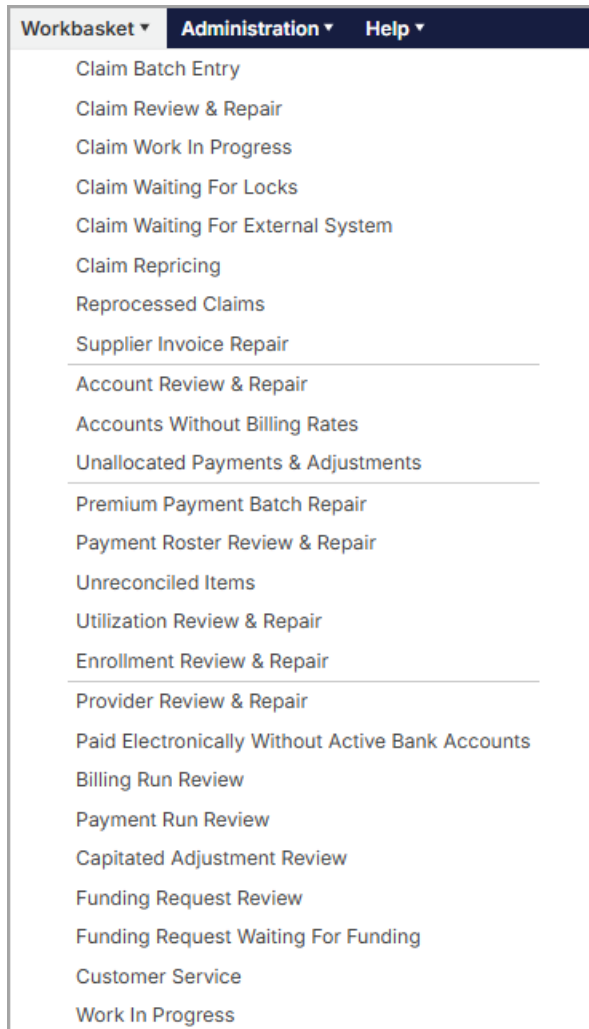

This discusses the following:

| | |
|--|-------------|
| About Claims Workbaskets | 4-2 |
| Claim Review and Repair Workbasket | 4-4 |
| Claim Review and Repair Push Flow Workbasket | 4-32 |
| Claim Work in Progress Workbasket | 4-42 |
| Claim Waiting for Locks Workbasket | 4-45 |
| Claim Waiting for External System Workbasket | 4-46 |
| Claim Repricing Workbasket | 4-47 |
| Reprocessed Claims Workbasket | 4-56 |
| Filtering Trigger Events/Claims in the Workbasket | 4-64 |
| Previewing the Results of a Reprocessed Claim | 4-65 |
| Supplier Invoice Repair Workbasket | 4-68 |

About Claims Workbaskets

A number of workbaskets are designated to hold claims in various states of processing. You or your group must be assigned ownership of a claim in order to access that claim from a workbasket.

Claims workbaskets are accessed from the HealthRules Manager Home page via the Workbasket option.

Claims workbaskets are similar to other workbaskets. Regular claims and trial claims are displayed together in the Claim Waiting For Locks, Claim Work in Progress, Claim Waiting For External System, and Claim Repricing workbaskets.

For a general overview of workbaskets, see *HealthRules Manager User Guides, Volume 1: Getting Started*.

For information on trial claims, see *HealthRules Manager User Guides, Volume 3: Members and Enrollment*.

Claim Batch Entry

Lists the batch of claims that have not been processed. You can enter search criteria to find the batch you want to work with from a list of batches assigned to you, and then you can enter the batch claims.

Claim Review & Repair

Lists the claims that did not pass successfully through the adjudication process or that were automatically "pended." There are two categories of claims in this workbook, those needing some sort of repair before they can be adjudicated, and those needing review by a person to evaluate how the claim adjudicated.

Claim Review & Repair Push Workflow

The Claim Review Repair Push Workflow workbook lists claims that failed adjudication and require repair or claims that are automatically "pended" for review. The workbook mimics the Claim Review & Repair workbook, but allows you to work through the items in the workbook using the "push" workflow.

The "push" workflow automatically displays the next highest priority claim you have permission to view without having to search for a claim or click to access the subsequent claim. The next highest priority claim is based on the owner of the claim (unassigned, assigned to the user, and assigned to the Push to Claim Review Repair Overflow Workbook Group), and ordered based on the oldest to the newest receipt and endorsement dates.

When you skip a claim, the owner is released and routed to the group based on the configuration under the Claim Review and Repair Push Based Workflow setting. If a push based workflow group is not configured, the claim moves to the group configured under the Default Workbook Assignment Group setting.

If the claim is corrected, the system removes it from the queue, but if it is not fixed, the system assigns it to the push based workflow group or the default workbook. If a user owning claims switches the workbook, the system prompts a message to release or reassign the claim.

Claim Work In Progress

If you did not have time to finish creating or editing a claim, you can save it in the *Claim Work in Progress* workbook.

Claim Waiting For Locks

This workbasket lists claims that are currently locked and waiting to be processed. Claims might be locked by the system if another claim for the subscription is held up or if the subscription is being edited. As soon as the cause for the lock is resolved, claims automatically continue processing.

Claim Waiting For External System

When HealthRules Payer is integrated with Cotiviti, which includes Coding Validation, if a response from Cotiviti includes a Coding Validation, the claim will be visible in this workbasket. After the response clears, the Coding Validation edit is received, the claim will automatically continue the adjudication process. If a response is not received within four hours, the claim will automatically be removed and all the Cotiviti edits will be cleared.

Claim Repricing

Claims that require repricing are held in the *Claim Repricing* workbasket. A claim may be sent to the repricing workbasket as part of adjudication in order to obtain the claim price from an outside vendor (Repricer), if the member's benefit contract specifies this.

Reprocessed Claims

During normal system operation, certain events might cause one or more claims in the system to become out-of-date; this can, potentially change the amounts that should have been paid on those claims. For example, claims needing reprocessing might occur when an authorization arrives a week after the associated claim was processed, or when a supplier contract is amended retroactive to the beginning of the year because contract negotiations dragged out past the renewal date.

When such events occur, the server automatically reprocesses any claims that were affected. If there was not material impact, the server does nothing. If, however, a claims dollar values are affected, the system sends the list of affected claims to the Reprocessed Claims workbasket.

Claim Review and Repair Workbasket

HealthRules Payer assigns records with review or repair policy directives to the Claim Review and Repair workbasket to be resolved. The Claim Review and Repair workbasket allows you to select a claim, view it, make edits to certain areas of the claim, or make claims financial changes, if applicable, and then approve it.

Chapter 4: Claims Workbaskets

The screenshot displays the Claims Workbasket interface with several labeled components:

- Menu Bar:** File, View, hcc_admin
- Document Toolbar:** Close, Add Comment, Open for Edit, View Input
- Document Pane:** Refresh, Void, Replace
- Assignment Toolbar:** Refresh, Clear Inputs, Rows per Page (50)
- Search Filters:** Take Ownership, Assign, Unassign, Multi Assign, My Assignments, Review/Repair Info, View Rules, Edit Rules, Expedite, Misrouted Claims, Export
- Record Pane:** Table of claims with columns: Claim ID, Claim Type, State, Review/Repair Reason, Group, Owner, Member Name, Service Start Date, Receipt Date, Estimated Late Claim Date, Expedited, Billed Amount.

The table shows one claim record:

| Claim ID | Claim Type | State | Review/Repair Reason | Group | Owner | Member Name | Service Start Date | Receipt Date | Estimated Late Claim Date | Expedited | Billed Amount |
|-------------------|--------------|--------|--|----------------|----------|------------------|--------------------|--------------|---------------------------|-----------|---------------|
| 49c22642a3c945... | Professional | Review | Claim flagged for review by external ... | Group Claim A1 | claim_b2 | Turnbull, Malcom | 2/5/2024 | 2/5/2024 | | | \$20 |

Total assigned to user: 17

Claims that reside in the Claims Review and Repair workbasket can be edited in two ways:

- By using the standard Claims Search feature, and opening the claim for Edit. A dialog box opens indicating that a version of the claim resides in the workbasket. You can click **Yes** to display the Edit Claim screen.
- Open the claim from within the workbasket and click the **Edit** button to edit the claim.

When successfully approved it is removed from the workbasket and submitted for processing.

You also have the ability to deny the claim, or to void it.

NOTE For users that send claims to the ClaimsXten external claims editing system, when claims get voided or rejected in HealthRules Payer, or when claim transactions get canceled (through Transaction Manager), HealthRules Payer will automatically send information about the voided, rejected, or canceled states of these claims to ClaimsXten (in real time) if needed in order to ensure that ClaimsXten's claims history stays in sync with HealthRules Payer's.

Only claims which the user has permission to operate on are displayed in the list. If you have permissions to do so, this workbaskets includes the ability to assign claims to a user or users of a pre-defined group, or to select a claim and assume ownership of it.

You can also create rules by which a claim record will be automatically assigned to a specified user group.

The Claims Review and Repair Workbasket is one of five workbaskets with assignment capabilities. The other four are: Account, Utilization, Enrollment, and Provider.

For more information, see one of the following tasks:

- [Searching for a Claim in the workbasket](#)
- [View Claims Details](#)
- [Edit and Approve a Claim](#)
- [Denying a Claim](#)
- [Assign Claims](#)
- [Set Up Claim Assignment Rules](#)
- [View Your Assignments](#)
- [Expedite Claims From Review Repair Workbasket](#)
- [View Misrouted Claims](#)
- [Claim Review and Repair Workbasket Page Reference](#)

Search for Claims in the Workbasket

You can quickly search for the claims you want to work with in the Claims Review and Repair workbasket.

To Search for Claims in the workbasket, follow these steps:

1. Open the Claims Review and Repair workbasket, and complete one or more of the Filter fields(see ["Claim Review and Repair Workbasket Page" on page 4-26](#)).
2. Click **Refresh**, or press the [Enter] key which has the same effect. An updated list of claims based on your filter criteria is displayed in the results section of the page.

You can click **Clear Inputs** to clear the filter fields without updating the search results.

Chapter 4: Claims Workbaskets

The screenshot displays the 'Claims Workbaskets' interface. At the top, there's a blue header bar with 'File' and 'View' menus, and a 'Close' button. Below this is a toolbar with 'Refresh', 'Clear Inputs', and 'Rows per Page' (set to 50). A row of action buttons includes 'Take Ownership', 'Assign', 'Unassign', 'Multi Assign', 'My Assignments', 'Review/Repair Info', 'View Rules', 'Edit Rules', 'Expedite', 'Misrouted Claims', and 'Export'. Below the toolbar is a section for filters and search, including fields for Claim ID, Claim State, Claim Type, Claim Source, Trial Claim No, External Claim, Owner, Group, Review/Repair Reason, Service Start Date, Service End Date, Supplier ID, Supplier Name, Member ID, Member Last Name, Member First Name, Account Name, and Review/Repair Reason Code. Below the filters is a table with columns: Claim ID, Claim Type, State, Review/Repair Reason, Group, Owner, Member Name, Service Start Date, Receipt Date, and Estimate. The table contains five rows of data. At the bottom, there's a status bar showing 'Total assigned to user: 18'.

| Claim ID | Claim Type | State | Review/Repair Reason | Group | Owner | Member Name | Service Start Date | Receipt Date | Estimate |
|-------------------|---------------|--------|--|----------------|-------|-------------------------|--------------------|--------------|----------|
| 49c22642a3c945... | Professional | Review | Claim flagged for review by external ... | hcc_super_user | | Turnbull, Malcom | 2/6/2024 | 2/6/2024 | |
| 1741576283800 | Institutional | Review | External fraud detection system proc... | hcc_super_user | | 1741576283, CypressT... | 9/16/2024 | 9/17/2024 | |
| 1741285038900 | Professional | Repair | The claim was submitted with an inva... | hcc_super_user | | 1741285038, CypressT... | 3/4/2025 | 3/6/2025 | |
| 1741283431900 | Professional | Review | Claim is manually marked as requirin... | hcc_super_user | | 1741283431, CypressT... | 3/4/2025 | 3/6/2025 | |
| 1741282534800 | Institutional | Review | Claim is manually marked as requirin... | hcc_super_user | | 1741282534, CypressT... | 3/6/2025 | 3/6/2025 | |

You can expand the columns so that the populated data fully displays; the system will add a horizontal scroll bar, as needed, to allow you to view the columns.

NOTE It is highly recommended that you do not add ALL columns on the screen as this can negatively impact usability.

3. Do one of the following:

- Click on a claim in the results section to display claim detail for that claim in the upper portion of the page.

The upper portion of the page allows you to view and edit the claim.

Total assigned to user: 18

- If the preview pane is disabled, click on a claim in the results section, then click the **Edit** icon in the column.

View Claim Detail

To view details about a specific claim in the workbasket, use search to find the claim you want to work with and then click on a claim in the results section (bottom page) to display claim detail for that claim in the upper portion of the page.

Chapter 4: Claims Workbaskets

The screenshot displays the 'Claims Workbasket' interface. At the top, there's a header bar with 'File' and 'View' menus. Below it, a toolbar contains buttons for 'Close', 'Add Comment', 'Open for Edit', 'Adjust Financials', 'Reject', 'Cancel', and 'View Input'. A secondary toolbar has 'Refresh', 'Void', and 'Replace' buttons. The main area is divided into two sections. The top section contains form fields for 'Claim ID' (1741320647900), 'Last Changed On' (3/6/2025 11:11:20 PM), 'Status' (Needs Repair), 'Claim Type' (Professional), 'Benefit Plan Type', 'Calculated Benefit Plan Type', 'Manually Priced' (checked), 'Send to Review', 'Trial Claim', 'Capitated Service', 'Renewed Claim', 'Voided Claim', 'Locked Claim', 'Assigned Group' (hcc_super_user), and 'Assigned Owner' (hcc_admin). The bottom section is a table with columns: Claim ID, Claim Type, State, Review/Repair Reason, Group, Owner, Member Name, Service Start Date, Receipt Date, Estimated Late Claim Date, Expedited, Billed Amount, Edit, and View. The table contains three rows of data. The first row has a 'View' icon highlighted with a red box. Below the table, a summary bar shows 'Total assigned to user: 17'.

| Claim ID | Claim Type | State | Review/Repair Reason | Group | Owner | Member Name | Service Start Date | Receipt Date | Estimated Late Claim Date | Expedited | Billed Amount | Edit | View |
|---------------|--------------|--------|--|----------------|-----------|-------------------------|--------------------|--------------|---------------------------|-----------|---------------|------|------|
| 1741286466... | Professional | Repair | Service unit count may not be null | hcc_super_user | hcc_admin | 1741286466, CypressT... | 3/3/2025 | 3/5/2025 | | | \$10.00 | | |
| 1741320647... | Professional | Repair | Service unit count may not be null | hcc_super_user | hcc_admin | 1741320647, CypressT... | 3/3/2025 | 3/5/2025 | | | \$10.00 | | |

The upper portion of the page allows you to view and edit the claim.

If the preview pane is disabled, click the **View** icon to open the claim.

The screenshot displays the 'Claims Workbasket' interface, focusing on the lower portion. It shows a table with columns: Claim ID, Claim Type, State, Review/Repair Reason, Group, Owner, Member Name, Service Start Date, Receipt Date, Estimated Late Claim Date, Expedited, Billed Amount, Edit, and View. The table contains two rows of data. The first row has a 'View' icon highlighted with a red box. Below the table, a summary bar shows 'Total assigned to user: 17'.

| Claim ID | Claim Type | State | Review/Repair Reason | Group | Owner | Member Name | Service Start Date | Receipt Date | Estimated Late Claim Date | Expedited | Billed Amount | Edit | View |

Review, Edit, and Approve a Claim in the Workbasket

On the Review and Repair Workbasket page, you can either directly open a claim for edit, or you can review claim details first, and then select to open the claim for edit. On the Edit Claim page you can make needed changes to the claim, and then approve the claim. Approved claims are then removed from the workbasket.

To edit and approve a claim in the workbook:

1. Use the filter fields and Search feature to find the claims you want to work with.
2. Do one of the following:
 - Click the **Edit** (✎) icon on the search results row (without opening and displaying detail for the claim). The Edit Claim page is displayed. Go to step 5.
 - Click on a claim in the search results table at the bottom of the page to select the claim you want to work with. Claim details for the selected claim display in the upper portion of the page. Go to step 3.

3. Review the claim details for the selected claim.

Depending on the permissions you have been granted, you may see different buttons in the main toolbar. If you have approve, edit, and adjust financials permissions, you will see the tool bar pictured above, with **Close**, **Add Comment**, **Open for Edit**, **Adjust Financials**, **Deny**, **Cancel** and **View Input** buttons. If you have approve only permissions, you will see a toolbar with **Close**, **Add Comment**, **Approve**, and **View Input** buttons. The **Open for Edit**, **Adjust Financials**, **Deny** and **Cancel** buttons will be "grayed out" (unavailable). For approving a claim with approve only permissions, see ["Approve a Claim \(Approve Only Permission\)" on page 4-12](#).

4. Click **Open for Edit** to make changes to the claim.

The Edit Claim page is displayed.

5. Make any necessary changes to the claim.
6. To apply manual overrides to *multiple* claim lines, including removing denials, replacing denial reasons, and adding, changing or removing allowed amounts, click **Manual Overrides** (see ["Apply Manual Overrides to Multiple Claim Lines" on page 2-64](#)).
7. To see how your changes will impact the claim, click **Preview Results**.

The results will include any changes that would be made to the claim, including adjudication, calls to Prospective Payment Systems like Easygroup and 3M, and External Claim Editing services, such as CES and ClaimsXten.

8. To approve any review codes displayed in the Exceptions area on the right side of the window, click **Approve**.

The Select Reason Code dialog is displayed.

9. Select a reason and click **OK**.

The Approve Review Codes dialog is displayed.

10. Select the Approve checkbox next to each review code you want to approve. You can also use the Select all or Remove all buttons in the lower left of the dialog to help make your selections.
11. Click **OK** to approve the selected review codes.

If unapproved review codes remain when you click OK, a warning message is displayed, asking if you want to retain ownership of the claim. Click **Yes** or **No**, or click **Cancel** to return to the Approve Review Codes dialog to make additional changes.

12. To submit your changes, click **Submit**.

Approve a Claim (Approve Only Permission)

Depending on the permissions you have been granted, you may see different buttons in the Claim Review and Repair Workbasket main toolbar. If you have approve, edit, and adjust financials permissions, you will see **Close**, **Add Comment**, **Open for Edit**, **Adjust Financials**, **Deny**, **Cancel** and **View Input** buttons. If you have approve only permissions, you will see a toolbar with **Close**, **Add Comment**, **Approve**, and **View Input** buttons. The **Open for Edit**, **Adjust Financials**, **Deny** and **Cancel** buttons will be "grayed out" (unavailable).

For more information about approving a claim if you have approve, edit, and/or adjust financials permissions, see ["Review, Edit, and Approve a Claim in the Workbasket" on page 4-9](#)

To approve a claim when you have "approve only" permission, do the following:

1. Select the claim you want to approve in the lower portion of the page.

After selecting the claim you want to approve, details for the selected claim are displayed in the upper portion of the page.

2. Click **Approve** in the main toolbar.

The Approve Claim page is displayed.

The Approve Claim page is a view-only page showing all claim details.

If you want to view Claim input detail, click **View Input**. The Claim Input form page is displayed.

3. To approve the selected claim, click **Approve** button in the Approve Claim page.

The Select Reason Code dialog is displayed.

4. Select a reason code, and enter a comment, if desired.
5. Click **OK**.

The Approve Review Codes dialog is displayed.

6. Select the Approve checkbox for each claim review message code you want to approve.

You can use the **Select All** button  to select the Approve checkboxes all the displayed message code.

You can use the **Clear All** button  to clear the Approve checkboxes for all the displayed message codes.

7. Click **OK**.

The Claim Review and Repair Workbasket page is redisplayed and the claim is approved out of the workbasket.

Deny a Claim in the Workbasket

You can deny a claim in the Claim Review and Repair Workbasket when it is Review state.

To deny the claim, do one of the following:

- Select a claim in the claims search results area of the workbasket, and then click **Deny**. The Select a Denial Reason dialog box displays.
- Click the **Actions** icon in the column for the claim you want to deny. Then click **Deny**. The Select Denial Reason dialog box displays.

Select a deny reason code from the drop-down list; this reason code is applied to all lines of the claim.

If you want to adjust the deny reason for a *specific* claim line, you can open the denied claim for edit and then go to the Manual Override section to make your changes (see ["Working with Claim Denials" on page 2-47](#)).

Assign or Take Ownership of Claims

There are several command buttons on the search results toolbar that allow you to:

- take ownership of a claim,
- assign ownership of a claim, including moving ownership from one user or user group to another user or user group,
- use the multi-assign tool to assign multiple claims to users or groups of users,
- unassigned a user or user group from a claim.

NOTE

- The workbasket assignment rule user interface reflects only the active groups/users for selection for the following workbaskets; Claim Batch Entry, Claim Review & Repair, Claim Repricing, Claims Waiting for External System, Supplier Invoice Repair, Account Review & Repair, Enrollment Review & Repair, Provider Review & Repair, Utilization Review & Repair, and Payment Roster Review & Repair.
- This feature works the same for both Assign and Multi Assign options.
- The availability of parent/child groups and their members depends on the configuration of the INCLUDE_INDIRECT_GROUP_MEMBER property.

Take Ownership of a Claim

To take ownership of a claim, follow these steps:

1. Use search to find the claim you want to work with.
2. Highlight the claim you want to work with.

The screenshot shows the 'Claims Workbasket' interface. At the top, there's a toolbar with buttons like 'Close', 'Add Comment', 'Open for Edit', 'Adjust Financials', 'Deny', 'Cancel', and 'View Input'. Below this is a section for claim details, including 'Claim ID', 'Status', 'Claim Type', 'Benefit Plan Type', 'Calculated Benefit Plan Type', 'Last Changed On', 'Adjudicated On', 'Manually Priced', 'Send to Review', 'Trial Claim', 'Capitated Service', 'Renewed Claim', 'Voided Claim', and 'Locked Claim'. A table below lists claims with columns: Claim ID, Claim Type, State, Review/Repair Reason, Group, Owner, Member Name, Service Start Date, Receipt Date, Estimated Late Claim Date, Expedited, Billed Amount, Edit, and View. The first row is highlighted with a red border.

| Claim ID | Claim Type | State | Review/Repair Reason | Group | Owner | Member Name | Service Start Date | Receipt Date | Estimated Late Claim Date | Expedited | Billed Amount | Edit | View |
|---------------|--------------|--------|---|----------------|-------|-------------------------|--------------------|--------------|---------------------------|-----------|---------------|------|------|
| 1741285383... | Dental | Review | Claim is manually marked as requirin... | hcc_super_user | | 1741285383, CypressT... | 3/3/2025 | 3/5/2025 | | | \$85.00 | | |
| 1741285038... | Professional | Repair | The claim was submitted with an inv... | Group G1 | | 1741285038, CypressT... | 3/3/2025 | 3/5/2025 | | | \$10.00 | | |

3. Click **Take Ownership** on the toolbar.

The screenshot shows the same 'Claims Workbasket' interface after clicking the 'Take Ownership' button. The 'Owner' column for the first claim (1741285383...) now displays 'hcc_admin' instead of 'hcc_super_user'. The red border remains on the first row.

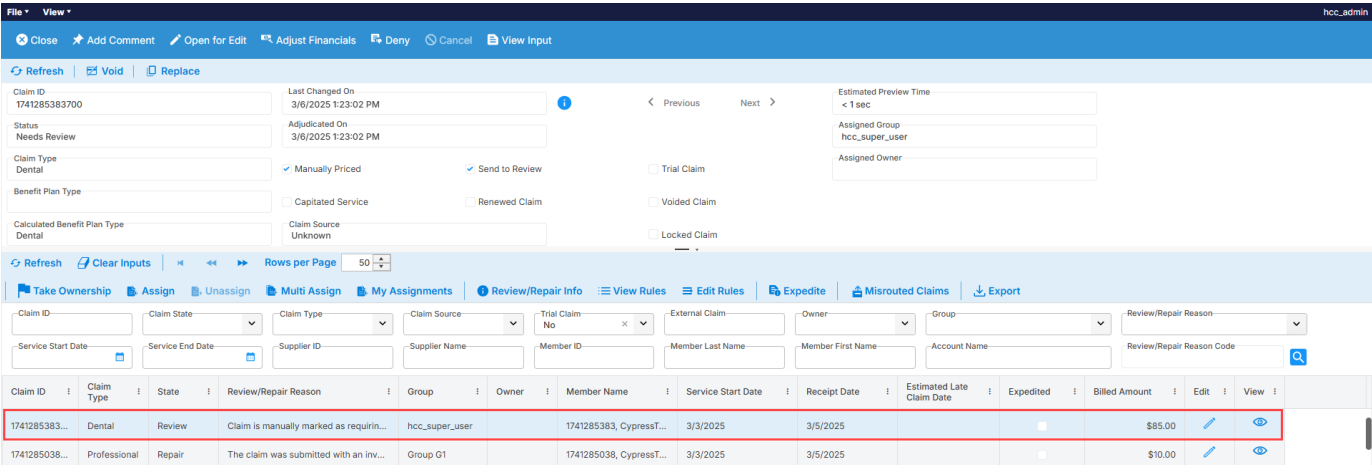

| Claim ID | Claim Type | State | Review/Repair Reason | Group | Owner | Member Name | Service Start Date | Receipt Date | Estimated Late Claim Date | Expedited | Billed Amount | Edit | View |
|---------------|--------------|--------|---|----------------|-----------|-------------------------|--------------------|--------------|---------------------------|-----------|---------------|------|------|
| 1741285383... | Dental | Review | Claim is manually marked as requirin... | hcc_super_user | hcc_admin | 1741285383, CypressT... | 3/3/2025 | 3/5/2025 | | | \$85.00 | | |
| 1741285038... | Professional | Repair | The claim was submitted with an inv... | Group G1 | | 1741285038, CypressT... | 3/3/2025 | 3/5/2025 | | | \$10.00 | | |

Notice that the user ID (user ID of current user) is now displayed in the Owner column.

Assign a Claim to Another User

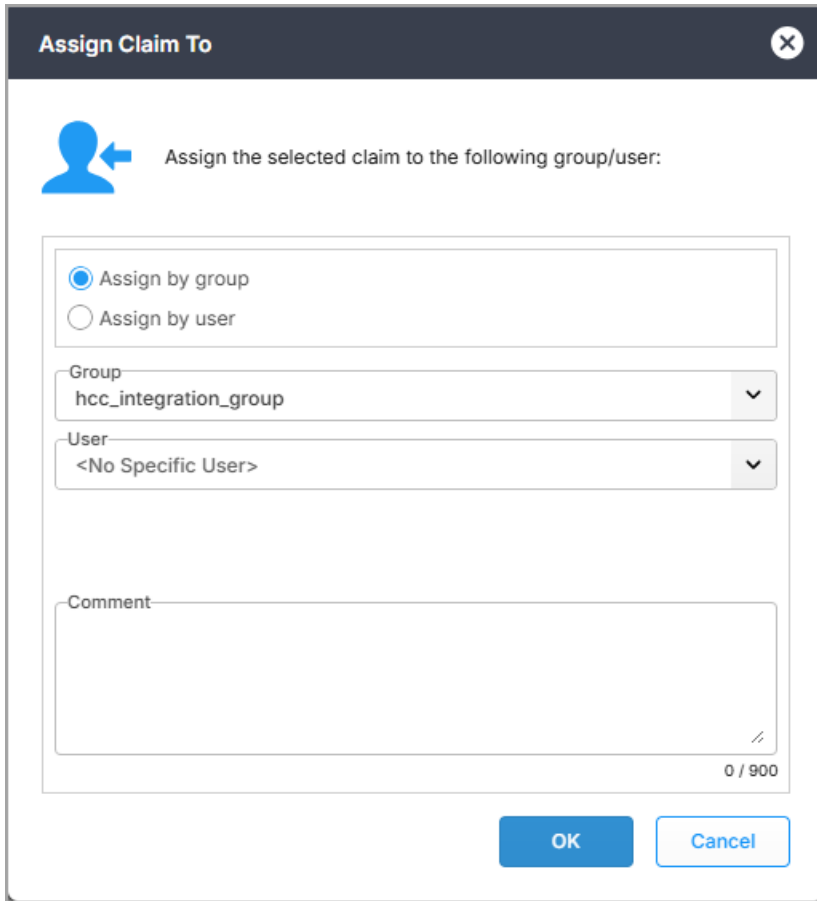

To assign a claim to another user:

- 1. Use search to finds the claim you want to work with.
- 2. Highlight the claim you want to work with.

- 3. Click **Assign**.

The Assign to Claim dialog is displayed.

The image shows a dialog box titled "Assign Claim To" with a close button (X) in the top right corner. Inside the dialog, there is a blue person icon with an arrow pointing to the text "Assign the selected claim to the following group/user:". Below this text, there are two radio buttons: "Assign by group" (which is selected) and "Assign by user". Under the "Assign by group" section, there is a "Group" dropdown menu currently showing "hcc_integration_group". Below that is a "User" dropdown menu currently showing "<No Specific User>". At the bottom of the form area is a "Comment" text box with a character count "0 / 900" at the bottom right. At the very bottom of the dialog are two buttons: "OK" and "Cancel".

4. Use the radio button to assign the claim to a user group or a user, then select the group and/or user from the respective drop-down lists. Enter any comments you want.

NOTE The Group and User dropdowns will convert to Group and User search lookup when the configuration parameters for Group search `DisplayGroupDropdownInClaimReviewRepairWorkbasket`, and for Owner search `DisplayOwnerDropdownInClaimReviewRepairWorkbasket` are configured in the `healthedge.manager.config` file as *"False."*

5. Click **OK** to save your work.

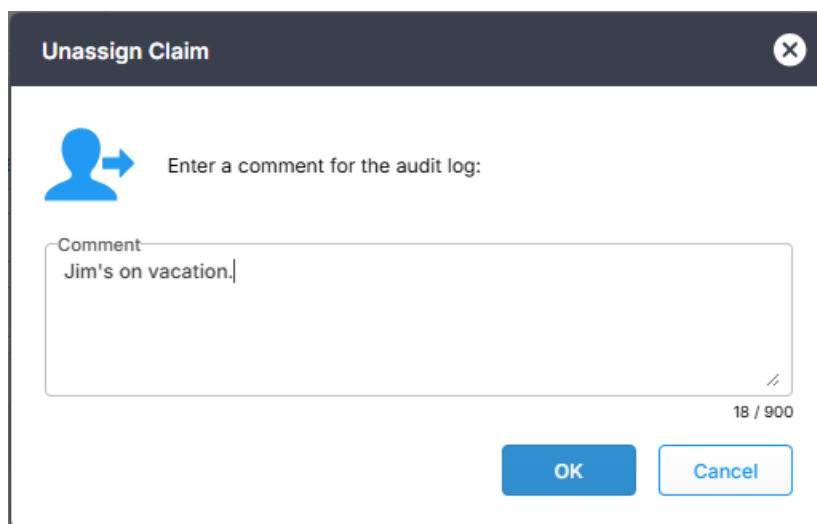

The claim is assigned to the specified group and/or user.

Unassign a User

To unassign a user from a claim:

1. Use search to find the claim you want to work with.
2. Highlight the claim you want to work with.
3. Click **Unassign**.

The Unassign Claim dialog is displayed.

The image shows a dialog box titled "Unassign Claim" with a close button (X) in the top right corner. Inside the dialog, there is a blue icon of a person with an arrow pointing right, followed by the text "Enter a comment for the audit log:". Below this is a text input field with the placeholder text "Comment" and the text "Jim's on vacation." entered. At the bottom right of the input field, there is a character count "18 / 900". At the bottom of the dialog, there are two buttons: "OK" and "Cancel".

4. Enter a comment (required) that describes why you are removing the claim from assignment to the user.

This comment will be included on the Audit Log.

5. Click **OK** to save your work.

Multi-Assign Claims

The Multi-assign claim tool allows you to select multiple claims and either assign or unassign them all at once.

To multi-assign claims:

1. On the Claim Review and Repair Workbasket page, click **Multi-Assign**.

The Workbasket Multi Assignment page is displayed.

 Rows per Page: 50
 Previous Page Button
 Select Number of Rows to Display Per Page (200 Rows Max)

3. Optionally, use the search filters and click **Refresh** to display just the claims you want to work with. You can click **Clear** to remove all entries in the filter fields.

Chapter 4: Claims Workbaskets

4. Select multiple claims. For example, click on a beginning claim in a range, then hold down the [Shift] key and click your mouse on the ending claim in the range. Or to select multiple, individual claims, click on the first claim, hold down the [Ctrl] key, and click all the other individual claims to select the ones you want.
5. When the claims you want are highlighted (selected), click either the **Assign** button to assign them to a group and/or user and go to step 6. If you click the **Unassign**, user assignments are removed from the selected claims.
6. On the Assign to Claim dialog, specify the user or group to which you want to assign the selected claims. Optionally, enter a descriptive message in the Comments field. This message will be displayed in the Audit Log for every claim you have selected for reassignment.

View Your Assignments

The screenshot displays the 'My Assignments' view in the Claims Workbasket interface. The interface includes a toolbar with buttons for Refresh, Clear Inputs, Rows per Page (set to 50), Take Ownership, Assign, Unassign, Multi Assign, My Assignments (highlighted), Review/Repair Info, View Rules, Edit Rules, Expedite, Misrouted Claims, and Export. Below the toolbar is a search and filter section with fields for Claim ID, Claim State, Claim Type, Claim Source, Trial Claim, External Claim, Owner, Group, Review/Repair Reason, Service Start Date, Service End Date, Supplier ID, Supplier Name, Member ID, Member Last Name, Member First Name, Account Name, and Review/Repair Reason Code. The main area is a table of claims with the following columns: Claim ID, Claim Type, State, Review/Repair Reason, Group, Owner, Member Name, Service Start Date, Receipt Date, Estimated Late Claim Date, Expedited, and Billed Amount. The table contains 10 rows of data. The bottom left corner shows 'Total assigned to user: 19'.

Set Up Claim Assignment Rules

You can set up rules by which claims are assigned to user groups. Each rule you create is assigned a number. When claims are assigned, they use the first number in the list first, followed by the next and so on, until an applicable rule is applied to the claim.

Rule processing is the best way to get records routed to the proper groups. At the HCC level you can define a default group that will get any unassigned item that doesn't match any rules. This group should be a group that has permissions to view, amend and transfer for all items so that no record goes un-viewable in the workbasket.

Unknown items will get processed by the rules in two ways; on save and if there is a scheduled run to process all workbasket items. Items that are assigned to a specific user will not get reassigned based on the rules. Once an item matches a rule and is processed it will not be evaluated by other rules. The rules process in order as they appear in the rule editor - so it is important to make sure the most specific rules are placed at the top of the list.

NOTE The workbasket assignment rule user interface reflects only the active groups/users for selection.

To create an assignment rule:

- 1. On the Claim Review and Repair Workbasket page, click **Edit Rules**.

The Workbasket Assignment Rules - Claims page is displayed.

Workbasket Assignment Rules - Claims - hcc_admin

| Conditions | Criteria | Edit |
|--------------------|---------------------|----------|
| Claim Type | Any Claim Type | Edit ... |
| Claim Sources | Any CodeEntry | Add ... |
| Claim Amounts Over | Any Amount | Edit ... |
| Accounts | Any Account | Add ... |
| Benefit Plans | Any BenefitPlan | Add ... |
| Business Segments | Any BusinessSegment | Add ... |
| Carriers | Any Carrier | Add ... |
| Members | Any Membership | Add ... |
| Products | Any Product | Add ... |

- 2. Click **Add Rule** on the button bar at the top of the page. A new rule line is added to the Assignment Rules table. and the next sequential number is assigned to it.
- 3. Define the rule in the lower section of the page.
- 4. Change the rule name if applicable.
- 5. Select the rule type to define if the rule applies to both review and repair claims, or just review or repair claims.
- 6. In the Assign To field, select the group to which to assign the claim, if applicable.
- 7. Select conditions for the rule. Click **Edit** or **Add** next to the condition to change or add for the current rule. Some conditions allow you to add multiple items.

Chapter 4: Claims Workbaskets

For example, you can click **Edit** next to the Claim Type, and select a specific claim type, such as Professional. You could then click **Edit** next to Claim Amounts Over and then enter a threshold claim value (based on the billed amount), such as \$1500. Claims over the specified billed amount value will meet the rule. Using these two values can direct professional claims over \$1500 to a specific user or user group.

When multiple items exist, the **+** control is enabled next to the condition. Click the **+** control to display a list of items in it, and if applicable, remove them.

| Conditions | Criteria | Edit |
|---------------------------|---|-----------------|
| Claim Type | Any Claim Type | Edit ... |
| Claim Sources | External system pharmacy claims, External system medical claims | Add ... |
| CodeEntry | External system pharmacy claims | Remove |
| CodeEntry | External system medical claims | Remove |
| Claim Amounts Over | Any Amount | Edit ... |
| Accounts | Any Account | Add ... |
| Benefit Plans | Any BenefitPlan | Add ... |
| Business Segments | Any BusinessSegment | Add ... |

For example, if you click the **+** control next to Claim Sources, you might see a list of individual claim sources. You could click **Remove** next to a specific claim source to remove it from the rule.

8. Use other conditions in a similar fashion.

You can change the priority of one or more rules using the priority button on the right side of the page.

9. Click **Save** when done.

For additional Assignment Rules documentation, see *Manager Guide, Vol. 1: Getting Started*.

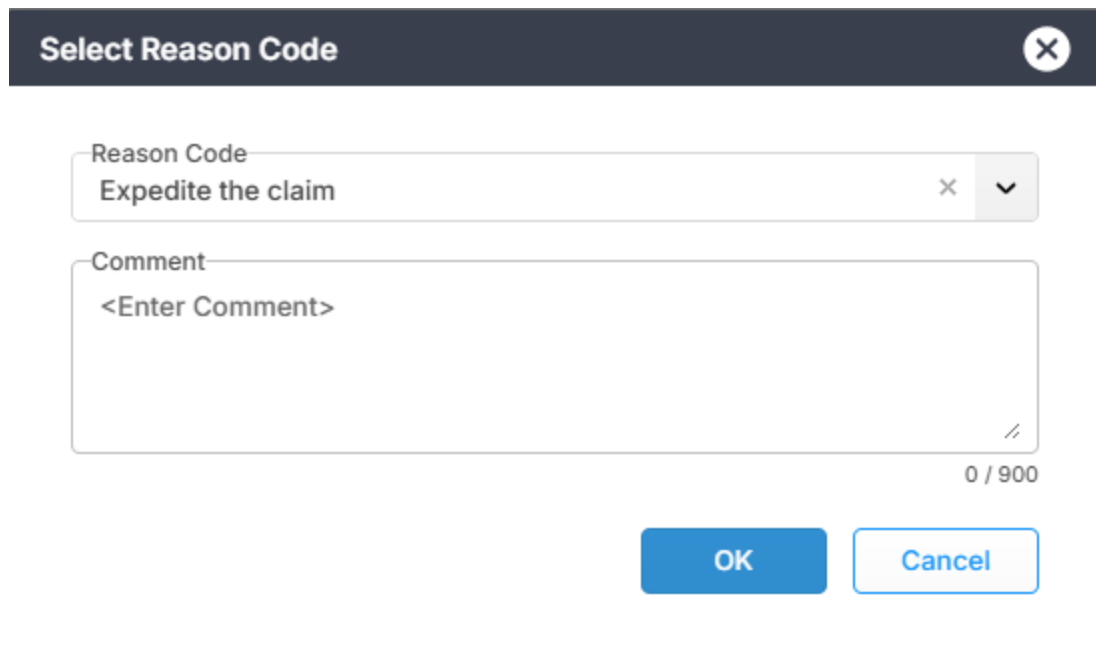

Expedite Claims From Review Repair Workbasket

You can mark a claim in the Claim Review and Repair Workbasket as “expedited” from either the Claim View page or the Claim Review and Repair Workbasket page so that claim processors are aware that the claim has been expedited by a supervisor and the claim is worked upon immediately to address the escalation/urgent attention it requires.

To expedite a claim from the Claims Review and Repair Workbasket, do the following:

1. Go to the Claim Review and Repair Workbasket and select the claim you want to expedite. It must have a “Needs Review” or “Needs Repair” status.
2. Click the **Expedite** button on the toolbar as shown in the illustration below.

The Select Reason Code dialog is displayed.

The image shows a dialog box titled "Select Reason Code" with a close button (X) in the top right corner. Inside the dialog, there is a "Reason Code" field with a dropdown menu showing "Expedite the claim" and a clear button (X). Below this is a "Comment" text area with the placeholder text "<Enter Comment>" and a character count "0 / 900" at the bottom right. At the bottom of the dialog are two buttons: "OK" and "Cancel".

3. Select a reason code from the drop-down list and enter a comment, if desired.

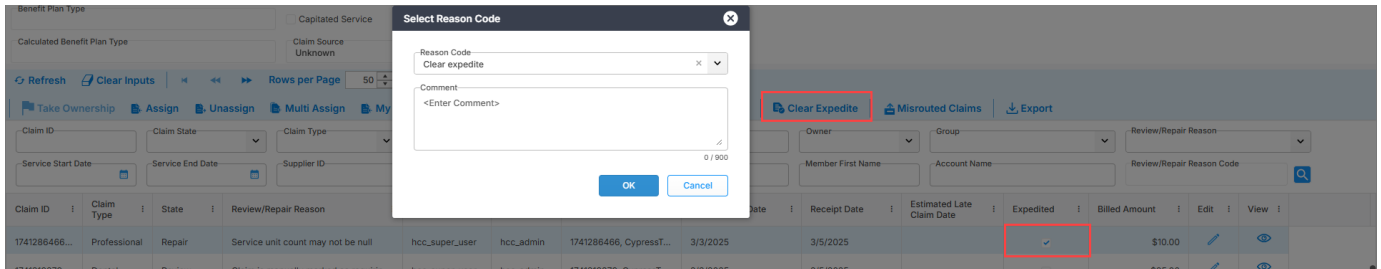

Reason codes in the Select Reason Code drop-down are user-defined as code entries in the ExpediteClaimReason Code Set. Reason codes and comments attached to a claim are displayed on the Claim Audit Log tab.

4. Click **OK**.

The claim will be marked with an expedite status.

When a claim has been expedited the Expedite checkbox for that claim in the Expedited column of the workbasket will be selected (see illustration above).

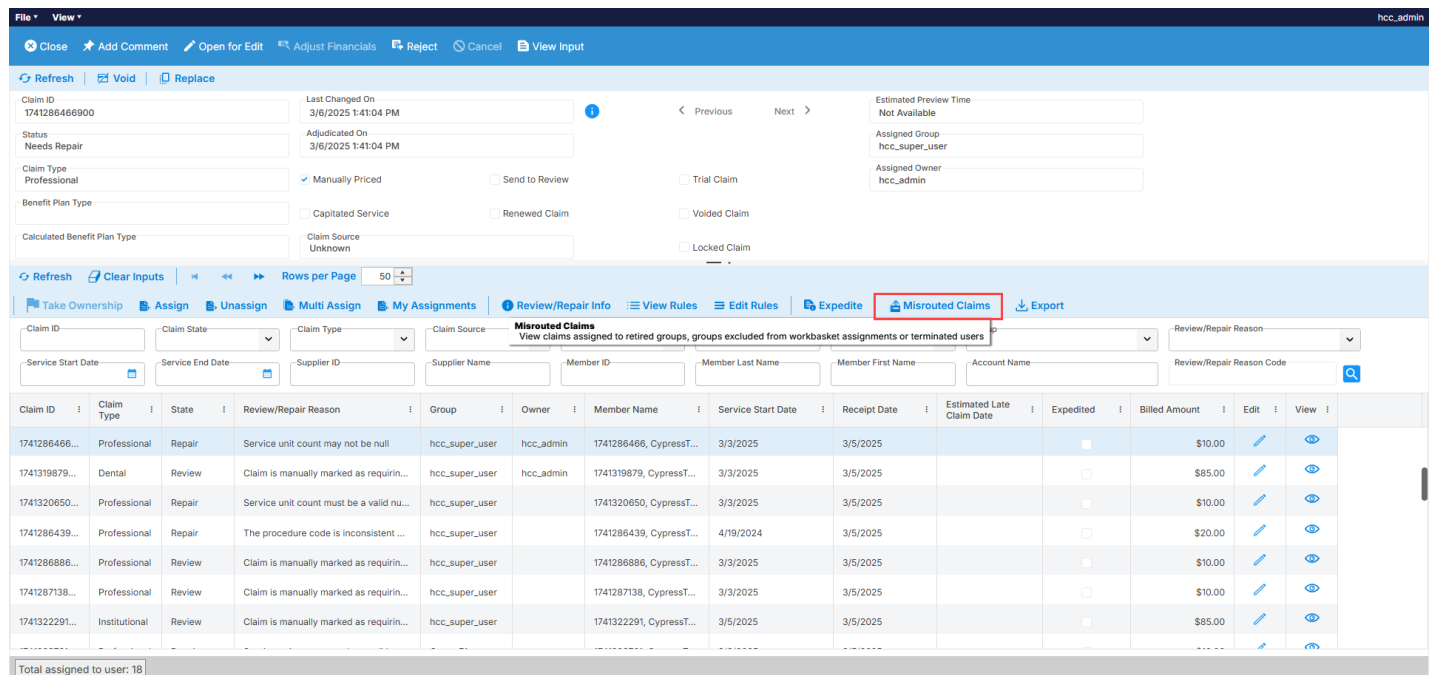

NOTE You can clear the expedited status by clicking the **Clear Expedite** button in the toolbar as shown below.

View Misrouted Claims

Misrouted claims are claims that need review or repair, and satisfy at least one of the following conditions:

- The claim is assigned to a terminated user
- The claim is assigned to a retired group
- The claim is assigned to a group marked as excluded from workbook assignments.

Misrouted Claims button helps to view the misrouted claim records as a supervisor of the associated owner/user/groups that are now retired or terminated. When you click the button, the Misrouted Claims page opens:

Workbasket Misrouted Claims - hcc_admin

NOTE

The claims displayed on the Misrouted Claims dialog are the claims assigned to the groups that the user supervises.

The Supervisor user only has the read-only permissions for the Misrouted Claims dialog.

For field/filter details, see ["Claim Review and Repair Workbasket Page" below](#).

Claim Review and Repair Workbasket Page

Claims are sent to the Claims Review and Repair Workbasket for a variety of reasons, including those that are:

- marked for review on the claim entry form
- missing information required to successfully submit them for processing
- associated with a specific account, member or supplier that are under review

Chapter 4: Claims Workbaskets

- special claims, such as high dollar amount

Total assigned to user: 18

The Claim Review and Repair Workbasket page allows you to select a claim, view it, make edits to certain areas of the claim, or make claims financial changes, if applicable, and then approve it. You also have the ability to deny the claim.

When successfully approved it is removed from the workbasket and submitted for processing.

This workbasket includes the ability to assign claims to a user or users of a pre-defined group, if you have permission to do so, or to select a claim and assume ownership of it.

Claim Search Filters

You can use a number of fields to filter the claims you want to work with.

| Field | Description |
|--------------|--|
| Claim ID | Limit the search to a specific claim ID. |
| Claim State | Limit the search to claims with a repair or review state. |
| Claim Type | Limit the claim search by Claim Type: Dental, Professional, or Institutional. |
| Claim Source | Limit the claim search by Claim Source. These selections are code entries. For example, External Medical Claims, Pharmacy, or some other code entry. |

| Field | Description |
|-------------------|---|
| Trial Claim | <p>Limit the claim search to regular claims, trial claims, or both.</p> <p>To display only trial claims, select Yes in the Trial Claim field and then click Search.</p> <p>To display only regular claims, select No in the Trial Claim field and then click Search.</p> <p>To display both trial claims and regular claims, do not select a value in the Trial Claim field, select another search criteria and then click Search.</p> <p>You can add a column to show which claims are trial claims by right-clicking in the table heading area and selecting Column Chooser > Trial Claim. Trial claims are marked with a checkbox in the Trial Claim column.</p> |
| External Claim ID | <p>Limit the search by External Claim ID (SCCF#). Enter one or more starting characters of the External Claim ID, and search to return all claims that start with those characters.</p> <p>For BlueCard claims, the External Claim ID is the SCCF#.</p> <p>If the claim is a "converted claim", the claim number is the external claim number.</p> <p>To display the External Claim ID in the Search Results, use the Column Chooser.</p> |
| Owner | <p>From the dropdown list box, select an owner that has been assigned items in the workbasket.</p> <p>Note: The list will only show users with the ClaimAction.View permission.</p> <p>When you click Refresh, the search results will include only workbasket items that have been assigned to the selected owner.</p> <p>The Owner search dropdown will convert to Owner Search lookup, when the configuration parameter <code>DisplayOwnerDropdownInClaimReviewRepairWorkbasket</code> in the <code>healthedge.manager.config</code> file is set to <i>False</i>.</p> |
| Group | From the dropdown list, select the group that has been assigned |

| Field | Description |
|---------------------------|---|
| | <p>items in the workbooket.</p> <p>Note: The list will only show groups with the ClaimAction.View permission.</p> <p>When you click Refresh, the search results will include only workbooket items that have been assigned to the selected group.</p> <p>The Group search dropdown will convert to Group Search lookup, when the configuration parameter <code>DisplayGroupDropdownInClaimReviewRepairWorkbooket</code> in the <code>healthedge.manager.config</code> file is set to <i>False</i>.</p> |
| Review/Repair Reason | <p>The review repair reason and review repair reason code search filters allow a workbooket user to search for claims that have a specific review repair reason code attached to them.</p> <p>Each search filter provides a different way to search for a reason code.</p> <p>The Review Repair Reason filter allows the user to type in the code value, short description, or domain of the reason code being sought.</p> <ul style="list-style-type: none"> ■ As the user types, the list of reason codes that contain the typed string/value starts to appear. The user can then select one of the codes to use in a claim search. ■ The review repair reason field searches against most of the claim-related reason codes but does not search against the entire universe of code set domains in HealthRules. <p>When searching for claims that have a particular reason code attached, it is faster and easier to use the Review/Repair Reason drop-down, instead of the Review/Repair Reason Code drop-down.</p> |
| Review/Repair Reason Code | <p>The Review/Repair Reason Code drop-down allows the user to search across all code set domains but requires more clicks to do so and might take longer to search.</p> <p>The review repair reason code filter presents the user with the standard HealthRules search dialog box.</p> |

| Field | Description |
|------------------------|---|
| | <ul style="list-style-type: none"> ■ The user can enter the specific code value, the code set name (domain), and/or any part of the code's short description to find the desired reason code. ■ The review repair reason code field can search against the entire universe of code set domains but can take longer to return the results due to the same. <p>Note: Only one of the two search filter fields can be used at a given time.</p> |
| Service Start/End Date | Limit the search to those claims that fall within a range of service dates by entering the starting and ending service dates. |
| Supplier ID | Limit the search to a specific supplier ID. |
| Supplier Name | Limit the search to a specific supplier Name. |
| Member ID | Limit the search to a specific Member ID. |
| Member Last Name | Limit the search to a specific Member Last Name. |
| Member First Name | Limit the search to a specific Member First Name. |
| Account Name | Limit the search to a specific Account Name. |

Search Results

| Field | Description |
|---------------------------|---|
| Claim ID | Limit the search to a specific claim ID. |
| (Claim) State | Limit the search to claims with a repair or review state. |
| Claim Type | Limit the claim search by Claim Type: Dental, Professional, or Institutional. |
| Days Since Receipt | The number of days since the claim was received (calculation based on the Current Date - Claim Receipt Date). |
| Receipt Date | The claim receipt date. |
| Review/Repair Reason Code | <p>The code associated with the review or repair reason assigned to the claim.</p> <p>Note: This column is not available by default but can be added using the Column Chooser.</p> |
| Review/Repair Reason | The description associated with the review or repair reason assigned to the claim. |

| Field | Description |
|--------------------|---|
| Group | The group to which the claim is assigned. |
| Owner | The owner to which the claim is assigned. |
| Expedited | If the checkbox is selected, the claim has been expedited by a supervisor. This indicates to claim processors that the claim is to be worked upon immediately to address the escalation/urgent attention it requires. |
| Billed Amount | The billed amount of the claim. |
| VIP | If this is a VIP claim, the checkbox is selected. |
| Edit button | Click Edit on the claim line to open the Claim Edit page for the claim. |
| View button | Click View on the claim line to open the Claim View page for the claim. |
| Actions | This column only shows when the preview pane is hidden. Click the icon in the column to view the available actions for the claim. The actions are based on the state of the claim and your permissions. |
| Account | The account associated with the claim. |
| Benefit Plan | The benefit claim associated with the claim. |
| Capitated Service | If this claim is part of a capitated service, this checkbox is selected. |
| Claim Source | The claim source, for example an external system claim. |
| Days in Workbasket | The number of days this claim has been in the workbasket. |
| Last Modified By | The user ID of the user that last modified the claim |
| Last Modified Date | The date on which the claim was last modified. |
| Member ID | The member ID of the member associated with this claim. |
| Member Name | The name of the member associated with this claim. |
| Paid Amount | The total amount paid on the claim. |
| Practitioner | The name of the referring practitioner on the claim. |
| Product | The name of the product. |
| Rule Name | If an assignment rule is applied to the claim, the name of the rule. |
| Service Start Date | The service start date on the claim. |
| Supplier | The supplier name on the claim |

| Field | Description |
|------------------|--------------------------------------|
| Supplier ID | The supplier ID. |
| Transaction Type | The transaction type, such as claim. |

Claim Review and Repair Push Flow Workbasket

The Claim Review & Repair Push Workflow workbasket mimics the Claim Review & Repair workbasket, and displays claims that failed adjudication and require repair or claims that are automatically "pending" for review. However, this workbasket allows you to work through the items in the workbasket using the "push" workflow. The "push" workflow automatically displays the next highest priority claim in the queue for review. The push workflow allows you to quickly access the next highest priority claim you have permission to view without having to search or click to access the next claim. The next highest priority claim is based on the owner of the claim (unassigned, assigned to user and assigned to the Push to Claim Review Repair Overflow workbasket group), and is then ordered on the oldest to newest receipt and endorsement dates.

You can access claims you have permission to view, and then void, deny or approve for adjudication. If successfully approved, the claim is removed from the workbasket and is submitted for processing. The workbasket then displays the next highest priority claim in the queue.

If the next claim needs additional information to approve or further review, you can assign to a specific user or group, or skip the claim and automatically move to the next claim. Skipping a claim will automatically reroute to the group set in the Push to Claim Review Repair Overflow Workbasket Group. However, if a group is not set, the claim is routed to the default workbasket assignment group set in HealthRules Designer.

For more information about working with the Claim Review and Repair Push workflow workbasket, see the following:

- ["Accessing the Claim Review & Repair Push Workflow Workbasket" on the facing page](#)
- ["Approving a Claim in the Claim Review & Repair Push Workflow Workbasket" on page 4-37](#)
- ["Denying a Claim in the Claim Review & Repair Push Workflow Workbasket" on page 4-40](#)
- ["Skipping a Claim in the Claim Review & Repair Push Workflow Workbasket" on page 4-40](#)
- ["Assigning a Claim in the Claim Review & Repair Push Workflow Workbasket" on page 4-41](#)

Accessing the Claim Review & Repair Push Workflow Workbasket

You can access the Claim Review & Repair Push Workflow workbasket using one of the following methods:

- Workbasket menu > Claim Review & Repair Push Workflow
- Toolbar > **Workbasket** icon > Claim Review & Repair Push Workflow
- Workbasket page > View menu > Claim Review & Repair Push Workflow

The screenshot displays the 'Claim Review & Repair Push Workflow' workbasket. At the top, a blue toolbar contains icons for 'Close', 'Add Comment', 'Open for Edit', 'Adjust Financials', 'Deny', 'Cancel', 'View Input', 'Skip Claim', and 'Assign Claim'. Below the toolbar, a light blue header bar includes 'Refresh', 'Void', and 'Replace' buttons. The main area is a form with several sections: 'Claim ID' (def-b87c-a9c75c3b1aaa), 'Status' (Needs Review), 'Claim Type' (Institutional), 'Benefit Plan Type' (Medical), and 'Claim Source' (Unknown). There are also fields for 'Last Changed On' (4/4/2025 1:31:28 PM) and 'Adjudicated On' (10/19/2024 2:42:54 PM). A 'Member' section at the bottom shows details for 'Jose Mohammed'. The interface is complex with many fields and checkboxes, typical of a professional software application for claims management.

Fields and Commands

| Fields/Commands | Descriptions |
|-----------------------------|---|
| Claim Action Toolbar | |
| Close | Closes the Claim Review & Repair Push Workflow workbasket and returns to the main application screen. |
| Add Comment | Allows you to enter a comment about the claim you are currently viewing. |
| Open for Edit | Allows to make changes to the claim. |
| Adjust Financials | This option is available for claims in final and denied status, |

| Fields/Commands | Descriptions |
|------------------------------|---|
| | and allows to adjust the financial data on the current consolidated claim. |
| Reject/Deny | Allows to deny a claim. |
| Cancel | This option is available for claims in repair, only if there is a previous version of the claim. This operation is the same as canceling a claim from Transaction Manager and deletes the 'current' version that needs repair. |
| View Input | Allows to view the original claim form associated (through EDI or manual entry) with the current consolidate claim. Any changes made to the consolidate claim does not reflect on the original claim. |
| Skip Claim | <p>Allows to skip a claim and move to the next highest priority claim in the queue. Skipping a claim reroutes the claim to the group defined in the Push to Claim Review Repair Overflow Workbasket Group. For example, you can skip a claim if you do not have the information required to edit and repair for adjudication.</p> <p>Note: If a group is not set up, the skipped claim is routed to the default workbasket assignment group set in HealthRules Designer.</p> |
| Claim Summary Section | |
| Claim ID | The unique identifier assigned by the system (as defined in the HCC Claims ID Generation Rules provision). |
| Status | <p>Indicates the status of the claim. The claim statuses include:</p> <ul style="list-style-type: none"> Consolidated – the incoming claim (from either claim entry, or electronic EDI-837 submission) is successfully matched to data in the HealthRules database and transformed into the standardized HealthRules format for adjudication. Needs Repair – the claim is flagged for repair during the data validation process. Needs Review – the claim is flagged for review during the data validation process. Rejected – the claim is rejected during the data validation |

| Fields/Commands | Descriptions |
|------------------------------|---|
| | <p>process. The claim must be re-submitted.</p> <ul style="list-style-type: none"> ▪ Denied – the claim is denied. ▪ Final – the claim is adjudicated and finalized. ▪ Needs Repricing – the claim is flagged as requiring repricing during the adjudication process. |
| Claim Type | Indicates the claim type that include dental, professional or institutional. |
| Benefit Plan Type | Indicates the benefit plan type as captured on the supplier invoice (for example, medical or dental). |
| Calculated Benefit Plan Type | Indicates the benefit plan type determined by member matching (for example, medical or dental). |
| Last Changed On | <p>The most recent date and time the claim was updated. Claim updates are captured as transactions and updates the date and time on the field with the latest transaction date and time. For example, adjusting a claim updates the date and time on the 'Last Changed On' field to indicate the old claim version is no longer current but retains the date and time on the 'Adjudicated On' field in the previous version because the claim is not reprocessed. The previous version was modified, but not adjudicated.</p> <p>In some instances, the system may continue updating the claim after adjudication and display a date and time on the 'Last Changed On' field that is after the date and time on the 'Adjudicated On' field. For example, this includes instances like recording an audit log entry, triggering workbasket assignment rules to assign to a user, and more.</p> |
| Adjudicated On | The date and time the claim was last processed by the claim adjudication process. Adjudication is performed with any of the key actions such as submit, approve, reject, and deny. When opening a claim in review for edit, the claim typically auto-adjudicates and will also update the date and time on the field. |
| Manually Priced | Indicates that the claim is manually priced. For example, if you adjust the financial details, the claim is flagged as a |

| Fields/Commands | Descriptions |
|--------------------|---|
| | manually priced claim and cannot be automatically repriced again. |
| Capitated Service | Indicates that the claim is for a capitated service where it pays a physician or group of physicians a set amount for each enrolled person assigned to them for a set period, regardless of whether that person seeks care. |
| Send to Review | Indicates that the claim is sent to the review basket. |
| Encounter | Indicates that the claim is an encounter. |
| Renewed Claim | Indicates that the claim is converted to a renewed claim (see "Converted, Renewed, and Delegated Claims" on page 1-22.) |
| Claim Source | Indicates the source of the claim. For example, pharmacy, external system medical claim or user-defined code entry. |
| Previous | Allows to view the previous version of a claim, if available. |
| Next | Allows to view an updated version of the claim, if available. |
| Group | <p>Indicates the group associated with the claim. For example, when a claim is skipped, the claim is moved to the group set on the Push to Claim Review Repair Overflow Workbasket Group and displays that group name.</p> <p>Note: The user working with the push workflow must be a member of the group selected. The group must have the review and/or repair permissions AND the Workbasket Transfer permission to receive the skipped claims.</p> |
| Owner | Indicates the owner associated with the claim. |
| Last Changed On | Indicates that the claim is voided. A claim can be voided manually or electronically. |
| Claims Tabs | |
| Header | Displays the basic information about the member, provider and more. |
| Lines | Displays summary information about each line of the claim. |
| Summary | Displays a summarized view of commonly reviewed claim information. |
| Exceptions | Displays any errors in the claim that require review or repair. |
| Financial History | Displays transactions and payment activity associated with the claim. |

| Fields/Commands | Descriptions |
|------------------|--|
| COB | Displays claim and line level coordination of benefit information that was submitted from one or more insurance carriers. |
| Repricer Outputs | Displays repricing information for each claim line. |
| Issue Tracking | Displays issues related to the claim. |
| Attachments | Displays supplementary documents attached to the claim. |
| Episodes of Care | Displays all episodes of care associated with the claim (see "About Episodes of Care and Reprocessing" on page 1-31). |
| Claim UDT | Displays attribute values for UDTs defined at the claim level. |
| Line UDT | Displays attribute values for UDTs defined at the claim line level. |
| Audit Log | Displays summary information of changes made to a claim. |

Approving a Claim in the Claim Review & Repair Push Workflow Workbasket

The Claim Review and Repair Push Workflow Workbasket allows you to make necessary changes, approve and submit the claim for adjudication.

The options available when editing a claim is based on the permissions associated with your user account or groups. For example, options such as **Add Comment**, **Approve**, and **View Input** are available if you have the approve only permissions (see ["Approve a Claim \(Approve Only Permission\)" on page 4-12](#)).

When a claim is edited, you can view the impact of the changes on the claim by clicking the **Preview Results**. The results display changes made to the claim, including adjudication, calls to prospective payment systems like Easygroup and 3M, and external claim editing services, such as Optum's CES and McKesson's ClaimsXten.

To approve a claim:

- 1. Access the Claim Review & Repair Push Workflow workbasket.
- 2. Click **Open for Edit** on the toolbar. The Edit Claim dialog is displayed.

Submitted Member Information

4. (Optional) Click **Preview Results** to see the impact of the edits on the claim.
5. Click **Submit**. The Select Reason Code dialog is displayed.
6. Select a reason and click **OK**. The Edit Claim dialog is displayed.
7. Click **Approve**. The Select Reason dialog is displayed. If there are codes that need review, the Approve Review Code dialog is displayed.
8. Select the checkbox next to the codes you want to approve.

NOTE If a claim has any unapproved review codes, a warning message is displayed with the option of retaining ownership of the claim or returning to the Approve Review Codes dialog to make additional changes.

9. Click **OK**. The claim is removed from the Claim Review and Repair Push Workflow Workbasket and displays the next highest priority claim in the queue. Once all claims in the queue are repaired and submitted, a message displays indicating that there are no claims to work in your queue.

Denying a Claim in the Claim Review & Repair Push Workflow Workbasket

You can deny a claim in the Claim Review and Repair Push Workflow workbasket when it is in "Review" state.

To deny a claim in the workbasket:

1. Access the Claim Review & Repair Push Workflow workbasket.
2. Click **Deny** on the toolbar. The Select a Denial Reason dialog box is displayed.
3. Select a deny reason code from the drop-down list. The denial reason is applied to all lines of the claim.

NOTE If you want to adjust the deny reason for a *specific* claim line, you can open the denied claim for edit and then go to the Manual Override section to make your changes (see ["Working with Claim Denials" on page 2-47](#)).

4. Click **OK**.

Skipping a Claim in the Claim Review & Repair Push Workflow Workbasket

You can skip a claim in the Claim Review and Repair Push Workflow workbasket and go to the next highest priority claim in the queue. The next highest priority claim is based on the owner of the claim (unassigned, assigned to user and assigned to the Push to Claim Review Repair Overflow workbasket group), and is then ordered on the oldest to newest receipt and endorsement dates.

The skipped claim is automatically routed to the group defined in the Push to Claim Review Repair Overflow Workbasket Group in HealthRules Designer for further review. However, if a group is not set the claim is routed to the default workbasket assignment group set in HealthRules Designer.

NOTE If working with the push workflow, you must be a member of the group selected. The group must have the review and/or repair permissions AND the Workbasket Transfer permission to receive the skipped claims.

To skip a claim:

1. Access the Claim Review & Repair Push Workflow workbasket.
2. Click **Skip Claim** on the toolbar or press **CTRL+K**. The claim is removed from the Claim Review and Repair Push Workflow Workbasket and you are displayed the next highest priority claim in the queue.

Assigning a Claim in the Claim Review & Repair Push Workflow Workbasket

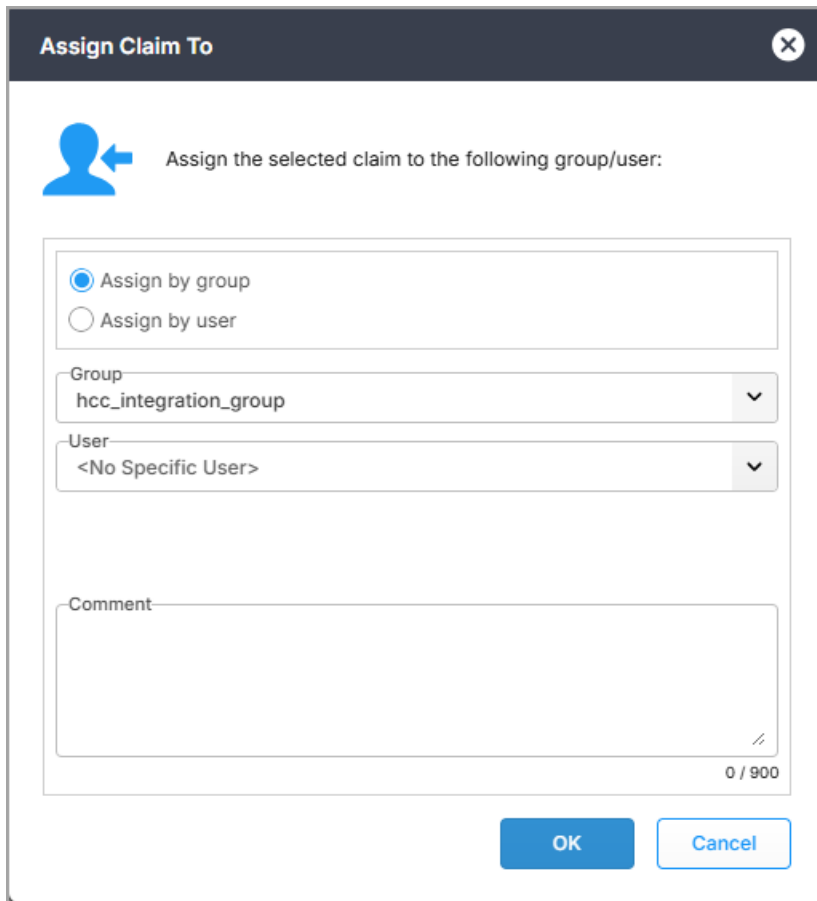

You can assign a claim in the Claim Review & Repair Push Workflow workbasket to a specific user or group that has permission to view the claim. For example, you can assign a claim if you do not have the information required to edit and repair for adjudication and send to a supervisory group for review.

To assign a claim:

1. Access the Claim Review & Repair Push Workflow workbasket.
2. Click **Assign Claim** on the toolbar.

The Assign Claim To dialog box is displayed.

3. Select Assign by group or Assign by user, and select the specific user or group based on your selection.

The image shows a dialog box titled "Assign Claim To" with a close button (X) in the top right corner. Inside the dialog, there is a blue person icon with an arrow pointing to the text "Assign the selected claim to the following group/user:". Below this text, there are two radio buttons: "Assign by group" (which is selected) and "Assign by user". Under the "Assign by group" option, there is a dropdown menu labeled "Group" with the value "hcc_integration_group" and a downward arrow. Below the "Group" dropdown, there is another dropdown menu labeled "User" with the value "<No Specific User>" and a downward arrow. At the bottom of the dialog, there is a text area labeled "Comment" with a character count "0 / 900" at the bottom right. At the very bottom of the dialog, there are two buttons: "OK" and "Cancel".

4. Enter a note about the reassignment, if necessary.
5. Click **OK**.

Claim Work in Progress Workbasket

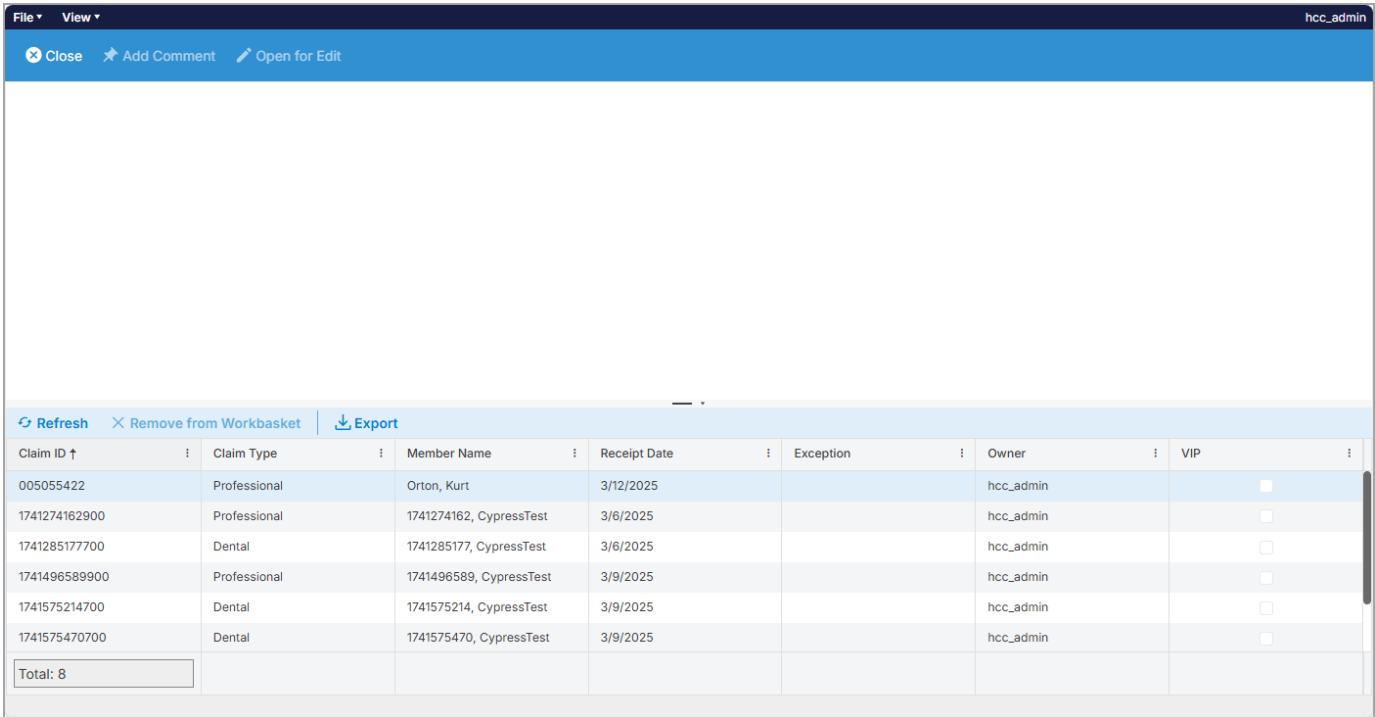

If you edit a finalized claim and then click **Close**, you will be prompted to save the claim to the Claim Work in Progress Workbasket. When a claim resides in your Work in Progress workbasket, it is locked to all other users. Only you can access it and make changes to it.

This section explains how to work with claims that have been sent to the Claim Work in Progress workbasket.

To open the Work In Progress workbooket:

- 1. Click on the **Work In Progress** option located in the Workbasket drop-down list as shown below.

The Claims Work in Progress Workbasket screen is displayed, with records that are in progress appearing at the bottom of the screen.

The command bar in the bottom portion of the page allows you to refresh the list with the most recent claims in progress, remove a selected claim from the workbooket, or export the claim to a file.

- 2. Click on a line of claim information to display the details of the claim in the upper section of the page.

You can click a tab to view information about the claim. Also, you can click one of the command bar buttons in the upper portion of the page to perform actions on the claim. For example, you can add a comment, open the claim for edit, or open a claim to edit just the financial section of the claim.

Refer to the table below for additional information.

| Screen Element | Description |
|---------------------------|------------------------|
| Upper Command Bar Buttons | |
| Close | Closes the workbooket. |

| Screen Element | Description |
|----------------------------------|--|
| Add Comment | Click to add a comment to the claim. |
| Open for Edit | Click to open the claim for edit. The Edit Claim page is displayed. Typically, you finish entering information on the claim and Save it. When it is saved it is removed from the workbasket and submitted for adjudication (see "Editing Claims" on page 2-21). |
| Adjust Financials | Click to adjust only the financial data for the selected claim. You need to have the proper authority to adjust claims financials (see "Adjusting Claims Financials" on page 2-42). |
| Deny | Click to deny the selected claim. The Select Denial Reason dialog is displayed. Here you select a reason from the drop-down list to indicate why the claim was denied. Click OK to accept the denial. The claim is removed from the workbasket but still resides in the system. |
| View Input | Click to display a view of the claim as it was originally entered. You cannot edit information while viewing a claim. |
| Lower Command Bar Buttons | |
| Refresh | Refreshes the list of records in the workbasket. |
| Remove from Workbasket | Removes the selected claim record from the workbasket. |
| Export | Click to export the search results to a file. The Export Search Results to a File dialog is displayed. Here you can enter a name for the file, indicate the folder in which to save the file, then save the file in either csv or xls format. |

Denying a Claim

For claim in a Work in Progress state, you can also deny the claim. Select a claim and click **Deny**. You then select a deny reason code that gets applied to all lines of the claim.

If you want to adjust the deny reason for a specific claim line, you can open the denied claim for edit and then go to the Manual Override section to make your changes (see ["Working with Claim Denials" on page 2-47](#)).

Claim Waiting for Locks Workbasket

The Claim Waiting for Locks workbasket lists claims that are currently locked and waiting to be processed. Claims might be locked by the system, for example, if another claim for the subscription is being edited. (If you are editing a subscription, new claims for that subscription will NOT be blocked.)

As soon as the cause for the lock is resolved, claims will automatically continue processing.

To open the Claim Waiting For Locks workbasket:

1. Click the **Claim Waiting for Locks** option located in the Workbasket drop-down list.

The application displays the Claim Waiting for Locks screen, with Claims Waiting for Locks appearing at the bottom of the screen.

2. Click **Refresh** to update the list with the claims currently waiting for locks. (Pressing the [Enter] key has the same impact as clicking Refresh.) Claims are removed from this list when the process holding the lock completes.

Claim Waiting for External System Workbasket

When HealthRules Payer is integrated with Cotiviti, which includes Coding Validation, if a response from Cotiviti includes a Coding Validation, the claim will be visible in Claim Waiting for External System workbasket. After the response clears and the Coding Validation edit is received, the claim will automatically continue the adjudication process.

If a response is not received within four hours, the claim will automatically be removed and all the Cotiviti edits will be cleared.

To open the Claim Waiting For External System workbasket:

- 1. Click the **Claim Waiting for External System** option located in the Workbasket drop-down list.

The Claim Waiting for External System workbasket screen is displayed, with claims waiting for a response from Cotiviti for coding validation appearing at the bottom of the screen.

- 2. Click **Refresh** to update the list with the claims currently waiting for a response from Cotiviti.
- 3. Click **Edit** on the selected claim or click the **Open for Edit** toolbar button to edit the claim.

NOTE Claims that are waiting in the Claim Waiting for External System Workbasket with no edits from Cotiviti are finalized and not sent for re-adjudication given the fact that no other claims against the same subscription are processed while being in the workbasket.

Claim Repricing Workbasket

Claims that require repricing are held in the Claim Repricing workbasket.

In the absence of supplier contract the system may send a claim to the repricing workbasket as part of adjudication in order to obtain the claim price from an outside vendor (Repricer), if the member's benefit contract specifies this.

You may open a claim for repricing, make manual changes to it, if needed, and resend it to the Repricer. There are two ways you can enter your repricing changes:

- Open a claim for edit, or select the claim from the Repricing Workbasket, then open the Repricer Outputs tab and make repricing changes to a summarized list of claim lines (recommended).
- Open a claim for edit, or select the claim from the Repricing Workbasket, then open the Line tab, select a line, and make changes on the line in the Repricer Output section.

For more information about repricing claims, see the following topics:

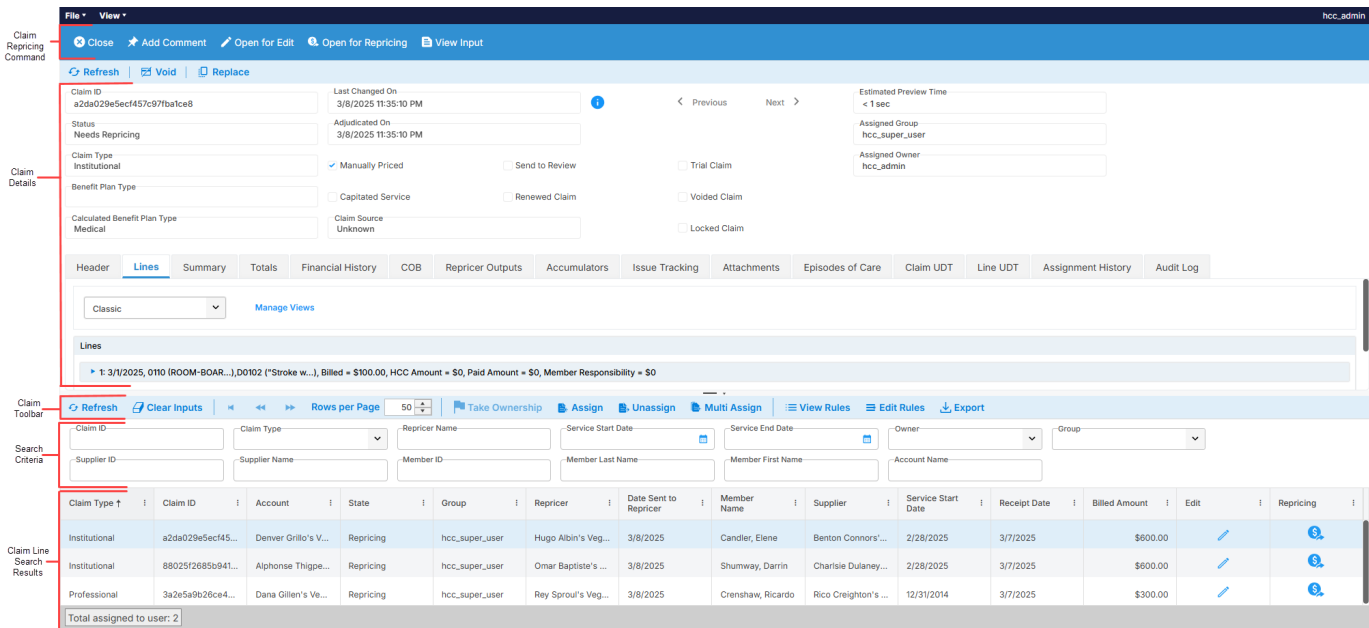

- [" About Claims Repricing" on page 1-42](#)
- [" Working with the Claim Repricing Workbasket " on the next page](#)
- ["Repricing Multiple Claim Lines on the Repricer Outputs tab" on page 4-49](#)
- ["Repricing a Selected Claim Line" on page 4-52](#)
- [" Repricing Claims via Electronic Feed " on page 4-54](#)
- [" Resending the Claim to the Repricer " on page 4-53](#)
- [" Editing a Claim from the Claims Repricer Workbasket" on page 4-54](#)
- ["Denying a Claim from the Claims Repricing Workbasket" on page 4-55](#)

Working with the Claim Repricing Workbasket

To open the Claim Repricing workbasket:

- 1. Click the **Claim Repricing** option located in the Workbasket drop-down list.

The Workbasket - Claim Repricing screen appears, with a list of claims requiring repricing displayed at the bottom of the screen.

- 2. Click once on a claim in the list to display claim summary information about the claim in the top portion of the screen.
- 3. To help you find the claim you want to work with, enter search criteria in the middle portion of the screen, such as Service Start and End Date, Claim Type, Repricer Name, or Supplier name, Owner or Group, and then click the **Refresh** toolbar button to display the filtered list of claims. (You can also press the [Enter] key which has the same effect as clicking Refresh.)

Repricing Claims

To open a claim for repricing:

1. Do one of the following:

- In the search results section, click the **Repricing** (🔍) icon on the claim line you want to reprice.
- Select the claim, display claim detail in the upper section of the page, and click the **Open for Repricing** toolbar button.

The Open for Repricing window is displayed, with the Repricer Outputs tab open.

The Repricer Outputs tab lists all the lines for the claim and the repricing information for each line. Here you can:

- Enter or override existing repricing data for claim lines, including allowed amount, repricing decision, and response date. When entering the Response date, you can click **Now** to quickly enter the current date and time.
- If no benefit or repricer has been entered, you can use search to find and select them.
- Resend for repricing, one or more claim lines that are marked with a repricing decision of "Waiting for Repricing" by clicking the **Resend** button for individual items, or click the **Resend All** button to resend all claim lines with the repricing decision of "Waiting for Repricing."

You can also change the repricer information on a specific claim line (see ["Repricing a Selected Claim Line" on page 4-52](#)).

Any changes you make in the Repricer Outputs tab will automatically be reflected in the Claim Line details Repricer Outputs section. Likewise, changes made on an individual claim line will automatically be made in the Repricer Outputs tab.

Once repricing information has been entered the claim can be submitted for adjudication.

To make repricing changes on the Repricer Outputs tab

1. The Repricer Outputs tab lists all the claim lines for the selected claim in a tabular view. To display additional information about the claim line, click the [+] control. The information includes the associated start/end dates, revenue codes, billed amount, and more.

Click the [-] control to hide the additional information.

Chapter 4: Claims Workbaskets

| Line # | Allowed Amount | Repricing Decision | Request Date | Response Date | Benefit Network | Repricer |
|--------|----------------|-----------------------|------------------------|---------------|-----------------|------------------------------|
| 1 | | Waiting for Repricing | 03/08/2025 11:35:10 PM | Now | | Hugo Albin's Vegan Food Cart |
| 2 | | Waiting for Repricing | 03/08/2025 11:35:10 PM | Now | | Hugo Albin's Vegan Food Cart |
| 3 | | Waiting for Repricing | 03/08/2025 11:35:10 PM | Now | | Hugo Albin's Vegan Food Cart |

| Start Date | End Date | Rev. Code | CPT/HCPCS | Billed Amount | HCC Amount | Paid Amount |
|------------|----------|-----------|-----------|---------------|------------|-------------|
| 3/1/2025 | 3/1/2025 | 0110 | D0102 | \$100.00 | | |

2. If applicable, enter or change the Allowed Amount.
3. Change or select the Repricing Decision from the drop-down list box. Selecting "Waiting for Repricing" enables the Resend control in the Resend column for the current line. You can then click the control to resend the individual claim line.
4. Change the Request Date, if applicable. Use the Calendar control to help you find and choose a date.
5. Change the Response Date. You can click **Now** to automatically enter the current date and time in the field. Or, you can use the Calendar control to help you find and choose a date.
6. If a benefit network has not been specified, you can use the Search control to find and select one.
7. If a repricer has not been specified, you can use the Search control to find and select one.
8. Click the **Resend All** button to resend all the claim lines with a repricer decision of "Waiting for Repricing" to the repricing.

When the claim has completed repricing, a message similar to the following is displayed in the Message Codes section under Line Details in the Line tab:

"The claim line has been repriced by REPRICER_XYZ".

This message also displays for electronically repriced claims.

9. When you are done making repricing changes, click **Submit** to readjudicate the claim.

Repricing a Selected Claim Line

To make repricing changes to a specific claim line:

1. Do one of the follow:

- In the search results section, click the **Repricing** () icon on the claim line you want to reprice.
- Select the claim, display claim detail in the upper section of the page, and click **Open for Repricing** on toolbar.

The Edit Claim page is displayed.

2. Click the Lines tab to open it.

3. Click the line you want reprice. It will expand it to show line information.

4. Scroll down to the Line Details panel, and open the Repricer Outputs panel.

5. Make one or more changes to the repricing information:

- Enter or change the Allowed Amount, if applicable,
- Select/change the Repricer Decision, such as Priced, Waiting for Repricing, etc. Selecting "Waiting for Repricing" enables the **Resend** button.
- If one is not already specified, you can search for/select a benefit network
- If one is not already specified, you can search for/select a repricer
- Enter or change the response date. Click **Now** to automatically enter the current date and time into the Response Date field.
- To resend the claim line for repricing, click **Resend**. This button is only enabled when the

Repricer Decision is "Waiting for Repricing."

The screenshot shows the 'Repricer Outputs' tab in a claims management system. The 'Repricer Outputs' section is highlighted with a red box. It contains the following information:

- Allowed Amount:** (Empty field)
- Request Date:** 03/08/2025 11:35:10 PM
- Repricer Decision:** Waiting for Repricing (with a dropdown arrow)
- Response Date:** (Empty field with a 'Now' button)
- Benefit Network Name:** (Empty field with a search icon)
- Repricer Name:** Hugo Albin's Vegan Food Cart (with a search icon and a 'Resend' button)

Below the 'Repricer Outputs' section, there are several other sections:

- Fee calculated for repricer:** Includes 'Repricing Provision' and 'Calculated Fee' (with a 'Repricer not used because of cap' checkbox).
- MessageCodes:** Includes an 'Add' button.
- Repricer Admin Charges:** (Empty field)
- Repricer Payment Charges:** (Empty field)
- Pricing Prior to External Claim Editing:** (Empty field)

- When done entering Repricing information, click **Submit**.

When the claim has completed repricing, a message similar to the following is displayed in the Message Codes section under Line Details in the Line tab:

"The claim line has been repriced by REPRICER_XYZ".

This message also displays for electronically repriced claims.

Resending the Claim to the Repricer

If a claim was transmitted to the Repricer, but does not come back from processing in the expected time, you can resend it to the Repricer.

You can resend the claim line(s) from either the Repricer Outputs tab, or from the Line Tab > selected claim line.

You can also resend the claim to the repricer while editing a claim.

To resend a claim for repricing from the Repricing Outputs tab:

1. Select the claim and click either the **Open for Repricing**

The Open for Repricing window is displayed with the Repricer Outputs tab open by default. If one or more lines on the tab has a repricing decision of "Waiting for Repricing", the **Resend All** button is enabled. Also, the resend control is enabled in the Resend column for each applicable claim line.

2. To resend all claim lines to the repricer, click **Resend All**.
3. To send an individual claim line to the repricer, click the Resend control () for that claim line.

To resend claim from the Lines tab:

1. If applicable, click the **Lines** tab to open it.
2. Open the line of the claim to be repriced.
3. Under the Line Details panel, open the Repricer Outputs panel.
4. Click **Resend**. (This button is only enabled if the repricing decision is "Waiting for Repricing.")

Repricing Claims via Electronic Feed

If claims have been set up to receive electronic updates directly from the Repricer, when they are submitted from claims entry, they are automatically sent to the Claim Repricing Workbasket, and are also sent electronically to the Repricer for processing. In this case, the claim can sit in the workbasket waiting for an electronic feed to come back from the Repricer to update the claim. Once the claim is updated, it is automatically submitted for adjudication.

Editing a Claim from the Claims Repricer Workbasket

To edit a claim in the Claims Repricing Workbasket, you can either:

- In the Search results grid, click the **edit** () icon on claim line you want to work with, or
- Select the claim from the results table at the bottom of the Repricing Workbasket window and click the **Open for Edit** toolbar button.

The Edit Claim page is displayed. You can make a number of changes to a claim, including making changes to repricing information (see ["Editing Claims" on page 2-21.](#))

Repricing claim lines through the Open for Edit feature

When Editing a claim, you can also change repricing information, but because you are making changes to a consolidated claim, the recommended work-flow is to:

- Select the claim you want to edit and click **Open for Edit**.
- Make your changes to the claim.
- Click **Preview**.
- Change repricing information either through the Repricer Outputs tab or by opening the claim line and then opening the Repricer Outputs section.
- Resend the repriced claim line(s), if applicable.
- Submit the claim.

Denying a Claim from the Claims Repricing Workbasket

You can deny a claim from the Claims Repricing workbasket by selecting the claim and clicking the **Open for Edit** button. On the Edit Claim page, you can click the **Deny** button to deny the claim, select a denial reason, and automatically apply that denial reason to every line on the claim.

Further, you can select a claim line and change the reason, if applicable, or remove the denial from a specific claim line, so that when the claim is submitted, claim lines that have not been denied are processed (see ["Working with Claim Denials" on page 2-47.](#))

To open the Reprocess Claims Workbasket, select the Reprocessed Claims option from the Workbasket menu or drop-down on the Main menu.

The Reprocessed Claims Workbasket contains claims that have been sent to the workbasket for review prior to processing. It also contains claims that have completed reprocessing, have failed, been canceled, or are currently processing.

If a claim fails to reprocess, you can hover your cursor over the claim to display a text box of failure details.

Claims that are specifically *excluded* from the workbasket because they are not reprocessed include: claims matching a service definition specified in the "Reprocess Claims" provision in HealthRules Designer, manually priced claims, claims that are specifically assigned to an owner, and claims that are currently open for edit.

The Reprocess Claims workbook allows you to:

- Display a list of claim reprocessing candidates by Triggering Event
- Approve specific "Needs Review" claims, or all "Needs Review" claims for reprocessing
- Reject specific "Needs Review" claims, or all "Needs Review" claims from reprocessing
- Filter the claims in the workbooket by Member or Supplier

- View the impact (financial or reporting) a reprocessed claim will have, by claim line, *before* it is reprocessed
- Compare before and after amounts of the reprocessed claims

For an overview of reprocessing claims, including information about how claims get sent to the Workbasket, see the ["Claim Reprocessing Overview" on page 1-28](#).

For additional information, see one of the following:

- ["Filtering Trigger Events/Claims in the Workbasket" on page 4-64](#)
- ["Previewing the Results of a Reprocessed Claim" on page 4-65](#)
- ["Rejecting and Submitting Claims" on page 2-109](#)

Fields and Commands

| Field/Command | Description |
|--|---|
| Claim Information - Top of Page | |
| Command Line | |
| Close button | Closes the Reprocessed Claim workbasket and returns you to the main application screen. Any changes you might have made to the reprocessing trigger are not saved. |
| Approve All button | Click to select the Approve checkbox next to all claims listed in the detail section. You can then remove the check mark for individual claims that you don't want to process, if needed. |
| Reject All button | Click to select the Reject checkbox next to all claims listed in the detail section. You can then remove the check mark for individual claims that you don't want to reject, if needed. |
| Clear All button | To remove check marks from both the Approve and Reject checkboxes for all claims in the detail section, click Clear . |
| Submit button | To submit claims that have been either approved or rejected, click Submit . |
| Filter By | To filter the claim / claim line information by member or supplier, select "Member" or "Supplier" from the drop-down list. Then, in the next drop-down list, select the specific member or supplier, or select "All" to include all members or suppliers in the filter. |

| Field/Command | Description |
|--|--|
| Claim Source | <p>To limit the claims displayed to a particular claim source, select a claim source from the Claim Source drop-down list. For example, you might select, "External System Pharmacy Claims."</p> <p>The Claim-Source drop-down shows only those claim sources for the claims in the Reprocessed Claim Workbasket for the selected trigger.</p> |
| Hide previously approved/rejected claims | <p>To hide all previously approved or rejected claims from view, select this checkbox. Otherwise, leave blank to include all.</p> <p>Note: If a claim fails and you want to view details on the failed claim candidate, make sure this checkbox is not selected.</p> |
| Export Claims button | Click this button to export claim information to an Excel file formatted file. All claims for the current event will be copied to the file. |
| Claims Tab | |
| Approve | <p>Select this checkbox next to each claim to approve it for reprocessing. When you click Submit, the selected claims are reprocessed. Click Approve All to select this checkbox for all listed claims.</p> <p>Click the Plus icon to display all the claim lines by Benefit Plan for the claim.</p> |
| Reject | Select this checkbox next to each claim to reject it from reprocessing. When you click Submit , the selected claims are specifically not reprocessed. Click Reject All to select this checkbox for all listed claims. |
| Claim ID / Start Date | <p>The claim ID and start date of the claim is displayed.</p> <p>When you click the linked Claim ID, the Claim Preview page is opened so you can see a <i>preview</i> of the reprocessed claim.</p> <p>Note: you should close the Claim Preview page prior to taking any other action on the claim.</p> |
| # Lines | The total number of claim lines in the claim. |
| Lines Changed | The number of claim lines that will be impacted by reprocessing the claim. |

| Field/Command | Description |
|-----------------------|--|
| EOC | If checked, the checkbox indicates that the claim was reprocessed because of an episode of care reference change and the reprocessing impact was "financial" (see "Impact" below). (see "About Episodes of Care and Reprocessing" on page 1-31). |
| Claim Source | The source of the claim. Examples might be "external system pharmacy claim," "external system medical claim." Claim sources are user-defined as code entries in the ClaimSource code set. |
| Patient | The patient name and ID on the claim.

Click the linked name to display the Subscription View page for the member. |
| Supplier | The supplier name and ID on the claim.

Click the linked name to display the Supplier View page. |
| Failure Detail | If a candidate for reprocessing failed, this field displays failure detail about the failed candidate. If you hover over the field, it will display additional "stack trace" information that can be used by HealthRules Customer Support to identify why the claim failed to reprocess. |
| Impact | The impact of reprocessing on the claim, either financial or reporting only. A financial impact means that Totals for the claim will be recalculated. Reporting only means that no totals need to be recalculated, but other information about the claim will be updated. |
| Before Amounts | The Allowed amount, Paid amount, and Member responsibility amount on the claim <i>before</i> reprocessing. |
| After Amounts | The Allowed amount, Paid amount, and Member responsibility amount on the claim <i>after</i> reprocessing. |
| Net | The net amount of change from before and after totals for Allowed, Paid and Member Responsibility amounts. |
| Details by Claim Line | |
| Line # | The claim line number. |
| Benefit Plan | The benefit plan associated with the claim. |
| Service Date | The claim line service date. |

| Field/Command | Description |
|---|--|
| Revenue Code | The revenue code associated with the claim line. |
| Service Code | The service code associated with the claim line. |
| Billed Amount | The billed amount of the claim line. |
| Attributes by Benefit Plan | |
| Attribute | The attribute such as HCC amount, paid amount, co-payment, member responsibility, benefit label, or system/user messages. |
| Impact | Indicates if the attribute has a financial or reporting only impact.

For more information see table below "Claim Line Fields: Financial Impact and/or Reporting Only Impact" table below. |
| Multiple Charge(s) | A check in this checkbox indicates that there may be multiple charges associated with this attribute. An example of this case is the "Review/Repair Exceptions" attribute. |
| Before | Before value or attribute. |
| After | After value or attribute. |
| Before Amounts | Before value or attribute identifier (e.g., supplier contract name) |
| After Amounts | The amount after reprocessing. |
| Net | The net amount of the claim line reprocessing change. |
| Reprocessing Claims List - Bottom Page | |
| Command Line | |
| Refresh button | To update the list of claims with the most up to date information, and/or apply filters such as Trigger Status, Supplier ID, Member ID, etc., click Refresh . |
| Clear button | Click to remove any selected Approve or Reject checkbox selection. |
| Paging Controls | Use the Arrow buttons, when active, to page up or down through claim information. |
| Rows Per Page | Enter the number of rows per page to display. The default is 50. |
| Export | To export the list of claims in the Reprocess Claims workbook, click Export . The Export Search Result of a File dialog is displayed. Here you can select a folder and file name |

| Field/Command | Description |
|-------------------------|---|
| | for the exported file. You can save the file in either <code>.xls</code> , or <code>.csv</code> format. |
| Filters | |
| Trigger Status | To limit the claims listed at the bottom of the page by Trigger Status, select the status from the drop-down list. |
| Supplier ID | To limit the claims listed at the bottom of the page by supplier ID, enter the Supplier ID in the text box. |
| Supplier Name | To limit the claims listed at the bottom of the page by supplier name, enter the supplier name in the text box. |
| Member ID | To limit the claims listed at the bottom of the page by member ID, enter the member ID in the text box. |
| Member Last Name | To limit the claims listed at the bottom of the page by member last name, enter the member's last name in the text box. |
| Member First Name | To limit the claims listed at the bottom of the page by member first name, enter the member's first name in the text box. |
| Payment Transaction No. | To limit the claims listed at the bottom of the page by payment transaction number, enter the payment transaction number in the text box. |
| Claim Grid | |
| Trigger | The event that triggered claim reprocessing, such as supplier contract amend, or benefit plan component amend. |
| Type | The type of trigger. |
| Name/ID | The associated name, such as the benefit plan name, supplier contract name, etc. |
| Total Impact Amount | The total net impact on the claim, the positive or negative financial impact of all claim lines <i>after</i> reprocessing. |
| Date | The date of the triggering event. |
| Owner | The owner/user of the triggering event. An owner is set when a user selects a triggering event row from the bottom section of the screen. |
| Before Allowed | The allowed amount on the claim before the triggering event. |
| After Allowed | The allowed amount on the claim after the triggering event. |

| Field/Command | Description |
|--|--|
| Net Allowed | The net allowed amount after reprocessing. |
| Before Paid | The paid amount on the claim before the triggering event. |
| After Paid | The paid amount on the claim after the triggering event. |
| Net Paid | The net paid amount after reprocessing. |
| Before Member Responsibility | The member responsibility amount on the claim before the triggering event. |
| After Member Responsibility | The member responsibility amount on the claim after reprocessing. |
| Net Member Responsibility | The net member responsibility amount after reprocessing. |
| Additional Columns from Column Chooser | |
| Capitated Service | A check in this checkbox indicates the processing impacts a capitated service. |
| CVC ID | Transaction ID. |
| State | The current transaction state. |

Claim Line Fields: Financial Impact and/or Reporting Only Impact

This table indicates when a particular claim line field has changed, whether there is a financial and reporting impact or a reporting only impact.

| Field/Value | Has Financial and/or Reporting Only Impact? |
|---|---|
| Claim Status | Financial and Reporting impact |
| Member Account (e.g., Member Changes from one sub account to another) | Financial and Reporting impact |
| Status | Financial and Reporting impact |
| Split | Reporting only |
| Authorization (Service Auth # matched) | Reporting only |
| Agreement (Service Auth Agreement matched) | Reporting only |
| Base Benefit Plan | Financial and Reporting impact |
| Wrap Around Benefit Plan(s) | Financial and Reporting impact |

| Field/Value | Has Financial and/or Reporting Only Impact? |
|---|---|
| Then for each plan (base or wrap(s)) the following: | |
| Contracted | Reporting only |
| Nonpar | Reporting only |
| Authorization Required | Reporting only |
| Tier Name | Financial and Reporting impact |
| Benefit Delivery Tier | Financial and Reporting impact |
| Benefit Name | Financial and Reporting impact |
| Supplier Contract | Financial and Reporting impact |
| HCC Amount | Financial and Reporting impact |
| Paid Amount | Financial and Reporting impact |
| Allowed Amount | Financial and Reporting impact |
| Member Care Reserve Used | Financial and Reporting impact |
| Copay | Financial and Reporting impact |
| Coinsurance | Financial and Reporting impact |
| Deductible | Financial and Reporting impact |
| Member Responsibility | Financial and Reporting impact |
| Member Penalty | Financial and Reporting impact |
| Capped Non Covered (Capped Allowed Member Excess) | Financial and Reporting impact |
| Amount Pre-Lesser Than (PreCapAmount) | Financial and Reporting impact |
| Non Covered (Non Covered member Excess) | Financial and Reporting impact |
| Balance Billed (Balance Bill Member Excess) | Financial and Reporting impact |
| Member Paid Amount | Financial and Reporting impact |
| Member Account (e.g., FSA) | Financial and Reporting impact |
| Provider Penalty | Financial and Reporting impact |
| Other Discount | Financial and Reporting impact |
| Reference fee | Financial and Reporting impact, but only if funding based on reference fee. If funding is not based on reference fee, reporting only. |

| Field/Value | Has Financial and/or Reporting Only Impact? |
|--|---|
| Repricer Admin Charges | Financial and Reporting impact |
| Repricer Payment Charges | Financial and Reporting impact |
| Responsible Party | Financial and Reporting impact |
| Review or Repair Exception | Financial and Reporting impact |
| HCC COB Savings | Reporting only |
| Member COB Savings | Reporting only |
| Benefit Label | Reporting only |
| System Messages (Includes Denial Reason) | Reporting only |

Filtering Trigger Events/Claims in the Workbasket

If there are many triggering events and claims in the Reprocessed Claims workbasket, you can take steps to limit which ones you want to work with. For example, you may want to reprocess claims for a specific supplier.

There are several ways to limit the claims that are sent to the Reprocessed Claims workbasket (see ["Claim Reprocessing Overview" on page 1-28](#)).

Follow these steps:

1. Open the Reprocessed Claims workbasket.
2. In the lower portion of the page, select a trigger status from the Trigger Status drop-down list.

For example, selecting Needs Review will display all triggering events with a status of Needs Review.
3. If applicable, complete any of the other filters; Supplier ID, Supplier Name, Member ID, Member Last/First Name, Payment Transaction No. to limit the events you want to work with.
4. Click **Refresh**. (You can also press the [Enter] key which has the same effect as clicking Refresh.)

The events listed in the bottom of the page are filtered according to your criteria.

Chapter 4: Claims Workbaskets

The screenshot displays the 'Claims' tab in the 'hcc_admin' application. At the top, there is a navigation bar with buttons for 'Close', 'Approve All', 'Reject All', 'Clear All', 'Submit', and a 'Filter By' dropdown. A 'Claim Source' dropdown is set to '(All)'. To the right, there are checkboxes for 'Hide previously approved/rejected claims' and 'Ready to reprocess', along with an 'Export Claims' button.

Below the navigation bar is a table of claims. The first row shows a claim with ID 710417532, dated 1/31/2017, with a status of 'SCCF: 7632025039840'. It has 1 line and 1 line changed. The claim source is 'BlueCard Host Ready To Create SF'. The patient is 'Lewis Demarco's Practice' with ID 570633047 and host plan code 763. The impact is 'Financial'. The 'Before Amounts' are \$200.00, and the 'After Amounts' are \$0.00, resulting in a 'Net' of (\$200.00).

Below the main table is a summary table with columns: Trigger, Type, Name/ID, Total Impact Amount, Date, Owner, Before Allowed, After Allowed, Net Allowed, and Before F. The first row shows a 'Supplier contract amend' with a total impact of (\$200.00) on 02/07/2025 at 5:48 AM, owned by 'hcc_admin'. The second row shows a 'Benefit plan component amend' with a total impact of (\$35.00) on 02/04/2025 at 7:11 AM. The third row shows another 'Benefit plan component amend' with a total impact of \$5.00 on 02/04/2025 at 7:24 AM.

5. Select a triggering event to work with.

The claims that are reprocessing candidates as a result of the triggering event are listed in the upper portion of the page.

6. To exclude claims which have been previously approved or rejected, select the "Hide previously approved/rejected claims" checkbox.

7. To limit the claims displayed associated with a specific member or supplier, use the Filter By fields at the top of the page. In the first drop-down list box, select Member or Supplier. In the second drop-down list box, select "all" or select the specific member or supplier name. Only claims specific to your selection are displayed.

Previewing the Results of a Reprocessed Claim

You have the ability, before approving a claim for reprocessing, to *preview* detailed claim information, including claim line information as it will appear after reprocessing.

Follow these steps:

- 1. In the Reprocessed Claims workbook, select the trigger event with which you want to work.

The claims that are candidates for reprocessing are displayed in the upper portion of the page

Line details are only included for lines which reprocessing would change.

The line detail includes useful information, such as the associated benefit plan, service date, service/revenue codes, and before, after, and net amounts so you can see the impact of reprocessing on the claim line(s).

- Click the minimize control [-] to close the claim line detail.
- To display a preview of the claim on the Claim View page, click the linked Claim ID.

The Claim View page is displayed. Here you can scroll through the Claim to view information as it would appear on the claim *after* processing.

Supplier Invoice Repair Workbasket

Providers can make corrections to previously submitted claims by submitting a new 837 with the same Claim Number and a frequency of 7 (replace) or 8 (void). If a matching claim number exists in HealthRules Payer, a new version of the claim is created that is replaced/voided. The "HCC Operating" Provision, "Load Unmatched Void and Replace Supplier Invoices" gives health plans the option to reject or load the claim submissions that either fails to match to an existing claim or that does match, but the existing claim is open for edit. When the provision is set to "True," the 837 is loaded as a supplier invoice and is available in the Supplier Invoice Repair Workbasket for manual processing, where you can remove the supplier invoice using one of the following four methods:

- **Submit:** If a claim number now exists in HealthRules Payer, you can click **Submit** to resubmit the supplier invoice. The existing claim will now be replaced/voided based on the supplier invoice from the Supplier Invoice Repair workbasket.

NOTE For instances, where the claim existed in HealthRules Payer, but was open for edit, the Matched checkbox will be selected. If the original claim was received after the replace/void, the Match checkbox will not be selected, but the **Submit** button will be available.

- **Reject:** When you click **Reject**, a new claim will be created with "Rejected" status.
- **Match Claim:** You can manually search and select an existing claim in HealthRules Payer to be replaced/voided by the supplier invoice from the Supplier Invoice Repair workbasket.
- **Create Claim:** For replacements only, you can select to create a new claim in HealthRules Payer.

NOTE You can only replace a claim with the same claim type. For example, an institutional claim can only be replaced with an institutional claim or a professional claim with a professional claim, otherwise, upon submitting the replacement claim, the "Claim type does not match" error is displayed. When a new replacement claim type does not match the original claim type, the **Claim Type Mismatch** checkbox is selected under the Claim Type Mismatch column.

The Supplier Invoice Repair Workbasket supports both BlueCard Host claims processing (including "local" claim processing), and claim processing for non-BlueCard implementation (see the *HealthRules Payer BlueCard Guide*).

For "Load Unmatched Void and Replace Supplier Invoices" provision, see the *HealthRules Designer Guide, Vol. 4: Operating Provisions Reference*.

Chapter 4: Claims Workbaskets

For more information about working with Supplier Invoice Repair Workbasket, see the following tasks:

- [Access the Supplier Invoice Repair Workbasket](#)
- [Match and Assign Claims from the Supplier Invoice Repair Workbasket](#)
- [Create New Claim for a Replacement Claim Request](#)
- [Assign or Take Ownership of Supplier Invoice Record](#)
- [Workbasket Assignment Rules](#)

Access the Supplier Invoice Repair Workbasket

You can access the Supplier Invoice Repair Workbasket using one of the following methods:

- Workbasket menu > Supplier Invoice Repair
- Toolbar > **Workbasket** icon > Supplier Invoice Repair
- Workbasket page > View menu > Supplier Invoice Repair

The screenshot displays the 'Supplier Invoice Repair Workbasket' interface. At the top, there's a menu bar with 'File' and 'View'. Below it, a toolbar contains buttons for 'Close', 'Add Comment', 'Open for Edit', 'Submit', and 'Reject'. The main form area is divided into several sections for data entry:

- Professional** tab: Includes fields for 'CLAIM NUMBER' (213), 'DATE RECEIVED' (10/15/2024), 'CLEAN CLAIM DATE' (10/15/2024), 'SCAN CODE', 'SUBMITTER' (Provider), 'CLEARINGHOUSE #', 'REFERENCE #' (S212045736), and 'BENEFIT PLAN TYPE'.
- Insurance Type** section: Includes 'INSURANCE TYPE', 'ID PREFIX', and 'INSURED'S I.D. NUMBER' (816892496).
- Patient Information** section: Includes 'PATIENT'S NAME (Last, First, Middle Initial)' (Mai, Nicholas), 'BIRTH DATE' (01/01/1950), 'SEX' (Male), 'INSURED'S NAME (Last, First, Middle Initial)' (Mai, Nicholas), 'PATIENT'S ADDRESS (No., Street)' (3217 Brookbridge Rd), 'INSURED'S ADDRESS (NO., STREET)' (3217 Brookbridge Rd), 'CITY' (Virginia Beach), 'STATE' (VA), 'ZIP CODE' (2346), 'COUNTRY' (UNITED STATES), 'TELEPHONE', 'PATIENT STATUS', and 'EMPLOYMENT STATUS'.
- Claim Source** section: Includes 'CLAIM PAYOR' (Internal), 'CLAIM SOURCE', 'EXTERNAL BATCH #', 'EXT. BATCH SEQ. #', 'TRADING PARTNER ID', and 'EXTERNAL CLAIM #'.

Below the form, there's a toolbar with buttons for 'Refresh', 'Clear Inputs', 'Take Ownership', 'Assign', 'Unassign', 'Multi Assign', 'Match Claim', 'Create Claim', 'View Rules', 'Edit Rules', and 'Export'. Below this, there's a table with columns: Claim ID, Claim Type, Date Entered, Frequency Code, Encounter Claim, Matched, Claim Type Mismatch, Claim Source, Owner, Group Name, and Reason. The table contains several rows of data, with the first row (Claim ID 212) highlighted in blue.

| Claim ID | Claim Type | Date Entered | Frequency Code | Encounter Claim | Matched | Claim Type Mismatch | Claim Source | Owner | Group Name | Reason |

| 228 | Professional | 10/15/2024 | 7 | ☐ | ☐ | ☐ | | | hcc_super_user | Unmatched Void or Rep... |

Match and Assign Claims from the Supplier Invoice Repair Workbasket

To match an incoming void/replace claim request from the provider with the existing claim to be voided/replaced, do the following:

- 1. Select the incoming void/replace claim request (Frequency code Void '7'/Replace'8') and click **Match Claim**. The Supplier Invoice Wizard opens, and the Match Claim Invoice Based on Criteria page is displayed.

4. Select a relevant Denial/Replacement Reason and an Assign Reason from the respective drop-down lists and click **Next**. The Completing the Wizard page is displayed.

You can also add comments in the relevant comments fields.

NOTE The **Next** button for the page is enabled only when you select a reason for denying/replacing the claim. If you are rejecting an incoming void claim request than this page will display Denial reason options.

5. Verify the claim details and click **Finish**. The selected claim is replaced with the incoming replace claim request.

If you want to make changes to the displayed details, click **Back** or the **Back** icon from top left of the page.

Create New Claim for a Replacement Claim Request

To create a new claim/delegated encounter for an incoming replacement claim/delegated encounter request from the provider that do not match with an existing claim, do the following:

- 1. Select the incoming replacement claim/delegated encounter request (Frequency code '7') and click **Create Claim**. The Create New Claim dialog is displayed.

Create New Claim

Create

Cancel

New Claim ID

Create Reason

Create new claim from replacement

Comment

<Enter comment>

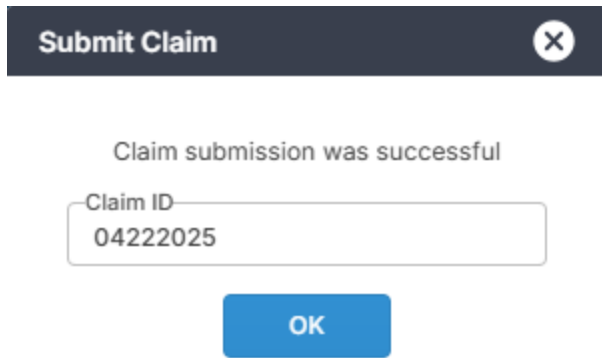

0 / 900

- 2. Enter a unique claim ID in the New Claim ID field and select a relevant create claim reason from the Create Reason drop-down list. Then click **Create**.

You can also add comments in the Comments field.

NOTE If you do not wish to enter a claim ID then select a Create Reason and click **Create**. A new claim/delegated encounter will be created with a system generated claim ID.

A message for successful claim submission is displayed and a new claim/delegated encounter is created.

3. Click **OK** to close the dialog.

You can search and view the normal claim/delegated encounter created from the Search Claim page.

Assign or Take Ownership of Supplier Invoice Record

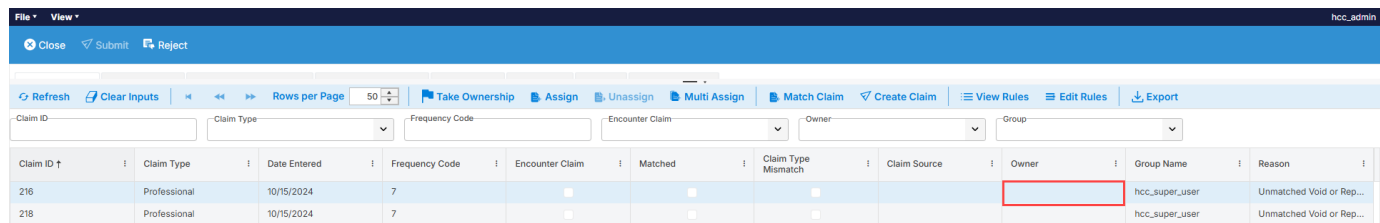

There are several command buttons on the search results toolbar that allow you to:

- take ownership of a supplier invoice,
- assign ownership of a supplier invoice, including moving ownership from one user or user group to another user or user group,
- use the multi-assign tool to assign multiple supplier invoice to users or groups of users,
- unassigned a user or user group from a supplier invoice record.

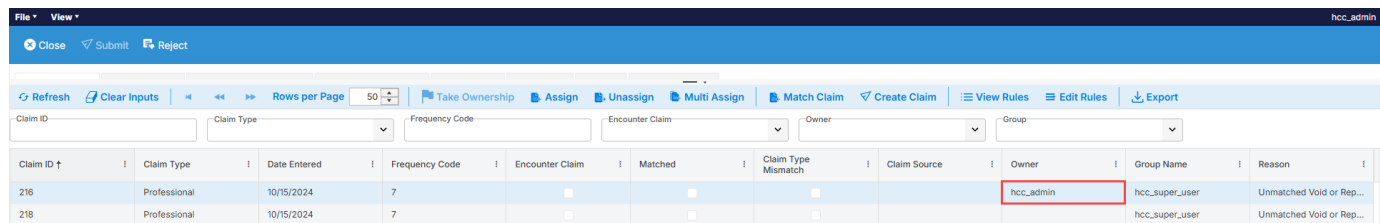

Take Ownership of a Supplier Invoice Record

To take ownership of a supplier invoice record, follow these steps:

- 1. Highlight the supplier invoice you want to work with.

- 2. Click **Take Ownership** on the toolbar.

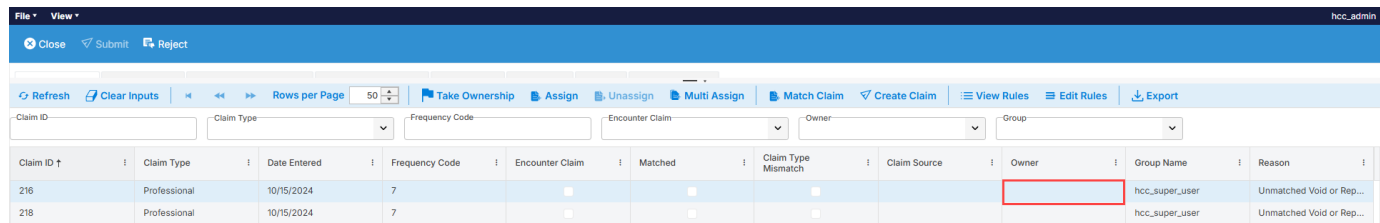

Notice that the user ID (user ID of current user) is now displayed in the Owner column.

Assign a Supplier Invoice to Another User

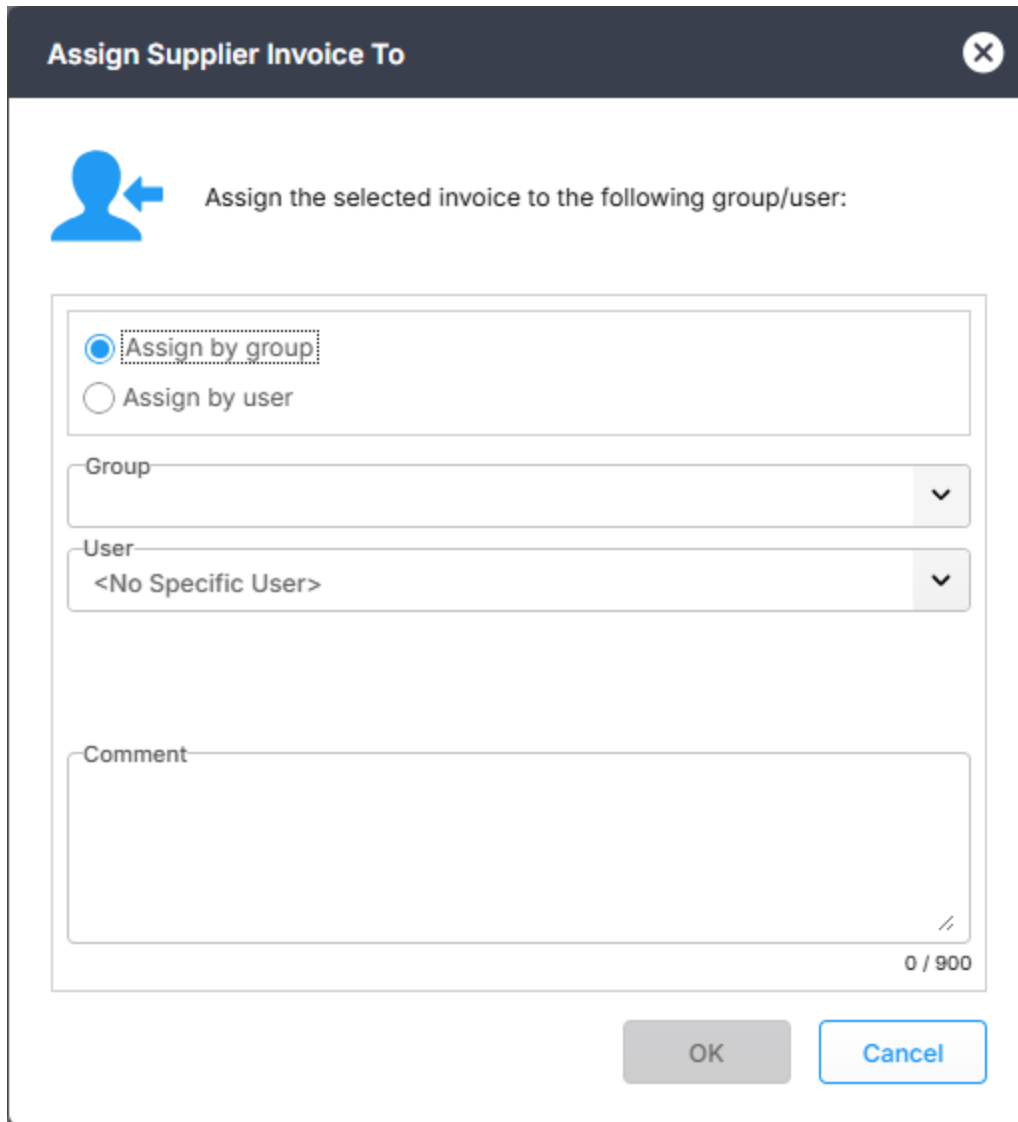

To assign a supplier invoice to another user:

- 1. Highlight the supplier invoice you want to work with.

- 2. Click **Assign**.

The Assign Supplier Invoice To dialog is displayed.

The dialog box is titled "Assign Supplier Invoice To" with a close button (X) in the top right corner. Below the title bar, there is a blue person icon with a left-pointing arrow. To the right of the icon, the text reads "Assign the selected invoice to the following group/user:". Below this, there are two radio buttons: "Assign by group" (which is selected) and "Assign by user". Under the "Assign by group" section, there is a "Group" dropdown menu. Under the "Assign by user" section, there is a "User" dropdown menu currently showing "<No Specific User>". Below these dropdowns is a large text area labeled "Comment" with a character count "0 / 900" at the bottom right. At the bottom of the dialog, there are two buttons: "OK" and "Cancel".

3. Use the radio button to assign the supplier invoice to a user group or a user, then select the group and/or user from the respective drop-down lists. Enter any comments you want.
4. Click **OK** to save your work.

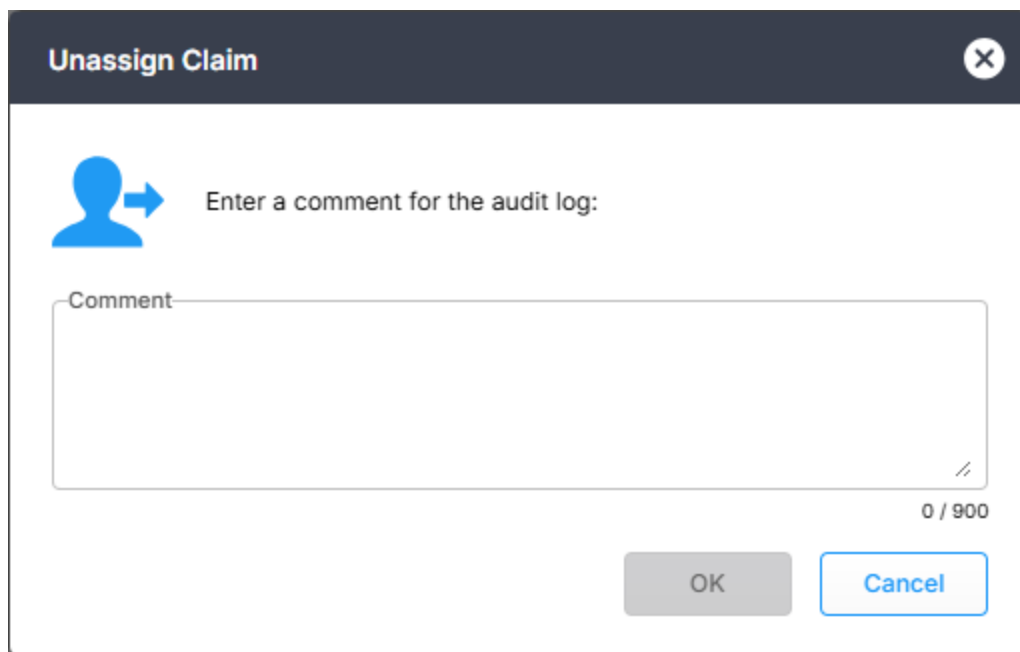

The claim is assigned to the specified group and/or user.

Unassign a User

To unassign a user from a claim:

1. Highlight the supplier invoice you want to work with.
2. Click **Unassign**.

The Unassign Claim dialog is displayed.

The image shows a software dialog box titled "Unassign Claim" with a close button (X) in the top right corner. Inside the dialog, there is a blue icon of a person with an arrow pointing to the right, followed by the text "Enter a comment for the audit log:". Below this is a large text input field with the placeholder text "Comment". At the bottom right of the input field, it says "0 / 900". At the bottom of the dialog, there are two buttons: "OK" and "Cancel".

3. Enter a comment (required) that describes why you are removing the claim from assignment to the user.

This comment will be included on the Audit Log.

4. Click **OK** to save your work.

Multi-Assign Supplier Invoice

The Multi-assign supplier invoice tool allows you to select multiple supplier invoice and either assign or unassign them all at once.

To multi-assign supplier invoice:

1. On the Supplier Invoice Repair Workbasket page, click **Multi Assign**.

The Workbasket Multi Assignment page is displayed.

Workbasket Multi Assignment - hcc_admin

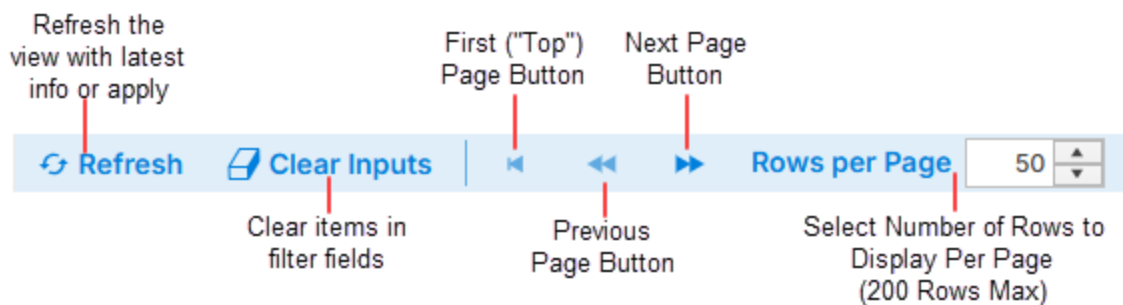

Select record(s) in the list below, and then click Assign or Unassign.

Refresh Clear Inputs Rows per Page 50 Select All Assign Unassign Close

2. If applicable, use the paging commands to determine the number of claims displayed on a page.

3. Optionally, use the search filters and click **Refresh** to display just the supplier invoice you want to work with. You can click **Clear** to remove all entries in the filter fields.

4. Select multiple supplier invoices. For example, click on a beginning supplier invoice in a range, then hold down the [Shift] key and click your mouse on the ending supplier invoice in the range. Or to select multiple, individual supplier invoices, click on the first supplier invoice, hold down the [Ctrl] key, and click all the other individual supplier invoice to select the ones you want.
5. When the supplier invoices you want are highlighted (selected), click either the **Assign** button to assign them to a group and/or user and go to step 6. If you click the **Unassign**, user assignments are removed from the selected supplier invoices.
6. On the Assign to supplier invoice dialog, specify the user or group to which you want to assign the selected supplier invoices. Optionally, enter a descriptive message in the Comments field. This message will be displayed in the Audit Log for every claim you have selected for reassignment.

Supplier Invoice Workbasket Assignment Rules Page

You can use the Workbasket Assignment Rules page to configure rules by which the system automatically assigns records to specified groups. The page includes the list of assignment rules, a rule definition editor, the audit log, and a list of rule validation errors (if applicable).

To open the page, on the Supplier Invoice Repair Workbasket screen, click the **Edit Rules** button on the Document toolbar.

Rules Toolbar

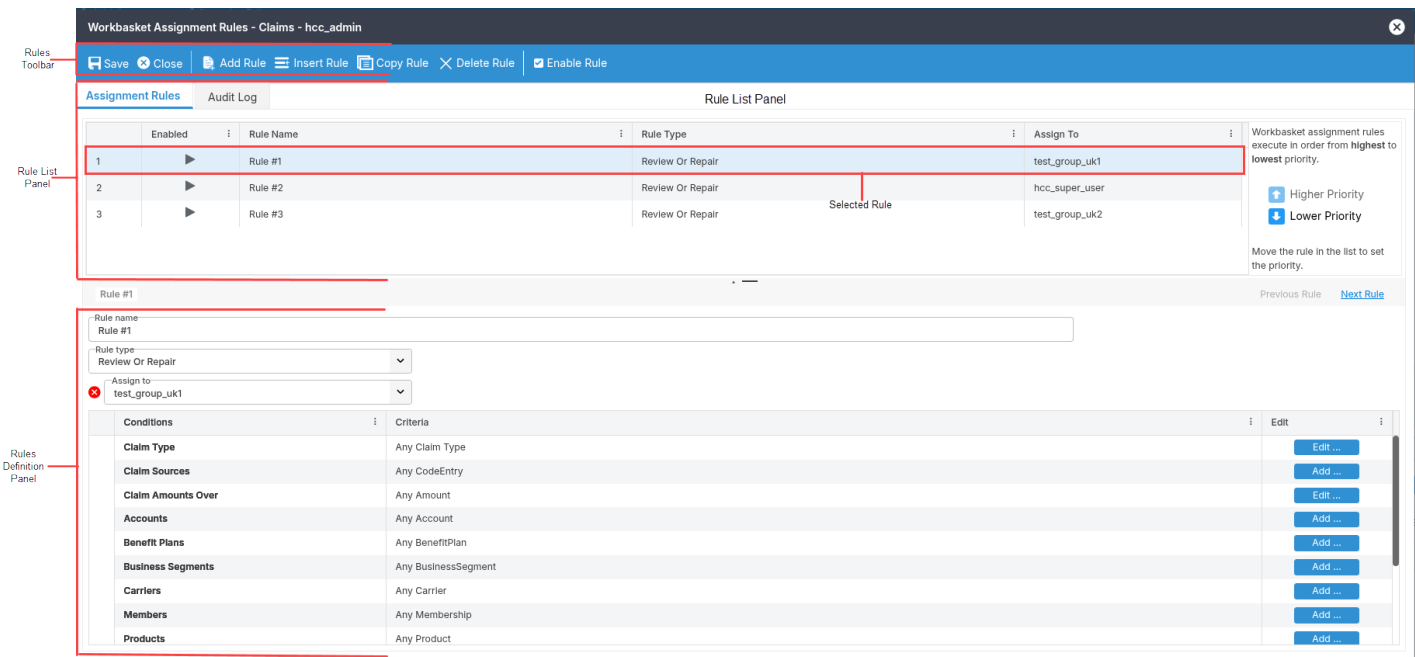

The Rules toolbar provides actions for managing assignment rules.

| Action | Description |
|------------------------|---|
| Save | Saves the rule list you are currently viewing. When you save the list, the system prompts you for a reason and comment (optional), which gets added to the audit log.

An attempt to save a rule list containing an invalid rule produces an error message. |
| Close | Closes Workbasket Assignment Rules page. |
| Add Rule | Adds rule to bottom of rule list, and loads new rule in Rule Editor. |
| Insert Rule | Add rule above rule currently selected in rule list, and load new rule in Rule Editor. |
| Copy Rule | Inserts a copy of the selected rule below the current selection, and displays the details in the Rule Editor. |
| Delete Rule | Delete rule currently selected in rule list. |
| Enable Rule | If the Enable checkbox is selected, the currently selected rule is active. If the Enable checkbox is deselected, the currently selected rule is inactive. |
| Higher Priority | The selected rule is moved UP if it has a higher priority. |
| Lower Priority | The selected rule is moved DOWN if it has a lower priority. |

Assignment Rules Tab

You can use the Assignment Rules tab to view and edit rules. It consists of two components: the rule list pane and the rule definition pane.

Rule List Pane

The Rule List pane contains the list of rules for automatically assigning workbasket records, and a control for positioning rules in the list. The system applies rules in the order in which they appear in the list (that is, rule #1 is applied before rule #3). In other words, the further up in the list a rule appears, the higher priority it is given. Once a record meets a given rule’s criteria, it will not be evaluated by subsequent rules.

Rule Definition Pane

The Rule Definition pane contains building blocks for defining assignment rules. The pane contains the currently selected rule in the rule list. You can specify the rule name, choose the group or user assignment, choose the rule type (that is, for records in Repair only, Review only, or either Repair or Review), and add/edit criteria for rule conditions.

Audit Log Tab

The Audit Log tab shows a history of actions performed on the rule list. Typically, this tab includes the user, date of action, action (create, amend, etc.), effective date, reason for the entry (rule added, rule order change, rule edited, etc.) and any comment entered when the rule list was successfully saved.

Validation Errors Tab

The Validation Errors tab shows any errors encountered (such as not specifying an assignment action) when trying to save the rule list. To save a rule list, all validation errors must first be corrected.
